

Identiteit Paul Verhaeghe

In this blazingly smart and voracious debut novel, an artist turned stay-at-home mom becomes convinced she’s turning into a dog.
• “A must-read for anyone who can’t get enough of the ever-blurring line between the psychological and supernatural that Yellowjackets exemplifies.”—Vulture
One day, the mother was a mother, but then one night, she was quite suddenly something else… An ambitious mother puts her art career on hold to stay at home with her newborn son, but the experience does not match her imagination. Two years later, she steps into the bathroom for a break from her toddler’s demands, only to discover a dense patch of hair on the back of her neck. In the mirror, her canines suddenly look sharper than she remembers. Her husband, who travels for work five days a week, casually dismisses her fears from faraway hotel rooms. As the mother’s symptoms intensify, and her temptation to give in to her new dog impulses peak, she struggles to keep her alter-canine-identity secret. Seeking a cure at the library, she discovers the mysterious academic tome which becomes her bible, A Field Guide to Magical Women: A Mythical Ethnography, and meets a group of mommies involved in a multilevel-marketing scheme who may also be more than what they seem. An outrageously original novel of ideas about art, power, and womanhood wrapped in a satirical fairy tale, Nighthitch will make you want to howl in laughter and recognition. And you should. You should howl as much as you want.

Recent research indicates that depression, once believed to be relatively benign, is highly recurrent and does not respond well to treatment. The goal of this book is to facilitate the development of more encompassing theories and more effective treatments for this disabling disorder by fostering dialogue and enhancing the integration of work across the boundaries of separate fields.

In this devastatingly witty new book, Carl Cederström traces our present-day conception of happiness from its roots in early-twentieth-century European psychiatry, to the Beat generation, to Ronald Reagan and Donald Trump. He argues that happiness is now defined by a desire to be “authentic,” to experience physical pleasure, and to cultivate a quirky individuality. But over the last fifty years, these once-revolutionary ideas have been co-opted by corporations and advertisers, pushing us to live lives that are increasingly unfulfilling, insecure and narcissistic. In an age of increasing austerity and social division, Cederström argues that a radical new dream of happiness is gathering pace. There is a vision of the good life which promotes deeper engagement with the world and our place within it, over the individualism and hedonism of previous generations.

Guided by this more egalitarian worldview, we can reinvent ourselves and our societies.

This book discusses what Jacques Lacan's oeuvre contributes to our understanding of psychosis. Presenting a close reading of original texts, Stijn Vanheule proposes that Lacan's work on psychosis can best be framed in terms of four broad periods.

What About Me?

This volume aims to provide new ways of thinking about population trends in the 21st century. While the 20th century was the century of population growth, with the world’s population increasing from 1.6 to 6.1 billion, this book shows that the 21st centur

The term ‘psychoanalytical process’, though occurring but rarely in Freud’s works, has become firmly established nowadays despite being hard to define, explain, or pin down in conceptual or meta-psychological terms. Although it is often employed as equivalent to ‘psychoanalytic work’, currents of thought that draw on

the idea display a certain ambivalence, for it can relate both to a theory of treatment (the practice of analysis) and to a theory of mind (a theory of psychic functioning). Before developing his own original perspectives about the consequences of the heterogeneity of psychic functioning, the author examines how various practitioners have approached this subject since Freud. He shows how each has shed useful new light on this issue, leading to a diversity of points of view, thereby justifying the idea of the ‘process’ within psychoanalytic treatment.

Ben je een lichaam of heb je een lichaam? Volgens Paul Verhaeghe berust intimiteit in de eerste plaats op de relatie met jezelf en pas daarna op een relatie met anderen. De verhouding tot ons eigen lichaam legt niet alleen de basis voor intimiteit, maar ook voor onze mentale en lichamelijke gezondheid. Vandaag de dag wordt die verhouding helaas gekenmerkt door schaamte, veroorzaakt door de overtuiging dat we nooit moer in onze gezondheid zijn. In intimiteit laat Verhaeghe zien dat onze tijd dringend behoefte heeft aan een nieuwe vorm van zelfzorg. Een waarin we meer samenvallen met onszelf. Hij rekent af met de klassieke verdeling tussen lichaam en geest zodat we op een andere manier naar het zelf en de wereld kunnen kijken. Met zijn doordachte pleidooi voor intimiteit zet Paul Verhaeghe de lezer aan het denken over zichzelf en over de ander.

A comprehensive examination of Lacan's seminar on ethics.

The 7-Step System to Awaken Your Spirit, Heal Your Body, and Live Your Best Life

Says Who?

When It Is Darkest

Being skinning illustrated and hauntingly written, Tales from Outer Suburbia is by turns hilarious and poignant, perceptive and goofy. Through a series of captivating and sophisticated illustrated stories, Tan explores the precious strangeness of our existence. He gives us a portrait of modern suburban existence filtered through a wickedly Monty Pythonesque lens. Whether it’s discovering that the world really does stop at the end of the city’s s map book, or a family’s lesson in tolerance through an alien cultural exchange student, Tan’s deft, sweet social satire brings us face-to-face with the humor and absurdity of modern life.

'Tis two score years since Carroll's art!With topsy-turvy magic.Sent Alice wondering through a part!Half-comic and half-tragic.Enchanting Albeit black-and-white!Has made your deeds perennial!And naught save "Chaos and old Night!"Can part you now from Tenniel!But still you are a Type, and baselidn Truth, like Lear and Hamlet!And Types may be re-draped to tasteln cloth-of-gold or camelot.

'Read this incredible book. I wpt and I learnt' - Prof Tanya Byron 'This book comes from the heart' - Roman Kemp 'Compassionate, personal and thought-provoking' - Prof Steve Peters When you are faced with the unthinkable, this is the book you can turn to. Suicide is baffling and devastating in equal measures, and it can affect any one of us: one person dies by suicide every 40 seconds. Yet despite the scale of the devastation, for family members and friends, suicide is still poorly understood. Drawing on decades of work in the field of suicide prevention and research, and having been bereaved by suicide twice, Professor O'Connor is here to help. This book will untangle the complex reasons behind suicide and dispel any unhelpful myths. For those trying to help someone vulnerable, it will provide indispensable advice on communication, stressing the importance of listening to fears and anxieties without judgment. And for those who are struggling to get through the tragedy of suicide, it will help you find strength in the darkest of places.

The relationship between feminism and the biological sciences has always been particularly tense and hostile. Feminists have been inclined not to trust what scientists had to say about the sexes, with science often being pronounced a Whitey, male enterprise O But why should feminism and the biological sciences remain at odds? And what might be gained from a reconciliation? In Who's Afraid of Charles Darwin? Griet Vandermassen shows that, rather than continuing this enmity, feminism and the biological sciences, and in particular evolutionary psychology, have the potential and the need to become powerful allies. Properly understood, the Darwinian perspective proposed in this volume will become essential to tackling the major issues in feminism.

“For those ready and willing to build a new life, here are the tools. Powerful, incisive, extraordinary writing.”—Neale Donald Walsch, *New York Times* bestselling author of *Conversations with God Transform your life with this bestselling, revolutionary, and accessible seven-step guide—grounded in energy medicine, neurobiology, and quantum physics—to awaken your true health and potential through energy healing. Eighteen years ago, health pioneer and “extraordinary enlightened visionary” (Anita Moorjian, New York Times bestselling author) Dr. Sue Morter had a remarkable and profound awakening. While meditating, she spontaneously accessed an energy field—a level of consciousness—beyond anything she had ever imagined. This dramatic experience changed her life and set her on a mission to discover how to create such radical transformation for her patients. Through years of advanced study and research in energy healing and medicine, she developed the Energy Codes. This life-altering program has now enabled thousands of people around the world to overcome pain, disease, fatigue, anxiety, and depression, and to awaken their innate creativity, intuition, and inner power. Bridging ancient healing practices with cutting-edge science, The Energy Codes offers a detailed road map to help you experience deep healing in your life. Grounded in practical, accessible exercises, including yoga, breathwork, meditations, and Dr. Morter’s proprietary Bio-Energetic Synchronization Technique (BEST) protocol, The Energy Codes “offers deep insights...that brilliantly merge the ever-blending worlds of science and spirituality to help reveal the truth of our being and the depths of our greatness.”*

(Jack Canfield, author of the Chicken Soup for the Soul series).
Redmond O’Hanlon is known as an amiable anti-hero – the debunker of classical exploration literature – and here on this joint road trip with journalist Rudi Rotthier, O’Hanlon visits places from his dark childhood. With a fine sense of the comic and beautifully rendered observations of the people they encounter, Rotthier excels in painting a portrait of this English author as he details the escapades of their journey. O’Hanlon provides a stream of jokey anecdotes which offset the bleakness of almost all his memories as do their conversations on God, Darwin and nature. Plagued by depression and scarred by his childhood and sadistic teachers, O’Hanlon drinks excessively, pouts caffeine and nicotine pills. One of his most important possessions is a jar containing some of the charred remains of a close friend who committed suicide. In his house in Oxfordshire piles of books have spilled over tables and shelves and tottering mounds of dirty crockery obscure the sink. Yet, unlikely as it may seem, this is a remarkably light-hearted, sensitive and funny book.

This collection is the first extended interrogation in any language of Jacques Lacan's Seminar XVII. Originally delivered just after the Paris uprisings of May 1968, Seminar XVII marked a turning point in Lacan's thought; it was both a step forward in the psychoanalytic debates and an important contribution to social and political issues.

Collecting important analyses by many of the major Lacanian theorists and practitioners, this anthology is at once an introduction, critique, and extension of Lacan's influential ideas. The contributors examine Lacan's theory of the four discourses, his critique of the Oedipus complex and the superego, the role of primal affects in political life, and his prophetic grasp of twenty-first-century developments. They take up these issues in detail, illuminating the Lacanian concepts with in-depth discussions of shame and guilt, literature and intimacy, femininity, perversion, authority and revolt, and the discourse of marketing and political rhetoric. Topics of more specific psychoanalytic interest include the role of objet a, philosophy and psychoanalysis, the status of knowledge, and the relation between psychoanalytic practices and the modern university. Contributors: Geoff Boucher, Marie-Hélène Brousse, Justin Clemens, Mladen Dolar, Oliver Feltham, Russell Grigg, Pierre-Gilles Guéguen, Dominique Heça, Dominiek Hoens, Eric Laurent, Juliet Flower-Creswell, Jacques-Alain Miller, Ellis Ragland, Matthew Sharpe, Paul Verhaeghe, Slavoj Žižek, Alenka Zupančič
Since its first publication over twenty years ago, Images of Organization has become a classic in the canon of management literature. The book is based on a very simple premise—that all theories of organization and management are based on implicit images or metaphors that stretch our imagination in a way that can create powerful insights, but at the risk of distortion. Gareth Morgan provides a rich and comprehensive resource for exploring the complexity of modern organizations internationally, translating leading-edge theory into leading-edge practice.

This book offers a practitioner's guide to evidence-based practice in working with psychotic patients in an outpatient setting by clinicians and scholars who are internationally recognized for their work in treating severe psychopathology. Topics cover conceptual, technical, and practical considerations in the parameters of working with adult and adolescent populations that exhibit thought disorder, delusions, hallucinations, borderline organizations, trauma, and schizoid phenomena. Different theoretical models are presented from psychoanalytic traditions that introduce the student and practitioner to eclectic ways of conceptualizing and treating these challenging clinical groups. Concrete approaches to establishing a proper treatment environment, working alliance, symptom management, managing countertransference, and facilitating a therapeutic framework are provided. Various psychodynamic techniques are demonstrated by master clinicians through the extensive use of clinical case material culled from outpatient settings that illustrate how psychoanalytic perspectives enrich our understanding of the psychotic spectrum and lead to therapeutic efficacy.

In this provocative and timely book, Richard Sennett examines the forces that erode respect in modern society. Respect can be gained by attaining success, by developing talents, through financial independence and by helping others. But, Sennett argues, many who are not able to achieve the demands of today's meritocracy lose the esteem that should be given to them. From his childhood in a poor Chicago housing project to the contrasting methods of care practised by a nun and a social worker, from the harmonious interaction of musicians to the welfare system, Sennett explores the ways in which mutual respect can forge bonds across the divide of inequality.

‘There to fill the Sapiens-size hole in your life’ Observer
In this groundbreaking global overview of philosophy, Julian Baggini travels the world to provide a wide-ranging map of human thought. One of the great unexplained wonders of human history is that written philosophy flowered entirely separately in China, India and Ancient Greece at more or less the same time. These early philosophies have had a profound impact on the development of distinctive cultures in different parts of the world. What we call ‘philosophy’ in the West is not even half the story. Julian Baggini sets out to expand our horizons in How the World Thinks, exploring the philosophies of Japan, India, China and the Muslim world, as well as the lesser-known oral traditions of Africa and Australia’s first peoples. Interviewing thinkers from around the globe, Baggini asks questions such as: why is the West is more individualistic than the East? What makes secularism a less powerful force in the Islamic world than in Europe? And how has China resisted pressures for greater political freedom? Offering deep insights into how different regions operate, and paying as much attention to commonalities as to differences, Baggini shows that by gaining greater knowledge of how others think we take the first step to a greater understanding of ourselves.

When it was first published in 1980, the Diagnostic and Statistical Manual of Mental Disorders, Third Edition—universally known as DSM-III—embodied a radical new method for identifying psychiatric illness. Kirk and Kutchnin challenge the general understanding about the research data and the process that led to the peer acceptance of DSM-III.

Their original and controversial reconstruction of that moment concen-trates on how a small group of researchers interpreted their findings about a specific problem—psychiatric reliability—to promote their beliefs about mental illness and to challenge the then-dominant Freudian paradigm.

From Brian McDonald and Les McClaire comes Old Souls, a supernatural graphic novel about addiction, obsession, and the things we do for family. Chris Olsen has a good life. He has a regular job, a wife and daughter who love him, and a promising future. By any measure this is a good life, but it isn't his first. When a troubling encounter with a homeless man triggers something inside Chris, memories of his past lives bubble to the surface. A lost Chinese boy, a wailing grandmother, and a love so powerful it never left his soul all compete for his attention. Chris sinks deep into the seedy and seductive world of f'grave robbers,' vagrants known for their ability to relive their former lives. But can he find closure to a tragic episode in his past without losing himself in the process?

The world of management is in crisis - the old remedies no longer work and organizations are failing at an increasing rate. Although many talk of 'joined up thinking', few offer practical guidance on how to achieve this in organizations. The Fractal Organization sets down the practical implications of a well tested systemic approach to building organizations that are capable of surviving and flourishing in these turbulent times. "An excellent read... Many organizations fail at the mercy of their own ignorance. The author has done an excellent job in making the science of effective organization accessible to management, providing them with a new knowledge to deal with the uncertainties that the markets place upon them." Stephen J. Brewis, Business Architect, British Telecom "...one of the most interesting, thorough and rigorous guides to management that I have ever read... introduces new insights in every chapter... carries a credibility which acts as a counterbalance to the sometimes difficult message which he conveys which is that a lot of mainstream management practice is at best ineffective and at worst downright destructive. I would recommend this book to anyone interested in management or systems thinking." Penny Harrington, Course Chair, Systems Group, Open University "In my opinion this book manages to present sound academic theory that is relevant and helpful to the practitioner in the business. I experienced several A-HA moments." Pauline Marsh, Strategy Director, CS&S International, BA&S SYSTEMS "The insights of the Viable System Model have been open only to a select few for much too long. Hovestadt has gone further in bringing these ideas to a wider audience...Management books have too often been serious but not practical, or practical but not serious. This book is both brilliantly serious and practical, and often entertaining too." Professor Peter Kavalak, Manchester Business School "Integrates mainstream management ideas with the systems ideas underpinning the VSM, and flows and reads well. As a starting point for developing understanding of the VSM in today's world this book improves greatly on all books that have gone before. I would certainly recommend it to colleagues, clients, and students." Dr. Robin Asby, Course Chair, Communication and Systems, Open University

Freud's discovery of the Oedipus complex has had a tumultuous fate in the field of psychology in the United States. At first considered the kernel of psychoanalysis, it progressively lost its lustre because of its patriarchal underpinnings!oday Freud is barely studied in psychology departments. His theory of the unconscious, born of the notion that the child represses his love for his mother for fear of incurring his father's wrath, is now obsolete and replaced by various theories focused mainly on the mother-child relationship, where the burning question of the child's sexual development is conveniently set aside. In this revolutionary book Paul Verhaeghe, an expert Lacanian psychoanalyst and psychologist and award-winning author, explains why the Oedipus complex is not what it appears to be. Freud's theory can be read as a defensive myth that patients themselves invent in order to avoid confronting a forbidden enjoyment. Lacan's theory sheds a new light on this need for a defense. Seen from that angle the whole history of psychoanalysis, its twists and turns, is revisited, revealing connections with recent discoveries in attachment theory. New Studies of Old Villains will be of great interest to therapists and practicing psychologists, as well as academics.

A timeless and enchanting children's fantasy classic with a loyal fan base. At the end of his thousand-year reign of the Copper Mountains, old King Mansolain is tired and his heart is slowing down. When his attendant, the Hare, consults The Wonder Doctor, he is told he must keep the King engaged in life by telling him a story every night until the Doctor can find a cure. The search is on for a nightly story more wonderful than the last, and one by one the kingdom's inhabitants arrive with theirs; the ferocious Wolf, the lovesick Donkey, the fire-breathing three-headed Dragon. Last to arrive is the Dwarf, with four ancient books and a prophecy that the King will live for another thousand years - but only if the Wonder Doctor returns in time.

A Biography

A Radical Reconsideration of the Oedipus Complex

According to current thinking, anyone who fails to succeed must have something wrong with them. The pressure to achieve and be happy is taking a heavy toll, resulting in a warped view of the self, disorientation, and despair. People are lonelier than ever before. Today's pay-for-performance mentality is turning institutions such as schools, universities, and hospitals into businesses, while individuals are being made to think of themselves as one-person enterprises. Love is increasingly hard to find, and we struggle to lead meaningful lives. In What about Me?, Paul Verhaeghe's main concern is how social change has led to this psychic crisis and altered the way we think about ourselves. He investigates the effects of thirty years' acceptance of neo-liberalism, free-market forces, and privatization, and the resulting relationship between our engineered society and individual identity. It turns out that who we are is, as always, determined by the context in which we live. From his clinical experience as a psychotherapist, Verhaeghe shows the profound impact that social change is having on mental health, even to the extent of affecting the nature of the disorders from which we suffer. But his book ends on a note of cautious optimism. We can once again become masters of our fate – if we accept the challenge.

A timely examination of how authority functions, why we need it to develop healthy psyches and strong societies, and how we ourselves can take the first steps toward creating a new social order.

Using the mythical creature of the Himalayas, the Yeti, as a symbol for the prejudices and assumptions that people prematurely make about each other, this book discusses bringing up children to accept and cherish diversity and helping them to thrive in an increasingly diverse world. Directed to educators and caregivers of toddlers and preschoolers, the book takes insights from Dutch-, French-, and English-language literature and provides practical examples based on European issues and context. Chapters 1 and 2 deal with facilitating identity development in a fragmented world. Chapters 3 and 4 examine self-image development and the self, and the way we think about ourselves. Chapter 5 looks at an educational model based on the social and developmental psychology insights from previous chapters. Chapters 6 and 7 examine parental cooperation and suggest some ways that the educational model can be implemented at educational centers. Chapter 8 analyzes multilingualism. Chapter 9 examines how a group in a child care center or elementary school can be equipped and organized. The book's appendix highlights legal regulations that parents and educators must follow and includes the mission and mandate embodied in the U.N.'s Treaty for the Rights of the Child. (Contains 190 references.) (KB)

marketing in het nieuwe tijdperk

Nieuwe denkmodellen voor marketing en management De wereld is in volle transformatie. Onze denkmodellen lijken niet meer te kloppen. We doen alles volgens het boekje, consumenten en klanten hebben sympathie en positieve associaties met ons merk, en toch staat ons marktaandeel anders moeten aanpakken, willen we weer relevant worden in het leven van mensen. In Transformeren om te overleven geeft Herman Toch zijn visie op onze veranderende wereld. Bovendien doet hij aan de hand van tien paradigma's een nieuwe soort marketing uit de doeken en toont hij aan wat merken moeten doen om succesvol te zijn een winnende positie uit te bouwen. Een aanrader voor marketeers, leidinggevenden, marketingdirecteurs, CEO's die een gids zoeken om hun merk voor te bereiden op een nieuw tijdperk.

What about Me?the struggle for identity in a market-based societyScribe Publications

Welcome to Omega Minor, where nothing is ever what it seems and nothing every ends.”--BOOK JACKET

Eerstelijnswerkers die vandaag willen werken aan positieve identiteitsontwikkeling met moslimjongeren staan onder een sterke marktshappelijke druk. Het publieke debat is immers in de ban van thema's als 'terreur', 'religieuze extremisme', 'radicalisme'. Thema's waarbij voortdurend en vanzelfsprekend een link wordt gelegd met moslims. De complexiteit van de actuele realiteit, de onduidelijkheid rond hetrippen als terreur en radicalisering en de angst die hierdoor in de hand wordt gewerkt, creëren bij heel wat leerkrachten, schooldirecties, jeugdwerkers en hulpverleners een handelingsverlegenheid. Of erger: een handelingsloze. Een repressieve veiligheidslogica dreigt in het eerstelijnswerk stilaan de 'normale' pedagogische logica te verdringen. Een antiradicaliseringsindustrie speelt daar gretig op in met praktische checklists, quick fixes, hapklare 'tools' en handige methodiekjes. Met korte bijzcholingsprogramma's waarin experts pasklare antwoorden bieden op dringende praktijkcases hopen we te leren hoe we radicaliserende jongeren vroegtijdig kunnen detecteren en weerwerk bieden. 'Preventie van radicalisering' is de bri geworden waardoor we naar ons dagelijkse werk met jongeren kijken. Maar werken we op die manier geen zelfvulling prophy in de hand? In welke mate creëren we precies het probleem dat we eigenlijk trachten in te dijkten? Dit tool- en handboek is een poging om in het huidige radicaliseringsdiscours even een stapje achteruit te zetten en terug te keren naar de vraag: Wat is onze pedagogische opdracht als eerstelijnswerkers? Hoe verhouden we ons tot de actuele context en met welke visie gaan we daarin aan de slag? Hoe krijgen we de glazen in onze professionele bril weer helder? Wat is onze reële handelingsruimte en hoe kunnen we die ten volle gebruiken? Hoe krijgen we opnieuw vertrouwen in de deskundigheid waarover we beschikken van een diepgaande, constructieve rol te spelen in de positieve identiteitsontwikeling van (moslim)jongeren? Dit boek toont hoe visie, handelingsleutels en concrete methodische tools intrinsiek met elkaar verbonden zijn. In het omgaan met (levensbeschouwelijke) diversiteit pleiten de auteurs ervoor om consequent te durven kiezen voor een transformatiologica en een emancipatorische aanpak.

Transformeren om te overleven

Paul Verhaeghe vertelt over zijn persoonlijke ontwikkeling Een wereld in evenwicht. Daar pleit Paul Verhaeghe al voor sinds Liefde in tijden van eenzaamheid. Zijn boeken belichten de grote thema 's van onze tijd: Identiteit, Autoriteit, Intimiteit. Daarin reflecteert hij op onze zoektocht naar het goede leven - en de obstakels daarbij. Na veertig jaar neemt Paul Verhaeghe eind 2021 afscheid van de universiteit. In dit boek blikt hij terug en vooruit. Hoe zag hij onze inteme relaties veranderen? Wat valt er nog te vinden voor de zoekende mens? En hoe doe je dat eigenlijk, kritisch en toch hoopvol nadenken over de samenleving waarin je thuis bent? ' Het moeilijkste aan vragen stellen, ' weet Paul Verhaeghe, ' is dat je antwoorden krijgt. ' Maar het beste daaraan is dat die weer niet aan nieuwe vragen leidt. Journaliste Sarah Vankersschaever stelt ze - en vraagt door.

This book brings together, for the first time, a selection of international critiques on the role of ADHD in our society today, looking at how diagnoses have increased in recent years and the reasons behind this. Topics range from genetics to social culture, offering a comprehensive overview of this area.

This new edition of the biography of pioneering child analyst Anna Freud includes, among other features, a major retrospective introduction by the author.

'The old discussion of 'Market or State' is obsolete. There will always have to be a mix of market and state. The only relevant question is what that mix should look like. How far do we have to let the market go its own way in order to create as much welfare as possible for everyone? What is the responsibility of the government in creating welfare? These are difficult questions. But they are also interesting questions and Paul De Grauwe analyses them in this book. The desired mix of market and state is anything but easy to bring about. It is a difficult and sometimes destructive process that is constantly in motion. There are periods in history in which the market gains in importance. During other periods the opposite occurs and government is more dominant. The turning points in this pendulum swing typically seem to coincide with disruptive events that test the limits of market and state. Why we experience this dynamic is an important theme in the book. Will the market, which today is afforded a greater and greater role due to globalization, run up against its limits? Or do the financial crisis and growing income inequality show that we have already reached those limits? Do we have to take ourselves for a rejection of the capitalist system? Are we returning to an economy in which the government is running the show?' --Dust jacket.

Journeys and Pathways

Tales from Outer Suburbia

Jacques Lacan and the Other Side of Psychoanalysis

Creating sustainable organizations with the Viable System Model

In this volume, Paul Verhaeghe's lectures on the development of psychoanalytic theory between Freud and Lacan are reproduced as a written work of astonishing versatility, which stands at the vanguard of Lacanian studies. Beyond Gender examines Freud's discovery of the unconscious, and Lacan's elaboration of this discovery as a gap in the subject between what (s)he knows and the real driving forces in the psyche. The implications of this gap are manifold, and their impact on areas of study and practice from gender theory to obsessional neurosis, trauma, hysteria, and dream interpretation are profound. It is Verhaeghe's contention that, far from being the bedrock of gender differentiation, castration masks another anxiety over another, original lack that is beyond gender. This book elaborates the relationship between body and psyche beyond the classic binary opposition. Beyond Gender postulates that the sexual relationship must be re-examined, as does the troublesome notion of gender identity.

Beschouwing over de samenhang tussen psychische problemen en de huidige neoliberale samenleving.

Winner of the 2005 Goethe Award in Psychoanalytic Scholarship The central argument of On Being Normal and Other Disorders is that psychic identity is acquired through one's primary intersubjective relationships. Thus, the diagnosis of potential pathologies must also be founded on this relation. Given that the efficacy of all forms of treatment depends upon the therapeutic relation, a diagnostic of this sort has wide-ranging applications. Paul Verhaeghe's critical evaluation of the contemporary DSM-diagnostic shows that the lack of reference to an updated governing metapsychology impinges on the therapeutic value of the DSM categories. In response to this problem, the author sketches out the foundations of such a metapsychology by combining a Freudo-Lacanian approach with contemporary empirical research. Close attention is paid to the processes of identity acquisition to show how the self and the Other are not two separate entities. Rather, subject formation is seen as a process in which both the subject's and the Other's identity, as well as the relationship between them, comes into being. By engaging this new theoretical approach in a constant dialogue with the findings of contemporary research, this book provides a compass for the practical applications of such a differential diagnostic. Post-modern categories of anxiety disorders, personality disorders, and post-traumatic stress disorders are approached both through the well-known neurotic, psychotic, and perverse structures, as well as through the less familiar distinction between an actual pathology and a psychopathology. These two outlooks, which involve the role of language and the subject's relation to the Other, are spelled out to show their implications for treatment at every turn.

This book describes the path ahead. It combines system transformation research with political economy and change leadership insights when discussing the needfor a great mindshift in how human wellbeing, economic prosperity and healthyecosystems are understood if the Great Transformations ahead are to lead to morsustainability. It shows that history is made by purposefully acting humans andintroduces transformative literacy as a key skill in leading the radical incremental change.
