

Information Please Culture And Politics In The Age Of Digital Machines

As a contribution to cultural policy studies, this book offers a uniquely detailed and comprehensive account of the historical evolution of cultural policies and their contestation within a single democratic polity, while treating these developments comparatively against the backdrop of contemporaneous influences and developments internationally. It traces the climate of debate, policies and institutional arrangements arising from the state's regulation and administration of culture in Ireland from 1800 to 2010. It traces the influence of precedent and practice developed under British rule in the nineteenth century on government in the 26-county Free State established in 1922 (subsequently declared the Republic of Ireland in 1949). It demonstrates the enduring influence of the liberal principle of minimal intervention in cultural life on the approach of successive Irish governments to the formulation of cultural policy, right up to the 1970s. From 1973 onwards, however, the state began to take a more interventionist and welfarist approach to culture. This was marked by increasing professionalization of the arts and heritage, and a decline in state support for amateur and voluntary cultural bodies. That the state had a more expansive role to play in regulating and funding culture became a norm of cultural discourse.

Many political parties base their political action and election program on an ideology. In social studies, a political ideology is a certain ethical set of ideals, principles, doctrines, myths or symbols of a social movement, institution, class, and/or large group that explains how society should work, and offers some political and cultural blueprint for a certain social order. A political ideology largely concerns itself with how to allocate power and to what ends it should be used. Some parties follow a certain ideology very closely, while others may take broad inspiration from a group of related ideologies without specifically embracing any one of them. The popularity of an ideology is in part due to the influence of moral entrepreneurs, who sometimes act in their own interests. Political ideologies have two dimensions: 1.Goals: How society should be organized. 2.Methods: The most appropriate way to achieve this goal. An ideology is a collection of ideas. Typically, each ideology contains certain ideas on what it considers to be the best form of government (e.g. democracy, autocracy, etc.), and the best economic system (e.g. capitalism, socialism, etc.). Sometimes the same word is used to identify both an ideology and one of its main ideas. For instance, "socialism" may refer to an economic system, or it may refer to an ideology which supports that economic system. Political ideology is a term fraught with problems, having been called "the most elusive concept in the whole of social science"; however, ideologies tend to identify themselves by their position on the political spectrum (such as the left, the center or the right), though this is very often controversial. Finally, ideologies can be distinguished from political strategies (e.g. populism) and from single issues that a party may be built around (e.g. opposition to European integration or the legalization of marijuana). This book attempts to divide the ideologies found in practical political life into a number of groups; each group contains ideologies that are related to each other. The names do not necessarily imply some hierarchical order or that one ideology evolved out of the other. They are merely noting the fact that the ideologies in question are practically, historically and ideologically related to each other. One ideology can belong to several groups, and there is sometimes considerable overlap between related ideologies. Also, keep in mind that the meaning of a political label can differ between countries and that parties often subscribe to a combination of ideologies. This book gives an overview of the many ideologies that form the backbone of the many types of political systems that exist. Also read the companion volume "The Many Forms of Government" at: <https://wwwcreatespace.com/6057437> This book is designed to be a general overview of the topic and provide you with the structured knowledge to familiarize yourself with the topic at the most affordable price possible. The level of discussion is that of Wikipedia. The accuracy and knowledge is of an international viewpoint as the edited articles represent the inputs of many knowledgeable individuals and some of the most currently available general knowledge on the topic based on the date of publication.

Americans today are being played, Big Time! The average voter has become a pawn in a high-stakes game of political maneuvering and chicanery that has moved beyond mere competition and challenge to something more closely resembling combat. Behind every sound-bite or online news byte is a surreptitious attempt to shape public opinion and spin events in a game of one-upmanship.

This book has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. So that the book is never forgotten we have represented this book in a print format as the same form as it was originally first published. Hence any marks or annotations seen are left intentionally to preserve its true nature.

This book is DEDICATED TO: The eradication of FEAR in America-as FDR articulated: "nameless, unreasoning, unjustified terror which paralyzes

needed efforts to convert retreat into advance." In short, fear is the mother of all cancers on the body politic of America.....i.e., fear is a wall to keep the Mexicans out, and drives our insidious racism....and the pernicious fear resulting from McCarthyism still hangs like a black cloud over and cripples America to this day, resulting in our Third World healthcare system, and Job Creation--and is the parent of the pervasive hate in America today....to illustrate: I didn't write the following. It is a cut and paste from FACEBOOK, or some blog [would like to give credit if knew the author]--but it is so on target regarding how "fear" is driving Conservative policy in America today-i.e., is undermining America and our progress-and relegating America to a Third World country status, rather than a world leader-"Conservatives are such cowards: they are afraid of gay people getting married or serving in the military; they are afraid of bringing terrorists to super max prisons in the US from which no one has ever escaped; they are afraid of the boy scouts letting gay kids in; they are afraid of everyone voting and are constantly suppressing the vote under some bogus voter fraud theory; they are afraid of letting students vote at their universities; they are afraid of women having the right to choose; they even are afraid of women getting contraception [the real issue actually is a women's agency and control over their bodies]; they are afraid of immigration reform leading to citizenship because they are afraid of-- name whatever reason; they are afraid of mandating gun purchasers to undergo background checks for crazy people and terrorists; they are afraid of people smoking pot; they are afraid of climate change being real and contradicting their beloved Bible; they are afraid of legitimate campaign reform; they are afraid of Muslims; they are afraid of blacks; they are afraid of atheists; they are afraid of hippies; they are afraid of socialists; they are probably still afraid of monsters under their beds; they are just rank cowards and keep making things up to be afraid of."

Reproduction of the original: Addresses by Henry Drummond

In *What's the Matter with the Internet?*, leading cultural theorist Mark Poster offers a sophisticated and astute assessment of the potential the new medium has to redefine culture and politics. Avoiding the mindless hype and meaningless jargon that has characterized much of the debate about the future of the Web, he details what truly distinguishes the Internet from other media and the implications these novel properties have for such vital issues as authorship, national identity and global citizenship, the fate of ethnicity and race, and democracy. Arguing that the Internet demands a social and cultural theory appropriate to the specific qualities of cyberspace, Poster reformulates the ideas of thinkers associated with our understanding of post-modern culture and the media (including Foucault, Deleuze, Heidegger, Baudrillard, and Derrida) to account for and illuminate the virtual world, paying particular attention to its political dimensions and the nature of identity. In this innovative analysis, Poster acknowledges that although the colonization of the Internet by corporations and governments does threaten to retard its capacity to bring about genuine change, the new medium is still capable of transforming both contemporary social practices and the way we see the world and ourselves.

Because of the many roles he has played in the country, *Looking Back* is much more than Dr. Sama Banya's life story. In a lively and entertaining manner, he takes the reader through the chequered history of Sierra Leone from the colonial era to the present providing, along the way, accounts of the origin of Kailahun, his home town, the Kissy/Mende chiefs from whom he descends, life in Bo School where he had the early part of his secondary school education, as well as insights into the workings of the civil service in his day. A physician by profession, Dr. Sama Banya is best known as a politician. He served as a cabinet minister under two presidents, and his deep knowledge of political machinations in Sierra Leone as seen from both sides of the parliamentary divide, makes this autobiography an altogether fascinating read.

International Relations scholars have traditionally expressed little direct interest in addressing time and temporality. Yet, assumptions about temporality are at the core of many theories of world politics and time is a crucial component of the human condition and our social reality. Today, a small but emerging strand of literature has emerged to meet questions concerning time and temporality and its relationship to International Relations head on. This volume provides a platform to continue this work. The chapters in this book address subjects such as identity, terrorism, war, gender relations, global ethics and governance in order to demonstrate how focusing on the temporal aspects of such phenomena can enhance our understanding of the world. Contributors: Andrew Hom, Christopher McIntosh, Liam Stockdale, Alasdair McKay,

Shahzad Bashir, Kevin K. Birth, Valerie Bryson, Kathryn Marie Fisher, Robert Hassan, Caroline Holmqvist, Kimberly Hutchings, Tim Luecke, Tom Lundborg, Tim Stevens and Ty Solomon.

The Plot of the Book Title: Revolution in Wazobia: The Revolutionary Vision of the Triumph of a Triumvirate Written in 407 pages including the preliminary pages, 14 Chapters and a Postscript Copyright: Anene Nwuzor, 2013, Published in 2015 Publishers: Ann's Indulgence Limited (AIL), Abuja, Nigeria. The book is a historical fiction for a general readership. The author, Anene Nwuzor, used a fictional approach to deal with realities in Africa. Bad leadership and corruption have contributed to having most of the African countries falling behind with failed education, economic and socio-political systems. Just like many innovations, which come with imaginations turned into clear visions, the author put up a challenge to a possibility, which with commitment can be brought to reality. Just a reminiscent of the saying, 'with imagination one can fly', with his vision in order to inspire in the people a rethink, hope and confidence for a change towards for growth and development of African countries. The author's analogy of the prevailing pathetic state of African countries, using an imaginary country in this book started in his earlier book; Educating for Democracy in Nigeria, a psycho-socio analysis, which specifically analysed the systems' failure in Nigeria. The book pitched from helping readers in understanding human and developmental psychology went on explaining to readers what contributed to the systems' abnormalities. With an unassuming boldness, the author in this new book traced the need for social change, reformation of minds and use of scientific innovation (Nanotechnology) to offer what will help change the systems. While some people have given up hope on a change to normal standard systems, some have the notion that for the countries in Africa, if at all a positive change will come, it will come with revolution, which has been mostly viewed as one of violence, bloodshed. However, the author in another different stroke daringly offered a practical solution on how the needed change can happen. Committed to impacting on societal growth and development, he reaffirmed the need for a radical change-not one of bloodshed-but in attitude with Revolution in Wazobia. Despite portraying the disheartening tales of abnormal things that have become normal things, which people seem not working on changing but rather devising means to living with or leaving for some other foreign lands, Revolution in Wazobia created a fascinating and mind-boggling thriller of the tales that make readers to laugh hilariously (this is possibly to nerve the readers while exposing the weak structure of the educational, economic, social and political institutions), but then the readers pause and think. The book somewhat taught what democratic leadership and followership should offer. The author found a figure, a woman, Andora, who despite the odds surrounding her sexuality-in most African cultures is subjected for no just cause to social, economic and moral deprivation-triumphed along with two other major characters. They promoted an ideology and a movement that helped change the people's executive, legislature and judiciary systems. Nwuzor tactically employed the skills of a teacher, a historian, a psycho-socio analyst and many years of experience as a researcher to analyse the behaviour of the polity in most of the African countries. The story completed in 2013, in simple past tense tells of a modest future triumph for Africans. His work depicted with utmost precision what played out in Nigeria's 2015 general election. The work is a result of thorough analysis, and thus deemed worth reading for the actualization of its actual vision. It has an audio and e-book versions. Focusing on cultural values and norms as they are translated into politics and policy outcomes, this book presents a unique contribution in combining research from varied disciplines and from both the developed and developing world. This collection draws from multiple perspectives to present an overview of the knowledge related to our current understanding of climate change politics and culture. It is divided into four sections - Culture and Values, Communication and Media, Politics and Policy, and Future Directions in Climate Politics Scholarship - each followed by a commentary from a key expert in the field. The book includes analysis of the challenges and opportunities for establishing successful communication on climate change among scientists, the media, policy-makers, and activists. With an emphasis on the interrelation between social, cultural, and political aspects of climate change communication, this volume should be of interest to students and scholars of climate change, environment studies, environmental policy, communication, cultural studies, media studies, politics, sociology.

When you're running for local office for the first time, there are plenty of mistakes you can make. The good thing is that you're not the first person ever to face the challenges of running for office - even though sometimes it might seem like it. In this book, Craig W. Turner collects stories, advice, warnings and best practices from local candidates from around the country who have been there and done that. They've already seen what you're about to see, and they've generously shared their experiences for the benefit of you and other first-time candidates for local office. This is no poli-sci class. This is "in the trenches" life experience. Everyone interviewed for this book as part of The Campaign Coach Podcast, has run and won at least one election. Some are now retired, some have moved on to higher office, and some are still serving in the capacity we discussed in their interview. In these pages, you will find insights that no guidebook or online course can give you - they will inspire you, and scare you, and motivate you and smack you in the face with a reality check. But, they will also make you a stronger candidate. Whether it's talking with voters, fundraising, understanding local government policy, promoting your candidacy or even knowing how to best serve your community, learning from these people's experiences - and avoiding mistakes that they've already made for you - will give you a leg up on any opponent.

A practical, hands on guide to getting involved in the political process from the precinct to the general election. The Guide covers organization, fundraising, public relations, on and offline candidate and issue promotion, social and mobile media and overall campaign strategy. The Guide is perfect for the novice and the professional political activist or potential candidate or campaign worker. If you are interested in being successfully involved in politics, advocating an issue or running for office you must read this book!

Between 1512 and 1570, Florence underwent dramatic political transformations. As citizens jockeyed for prominence, portraits became an essential means not only of recording a likeness but also of conveying a sitter's character, social position, and cultural ambitions. This fascinating book explores the ways that painters (including Jacopo Pontormo, Agnolo Bronzino, and Francesco Salviati), sculptors (such as Benvenuto Cellini), and artists in other media endowed their works with an erudite and self-consciously stylish character that made Florentine portraiture distinctive. The Medici family had ruled Florence without interruption between 1434 and 1494. Following their return to power in 1512, Cosimo I de' Medici, who became the second Duke of Florence in 1537, demonstrated a particularly shrewd ability to wield culture as a political tool in order to transform Florence into a dynastic duchy and give Florentine art the central position it has held ever since. Featuring more than ninety remarkable paintings, sculptures, works on paper, and medals, this volume is written by a team of leading international authors and presents a sweeping, penetrating exploration of a crucial and vibrant period in Italian art.

Information Please advances the ongoing critical project of the media scholar Mark Poster: theorizing the social and cultural effects of electronically mediated information. In this book Poster conceptualizes a new relation of humans to information machines, a relation that avoids privileging either the human or the machine but instead focuses on the structures of their interactions. Synthesizing a broad range of critical theory, he explores how texts, images, and sounds are made different when they are mediated by information machines, how this difference affects individuals as well as social and political formations, and how it creates opportunities for progressive change. Poster's critique develops through a series of lively studies. Analyzing the appearance of Sesame Street's Bert next to Osama Bin Laden in a New York Times news photo, he examines the political repercussions of this Internet "hoax" as well as the unlimited opportunities that Internet technology presents for the appropriation and alteration of information. He considers the implications of open-source licensing agreements, online personas, the sudden rise of and interest in identity theft, peer-to-peer file sharing, and more. Focusing explicitly on theory, he reflects on the limitations of critical concepts developed before the emergence of new media, particularly globally networked digital communications, and he argues that, contrary to the assertions of Michael Hardt and Antonio Negri, new media do not necessarily reproduce neoimperialisms. Urging a rethinking of assumptions ingrained during the dominance of broadcast media, Poster charts new directions for work on politics and digital culture.

This Handbook provides a complete survey of the vibrant field of political sociology. Part I explores the theories of political sociology. Part II focuses on the formation, transitions, and regime structure of the state. Part III takes up various aspects of the state that respond to pressures from civil society.

U.S. foreign policy is being sold; not just altered, shifted, manipulated, or influenced – sold. Every single day the agents of foreign governments work to not only monitor U.S. foreign policy, but to actively change and even create it. They meet with policymakers, donate to their campaigns, write their speeches, and even write legislation. Yet, foreign lobbying garners scant attention, and no book has been written on the subject – until now. Ben Freeman, an expert on foreign influence in U.S. politics, goes inside the seedy underbelly of this half billion dollar foreign lobbying industry. Through exhaustive analysis he shows how foreign money infects the U.S. political process – systematically undermining U.S. foreign policy. The Foreign Policy Auction is an impassioned expose of an industry whose primary goal is bending U.S. politics to the will of foreign governments. It's a sobering realization of how foreign policy is actually made in the U.S. The Auction is open, how much will your government cost today?

Business is about relationships. What's the secret to success? Like many talented business owners, Jack Green thought it was long hours, do-it-yourself dedication, and cut-

throat competition. But he learns how wrong he was when time begins running out for his struggling business. In the middle of a sleepless night, Jack is given a chance to change things when a mysterious visitor appears from the past, promising to deliver nine keys that will salvage Jack's future--the keys to the city of influence. Jack then is thrust into an adventure with an extraordinary group of mentors who teach him the secrets to building strong professional relationships. The City of Influence is a humorous, insightful parable that will leave you ready to roll up your sleeves and change the way you build relationships from the inside out.

The defeat of House Majority Leader Eric Cantor on June 10, 2014, was the most stunning upset in modern political history. Shown by his own polling to be leading by 34 points in the Virginia district he'd represented fourteen years, outspending little-known primary opponent Dave Brat 40-1, Cantor - widely presumed to be the next Speaker - was crushed by eleven points. Typically, the elite media had totally missed the story, buying into the narrative of Cantor-the-inevitable. Meanwhile the Brat campaign was putting together a vast, highly motivated grassroots army that day by day, voter by voter, was exposing Cantor for who he really was: not the staunch 'young gun' conservative he played on TV, but one of the nation's leading RINOs (Republican in Name Only), indifferent to his constituents, deeply self-interested and a key behind-the-scenes Democrat enabler on Obamacare, immigration and spending. The architects of that remarkable, against-all-odds victory were 23-year old Zach Werrell and 24-year old gray Delany. In 'How to Bag a RINO,' they reveal in detail how it was achieved, and why it is a model for similar insurgent GOP campaigns across America as grassroots Republicans fight to take back their party, and the country. "This is the book the Republican Establishment does NOT want you to read" - Peter Schweizer, author of 'Clinton Cash' and 'Throw Them All Out.'

Caution: this book is a document from the future, on how the United States finally split into two independent republics in 2029, and its aftermath. The topic is so sensitive, that its futuristic author must be identified merely as John Doe, Ph.D. Dateline: 2029. The "One Nation, Indivisible," finally divides. - A political satire.

Information Please

*Hey kids, do you want to know how to make all-stars for your baseball league? Or parents, do you feel like the coaches keep passing your child up? Well no more! Or coaches, want drills and ways to motivate your players to get better? Coach Andy Collins is going to tell you everything he knows from his 35 years of youth and adult coaching and watching what works and what doesn't work. It's chock-full of ideas in 86 pages. He'll cover: * How your league chooses all-stars * What all-star selectors are really looking for * 7 tried and true methods of getting better at baseball * But more importantly, little known ways to get the people picking the team to notice you * And how to beat the "politics" that seem to get in the way Year after year kids sit in the stands crying after the all-star teams are announced and they weren't one of the players that were chosen. At the same time the students I've trained do make these same all-star teams. It was then I realized I had the information that the kids in the stands and their parents and coaches were looking for. Wherever there are kids around the world that play youth baseball, there are kids that long to make the league's all-star team. Every year it's the same, kids that desperately want to have their name called out (or see it announced on the list) don't make it, and a little bit of them is hurting deep inside; and they don't know why they were not picked. Little did they know that they could have fairly accurately predicted their chances almost from day one of when the season started. And if they knew what you're about the find out, they could improve enough in skill in the eyes of the all-star selectors as to be a better player or even make the all-star team. The good news is that in this book, there is a way to learn how to make the all-star team for the next upcoming season; and if not then, the following year (if you're willing to listen and follow the advice I give). While I have written this for parents and coaches to learn how this process works and how they can help these youngsters achieve their dreams, this is mostly a book written for the kid who wants to make all-stars, not a book for the parent who wants their kid to make all-stars (there is a difference). And it will be in that voice that this book will be written.*

This book examines the implications of new communication technologies in the light of the most recent work in social and cultural theory and argues that new developments in electronic media, such as the Internet and Virtual Reality, justify the designation of a "second media age". When we make phone calls and use computers, electronic devices mediate how we communicate. In each instance, we exchange symbols and information just as we have since humans began speaking and writing. What, then--besides economy of space and time--differentiates electronic communications from ordinary speech and writing? The difference, Mark Poster argues, is the profound effect electronic mediation exerts on the very way we perceive ourselves and reality. To help decode the linguistic dimensions of our multiple forms of social interaction, he plays upon Marx's theory of the mode of production--the shift to late capitalism has a parallel in the shift from the mode of production to

that of information. Enlisting poststructuralist theory, he links four modes of communication with four poststructuralists: TV ads with Baudrillard, data bases with Foucault, electronic writing with Derrida, and computer science with Lyotard. *Mode of Information* points the way to a poststructuralist strategy for writing history, a framework well suited to unearthing structures of domination and the means to their disruption. "An informed, insightful, provocative account of phenomena that have transformed virtually every area of public and private life on our time."—Robert Anchor, *American Historical Review* "The importance of Poster's book is unmistakable for he skillfully negotiates between and juxtaposes two wide theoretical domains—electronically mediated communications and poststructuralist theory—about which much has been written, but hardly with the acumen that he brings to bear in a long-awaited critical rapprochement."—Charles J. Stivale, *Criticism*

A great American crank, in the best sense of the word, Charles Hoy Fort (1874–1932) spent his life hunting down reports of "anomalous phenomena"—"damned" events such as rains of frogs, cattle mutilations, and UFO sightings—and studying them from a true outsider's perspective, one that characterized even objective science as wearing blinders in its approach to them. In this modern classic of analytical biography, Colin Bennett examines not only the life of this one-man investigator of real-life X-Files but his work as well, likening him to such diverse figures that loom in the cultural imagination as Lee Harvey Oswald and Shakespeare's Hamlet. A must-read for fans of the strange, this riveting book explores why the 20th century, which gave rise to conspiracy-theory philosophies and widespread distrust of social authority, embraced Fort so wholly that his name has been immortalized in the adjective "Fortean." In the course of a delightfully misspent youth, COLIN BENNETT was employed as both a musician and as a mercenary soldier. He was far better at the second than at the first. Educated at Balliol College, Oxford, he is the author of the novels *Infantryman* and *The Entertainment Bomb*, and paranormal nonfiction including *Looking for Orthon*, a biography of George Adamski; *Politics of the Imagination*, a biography of Charles Fort; and *An American Demonology*, about the head of the 1950s UFO-hunting agency Project Blue Book.

United We Stand Divided We Fall

Opposing Trump's Agenda: Essays On Protest And Resistance And What We Can Do To Stop Him

How Today's High-Stakes Political Combat Works

In *United We Stand Divided We Fall* Garn Press has gathered together essays by great scholars and renowned teachers who oppose the direction in which President Trump is leading the country. These are essays, to quote George Lakoff, which frame American values accurately and systemically day after day, telling truths by American majority moral values. These are essays of protest against and resistance to Trump's presidency, to his billionaire cabinet, to the privileging in the White House of white supremacists, the promulgation of "alternate facts," the denigration of media sources, the purges of State Department personnel, the gag orders at the EPA and scientists placed on "watch lists," the travel bans on people from wide swaths of U.S. society and on refugees ... the list is long. They are also essays that tackle the question of what we can do to stop Trump from becoming a fast moving catastrophe. When the hands of the Doomsday Clock were moved closer to midnight, President Trump was named specifically as an existential risk to humanity. There is no doubt that we must all act. The writers of conscience who have written this collection of essays are all actively engaged in opposing President Trump and their writings encourage us to participate in the resistance movement. Read with a pencil in hand. Make notes on what you can do to join aspects of the movement that reflects the needs and concerns of your community. Through social media you can go global while acting locally.

A sophisticated argument about how the internet and communication networks impact on politics, democracy, and identity.

What happens when media and politics become forms of entertainment? As our world begins to look more and more like Orwell's 1984, Neil's Postman's essential guide to the modern media is more relevant than ever. "It's unlikely that Trump has ever read *Amusing Ourselves to Death*, but his ascent would not have surprised Postman."—CNN Originally published in 1985, Neil Postman's groundbreaking polemic about the corrosive effects of television on our politics and public discourse has been hailed as a twenty-first-century book published in the twentieth century. Now, with television joined by more sophisticated electronic media—from the Internet to cell phones to DVDs—it has taken on even greater significance. *Amusing Ourselves to Death* is a prophetic look at what happens when politics, journalism, education, and even religion become subject to the demands of entertainment. It is also a blueprint for regaining control of our media, so that they can serve our highest goals. "A brilliant, powerful, and important book. This is an indictment that Postman has laid down and, so far as I can see, an irrefutable one."—Jonathan Yardley, *The Washington Post Book World*

Tom Meyer combines ancient and modern history, research and personal experience of living with Jews and Arabs in Jerusalem over a period of four years to reveal exciting insights into the humanity, history, religion and politics of the Holy Land as we enter the 21st century. Inside you'll find- - Information to equip you with an introductory knowledge of Middle East culture and religion, with an emphasis on the religious, historical, and political features of Israel and Palestine. - Data to better recognize the culture and religion within

Israel and Palestine in its specific historical and geographical context and how they compare, contrast and relate to one another. - Facts to help you understand and describe important aspects of the various tensions in the Holy Land. - The tools you'll need to acquire the ability to identify and explain popular subjects pertaining to Israel and Palestine and the Middle East at large. Tom Meyer has an MA in the Historical Geography of Israel and another MA in Middle East Culture and Religion from Jerusalem University College. He is currently working towards a PHD. The Life, Work and Ideas of Charles Fort

Each person is given the opportunity to respond to popular culture in a variety of ways. They can condemn, critique, consume or copy. Not only do individuals have this choice, each church has to choose its response to culture as well. What if we were never designed to passively respond to culture, but to create it? God specifically created each person to build a culture that honors Him. We are called to create a culture around us based upon the worship of God. The purpose of this culture is help people engage in worship beyond the corporate worship service. To teach them how to hear and see what God is doing and carry it out in every relationship and situation they encounter. To present something new and more compelling to the world than what they have seen before. This book will help you discover how to create culture by examining Jesus' example and then give you practical application on how to apply it to your life. This book is an invitation to come and discover the path towards creating a culture that acknowledges and worships God.

Fascism vs. Capitalism: The Central Ideological Conflict of Our Times "Fascism" has become a term of general derision and rebuke. It is tossed casually in the direction of anything a critic happens to dislike. But fascism is a real political and economic concept, not a stick with which to beat opponents arbitrarily. The abuse of this important word undermines its true value as a term referring to a very real phenomenon, and one whose spirit lives on even now. Fascism is a specific ideology based on the idea that the state is the ideal organization for realizing a society's and an individual's potential economically, socially, and even spiritually. The state, for the fascist, is the instrument by which the people's common destiny is realized, and in which the potential for greatness is to be found. Individual rights, and the individual himself, are strictly subordinate to the state's great and glorious goals for the nation. In foreign affairs, the fascist attitude is reflected in a belligerent chauvinism, a contempt for other peoples, and a society-wide reverence for soldiers and the martial virtues. Lew Rockwell, in this new volume, examines the starkly contrasting systems of capitalism and fascism, noting pro-fascist trends in recent decades as well as the larger historical trends in the United States and internationally. In Section One, Rockwell focuses on the nature of fascism and its influence in Western society, with a focus on American political and economic institutions. In Section Two, Rockwell examines capitalism as the enemy of, and antidote to fascism. Combining economics, history, and political philosophy, this book doesn't just provide a diagnosis of what ails American and Western society, but also sheds light on how we might repair the damage that has been done, and with the help of the intellectual work of great minds like Murray Rothbard and Ron Paul, we might as a society shed the fascism of our times and look to freedom instead.

During a chance night shift on the cops beat, newsroom assistant Madeleine Harrington stumbles on the corruption story of a lifetime – a plot that would reshape the entire city. She teams up with her dad, a downtrodden columnist at the paper, to unearth the mystery. The muckrakers find the plot goes deeper – and contains more skeletons among the city's powerbrokers – than they imagined.

In this thorough update of one of the classic texts of media and cultural studies, Douglas Kellner argues that mediated culture is now the dominant form of culture which socializes us and provides and plays major roles in the economy, polity, and social and cultural life. The book includes a series of lively studies that both illuminate contemporary culture and society, while providing methods of analysis, interpretation, and critique to engage contemporary U.S. culture. Many people today talk about cultural studies, but Kellner actually does it, carrying through a unique mixture of theoretical analysis and concrete discussions of some of the most popular and influential forms of contemporary media culture. Studies cover a wide range of topics including: Reagan and Rambo; horror and youth films; women's films, the TV-series Orange is the New Black and Hulu's TV series on Margaret Atwood's *The Handmaid's Tale*; the films of Spike Lee and African-American culture; Latino films and cinematic narratives on migration; pop female icons Madonna, Beyoncé, and Lady Gaga; fashion and celebrity; television news, documentary films, and recent work of Michael Moore; fantasy and science fiction, with focus on the cinematic version of *Lord of the Rings*, Philip K. Dick and the *Blade Runner* films, and the work of David Cronenberg. Situating the works of media culture in their social context, within political struggles, and the system of cultural production and reception, Kellner develops a multidimensional approach to cultural studies that broadens the field and opens it to a variety of disciplines. He also provides new approaches to the vexed question of the effects of culture and offers new perspectives for cultural studies. Anyone interested in the nature and effects of contemporary society and culture should read this book.

How Information Shapes our Common Future

Your Choice, Your Voice, Our Future What I am offering Maine is nothing like what others who have run for this position have offered. I have never wanted someone to be my voice, and I do not offer to be yours. I am using this opportunity to shine light on the system that creates a stage for elites and keeps everyone else from having a voice. I am running for Governor of Maine to educate, and if we win, I am smashing the stage so everyone may have their voice heard equally. Our system is disenfranchising, falsely binary, oppressive, and fraught with contention and slavery. We can rise against this or we can continue on the same path. It has been the result of the American system that generation after generation left this nation (and the world) freer and more prosperous than the last. We cast off race-based slavery, we have destroyed the notion that one gender should rule while the other obeys, we had built a nation of rights and freedom... but, we have backslidened. Our nation is not better off than it was a generation ago. We are in unprecedented debt, have resurfaced racism and sexism, we have instilled a class warfare, and we are being oppressed by fascism and authoritarians. Generation X and Millennials have less opportunity, less ability to grow and flourish, and less unity than our grandparents. We have been slowly taken over by a rotting infestation of cronies, puppet masters, propogandists, and dictators. As our nations becomes more centralized, Maine can stand in opposition. We have an opportunity to demonstrate what America has lost. Maine has strong educators, doctors, nurses, social workers, counselors, laborers of all types, and most respectably, we have strong work and moral ethics. Our State has diversity and a will to surpass obstacles and be reveled across the nation and world. We need the will to see an opportunity through the despair. By continuing what we do best, by growing rather than contracting, by embracing innovation and adaptation rather than antiquity and failed ideas, we can guide America back to prosperity. Maine can be the economic engine of tomorrow's America. Through this book, we have covered Education, Healthcare, ideological spectrums, Corrections, Rehabilitation, Culture, Community, politics, Economics, Energy, business, debt, governance, and a slew of other topics. Through this journey, we have delved into what keeps us from growth, how we can overcome oppressing obstruction, and what we could do to drop the shackles and pick up prosperous freedom. Reaching a better future for everyone takes change. Change is not always easy; change is often coupled with fear. We need not fear the future and change when we can be so positively impacted. When we decide to swallow our fear and move toward a better future, we will be unstoppable. I am applying for a job: the executive position of our State of Maine. This is your choice, your voice, our future. Richard Lee Light

5/5 No Compromise is an African centered perspective on solving the x factor in the human equation: $3/5$ slave + x = $5/5$ whole human beings, for Black Americans, specifically, and Black people world wide in general. The book written by Jeff Weaver, is inspired and driven by the divine wisdom of Almighty God, the African Forces (Lwa, Orisa, Obosum) / Holy Spirit and the ancestors. The premise of 5/5 No Compromise is to establish the fact that: 1) The United States Constitution codified the value of Black lives, in Article I. Section 2, Chapter 3 (more popularly known as the "3/5 Clause") as "3/5 of a person." A codification which has never been, expressly, amended or eradicated; and 2) in order for Black victims of the trans Atlantic slave trade, white supremacy and colonialism to establish their genuine human status they must embrace their own traditions, customs and culture, in an autonomous mutual respect based co-existence with their former slave masters and governors. Furthermore, in order to connect the various "splinters" of Black sub-cultures that exist in the US and globally, there must be an establishment of the one cultural thread that exist in common with the genetic heredity of the people in question. For Black Americans and Black people, worldwide, that common cultural thread is the drum pulse which originated in Africa. It is the one cultural element that is powerful and consistent, wherever Black people are heavily populated in the world. The author, Jeff Weaver calls that thread, "drum centered culture" and has identified it as the key element in sowing together the global cultural fabric that will restore Black people to a 5/5 autonomous culture of thriving human beings, with lives that matter.

“ Any history of the political movements of the Muslims will not be complete without Chaudhry Afzal Haq. The conservative elite of Punjab were afraid of him just like all the ruling classes that are afraid of a successful revolution. He was everything in Ahrar, but never accepted any designation in the party. ” “ He was one of the worst enemies of British rule and ready to make an alliance with anyone who was against the British. ” Agha Shorash Kashmiri Rejecting racism, religious intolerance and embracing “ social leveling ” and economic justice, Chaudhry Afzal Haq was a visionary, writer, politician, humanitarian, political prisoner and freedom fighter on behalf of all Indians. He was a moral man who sacrificed his personal needs in the service of his fellow countrymen, regardless of their religious or ethnic background. Pakistan and Untouchability is a lost literary work and message that is a must read for every student of history and politics in the subcontinent of today. This book examines the real underlying historical, economic, religious and political issues of the Indian subcontinent at a moment in time of decision for its people. The debate of why and if a new country of Pakistan should be created or will be created after British rule of India is examined in detail by Afzal Haq. His conclusions remain as relevant today as they were in his time. The working and middle class in India, Pakistan and Bangladesh are still struggling with these same issues in the subcontinent today. Written in 1939 and 1940, while imprisoned in Rawalpindi jail and published in 1941, this book is a culmination of Afzal Haq's lifelong thinking about the key issues facing his country and its peoples while under British rule. About the Author: Chaudhry Afzal Haq was elected twice to Punjab Assembly as a Member of Legislative Assembly starting in 1924. He helped to found Majlis-e-Ahrar, a liberal Muslim political party at the time, working to seek social justice and freedom for all Indians regardless of race or religion. He was later elected as the second President of Majlis-e-Ahrar from 1931-1934. Known as Mufakkir-e-Ahrar “ The Thinker ” by this time, Chaudhry Afzal Haq was in and out of British prisons for over two decades for openly defying the British Government as a political and moral leader. He campaigned and wrote tirelessly focusing his efforts on helping the poor and working class in India during these most desperate of times. His life's work included political action on behalf of the common man, prison reform and human rights for his fellow Indians.

Cultural Studies, Identity and Politics in the Contemporary Moment

This concise, accessible text presents an overview of the relevance of culture for politics. Culture figures prominently in the theories of the great classics such

as Marx, Durkheim and Weber. Recently, the cultural approach to politics has developed quickly, and the concept of political culture has played a role in these developments, particularly given the emergence of large-scale survey research into political value orientations. Seeking to outline this rapid development, the book is divided into three sections: Section I of the book discusses the relevance of cultural perspectives to political analysis including discussion of the most significant concepts and methods. Section II looks at the core elements of political culture - tradition, ethnicity and religion. Section III examines emerging research avenues and opportunities including social capital, value orientations in the postmodern world, newer formulations of political culture such as gender and sexuality and the influence of the environment. Drawing on a wealth of examples and a comprehensive analysis of comparative data, this textbook is essential reading for all students of political culture, research methods, political sociology and comparative politics.

In Alienation Nation, James LaFond, the author of over 10 books and 300 articles on urban survival, offers a guide to defining and surviving our dystopian now. As a committed Darwinist LaFond offers no societal solutions and advocates no political action, but rather offers a guide to living below the political and criminal horizon [which he insists are one in the same] and adopting a practical view of violence and society toward the end of developing sustainable countermeasures that will permit you to avoid and survive crime without falling into the clutches of the judicial system.
