Parties to cross-border disputes arising anywhere in the vast Portuguese-speaking world – a community of more than 230 million in a space that offers a wide array of investment opportunities across four continents – increasingly seek Portugal as their preferred seat of arbitration. A signatory to all relevant international conventions, Portugal has proven to be an 'arbitration-friendly' jurisdiction. This volume is the first and so far only book in English that provides a thorough, in-depth analysis of international arbitration law and practice in Portugal. Its contributing authors are among the most highly regarded legal names in the country, including scholars, arbitrators, and practitioners. The authors describe how international arbitration proceedings are conducted in Portugal, what cautions should be taken, and what procedural strategies may be suitable in particular cases. They provide insightful answers to questions such as the following: What matters can be submitted to arbitration under Portuguese law? What are the validity requirements for an arbitration agreement? How do the State courts interact with arbitration proceedings and what is the attitude of such courts toward international arbitration? What are the rules governing evidentiary matters in arbitration? How is an arbitration tribunal constituted? How are arbitrators appointed? How may they be challenged? How can an international arbitral award be recognized and enforced? How does the Portuguese legal system address the issue of damages and what specific damages are admitted? How are the costs of arbitration proceedings estimated and allocated? The book includes analyses of arbitration related to specific fields of the law, notably sports, administrative, tax, intellectual property rights (especially regarding reference and generic medicines), and corporate disputes. Each chapter provides, for the topics it addresses, an examination of the applicable laws, rules, arbitration practice, and views taken by arbitral tribunals and state courts as well as those of the most highly considered scholars. As a detailed examination of the legal framework and of all procedural steps of an arbitration in Portugal, from the drafting of an arbitration agreement to the enforcement of an award, this book constitutes an invaluable resource for parties involved in or considering an international arbitration in this country. The guide that it seeks to provide in respect of any problem likely to arise in this context can be useful to arbitrators, judges, academics, and interested lawyers.

New technologies are changing the way that tax administrations, taxpayers and their advisers interact, leading to a reduction in the compliance cost for taxpayers, a level playing field for large and small businesses, and fewer opportunities to engage in aggressive tax practices. Although entering a new world where processes are supported by machines inevitably disrupts traditional ways of working, the contributors to this indispensable book reveal the enormous potential of 'tax technology' to positively transform tax compliance, clearly showing both government and business how to manage the transition from the old to the new. With detailed treatment of the technology available in the tax field, the authors describe how to secure its benefits in such ways as the following: electronic balance sheets and invoices; automated transmission to tax authorities; innovative analytics applications; blockchain in tax law processes; process mining in VAT; real-time reporting with cryptography; and meeting the challenges to taxpayers' rights to privacy and personal data protection. The contributions draw on an international conference held under the auspices of the Digital Economy Taxation Network at the Vienna University of Economics and Business in December 2020. The perspective throughout focuses on how to achieve better tax compliance at a lower cost. For this reason, this full-scale, practical guide on how to adapt tax law to new technologies and how to apply tax tech processes in practice will be welcomed by tax practitioners, tax administrations, and academics

Completely revised and updated, this sixth edition of a well-received desk reference offers in one volume a comprehensive review of United States (US) copyright, patent, and trademark laws. Like its previous editions, the book's thorough and sophisticated treatment of this complex material escapes the cumbersome overelaboration of a multivolume treatise on the one hand and a superficial "nutshell" on the other. Maintaining the systematic structure that makes it easy for users to zero in on any particular matter, the new edition incorporates the changes that have entered into force since the fifth edition and expertly examines their effects. The three major categories of copyright, patent, and trademark are covered in turn—along with a fourth section on chip protection—with detailed but concise examination and analysis of such issues and topics as the following and much more: • subject matter of protection; • conditions of protection; • registration procedures; • scope of exclusive rights; • transfer of interests; • fair use; • rights in unregistered marks; • protection of computer software, code, and databases; • remedies and defenses; and • procedural issues in infringement actions. The authors examine significant case law, updated for this edition, in the course of their analysis. With its detailed citations and readily accessible and complete subject coverage, this latest edition is sure to retain its usefulness as a quick reference or desk book for intellectual property practitioners, in-house counsel, patent agents, academics, and librarians, as well as for anyone interested in understanding US intellectual property law.

Part of the University Casebook Series*, Fundamentals of Federal Income Taxation provides detailed information on federal income taxation, with selected cases and expanded coverage of capitalization issues. The casebook also contains new problems and discussion of capitalization rules, such as gains on principal residences under Section 121, tax benefits of higher education, retirement programs, and capital gains and losses reflecting amendments to Section 1(h).
