Althusser and Law is the first book specifically dedicated to the place of law in Louis Althusser's philosophy. The growing importance of Althusser's philosophy in contemporary debates on the left has - for practical and political, as well theoretical reasons - made a sustained consideration of his conception of law more necessary than ever. As a form of what Althusser called 'Ideological

Is Althusser still useful in helping us to understand these struggles? Does he have something to teach us about how law is produced, and how it is used and misused? This collection demonstrates that Althusser's ideas about law are more important, and more

On September 11, 2001, journalist Tom Flynn set off on his bike toward the World Trade Towers not knowing what he was riding into. Bikeman is one man's journey back to the horrors of that day and to the humanity that somehow emerged from the dust and the death. Both heartbreaking and haunting, his words will stay with you like that 'forever September morning.'"

I move on at peace. Modeled on Dante's Inferno, veteran journalist Thomas Flynn's Bikeman chronicles the morning of September 11, 2001 like no other published work. and point his bike's handlebars in the direction of the north tower.

His story continues as he transitions from reporter to participant hoping to survive the fall of the south tower. Now Flynn, as both journalist and now survivor, must come to terms with the harrowing ordeal and somehow find peace in the very act of surviving. Part journalist's record, part survivor's eulogy, Flynn writes: Survival is the absence of death. It is a subdued, a hushed existence. . . I live to talk about it, to relate the tale as it happens, not only its extremities and cruelty, but also the goodness that flourishes too.

In this thought-provoking and lyrical debut novel, a young woman's only hope for survival in the dystopian future is a ship, a Noah's Ark, that can rescue 500 people. London burned for three weeks. And then it got worse. . . Young, naive, and frustratingly sheltered, Lalla has grown up in near-isolation in her parents' apartment, sheltered from the chaos of their collapsed civilization.

On her sixteenth birthday, Lalla's father decides it's time to use their escape route -- a ship he's built that is only big enough to save five hundred people. But the utopia her father has created isn't everything it appears. There's more food than anyone can eat, but nothing grows; more clothes than anyone can wear, but no way to mend them; and no-one can tell her where they are going.

In April 1948, the 11-year-old Appalachian Trail from Maine to Georgia was pretty much a wreck: Volunteer maintainers who hadn't been called to combat couldn't get rationed gasoline to get out there to keep it clear.

In April 1948, so, pretty much, was Earl Shaffer, self-dubbed The Crazy One. He had come home from war in the Pacific where he had lost the dearest friend of his life. He needed to walk it off, and he did with the most primitive of gear. In four months, he walked with the merging spring from Georgia to Maine, bushwhacking to find the

These reflections on and from his first of three thru-hikes are often lyrical, full of history and local legend and his own quiet insights on life in the woods in a much different era all around.
