

## Infant Toddler Environment Rating Scale Iters

**This resource provides step by step instruction on how to design a quality day care environment. It should be used side by side with the ECERS-R, the scale used to develop and quantify quality standards in Canada, the USA, and abroad. It includes the How, What and Why for Each indicator, seven sub-scale items, step-by-step instructions, and over 700 colour photos. The usage of this book can ensure accurate ECERS-R assessment by: early childhood practitioners, to improve classroom quality; technical staff, wanting to provide guidance to practitioners; licensing staff, who need to evaluate the quality of a program; and researchers, who need to use the scale correctly and reliably. The format is organized to match the format of the assessment, by subscale, item and indicator. They provide clear, print explanations of how each indicator within each item is to be interpreted.**

**FDCRS consists of 32 items, organized under six major headings: Space and Furnishings for Care and Learning -- Basic Care -- Language and Reasoning -- Learning Activities -- Social Development -- Adult Needs. Eight additional items are included for rating a day care home's provisions for special-needs children. Each book contains one score sheet. Packages of 30 score sheets can be ordered separately.**

**The Business Administration Scale for Family Child Care (BAS) is the first valid and reliable tool for measuring and improving the overall quality of business and professional practices in family child care settings. It is applicable for multiple uses, including program self-improvement, technical assistance and monitoring, training, research and evaluation, and public awareness. It is currently embedded in many state quality rating and improvement systems (QRIS) across the nation. Using a 7-point rating scale (inadequate to excellent), this easy-to-use instrument assesses 10 items: Qualifications and Professional Development Income and Benefits Work Environment Fiscal Management Recordkeeping Provider-Family Communication Family Support and Engagement Marketing and Community Relations Provider as Employer The second edition of the BAS includes refinements to support the reliable use of the instrument and to reflect current best practices in administering a family child care program: The Notes for the BAS items are expanded to increase understanding and facilitate greater consistency in both interpretation and scoring. There is greater emphasis on practices that promote family and community engagement. New national norms for the BAS are reported based on data collected between 2009 and 2017 from 439 home-based programs in 22 states. Use the BAS second edition with the Family Child Care Environment Rating Scale (FCCERS-3 or FCCERS-R) for a comprehensive picture of your family child care learning environment and the business and professional practices that support the program.**

**In their first three years of life, babies face the most complex learning endeavor they will ever undertake as human beings: They learn to talk. Now, as researchers make new forays into the mystery of the development of the human brain, Golinkoff and Hirsh-Pasek, both developmental psychologists and language experts, offer parents a powerfully insightful guidebook to how infants—even while in the womb—begin to learn language. Along the way, the authors provide parents with the latest scientific findings, developmental milestones, and important advice on how to create the most effective learning environments for their children. This book takes readers**

**on a fascinating, vitally important exploration of the dance between nature and nurture, and explains how parents can help their children learn more successfully.**

"Maguire-Fong has updated her groundbreaking book designed to assist pre- and inservice professionals working with infants and their families. Each chapter draws from research and real-life infant care settings to provide valuable insights into how to design an infant care program, plan curriculum, assess learning, and work with families"--

The assessment of young children's development and learning has recently taken on new importance. Private and government organizations are developing programs to enhance the school readiness of all young children, especially children from economically disadvantaged homes and communities and children with special needs. Well-planned and effective assessment can inform teaching and program improvement, and contribute to better outcomes for children. This book affirms that assessments can make crucial contributions to the improvement of children's well-being, but only if they are well designed, implemented effectively, developed in the context of systematic planning, and are interpreted and used appropriately. Otherwise, assessment of children and programs can have negative consequences for both. The value of assessments therefore requires fundamental attention to their purpose and the design of the larger systems in which they are used. Early Childhood Assessment addresses these issues by identifying the important outcomes for children from birth to age 5 and the quality and purposes of different techniques and instruments for developmental assessments.

Early childhood is a crucial stage in a child's life, and aspects of the environment in the physical, social-emotional, cognitive, and health and safety domains all play important roles in shaping children's development during these early years. Having a valid and reliable measure of the quality of these aspects of children's care settings is critical. The Early Childhood Environment Rating Scale (ECERS-3) is the leading research-based instrument for examining these

## Where To Download Infant Toddler Environment Rating Scale Iters

influential global factors that directly impact children in early childhood environments. In this new guide, readers will find an in-depth description of both the conceptual model underlying the ECERS-3 and innovative ways of analyzing data for a fuller understanding of what can be done with the scale and why it is integral to the evaluation of early care and education. The authors analyze a large database of classroom observations to help ECERS-3 users better understand, interpret, and utilize their own findings. Readers will also see how components of their ECERS-3 data relate to one another, within and across subscales, and within the scale as a whole. A Guide to Analyzing and Interpreting ECERS-3 Data will assist program directors, agency administrators, preK-K teaching coaches/mentors, school principals, researchers, and others who use the ECERS-3 to more successfully document, interpret, and analyze the quality of essential influential factors in an early learning setting. This resource will help guide program improvement initiatives with insight into what is needed for children's development and learning. Book Features: Provides a framework for thinking about how early childhood care and education learning environments fit into the larger picture of influences on children's development. Presents a theory of change that combines understanding how children learn and develop with how early education and care affect long-term outcomes. Analyzes what ECERS-3 data looks like for a large sample of classrooms and by different child and teacher characteristics. Aimed at academic, professional and general readers, Bush, city, cyberspace provides a snapshot of the state of Australian children's and adolescent literature in the early twenty-first century, and an insight into its history. In doing so, it promotes a sense of where Australian literature for young people may be going and captures a literary and critical mood with which readers in Australia and beyond will identify. The title of the work is intended to capture the fact that the field has changed dramatically in the century and a half that 'Australian children's literature' has existed, from the bush myths and heroism that inform the past and the present, through the recognition that the vast majority of authors and readers live in cities, to the third wave of 'cyberliterature' that incorporates multimedia, hypertext, weblinks and e-books - none of which lessens the enduring enthusiasm of practitioners and readers for books. Bush, city, cyberspace is not meant to be an encyclopedic volume. Rather, well-known, recent and/or award-winning works have been emphasised, with the addition of others where these help to illuminate particular points. The book is similar in coverage and approach to Australian Children's Literature: An Exploration of Genre and Theme, written by the same three authors and

## Where To Download Infant Toddler Environment Rating Scale Iters

published by the Centre for Information Studies in 1995. In the intervening period, much has changed in the field, notable examples including the blurring of the dividing line between 'quality' and 'popular' literature; the blending of genres; the rise of a truly indigenous literature; the demise, to a significant extent, of 'Outbackery' in fiction; the acceptance of multiculturalism as the norm; and the advent of the literature of cyberspace, with new methods, and the sheer speed, of communication between writer and reader. All these trends, and others, are reflected in this work.

Featuring a new spiral binding, the updated ITERS-R offers more practical assistance in the form of additional notes for clarification and an Expanded Score Sheet, which incorporates notes and tables to assist in scoring. However, the items and indicators remain the same as in the original ITERS-R. Designed for use in center-based child care programs for infants and toddlers up to 30 months of age, the ITERS-R can be used by program directors for supervision and program improvement, by teaching staff for self-assessment, by agency staff for monitoring, and in teacher training programs. The established reliability and validity of the scale make it particularly useful for research and program evaluation.

"The guide offers a framework--based in the theoretical roots of the Bank Street approach--for planning and carrying out work with young children."

A practical guide to early childhood curriculum: linking thematic, emergent and skill-based planning to children's outcomes.

Perspectives miniseries focuses on teacher and family perspectives of early childhood education and care from 19 different countries around the world. The aim of this volume is to articulate the key components of teacher education and family practices that impact young children's education and care. Each country featured in this volume presents its own unique perspective in relation to the cultural and societal constraints around teacher training and/or family practices and the thinking around those practices that are important for early childhood development. Offering a unique insight into how teachers and families work together in different countries, the book is essential reading for early childhood educators, researchers, early childhood organisations, policy makers and those interested to know more about early childhood within an international perspective.

The long-anticipated new version of the internationally recognized Early Childhood Environment Rating Scale®, ECERS-3, focuses on the full range of needs of preschool- and kindergarten-aged children. This widely used, comprehensive assessment tool measures both environmental provisions and teacher-child interactions that affect the broad developmental needs of young children, including: Cognitive Social-emotional Physical Health and safety ECERS-3 also includes additional Items assessing developmentally appropriate literacy and math activities. Designed for preschool, kindergarten, and child care classrooms serving children 3 through 5 years of age, ECERS-3: Provides a smooth transition for those already using ECERS-R. Emphasizes the role of the teacher in creating an environment conducive to developmental gains. Is designed to predict child outcomes more accurately and with greater precision. Provides a stronger method of distinguishing between good and truly excellent programs. Offers a complete training program with ongoing support available at the Environment Rating Scales Institute (ERSI) website ([www.ersi.info](http://www.ersi.info)). ECERS-3 is appropriate for state and district-wide QRIS and continuous improvement; program evaluation by directors and supervisors; teacher self-evaluation; monitoring by agency staff; and teacher education. The established reliability and long term evidence of validity of the ERS family of instruments make this new version of ECERS particularly useful for RTTT-ELC accountability and research. Suitable for use in inclusive and culturally diverse programs, ECERS-3 subscales evaluate: Space and Furnishings Personal Care Routines Language and Literacy Learning Activities Interaction Program Structure

Physical development is a key component of the curriculum in the great majority of countries. But so far there has been no valid means of assessing the quality of the child's physical experience or the pedagogy and environmental quality of those physical experiences. The Movement Environment Rating Scale (MOVERS) is a new method of measuring the quality of environment and pedagogy in which young children are encouraged to move and be physically active. It applies the methodology used in the ECERS-E and SSTEWS rating scales, making it easy for educators already familiar with these well-established scales to adopt. MOVERS has four sub-scales: \* Curriculum, environment and resources for physical development \* Pedagogy for physical development \* Supporting physical activity and critical thinking \* Parents/carers and staff MOVERS is an invaluable tool for research, self-evaluation and improvement, audit, and regulation.

INFANTS AND TODDLERS: CAREGIVING AND RESPONSIVE CURRICULUM DEVELOPMENT, 9th Edition, guides readers through the acquisition of skills necessary to provide high-quality care for infants and toddlers in any educational setting. This edition's new subtitle better reflects the book's goal of providing appropriate caregiving and educational techniques, as well as curriculum ideas, for infants and toddlers from birth to age three. Overviews of key child care philosophies as they relate to the child, the caregiver, and parent involvement are presented along with case studies and lesson plans that help students translate theory into practice. Linking Thematic, Emergent, and Skill-based Planning to Children's Outcomes

East Asia is normally identified as a group of countries lying along the western edge of the Pacific Ocean, but in recent years scholars have begun thinking about a new East Asia that is a community rather than a set of sovereign states. This regional community is a theoretical notion variously defined on the basis of economic or political relations, philosophical orientations, language or other criteria, with each standard producing a different set of boundaries. This book looks at the new East Asia from a Northeast Asian perspective, considering it both as a theoretical construct and a practical reality. The authors are Asian Studies specialists, mainly from Japan but with contributions from Korea and the United States, and they consider the trade and economic interaction, diplomacy, and security arrangements of East Asia. Prepared as part of a five-year research program conducted by Waseda University's 21st Century Center of Excellence for the Creation of Contemporary Asian Studies, the essays are published here in English for the first time.

A text for students taking courses in Assessment and Early Childhood Special Education, as well as professionals in the field, who work with families and young children, birth to age three.

Combines and resets the classic tales of Rapunzel and Snow White in the Northern Piney Woods of Alaska, where a prince riding a white moose tries to rescue a long-haired beauty who has been poisoned by a witch.

This new book in the ERS® Family presents best practices for coaches to use in their work with teachers and administrators to help them improve classrooms and teaching practices. The author includes guidance and activities for facilitating group meetings, professional learning communities, and staff workshops. Appropriate for use with ECERS-3 and ECERS-R.

A Detailed Guide in Words and Pictures to be Used with the ECERS-R

***Building on extensive feedback from the field as well as vigorous new research on how best to support infant and toddler development and learning, the authors have revised and updated the widely used Infant/Toddler Environment Rating Scale. ITERS-3 is the next-generation assessment tool for use in center-based child care programs for infants and toddlers up to 36 months of age. ITERS-3 focuses on the full range of needs of infants and toddlers and provides a framework for improving program quality. Further, the scale assesses both environmental provisions and teacher-child interactions that affect the broad developmental milestones of infants and toddlers, including: language, cognitive, social-emotional and physical development, as well as concern for health and safety. ITERS-3 is appropriate for state- and district-wide QRIS and continuous quality improvement, program evaluation by directors and supervisors, teacher self-evaluation, monitoring by agency staff, and teacher training programs. The established reliability and validity of the scale make it particularly useful for research and program evaluation. While the approach to assessing quality and the scoring process remain the same for the new ITERS-3, users will find the following improvements informed by extensive use of the ITERS in the field and by the most recent research: Enhanced focus on interactions and the role of the teacher. Six new language and literacy Items. A new Item on beginning math experiences. Expanded age range to include children from birth to 36 months. A new approach to scoring based solely on observation of ongoing classroom activity (3-hour time sample). The elimination of the parents/staff subscale and teacher interviews, freeing up time for observing more actual classroom practice. Improved indicator scaling, providing more precise and useful scores for use in professional development and self-improvement. Reduced emphasis on the number of materials, along with greater emphasis on how materials are used to encourage learning. Suitable for use in inclusive and culturally diverse programs, ITERS-3 subscales evaluate: Space and Furnishings Personal Care Routines Language and Books Activities Interaction Program Structure***

***The activities in this 24-page workbook prepare instructors to accurately use the ITERS-R, including explanations for the scoring system, terms used throughout the Scale, protocols for observation, sample situations for scoring practice, and more. This Workbook is to be used in***

*conjunction with the Video Observation for the ITERS DVD, as part of a complete training package. Each participant will require a personal copy of the Video Guide and Training Workbook, which can be reproduced for use in the classroom for educational purposes only. These multimedia packages demonstrate how to use the ECERS -- R, FDCRS, and ITERS. Each training package contains an interactive videotape and an Instructor's Guide, which explains how to present the various training activities and provides answers and explanations for any questions that may arise. A 16-page Video Guide and Training Workbook, containing training activities, is sold separately. Each participant will require a personal copy of the Video Guide and Training Workbook, which can be reproduced for use in the classroom for educational purposes only.*

*Gladstone focuses on the public side of the statesman's life and on those aspects of his private life - such as his religious beliefs and family life - which most affected his career. Besides reflecting the current state of the debate, this study draws on the author's own work in progress on various aspects of Victorian liberalism, including political charisma and nationalism. With its thematic approach, Dr Biagini's short, clear analysis offers an exciting introduction and a flexible teaching aid, with a guide to further reading. Includes Part I of Executive Order 12674 (April 12, 1989) & 5 CFR Part 2635 Regulation (August 7, 1992). Covers: gifts from outside sources, conflicts of interest, impartiality in performing official duties, seeking other employment, misuse of position, and other prohibited activities. Also includes related statutory authorities.

This quick-guide introduces teachers to the 8 dimensions of CLASS and includes practical classroom tips and strategies for implementation. Featuring a spiral binding, the updated Early Childhood Environment Rating Scale, ® ECERS-R, offers more practical assistance in the form of an Expanded Score Sheet (which contains a worksheet) and additional notes for clarification to improve accuracy in scoring. However, the indicators remain the same as in the original ECERS-R. Designed for preschool, kindergarten, and child care classrooms serving children 2 through 5 years of age, this widely used program quality assessment instrument can be used by program directors for supervision and improvement, by teaching staff for self-assessment, by agency staff for monitoring, and in teacher training programs. The established reliability and validity of the ECERS-R make it particularly useful for research and program evaluation. Convenient Organization in seven subscales Space and Furnishings Personal Care Routines Language-Reasoning Activities Interaction Program Structure Parents and Staff Each of the 43 items is expressed as a 7-point scale with indicators for 1 (inadequate), 3 (minimal), 5 (good), and 7 (excellent). Notes for clarification and sample observations are included to improve accuracy in scoring. An introductory section gives detailed information about the rationale for the ECERS-R, the process of revision, and the reliability and validity of the scale. Full instructions for administration and scoring, as well as an Expanded Scoresheet that may be photocopied, are included with the scale.

The 35 items in the ITERS are divided into seven categories: Furnishings and Display for Children -- Personal Care Routines -- Listening and Attention -- Learning Activities -- Interactions -- Program Structure -- Adult Needs.

Toward a Regional Community

The Four Curricular Subscales Extension to the Early Childhood Environment Rating Scale (ECERS-R)

***As a developmental psychologist with a strong interest in children's response to the physical environment, I take particular pleasure in writing a foreword to the present volume. It provides impressive evidence of the concern that workers in environmental psychology and environmental design are displaying for the child as a user of the designed environment and indicates a recognition of the need to apply theory and findings from developmental and environmental psychology to the design of environments for children. This seems to me to mark a shift in focus and concern from the earlier days of the interaction between environmental designers and psychologists that occurred some two decades ago***

*and provided the impetus for the establishment of environmental psychology as a subdiscipline. Whether because children-though they are consumers of designed environments are not the architect's clients or because it seemed easier to work with adults who could be asked to make ratings of environmental spaces and comment on them at length, a focus on the child in interaction with environments was comparatively slow in developing in the field of environment and behavior. As the chapters of the present volume indicate, that situation is no longer true today, and this is a change that all concerned with the well-being and optimal functioning of children will welcome.*

*What are the components of high-quality after-school care for children ages 5-12? How can we evaluate these programs? These are the challenges facing caregivers, schools, agencies, and parents as after-school programs proliferate. The School-Age Care Environment Rating Scale®, Updated Edition provides an easy-to-use resource for defining and assessing the quality of both public and private programs caring for school-age children during out-of-school time. This updated, spiral-bound edition is re-formatted so that each Item appears on its own page, along with Notes for Clarification and Questions. The expanded Scoresheet can be copied from the book or downloaded from the TC Press website: [www.tcpres.com](http://www.tcpres.com). Selected revised Items make scoring more accurate and informative. The SACERS Updated Edition consists of 47 items, organized under 7 categories: Space and Furnishings Health and Safety Activities Interactions Program Structure Staff Development Special Needs Supplementary Items The SACERS Updated Edition is designed to be comprehensive in coverage and easy to use. Instructions for using the scale provide options for self-assessment in addition to formal assessments. Who should use the SACERS? Program directors Organizations, states, and agencies doing QRIS and continuous improvement evaluations School districts Program funders School principals Community-based out-of-school programs States receiving Race to the Top funds Teachers Teacher educators Researchers Shows illustrations of flowers, and describes the characteristics of each plant ECERS-E is designed to be used with the Early Childhood Rating Scale-Revised (ECERS-R), an internationally recognized measure of quality in education and care written by Thelma Harms, Richard M. Clifford, and Debby Cryer. It not only complements the ECERS-R but extends the scales to provide additional insights into important aspects of literacy, mathematics, science and environment, as well as practices related to issues of diversity. Given the current focus on emerging literacy and numeracy skills, the ECERS-E provides unique guidance on the kinds of environments that enhance learning in preschool*

**settings. The curriculum domains within the scales bear important relationships to children's (age 3-5) cognitive and social/behavioral developmental outcomes. Using the ECERS-E alongside the ECERS-R gives users a more complete picture of what a high-quality early childhood education program can look like. It can be used by program directors, teaching staff, agency staff, and in teacher training programs. Convenient organization: Literacy Items: Print in the environment Book and literacy areas Adults reading with children Sounds in words Emergent writing/mark making Talking and listening Mathematics Items: Counting and application of counting Reading and representing simple numbers Activities: Shape Activities: Sorting, matching and comparing Science and Environment Items: Natural materials Areas featuring science/science materials Activities: Non living Activities: Living processes Activities: Food preparation Diversity Items: Planning for individual learning needs Gender equality and awareness Race equality and awareness**
