+ ... + an_{xn} of algebra. The book gathers results concerning linear operators defined in general spaces of a certain kind, principally in Banach spaces, examples of which are: the space of continuous functions, that of the p th-power-summable functions, Hilbert space, etc. The general theorems are interpreted in various mathematical areas, such as group theory, differential equations, integral equations, equations with infinitely many unknowns, functions of a real variable, summation methods and orthogonal series. The city-sized, deep-space cruise ship "Infinity 8" stops halfway en route between the Milky Way and Andromeda, blocked by a massive field of debris containing wreckage and artifacts from countless planets, cultures, and possibly dimensions. The captain of the ship calls upon eight of the ship's top security to investigate the anomaly, each one sent out in a parallel time loop to collect information which can then be assembled to hopefully discover the truth before disaster erupts. Each time loop lasts only eight hours, at which
