Bats: An Illustrated Guide to All Species looks in detail at the more than 1,300 species known today. Nocturnal, fast-flying and secretive, they are endlessly fascinating, yet extremely difficult to observe and catalogue. The diversity of bats is both rich and underestimated and the threats they face from humans are very real. This guide illuminates the world of bats and reveals their true nature as intelligent, social and deeply misunderstood creatures. This extravagantly illustrated handbook features the work of famed nature photographer Merlin D. Tuttle and in-depth profiles of 288 bats, from the Large Flying Fox, which has a wingspan of more than five feet, to the Bumblebee Bat, contender for the world's smallest mammal. *Bats* includes close-up images of these animals' delicate and intricate forms and faces, each shaped by evolution to meet the demands of an extraordinarily specialized life, and a thorough introduction which explores their natural history and unique adaptations to life on the wing.

What's wrong with the US food system? Why is half the world starving while the other half battles obesity? Who decides our food issues, and why can't we do better with labeling, safety, or school food? These are complex questions that are hard to answer in an engaging way for a broad audience. But everybody eats, and food politics affects us all. Marion Nestle, whom Michael Pollan ranked as the #2 most powerful foodie in America (after Michelle Obama) in Forbes, has always used cartoons in her public presentations to communicate how politics—shaped by government, corporate marketing, economics, and geography—influences food choice. Cartoons do more than entertain; the best get right to the core of complicated concepts and powerfully convey what might otherwise take pages to explain. In Eat Drink Vote, Nestle teams up with The Cartoonist Group syndicate to present more than 250 of her favorite cartoons on issues ranging from dietary advice to genetic engineering to childhood obesity. Using the cartoons as illustration and commentary, she engagingly summarizes some of today's most pressing issues in food politics. While encouraging readers to vote with their forks for healthier diets, this book insists that it's also necessary to vote with votes to make it easier for everyone to make healthier dietary choices.
