

Indian Streams Research Journal

Corporations have a social responsibility to assist in the overall well-being of their employees through the compliance of moral business standards and practices. However, many societies still face serious issues related to unethical business practices. *Social Issues in the Workplace: Breakthroughs in Research and Practice* is a comprehensive reference source for the latest scholarly material on the components and impacts of social issues on the workplace. Highlighting a range of pertinent topics such as business communication, psychological health, and work-life balance, this multi-volume book is ideally designed for managers, professionals, researchers, students, and academics interested in social issues in the workplace.

1.1 Introduction: The entrepreneurs of the small industry have a prominent role in a developing economy, as the success of these industrial enterprises depends largely upon the capabilities and the talents of the entrepreneurs and there by promotes the industrialization process. To make the small scale industry more dynamic in accelerating industrial development for facilitating larger employment generation and output expansion, there is an imperative need to promote the entrepreneurial talents as inadequate supply of entrepreneurs, constrains the process of rapid industrialization and that of sustaining the economic development. Industrialization has been considered as one of the strategies for accelerating the process of economic development particularly in the developing countries, and this in turn depends on the availability of a large number of innovative and dynamic entrepreneurs and it is necessary to promote the entrepreneurial base in the economy through expansion and diversification of the entrepreneurial talents since they generate employment opportunities and thereby reduce the regional imbalances and the concentration of economic power.

1.1 NEED AND BACKGROUND 1.1.1 PHYSICAL EDUCATION AND SPORTS WITHIN SOCIETY Man is a social animal both by need and necessity. Social institutions are born with cultural influences. Social institution is one of the products of culture. Institutions are necessary to maintain social order and control human behavior. Social institutions are born to satisfy human needs. All the needs and desires of the individuals and human beings are met by social institutions. Social institutions are simply social habits. For example, the habits of shaving in the morning, uttering prayers before going to bed. Habits are systematized instituted or established by groups. Institutions may also be defined as, "habitual ways of living together which have been sanctioned, systematized and established by the authority of communities". An institution, therefore, "may be type of group". In this sense the family is an institution, (and if it conducts itself in institutionalized ways) Robert Bierstead considers that "institutions as an organized way of doing something". Institutions are socially important because they transfer cultural elements from one generation to another. For example, the father of the family teaches his sons and daughters about the family - the way of life, economic way of life and

religious way of life. A social institution introduces unity in human behavior. A social institution also controls the conduct and character of man in the society. Modern life is not as simple as that of ancient times. It is complex. The complexity has been produced by our growing and different needs. The needs are self-preservation, Self-perpetuation and self-expression. These needs are met only by social institutions. Social institutions represent the social structure of the society. We can conclude that the social relationships include common values and procedure to achieve basic needs of society. Common value means shared ideas and goals, procedure means the accepted standardized norms and the social relationships include the behavior of the people. (A. Youb, 2008).

EDUCATION Education is a life-long learning process of an individual for a meaningful life in the world. Only with the help of education, t a civilized and cultured individual. Different educationists interpreted the term 'Education' differently. Tagore remarks, "Education means mind to find out that ultimate truth which emancipates us from the bondage of the dust and gives us the wealth, not of things but of power but of love, making this truth its own and giving expression to it". Conenius says "All those who are born as human-beings need they are destined to be real men not wild beasts, dull animals and clumps of wood" (Regunath Safaya, 1994, P. 5). John Dewey defines, process of living through a continuous reconstruction of experiences. It is the development of all those capacities in the individual which control his environment and fulfill his responsibilities" (Regunath Safaya, 1994, P. 5).

This book discusses ideas for stakeholders to develop strategies to access and use financial products and services such as deposits, loan mechanism, insurance, payment services, and intermediaries, distribution channels at economical prices in order to cater to the needs of underprivileged people. Financial inclusion ensures ease of access, availability, and usage of the financial products and services to all the society. The book will help in recognizing the role of financial inclusion as one of the main drivers in reducing income inequality and thus sustainable economic growth of the countries, especially of an emerging economy. The book provides conceptual and practical ideas from best practices from the experts, and empirical views from the researchers on the best practices and how to mitigate the challenges and development of the financial inclusion.

This volume explores the dynamics of urbanisation in Northeast India. It discusses the impact of the process of urbanisation on the environment, infrastructure and socio-economic conditions of the region. The chapters in the book: Examine various challenges and opportunities of urbanisation as frontier urbanism, urban congestion, smart cities, vernacular architecture, urban water and waste management, cross-border migration. Draw attention to critical issues that have massively disturbed the urban landscape including deterioration of water quality, seismic activity and pollution. Give alternatives that could present possible solutions to the problems afflicting this region. Drawing on case studies rooted in

fieldwork, this book will be indispensable to researchers and students of urban studies, human geography, development economics, culture and South Asian studies. It will also be of interest to policy-makers, government representatives and town planners.

Contemporary Research In Management

This book is mentioned the physico chemical parameter with biological zoo and phyto plankton. Which is informative data to related consumers which are industry, irrigation and domestic drinking water. This limnological study is helpful to above water consumers with helpful to other limnological researchers.

The present review study deals with few biological aspects of few fresh water fishes including catfishes based on published literature as worked out by various researchers of India. Many small fresh water fishes and catfishes have become threatened and endangered due to contamination, over exploitation, habitat destruction, water abstraction, siltation, habitat fragmentation, fish diseases and introduction of alien species. For sustainable utilization, proper planning related to conservation and management strategies are of utmost importance. The earlier studies on the various aspects of fish bionomics have been reviewed under the following headings Viz., length-weight relationship, relative condition factor, food and feeding habits, GSI, HIS, sex ratio and fecundity.

This book provides a focused and comprehensive overview of criminal psychology in different socio-economic and psycho-sociological contexts. It informs readers on the role of psychology in the various aspects of the criminal justice process, starting from the investigation of a crime to the rehabilitation or reintegration of the offender. Current research in criminology and psychology has been discussed to understand the minds of various offenders, how to interact with them during investigation and conviction effectively and how to bring about positive changes in various stages of the criminal justice process—investigation, prosecution, incarceration, rehabilitation—to increase the efficacy of the correctional system and improve public confidence in the justice system. It thoroughly addresses the bigger issues of holistically reducing the increase in crime rates and susceptibility in society. Each chapter builds on leading scholarship in this field from Western scholars and supplements these theories with research findings from a South Asian perspective, particularly in the Indian criminal justice system. This book successfully encapsulates the foundations of criminal psychology literature while incorporating interdisciplinary avenues of study into criminal behaviour and legal psychology, bringing into the provincial discourse lacunas of the justice system and avenues for alternative correctional and rehabilitative programs.

This book is a compendium of papers presented in the International Conference on Emerging Global Economic Situation: Impact on Trade and Agribusiness in India. The book covers thirty four papers covering the emerging trends in global management and information technology. This book will be very useful for all those are interested in issues related to global management and information technology.

This is all about learning through direct experiences. However, indirect experiences also bring changes in behaviour. We generally listen, read somewhere in the books or watch in movie that snake biting leads to death. Such instances of indirect experiences make us to conclude that we should be aware of snakes. Hence the change in behaviour of an individual through direct or indirect experiences is commonly known as learning. Here are some well known definitions of learning:

Youth have always had higher unemployment rates – about twice or more than the average – as they are usually the last to be hired in an expansion and the first to be let go in a recession. In addition, young people engage in extensive job searching in their early years, and this can imply considerable job churning as both youth and employers look for a good match. This highlights the importance of facilitating the school-to-work transition and having early interventions to assist such youth before negative conditions set in. It also highlights the potential importance of determining those young people most “at risk” of long-term unemployment, and of targeting or streaming them into programmes that will yield the largest incremental net benefits given their characteristics. Unemployed youth without previous work experience often are not eligible for unemployment insurance benefits when they first enter the labour market. When they do receive job search assistance, they often face a bewildering array of programmes that are available to assist them, often with little guidance to help them select the programs that best meet their needs. Consequently, ensuring that today’s youth do not become a “lost generation” is an urgent matter. George Bernard Shaw once said that it is too bad that “youth is wasted on the young”, implying that youth do not realize the opportunities they have as youth and only see them as they get older. There is a danger, however, that many of today’s youth may be never have those opportunities and hence not even see them with hindsight. This book and others in the ADAPT Labour Studies Book-Series are intended to deal with these challenges, to make sure that youth is not wasted on the young.

Financial inclusion has been one of the most propagated ideologies in countries, and as a result, significant efforts have been taken to nurture institutions and systems to include an array of socio-economic classes. Various financial institutions and societies have taken steps toward financial inclusion, but to be successful, they need to understand how to accurately target and market their potential customers as well as the new avenues for development. Marketing Techniques for Financial Inclusion and Development is a critical scholarly resource on the marketing techniques adopted by various financial institutions and societies for promoting financial inclusion initiatives for the development of the society at large. Featuring coverage on a broad range of topics such as consumer awareness, financial literacy, and micro-enterprises, this book is geared towards managers, investors, brokers, researchers, and all others within the banking industry.

Recent world is research world. Research takes place in all fields in the world. In this special edition of Recent Research Academy and International Journal of Research, titled on "Recent Research in Social Sciences & Humanities" more focus is given to the Recent Researches from social sciences, which are considered as the need of the hour. Altogether this issue has twelve standard research articles contributed by academicians and enthusiastic research scholars. This special edition has the following articles. They are A STUDY ON ELECTRONIC BANKING'S PROS & CONS, MARKETING MANAGEMENT DEMANDS THE OMNIPRESENT SOURCE OF RESEARCH EDUCATION, CLASSROOM MANAGEMENT OF HIGH SCHOOL TEACHERS, CUSTOMERS PREFERENCE TOWARDS ONLINE BANKING VS TRADITIONAL BANKING – AN ANALYSIS, CORPORATE SOCIAL RESPONSIBILITY AND COMMUNITY DEVELOPMENT- A COMPILATION OF SUCCESSFUL CASES FROM THE CSR INTERVENTIONS OF TVS SST, A STUDY OF INTERNET USAGE OF UNDERGRADUATES, THE ATTITUDE OF STUDENTS AND TEACHERS TOWARDS E-LEARNING - AN ANALYSIS, WOMEN EMPOWERMENT THROUGH SELF HELP GROUPS PRODUCTION AND MARKETING ACTIVITIES: AN EMPIRICAL STUDY OF DINDIGUL DISTRICT, EMPLOYMENT, OUTPUT AND WAGE ELASTICITY IN RESEARCH INTENSIVE INDUSTRIES IN INDIA & USING STRUCTURAL EQUATION MODEL TO ASSESS TOURISTS OPINION TOWARDS CHETTINAD TOURISM & A STUDY ON CUSTOMER'S ATTITUDE TOWARDS DEBIT CARDS (WITH SPECIAL REFERENCE TO CUSTOMERS RESIDING AT CHENNAI AND VELLORE). The researcher have been discussed their in the above mentioned titles. Thus, the recent scenario of research in social science and humanities were clearly addressed. This volume enriches the reader to update their existing knowledge on these areas of Arts and Social Science. While I thank all the contributors and members of the editorial board for their contribution and cooperation, I thank and appreciate the timely help rendered by the team of Recent Research Academy and INTERNATIONAL JOURNAL OF RESEARCH for their valuable help and timely efforts to bring out this edition on the moment.

CONTEMPORARY ISSUES IN MULTIDISCIPLINARY SUBJECTS, VOLUME – 3

The Bhagirathi-Hooghly Basin in India is one of the most densely populated regions in the world and is undergoing rapid transformation of its natural landscape induced by human interventions, such as mushrooming of dams and barrages, deforestation, and urbanization. Human activities and interventions on basin landforms and the processes that shape those landforms have accelerated at an unprecedented rate. This book uses spatio-temporal analysis to understand the major anthropogenic signatures on land use and land cover change and the impact these activities have on the landforms and processes of the Bhagirathi-Hooghly River and its sub-basins. It answers the question of why, and how of the anthropogenic signatures involved. Recent case studies on the impact of anthropogenic signatures on fluvial processes make this book a useful resource for students and researchers in the earth sciences, local governments, urban planners, and those concerned with rural developments. Features: Explores for the first time the new concept of anthropogeomorphology for the emerging field Analyses the impact of anthropogenic activities, especially the construction of dams and reservoirs, and urbanization on the major fluvial landscapes using advanced geospatial modelling techniques Investigates human interference in river systems, the dynamics of the river, and the livelihoods of the people residing along the river Addresses issues related to geology, geomorphology, geography, planning, land use, and land management areas Fills the need for data-driven governance and policy decisions for the urban-industrial growth in India.

The volume evaluates major developments in psychiatry in India from the 1950s, and highlights the areas where Indian psychiatry has contributed to the development of the subject worldwide. The chapters review international as well as Indian developments in its sub-specialities. A wide range of clinical, research and policy-related topics have been covered in the volume, which begins with an overview of the history of psychiatry in India, moving on to developments in various sub-specialities of psychiatry in the last few decades. It then specifically discusses developments in psychology and psychodynamics, general adult and child psychiatry, substance use, community psychiatry, liaison psychiatry, and other psychiatric sub-specialities. Developments in treatment, the status of training, service in psychiatry and legal issues related to the practice of psychiatry in India are also included. The contributors to this volume are nationally and internationally recognized experts in different areas of psychiatry. Most of them have had some association, or been associated, with the Department of Psychiatry at the Post Graduate Institute of Medical Education and Research, Chandigarh. This book explores how the Indian education and training system prepares young people for the world of work and for the requirements of the employment market – because India is a leading industrialised nation with a very young population and a high demand for a skilled workforce. Indian experts write from a course-specific perspective, offering a comprehensive picture of educational policy, curriculum design and cultural characteristics. The virtual absence of a formalised system of vocational training in India underlines the importance of this research.

Confronting Corruption in Business focuses on the contextual issues that trigger corruption to give the reader a more thorough understanding of destructive leadership. It provides students with a unique, critical perspective on issues of leadership, corruption, and policy in different countries, industries, and companies. While there isn't a universally agreed upon definition of corruption in social sciences, it generally refers to efforts to secure wealth or power through misusing public power for private gain. This kind of destructive leadership is typically treated as an anomaly, but this book closes the gap in our understanding by highlighting the wider consequences of this behavior within business, and on an international level. Armed with this understanding, one also learns how to mitigate its causes and consequences. Edited by leading experts, the book includes contributions from scholars with international expertise on leadership, strategy, political science, finance, organizational change, and public policy. It is the first book to focus on corruption on the country level and within business, and students in international business, management, ethics, and leadership classes will find it a valuable read.

This is Third volume of our continued effort to present the latest thoughts of researchers in domain of management to benefit industry and academia. Like our previous volumes this book also intends to fulfill the quest for knowledge for academicians and person from industry having interest in current research in the field of Management and Business Administration. The articles included in this book are rigorously reviewed by peer referees and accepted only after the articles met the stringent criterion of plagiarism test. The research output of respective authors is presented in the form of edited book and carries chapters on issues researched and contemplated by them. Certain contemporary topics of interest in management that are covered in the chapters of this book are Sustainable development as an important aspect of achieving millennium development goals of United Nations, Impact of Proactive Personality and Entrepreneurial Alertness on Social Entrepreneurial Intentions, Issues surrounding to slowdown in

Rivers are a vital component of ecology-the earth's hydrological cycle depends on them. However, across the world, rivers are under stress and even in crisis. With rising populations, the demand for river water is increasing. Many rivers fail to reach the sea because of excessive withdrawal of water, and many other rivers are heading toward the same fate. Conflicts over river water are increasing, and climate change is making matters worse. River policies pursued so far are often aggravating these challenges rather than solving them. Yet, sustainable development requires healthy rivers. Urgent change in the approach and policies toward rivers is therefore required. In this book, Nazrul Islam points to the ways in which river policies need to change to ensure sustainable development. He offers a new conceptual framework, using such concepts as the Commercial and Cordon approaches to rivers and their opposite, the Ecological and Open approaches. He shows that while the former generally work against sustainability, the latter are conducive to sustainable development. The book illustrates this reality by drawing upon worldwide experience regarding rivers. Going forward, river policies therefore should be based on Ecological and Open approaches. Islam argues further that the use of the new conceptual framework offered in this book can help to connect the river related discussion of experts with

that of activists. It can thus help to move the discussion of river policies from the narrow confines of experts to the wider arena of the public, who should have a greater role in formulation of river policies in order to safeguard public interests and ensure sustainability. The book serves as a valuable guide for those interested in learning about river policy changes necessary to promote sustainable development.

Nowhere in India is contemporary politics and visions of 'the political' as diverse, animated, uncontrollable, and poorly understood as in Northeast India. Approaching politics in the vernacular, this book thinks itself afresh into the region's political life.

There are countless books on the market that address the personal challenges and institutional barriers that ambitious female leaders face in the United States. This volume furthers the conversation by comparing the experiences of women in leadership with regards to work-life balance from eight different countries around the globe. Collecting stories from women in the United States, Costa Rica, India, Iran, Nigeria, Norway, Sri Lanka, and Uganda, this volume provides insights into the issues women face globally regarding leadership and work-family integration. It offers a variety of perspectives from around the world, and highlights a variety of cultural norms regarding work and family integration.

This book examines topical issues in global corporate social responsibility (CSR) from both scholarly and practical perspectives. It offers a variety of viewpoints and cases from countries around the globe and combines them with current academic knowledge. Intended for students, academics, and managers wishing to keep abreast of the challenges and opportunities for corporations operating in our ever-more-complex globalized world, this book provides fresh insights into responsible business conduct.

REGIONAL RURAL BANK IN INDIA- Volume: II

Tackling Youth Unemployment

I. INTRODUCTION: In India, there are constitutional and legislative prohibitions on “untouchability” and manual scavenging. However, women and men continue to be engaged in manually cleaning human excrement from private and public dry toilets, open defecation sites,

septic tanks, and open and closed gutters and sewers. They usually embark upon manual scavenging because of traditional caste-based roles that leave them few, if any, alternate employment options, a situation perpetuated by poor implementation of laws and policies prohibiting this practice.

This book critically examines domestic violence law in India. It focuses on women's experiences and perspectives as victims and litigants, with regard to accessibility to law and justice. It also reflects on the manner in which the legal process reproduces gender hierarchies. This volume: Analyzes the legal framework from a gender perspective to pinpoint the inherent stereotypes, prejudices and discriminatory practices that come into play while interpreting the law; Includes in-depth interviews and case studies, and explores critical themes such as marriage, rights, family, violence, property and the state; Presents alternatives beyond the domain of law, such as qualitative medical care and legal aid facilities, shelter homes, short-stay homes, childcare facilities, and economic and social security provisions to survivors and their children. Drawing on extensive testimonies and ethnographic studies situated in a theoretical framework of law, this book will be of great interest to scholars and researchers of law, gender, human rights, women's studies, sociology and social anthropology, and South Asian studies.

The Proceeding contains the following sections: i) Groundwater Exploration and Exploitation; (ii) RS&GIS Applications in Water Resources; (iii) Watershed Management: Hydrological, Socio-Economic and Cultural Models; (iv) Water and Wastewater Treatment Technologies; (v) Rainwater Harvesting and Rural and Urban Water Supplies; (vi) Floods, Reservoir Sedimentation and Seawater Intrusion; (vii) Water Quality, Pollution and Environment; (viii) Irrigation Management; (ix) Water Logging and Water Productivity in Agriculture; (x) Groundwater Quality; (xi) Hydrologic Parameter Estimation and Modelling; (xii) Climate Change, Water, Food and Environmental Security; (xiii) Groundwater Recharge and Modelling; (xiv) Computational Methods in Hydrology; (xv) Soil and Water Conservation Technologies.
