

Inside The Ft An Insight Into The Art Of Journalism

Environmental sustainability practice and research have advanced over the past decade from novelty to near-mainstream status today. During this environmentally critical time period, sustainability practitioner techniques, such as environmental, energy and social auditing, other sustainability information and related systems, and a wide variety of environmental sustainability approaches have been developed, improved and institutionalised, advancing both the practice and research of environmental sustainability management and policy. However, academics and practitioners in the sustainability field still have widely differing perspectives on what a sustainable organisation is or might be, but seldom take the opportunity to share these respective sustainability visions, let alone the multiple ways to achieve them. New Horizons in Research on Sustainable Organisations is intended to bridge this gap between academics and practitioners with cutting-edge research from both groups on progress towards sustainability. After working on sustainability-related projects involving other academics, both research- and practitioner-oriented graduate students, consultants, managers and activists, the lead co-editors of this volume saw the need to encourage information exchanges among differing networks of sustainability stakeholders to create a pathway for researchers and practitioners and the natural environment to address issues of common interest. There are many networks in the general subject area, but the cross-pollination of ideas between academics and practitioners remains sketchy. New Horizons in Research on Sustainable Organisations is intended to present and encourage such cross-pollination. The chapters in this volume are presented in three subsets, generally proceeding from the most "macro" to the most "micro" in terms of perspective and applicability. However, this arbitrary division belies the integration from macro through meso (or mid-range) to micro levels that is apparent in these studies. Macro approaches typically include wider geographic scopes, greater numbers of stakeholders, and more complex explanatory factors than micro approaches. Each chapter adopts one or more particular sustainability world-view and then grounds these and the other chapter elements within actual organisations. Therefore, the reader is advised to envision not a one-dimensional continuum but rather a circle in which the macro view both feeds back and feeds forward to the micro view. This volume addresses a number of intriguing and important sustainable organisation phenomena such as multiple sustainable development perspectives, changing environmental politics, environmental management systems variations, voluntary environmental programme performance, complex adaptive systems, and environmental technology development. Additionally, several models are suggested, such as cultivation, capabilities and business ecology frameworks.

The outcomes of psychoanalysis, as with other psychotherapies, vary considerably. Psychoanalytic Treatment in Adults examines the results of a longitudinal study of change during psychoanalysis, illuminating the characteristics of patients, analysts and analyses which can help to predict outcomes of treatment. Written by experienced psychologists and psychoanalysts, chapters in the book draw upon sixty case studies to consider how patients with very different analytic outcomes respond at both the beginning and end of their analysis. Psychoanalysts used a clinician report measure, the Shedler-Westen Assessment Procedure, to describe a patient at the beginning of psychoanalysis and every six months until the analysis ended. This allowed the authors to learn about changes over analysis and, in turn, improved treatment planning and practice for the well-being of other patients. Chapters explore five outcomes: a negative therapeutic reaction; attrition when the patient drops out; attrition due to external events; mutual agreement between patient and analyst without maximum benefits; and mutual agreement between patient and analyst with maximum benefits. The findings from these chapters will be of interest to researchers and academics in the fields of psychoanalysis, psychotherapy, psychodynamic therapy, psychoanalytic education, psychiatry and psychology. The results should also help clinicians recognize potential problems early in analytic treatments so that they can work more effectively with patients.

With contributions from experts in supported metal catalysis from both the industry and academia, this book presents the latest developments in characterization and application of supported metals in heterogeneous catalysis. In addition to thorough and updated coverage of the traditional aspects of heterogeneous catalysis such as preparation, characterization and use in well-established technologies such as vehicle emission control, the book also includes emerging areas where supported metal catalysis will make significant contributions to future developments, such as fuel cells and fine chemicals synthesis. The second edition of Supported Metals in Catalysis comes complete with new and updated chapters containing important summaries of research in a rapidly evolving field. Very few other books deal with this highly pertinent subject matter and, as such, it is a must-have for anyone working in the field of heterogeneous catalysis. Contents:Preparation of Supported Metal Catalysts (Guido Mul and Jacob A Moulijn)Determination of Dispersion and Crystallite Sizes for Supported Metal Catalysts (J A Anderson, M Fernández-García and A Martínez-Arias)Imaging and Microanalysis of Supported Metal Catalysts in the Analytical Electron Microscope (Andrew A Herzing and Christopher J Kiely)Characterization of Supported Metal Catalysts by Spectroscopic Techniques (M Fernández-García and J A Anderson)Supported Metal Catalysts for Fine Chemicals Synthesis (R P K Wells and J A Anderson)Supported Gold in CO Oxidation, the Water-Gas Shift, and DeSOx Reactions (Jose A Rodriguez)Recent Progress in Supported Metal-Catalysed C1 Chemistry (A Guerrero-Ruiz and I Rodríguez-Ramos)Supported Metals in the Production of Hydrogen (J L G Fierro, M A Peña and M C Alvarez-Galvan)Supported Metals for Application in Fuel Cells (Sergio Rojas, María Victoria Martínez-Huerta and M A Peña)Supported Metals in Vehicle Emission Control (A Martínez-Arias, José C Conesa, M Fernández-García and J A Anderson) Readership: Postgraduate students and academic and industrial researchers working in the area of heterogeneous catalysis.

Keywords:Heterogeneous Catalysts;Catalysis;Supported Metals;Characterization;ReactionsKey Features:Few if any other titles specifically dealing with supported metalsNew edition with updated and new chapters

Disrupt

The Sublime in Kant and Beckett

Freedom in the World, the Freedom House flagship survey whose findings have been published annually since 1972, is the standard-setting comparative assessment of global political rights and civil liberties. The survey ratings and narrative reports on 194 countries and 14 territories are used by policymakers, the media, international corporations, civic activists, and human rights defenders to monitor trends in democracy and track improvements and setbacks in freedom worldwide.

&>Master a complete five-step program for identifying and executing on disruptive business opportunities! Now updated and even more effective, Luke Williams' Disrupt, Second Edition combines the design industry's most powerful "disruptive thinking" techniques with real business implementation discipline. Drawing on his pioneering experience innovating at the legendary frog design (and teaching innovation at NYU), Williams shows exactly how to generate and execute on a steady stream of disruptive strategies. Using updated examples and a book-length case study, Williams shows how the more unexpected an idea, the smaller the number of competitors, and the more successful the company that brings it to market. You'll walk through generating your disruptive hypothesis, defining your disruptive market opportunity, creating multiple disruptive ideas, shaping them into an actionable solution, and persuading key stakeholders to adopt or invest in your solution. Disrupt, Second Edition is for all entrepreneurs, product and marketing managers, R and D specialists, strategists, and senior executives seeking to create disruptive products, services, and customer experiences. It offers you a systematic and proven way to redefine your company's future, stun your industry, and leave your competitors scrambling to catch up.

With every chapter revised and updated, Physics for Diagnostic Radiology, Third Edition continues to emphasise the importance of physics education as a critical component of radiology training. This bestselling text helps readers understand how various imaging techniques work, from planar analogue and digital radiology to computed tomography (CT),

New Horizons in Research on Sustainable Organisations

Supported Metals in Catalysis

Marketing: Essential principles, new realities has been researched, developed and written primarily with the undergraduate and diploma-level student in mind. This student-oriented text, with its relaxed and free flowing language, provides the reader with material of a rigorous academic standard. Each chapter follows a set structure that has been designed to encourage discussion and raise issues for consideration and research: introduction; learning objectives; chapter sub headings - key issues; chapter summary; exercises and questions for review and critical thinking. At the end of the book there are additional notes and references to support student learning. Written by authors from both an academic and practitioner background, this new textbook offers an excellent introduction to the subject for the next generation of marketers and business people. FREE CD ROM FOR LECTURERS The authors have created a unique CD ROM containing both lecture presentation slides and essay questions. This is available on request from the publisher. CONTENTS Introduction What is marketing? The business and marketing environment Ethical marketing and social responsibility Buyer behaviour Segmenting, positioning and targeting Marketing research Marketing and strategy Products and brands Price and pricing strategies Promotion part 1 Promotion part 2 People, physical evidence and process Placement, distribution and logistics Marketing across borders: the international dimension Application: bringing the elements together Notes Reference Index Please view more information on this book, including a sample chapter and detailed, full contents at http://www.kogan-page.co.uk/groucutt

Libya is one of the most important regional actors in the Middle East and North Africa region in terms of its geographical location and geostrategic importance. In 2011, Qaddafi was ousted from power raising the hopes of the Libyan people for a democratic regime. Unfortunately, Libya, one of the most interesting fronts of the Arab insurgencies and revolutions, has disintegrated into a severe civil war and a regional crisis. The reasons behind this are both internal and external. While the clash between the state, non-state, and armed actors within Libya have threatened the internal stability, the intervention of some regional and global actors has incited the conflict further. Authoritarian regimes and pro status-quo states such as the United Arab Emirates (UAE), Saudi Arabia, and Egypt have been against the Arab uprisings as they did not want the will of the people to be reflected in the Middle East and Arab countries' administrations. Within this context, these states did not allow the emergence of an encompassing and pluralist political structure in Libya. Furthermore, most international and regional powers such as France, Russia, and the United States have also been supporting this authoritarian coalition. Haftar, who had little influence during the revolution and lived outside of Libya for a long time, attempted a military coup in 2014 by rejecting the authorities of legitimate political actors in the country, with the support of these states. The Government of National Accord (GNA), which is recognized as the only legitimate representative of the Libyan state and people by many international institutions, most notably the United Nations, suppressed Haftar's coup attempt. However, the abovementioned states continue to invest in Haftar's forces. After having amassed enough armed forces with the support of a large coalition of states, Haftar launched a comprehensive military attack to take over the capital city of Tripoli in April 2019, to offset-up another autocratic regime in Libya. While everyone saw the capital Tripoli passing into the hands of Haftar as inevitable and only a matter of time,turning a blind eye to the situation, Turkey stepped in and upset all the calculations. As a result, Turkey increased its presence in Libya after two memorandums of understanding (MoUs) were signed with the GNA in November 2019. With these two memorandums, Turkey has determined and declared its sea border in the Eastern Mediterranean and made a commitment to the GNA. Accordingly, when needed and requested by GNA, Turkey is ready to provide all kinds of military support. Especially since January 2020, Turkey has supported the GNA militarily and financially in its struggle against Haftar. The GNA forces supported by Turkey defeated the Haftar troops and forced them to withdraw from a large area in the Western part of the country. Turkey, which has altered the whole balance of power in Libya within a short time with the new dynamics, has changed the course of the crisis and the civil war in the country. Haftar and his supporters, who preferred only military methods, had to declare a unilateral ceasefire and to sit down at the diplomatic negotiation table. At the same time, Turkey persuaded some countries that are flirting with both sides to strengthen their relationship with the GNA. Developments in Libya directly influence Turkey, since Libya is a very important country for Turkey in the context of both the history of bilateral relations as well as the regional balance of power. Therefore, since the first days of the revolution, Turkey has been in close relations with the legitimate actors in order to protect the territorial integrity and political independence of the Libyan state. With its support both in the conflict area and at the negotiating table, Turkey ensured that the GNA remains an effective actor. Thus, Turkey has prevented the persons and groups which are under the control of the anti-Turkish coalition during the post-Arab spring period. On the other hand, Turkey has negated all anti-Turkey moves, formations, and processes within the newly emerged strategic regional equation. In this sense, the legitimate Libyan government came to the fore as a regional actor that it can work with. After signing a ceasefire agreement in October 2020, in Geneva, the political peace talks started under the auspices of the United Nations acting envoy to Libya, Stephanie Williams, and the warring sides have reached a preliminary agreement to a roadmap for elections. The two rival sides have agreed to hold both parliamentary and presidential elections in December 2021. If the process is completed successfully, the future of the country will be determined after these elections hopefully with an end to the discord in the country. The Libyan issue is a complex crisis with which many local, regional, and global actors have become involved. Therefore, the resolution of the crisis will only be possible with international consensus. In order to solve the crisis, a negotiation process must begin after securing a sustainable ceasefire agreement, all segments of the Libyan society must be included, and the two sides must reconcile on civil and democratic principles. Only then can a reconstruction of the state and a reform process in political, economic and security spheres be initiated. This issue of Insight Turkey focuses on underscoring both promises of internal reconstruction and challenges fueled by different external actors intervening in the Libyan crisis. This latest issue includes five commentaries and three insightful research articles that explore the Libyan conflict from different perspectives. While some pieces focus on the role of different actors in the crisis, others analyze the reconstruction efforts. While the civil war has pitted Libyans against each other, foreign interventions have hindered the resolution of the civil war. In this regard, Yahia H. Zoubir's commentary presents a coherent framework of the foreign powers involved in the Libyan conflict and their interests. Zoubir argues that unless those foreign powers have achieved their goals in Libya, an end to the civil war anytime soon remains unlikely. Talha Köse and Bilgehan Öztürk provide a rigorous analysis of the external interventions in Libya and the logic behind each intervention, between offensive, defensive, opportunistic, or ideological. Understanding the full picture in Libya requires us to fully grasp the Turkish role and motivation for the Libyan conflict. To do so, İsmail Numan Telci underlines the factors and challenges that made it difficult for Turkey to implement its peaceful plans in Libya and argues that Turkey will continue to be an active supporter of peace and stability in the country. Tarek Megerisi briefly analyzes Europe's relations with post-revolutionary Libya and European policies on Libya to conclude by stating that a continuing struggle between the EU member states over how to handle the new world, that is emerging in the wake of the pax-Americana, is also exposed in European policy on Libya. Ali Bakir's article aims to discuss the United Arab Emirates' interventions in Libya in terms of their nature, extent, motives, goals, and repercussions. Bakir tries to answer the questions of why Abu Dhabi has been able to act with impunity in Libya despite being the top foreign player fueling the war there for many years, and whether it will be able to achieve its goals and continue its interventions in Libya or not. France, while actively allying with the UAE, Egypt, and Saudi Arabia, has aggressively confronted Turkey and undermined the internationally recognized Libyan Government of National Accord. On this basis, Timothy Reid seeks to examine the premises of the French policy toward Libya and its real intentions behind these actions. Guma el-Gamaty highlights the strong foundations and drivers for the Turkish-Libyan strategic alliance which allowed Turkey eventually to provide timely and decisive support for the legitimate Government of National Accord. He argues that the Turkish strategic relationship and cooperation with Libya over the coming decades will contribute to lasting peace as well as institution and state-building. Based on empirical evidence, Shatha Sbeta and Mohamed Abufalgha advocate for a comprehensive framework to address the political, economic, and social challenges facing Libya. Their proposal draws a clear roadmap that begins with establishing trust and extending the authority of the government across the Libyan territory. Murat Aslan, focusing on state, non-state, and armed actors, analyses Libya's post-Qaddafi fragile state structure and struggles to build the internal order. He argues that these actors pose a repeating and paradoxical dilemma in which the root causes can be scrutinized by investigating the security culture inherited from Qaddafi's regime. Four off-topic manuscripts conclude this issue of Insight Turkey. This issue places a special emphasis on the insurmountable deadlock that tackled the Armenia-Azerbaijan conflict resolution process. Farid Shafiyev and Vasif Huseynov in their off-topic commentary assert that this deadlock is due to the failure of the peace negotiations brokered by different actors to deliver any progress as well as the constant provocations of Armenian military and political leaders, which eventually led to the outbreak of an almost full-scale war on September 27, 2020. As the COVID-19 pandemic continues, refugees are in constant danger because they live in highly congested environments. Within this context, Mahmood Monshipouri, Burcu Akan Ellis, and Cassidy Renee Yip call for a new approach to cope with the pandemic while arguing that helping refugees to curb the spread of the current coronavirus cannot be divorced from social contexts. Lukáš Tichý, Jan Mazáč, and Zbyněk Dubský present a modified concept of the EU actorness in energy relations and deals with the identification of its criteria. Based on a predefined methodology, the article also analyses dimensions of actorness in the external energy relations with Algeria. Written by Shamkhal Abilov, Ceyhun Mahmudlu, and Natig Abdullayev, the last research article focuses on the dispute between Turkmenistan and Azerbaijan over the delimitation of the Caspian Sea. This article aims to find out whether the new Convention of 2018 on the status of the Caspian Sea resolved the long-standing dispute and to assess the potential of implementing the Trans Caspian Pipeline under the new conditions. With one more year coming to an end, we are pleased to present to our readers yet another insightful issue of Insight Turkey that aims to bring the Libyan crisis to the attention of the politicians, intellectuals, and academicians. With the hope that you will find this issue informative and interesting, we are looking forward to providing you with more next year. Profitable innovation doesn't just happen. It must be managed, measured, and properly executed, and few companies know how to accomplish this effectively. Making Innovation Work presents a formal innovation process proven to work at HP, Microsoft and Toyota, to help ordinary managers drive top and bottom line growth from innovation. The authors have drawn on their unsurpassed innovation consulting experience -- as well as the most thorough review of innovation research ever performed. They'll show what works, what doesn't, and how to use management tools to dramatically increase the payoff from innovation investments. Learn how to define the right strategy for effective innovation; how to structure an organization to innovate best; how to implement management systems to assess ongoing innovation; how to incentivize teams to deliver, and much more. This book offers the first authoritative guide to using metrics at every step of the innovation process -- from idea creation and selection through prototyping and commercialization. This updated edition refreshes the examples used throughout the book and features a new introduction that gives currency to the principles covered throughout.

Cut through information overload to make better decisions faster Success relies on making the correct decisions at the appropriate time, which is only possible if the decision maker has the necessary insights in a suitable format. Mind+Machine is the guide to getting the right insights in the right format at the right time to the right person. Designed to show decision makers how to get the most out of every level of data analytics, this book explores the extraordinary potential to be found in a model where human ingenuity and skill are supported with cutting-edge tools, including automations. The marriage of the perceptive power of the human brain with the benefits of automation is essential because mind or machine alone cannot handle the complexities of modern analytics. Only when the two come together with structure and purpose to solve a problem are goals achieved. With various stakeholders in data analytics having their own take on what is important, it can be challenging for a business leader to create such a structure. This book provides a blueprint for decision makers, helping them ask the right questions, understand the answers, and ensure an approach to analytics that properly supports organizational growth. Discover how to: Harness the power of insightful minds and the speed of analytics technology Understand the demands and claims of various analytics stakeholders Focus on the right data and automate the right processes - Navigate decisions with confidence in a fast-paced world The Mind+Machine model streamlines analytics workflows and refines the never-ending flood of incoming data into useful insights. Thus, Mind+Machine equips you to take on the big decisions and win.

Using Qualitative Research in Advertising: Strategies, Techniques and Applications is the first book to discuss both theory and application of qualitative research techniques as they relate specifically to advertising research. Designed for those currently, working in the advertising industry and for those contemplating advertising careers, this book includes discussions on interviewing, projective techniques and online applications positioned within a theoretical context of the value of qualitative research. Practical information on applying results to practical processes such as writing a creative brief or conducting an online focus group are included, as is an overview of real world constraints faced by advertising researchers.

The Financial Times is more than a business tool. It seeks to explain as well as to inform. To deliver this kind of journalism it employs a wide range of journalists. This text offers an insight into the FT.

This book provides a comprehensive review of the application of 170 NMR spectroscopy to organic chemistry. Topics include the theoretical aspects of chemical shift, quadrupolar and J coupling; 17O enrichment; the effect of steric interactions on 17O chemical shifts of functional groups in flexible and rigid systems; the application of 17O NMR spectroscopy to hydrogen bonding investigations; mechanistic problems in organic and bioorganic chemistry; and 17O NMR spectroscopy of oxygen monocoordinated to carbon in alcohols, ethers, and derivatives. Recent results that show correlations between molecular geometry, determined by X-ray studies and estimated by molecular mechanics calculations, and 17O chemical shifts are also covered. 17O Spectroscopy in Organic Chemistry provides important reference information for organic chemists and other scientists interested in 17O NMR spectroscopy as a tool for obtaining new structural and chemical data about organic molecules.

Since 2006, The Insiders' Guide to Becoming a Yacht Stewardess has been a must-read guide for hopeful, young travelers and those intrigued by a career path in the super-yacht industry. Hundreds of yacht crew in the industry today used Julie's book to get started---and succeed---working aboard yachts. Entertaining and educational, this book not only covers who owns luxury yachts, where they travel, and what taking care of their eccentric owners is like, but it describes the awe-inspiring benefits of the job, the skills required, and a clear-cut roadmap for how others can do it, too. If the terrific pay and benefits that come from accompanying celebrities and dignitaries on their private journeys around the world appeals to you, consider Julie Perry your new career coach. Let her guide you to the sea of opportunity that awaits young travelers in one of the world's most adventurous and mind-boggling industries: LUXURY YACHTING.

Provides comprehensive information about the key exploration, development and optimization concepts required for gas shale reservoirs Includes statistics about gas shale resources and countries that have shale gas potential Addresses the challenges that oil and gas industries may confront for gas shale reservoir exploration and development Introduces petrophysical analysis, rock physics, geomechanics and passive seismic methods for gas shale plays Details shale gas environmental issues and challenges, economic consideration for gas shale reservoirs Includes case studies of major producing gas shale formations

This comprehensive textbook on the quantum mechanics of identical particles includes a wealth of valuable experimental data, in particular recent results from direct knockout reactions directly related to the single-particle propagator in many-body theory. The comparison with data is incorporated from the start, making the abstract concept of propagators vivid and accessible. Results of numerical calculations using propagators or Green's functions are also presented. The material has been thoroughly tested in the classroom and the introductory chapters provide a seamless connection with a one-year graduate course in quantum mechanics. While the majority of books on many-body theory deal with the subject from the viewpoint of condensed matter physics, this book emphasizes finite systems as well and should be of considerable interest to researchers in nuclear, atomic, and molecular physics. A unified treatment of many different many-body systems is presented using the approach of self-consistent Green's functions. The second edition contains an extensive presentation of finite temperature propagators and covers the technique to extract the self-energy from experimental data as developed in the dispersive optical model.The coverage proceeds systematically from elementary concepts, such as second quantization and mean-field properties, to a more advanced but self-contained presentation of the physics of atoms, molecules, nuclei, nuclear and neutron matter, electron gas, quantum liquids, atomic Bose-Einstein and fermion condensates, and pairing correlations in finite and infinite systems, including finite temperature.

Emerging Ideas, Approaches and Tools for Practitioners and Researchers

Beckett's novel Molloy and the question how this work evokes a particular kind of feeling associated with its exhibition of meaninglessness, namely the feeling of the sublime, is the point of departure for this study. Kant's theory of the sublime is interpreted within the framework of his aesthetic and moral theories, suggesting a way to understand the claim to universal validity for aesthetic judgements. Kant claims that the judgement of the sublime serves morality but he fails to provide this link, so a theory of how this aesthetic judgement can contribute to the cultivation of moral character is developed. It is argued that Kant held that art, including narrative art like the novel, can be sublime. Kant's theory of the sublime is shown to be relevant for modern works of art, and the application of this Kantian framework throws new light on the discussion of the moral aspects of Beckett's literary work. According to this account, Molloy is a sublime work of art, and despite its amoral content can serve the reader's moral cultivation.

Biophysical Characterization of Proteins in Developing Biopharmaceuticals, Second Edition, presents the latest on the analysis and characterization of the higher-order structure (HOS) or conformation of protein based drugs. Starting from the very basics of protein structure, this book explains the best way to achieve this goal using key methods commonly employed in the biopharmaceutical industry. This book will help today's industrial scientists plan a career in this industry and successfully implement these biophysical methodologies. This updated edition has been fully revised, with new chapters focusing on the use of chromatography and electrophoresis and the biophysical characterization of very large biopharmaceuticals. In addition, best practices of applying statistical analysis to biophysical characterization data is included, along with practical issues associated with the concept of a biopharmaceutical's developability and the technical decision-making process needed when dealing with biophysical characterization data. Presents basic protein characterization methods and tools applicable to (bio)pharmaceutical research and development Highlights the capabilities and limitations of each technique Discusses the underlining science of each tool Empowers industrial biophysical chemists by providing a roadmap for applying biophysical tools Outlines the needs for new characterization and analytical tools in the biopharmaceutical industry

Electronic inspection copies are available for instructors In this lively and entertaining book, Robin Wensley guides the reader through the basic analytical approaches to decision making required for more effective management practice. Packed with diagrams, anecdotes and examples which bring the book to life, Effective Management in Practice: - clearly presents a wide range of management tools, techniques and theoretical insights in just the right amount of depth for current and future managers - illustrates the need for a balanced approach, emphasizing the importance of the questioning process in clarifying the nature of action proposals and any underlying assumptions - eschews any approach which advocates one right way but at the same time encourages a greater appreciation of practical issues through analysis and theory Students of management, academics and any practitioner interested in exploring a range of different approaches to management will enjoy and treasure this book.

Detecting an abnormality is the first important step in radiological diagnosis. A thorough knowledge of how disease processes cause abnormal radiological appearances is needed to identify and interpret radiological images accurately. Radiology of the Chest and Related Conditions provides an extensive reference text and an accompanying database of images on CD-ROM. The book presents a comprehensive overview of the various disease processes affecting the chest and related abnormalities. It discusses biopsy and bronchography, as well as a variety of imaging techniques including radiography, fluoroscopy, tomography, and ultrasound. The text features helpful guidelines for the interpretation of radiological images, and an introduction to chest radiograph interpretation, basic anatomy, and physiology. Featuring over 8,600 image files with corresponding case notes and descriptions, the companion CD-ROM includes a copy of the text and a complete list of references. This valuable set supplies a wealth of information for radiologists in practice and in training.

Insight and intuition might be the most mysterious and fascinating fields of human thinking and problem solving. They are different from standard and analytical problem solving accounts and provide the basis for creative and innovative thinking. Until now they were investigated in separate academic fields with differing tradition. Therefore, this eBook attempts to bridge the gap between both processes and to provide a more integrated perspective. Several experts address the underlying cognitive processes and provide a broad spectrum of new empirical, theoretical, and methodological insights.
