

## Insight 2

The author provides insight that the TGL computer, with its data selections from 200 BC/BCE to 200 AD/CE, supports the interpretation of one of the key words "authentem" as committing violence", not "having authority." It then explores the effect of this interpretation on exegesis, gender pronouncements, hermeneutics, tradition, theology, and relevance. The second insight study discusses the "suffering servant" of Isaiah 40-66 as the city of Jerusalem. "The Servant City" study is based upon a comparison with the material outside the songs with another ANE city descriptions that are also in the first millennium.

Energy security, at the heart of energy policy, has become central to the dynamics of international relations. Political turmoil has overwhelmed many oil and gas producing countries, forcing them to adapt their national energy policies according to this continuous change. Specifically, because of the wars and instability in the Middle East and the Ukrainian crisis, global energy security is no longer guaranteed. One of the foremost experts on the energy industry, Daniel Yergin, identifies energy security as "the availability of sufficient supplies at affordable prices." He also comments that every country interprets the definition of energy security with its own dynamics. In practice, the definition of energy security is polysemic and the topic of energy security is being explored daily, under the lens of numerous new studies, by scholars, energy experts, government officials, activists, and journalists.

Spiritual Insight 2 is a thought-provoking compilation of spiritual self-inventory of personal experiences. It actually leads to repentance, confessions, prayers and praises. All these vines of spiritual enlightenment appeal to the emotion and intellect of us all. The author's experiences definitely summons the heart, soul and mind closer and closer to the God that is within all of us.

Systems of record (SORs) are engines that generates value for your business. Systems of engagement (SOE) are always evolving and generating new customer-centric experiences and new opportunities to capitalize on the value in the systems of record. The highest value is gained when systems of record and systems of engagement are brought together to deliver insight. Systems of insight (SOI) monitor and analyze what is going on with various behaviors in the systems of engagement and information being stored or transacted in the systems of record. SOIs seek new opportunities, risks, and operational behavior that needs to be reported or have action taken to optimize business outcomes. Systems of insight are at the core of the Digital Experience, which tries to derive insights from the enormous amount of data generated by automated processes and customer interactions. Systems of Insight can also provide the ability to apply analytics and rules to real-time data as it flows within, throughout, and beyond the enterprise (applications, databases, mobile, social, Internet of Things) to gain the wanted insight. Deriving this insight is a key step toward being able to make the best decisions and take the most appropriate actions. Examples of such actions are to improve the number of satisfied clients, identify clients at risk of leaving and incentivize them to stay loyal, identify patterns of risk or fraudulent behavior and take action to minimize it as early as possible, and detect patterns of behavior in operational systems and transportation that lead to failures, delays, and maintenance and take early action to minimize risks and costs. IBM® Operational Decision Manager is a decision management platform that provides capabilities that support both event-driven insight patterns, and business-rule-driven scenarios. It also can easily be used in combination with

other IBM Analytics solutions, as the detailed examples will show. IBM Operational Decision Manager Advanced, along with complementary IBM software offerings that also provide capability for systems of insight, provides a way to deliver the greatest value to your customers and your business. IBM Operational Decision Manager Advanced brings together data from different sources to recognize meaningful trends and patterns. It empowers business users to define, manage, and automate repeatable operational decisions. As a result, organizations can create and shape customer-centric business moments. This IBM Redbooks® publication explains the key concepts of systems of insight and how to implement a system of insight solution with examples. It is intended for IT architects and professionals who are responsible for implementing a systems of insights solution requiring event-based context pattern detection and deterministic decision services to enhance other analytics solution components with IBM Operational Decision Manager Advanced.

On December 21, 2012, the Mayan calendar will end. Many see it as an apocalyptic sign. But is it? In *The Twelfth Insight*, the long-awaited fourth book in the beloved *Celestine Series*, we again follow our Hero and his close friend Wil. They have just received a portion of another ancient and mysterious manuscript that describes a secret approach to spirituality that is silently arriving in the second decade of the 21st Century. But the manuscript is only available in fragments. To understand its full meaning for mankind, our Hero and Wil begin an urgent search to find the message in its entirety. As they embrace the power of Synchronicity and begin their search, they are confronted by powerful political forces and religious extremists that stand in the way of these spiritual revelations. Utilizing what he calls the "parable effect," and based on his own sources, James Redfield explores the similarities and differences that exist among the world religions, revealing the essential messages contained within them that can energize our experience of spirituality-- and produce a new wave of integrity and reform that can transform our lives and our world.

The Gulf is a sub-region consisting of Saudi Arabia and five small states, namely Kuwait, Qatar, Oman, the United Arab Emirates and Bahrain. This sub-region emerged after the British recognized the independence of the above-mentioned small entities between 1961 and 1971. Having an abundant amount of natural resources, i.e. oil and natural gas, the Gulf States are among the richest countries in the world; therefore, they do not share the poverty and political instability widely found in the Middle East. The Gulf is a sub-region consisting of Saudi Arabia and five small states, namely Kuwait, Qatar, Oman, the United Arab Emirates and Bahrain. This sub-region emerged after the British recognized the independence of the above-mentioned small entities between 1961 and 1971. Having an abundant amount of natural resources, i.e. oil and natural gas, the Gulf States are among the richest countries in the world; therefore, they do not share the poverty and political instability widely found in the Middle East. The sub-region was institutionalized with the establishment of the Gulf Cooperation Council (GCC) in 1981 as a result of three important regional developments -the Iranian Islamic Revolution in 1979, the Soviet invasion of Afghanistan in 1979, and the outbreak of the Iran-Iraq war in 1980. The GCC was mainly designed as a security institution to counter regional threats emanating from the other side of the Persian Gulf, namely Iran. However, after the invasion of Kuwait, by Saddam 's Iraq, the Gulf States became alarmed and asked the United States to protect their political independence against all regional threats. After the collapse of the Cold War, the Gulf States initiated a process of regional integration and significant steps were taken to achieve a monetary and economic union. At the end of the first decade of the 21st century, the Gulf States decided to introduce "al-khaleeji" as the common currency. However, this promising process was halted with the eruption of the Arab uprisings and revolutions. The Arab uprisings have imposed the greatest threat to the unity of the Gulf. For the first time in their history, the Gulf States began to be challenged politically from not only external threats but also internal dynamics. The process of sweeping changes throughout the Middle East instigated great concern in the Gulf, the most pro-status quo states in the region. During the first two years, 2011-2013, the Gulf States tried to follow a defensive policy against the powers of change. They strived to keep the wave of uprisings away from the Gulf. After they had overcome their shock and confusion, they began to take initiatives to intervene into the regional crises. Some of the Gulf countries, especially Saudi Arabia and the UAE, organized a military coup against the region 's first and only democratically elected government of Muhammad Morsi, placing Egypt in an economically and politically vulnerable position. Furthermore, these two countries interfered into the domestic affairs of other regional states in crisis such as Libya, Yemen and Lebanon. They succeeded in turning the "Arab Spring" into an "Arab Winter" by eliminating, de-legitimizing and weakening the carriers of reform, the Muslim Brotherhood and its affiliates, throughout the Arab world. Thus, indirectly they suppressed the moderate non-state actors in favor of radical actors and terrorist groups such as ISIS and al-Qaeda. Saudi Arabia and the UAE went further and tried to redesign the region through their ambitious regional policies. Encouraged by the United States and Israel, they gained the support from countries that are dependent on their petro-dollars such as Bahrain, Egypt and Jordan. These two states attempted to lead both the Arab and Muslim worlds; and therefore, mobilized their only asset, billions of petro-dollars, to buy influence in the region. In order to be able to lead the Arab world, Saudi Arabia and the UAE had to delegitimize the Muslim Brotherhood and affiliated groups and political parties -the main carriers of popular demonstrations throughout the Arab world. Therefore, they declared all these political groups and social movements as "terrorist organizations." They even attempted to ostracize those regional countries, i.e. Turkey and Qatar that support these popular movements, while at the same time forcing other countries to support their regional policies. The first target was Qatar; the Arab state most open to liberal values and diversity. In 2014, Saudi Arabia and the UAE forced Qatar to cut its relations with regional non-state actors such as the Brotherhood and Hamas, but the Obama Administration did not allow Riyadh and Abu Dhabi to instigate a crisis. However, after Trump came to power, these two states reintroduced the crisis and imposed their blockade against Qatar. Nevertheless, with the strong support of Turkey and Iran, two significant regional powers, the policy of Saudi Arabia and the UAE has failed. As a result, Riyadh and Abu Dhabi have shattered the unity of not only the Arabs but also that of the Gulf. While Oman maintained its neutral position, by following an active neutrality policy and playing a mediating role, Kuwait tried to prevent the breakup of the Gulf region. Although it has not declared so publicly, Kuwait rejects the regional design attempts by the Saudi and Emirati governments. To lead the Muslim world, Saudi Arabia led the foundation of the so-called "Islamic Military Alliance" comprising of more than 50 nations. However, it became clear in a short time period that this attempt was not a real Islamic alliance to bring stability to the region, but a measure to fortify a Sunni bloc against Iranian regional expansionism. That is, Saudi Arabia tried to utilize the Sunni Islamic understanding for its regional policies. It is not difficult to claim that Saudi Arabia and the UAE will not be able to realize this project. The possibility of ending up with the disillusionment of the Arab and Muslim streets and alienation of some Sunni countries is quite high. Overall the project, which has been executed with the support of the U.S. and Israel, is an attempt to deepen the sectarian strife between Shias and Sunnis and it will not bring political stability or peace to the region. In

conclusion, in order to protect themselves against regional threats and to establish a balance of power against other regional powers, the small Gulf States must form military alliances and political institutions with other regional countries. First, they need to maintain the unity of the Gulf. Second, Riyadh and Abu Dhabi should encourage other regional actors to contribute to the regional stability. Saudi Arabia and the UAE have to end the Qatari crisis, a lose-lose crisis manufactured by these two states, since it is undermining the sub-region's security and economic outlook. Third, the Gulf States must keep the sub-region as the island of political and economic stability in the chaotic Middle East and contribute to the gradual and peaceful reconstruction of the region. To achieve this objective, the Gulf States must stop using conflicting political discourses. Considering all these important developments, the Gulf region has attracted a lot of attention among the scholars and Insight Turkey, through this special issue, aims to cover some of the main topics such as the Qatari crisis, the rise of sectarianism, the foreign policies of the pro-status quo countries and the relations of these states with Turkey. The situation in the Gulf region gets more complicated as time passes and the division between blocks has started to become deeper. Ufuk Uluta and Burhanettin Duran provide a comprehensive analysis of all of the actors, including here global and regional ones, which are currently included in the Gulf affairs. Without any doubt, the Qatari crisis has played a decisive role in manifesting the existing regional rifts. In the light of this, Kristian Coates Ulrichsen and Marwan Kabalan focus on this crisis, which started with the blockade of Qatar by the so-called Quartet, i.e. Saudi Arabia, the UAE, Bahrain and Egypt. With a special focus on the Gulf and U.S. policies respectively, both of the authors provide valuable insights regarding the crisis and the future of the Gulf. The main division in the region comes as a result of the rise of sectarianism, which has transformed into local sectarian and regional geopolitical confrontations among some Gulf States -mainly Saudi Arabia and the UAE- and Iran. Emad Kaddorah, in his commentary, argues that the regional conflict over the Gulf region is geo-sectarian, meaning that it is a geopolitical contest, which has recently been engulfed by a sectarian dimension. Saudi Arabia remains one of the main actors in the region and it deserves special attention. The articles of Simon Mabon and May Darwich help to better understand the domestic and foreign policies of Saudi Arabia. Mabon looks at the actions of the new crown prince to explore the impact of Bin Salman's influence on both the Kingdom and the Middle East more broadly. On the other hand, Darwich analyzes the Saudi intervention in Yemen, a war that many have started to consider as "Saudis Vietnam war." More specifically, May Darwich offers an alternative explanation for the abrupt Saudi aggressiveness toward Yemen and argues that this intervention is driven by the Saudi leadership aims to assert the Kingdom's status as a regional power in the Middle East. Despite Saudi Arabia, the UAE is another important actor in the region, whose impact is underestimated. By focusing on the military bases built by the UAE in the Horn of Africa, Ismail Numan Telci and Tuba Öztürk Horoz provide an explanation on the real motivations behind the Emirati foreign policies which have started to focus more on hard power, a deviation from the perpetual foreign policies of the other Gulf States. Amidst the shattering order of the Gulf, Turkey has pursued a careful and balancing policy, finding itself sided neither with the Saudi-led block, nor with the Iranian-led block. At this point it is important to understand the background of the Turkey-GCC states relations and Özden Zeynep Oktav in her article brings a detailed analysis of the root causes that led to the policy divergences between Turkey, and some GCC states, i.e. Saudi Arabia and the UAE. This special issue of Insight Turkey includes five off-topic pieces, which indeed are closely related with the Gulf affairs. In his commentary, M. Akif Kireçci, focuses on the initiatives undertaken by Turkey after Trump declared Jerusalem as the capital of Israel and how the divided Gulf States left aside their disparities to protect the rights of Palestinians against this fallacious decision. The article of Osama Anter Hamdi complements Kireçci's commentary, as the author provides a comprehensive analysis of the American foreign policy toward the Arab-Israeli conflict since the establishment of the Israeli state. Iran, of course, deserves special attention as the foreign policies of the Gulf States are mostly designed to balance the Iranian influence in the region. The three remaining articles of the issue deal with U.S. Iranian relations, the nuclear deal and how Iran and Turkey serve as a model of emulation for other states in the region. Written by İmran Demir, Farhad Rezaei, and Ibrahim Khatib and As'ad Ghanem, respectively, these three articles are worth reading in order to better understand the Iranian policies. "The Gulf on the Verge: Ambitions, Crises and Shattering Order," provides timely analyses for a region that once again has become the linchpin of global affairs. We are confident that this issue of Insight Turkey will be a great contribution to the Gulf studies.

Corinth, a diverse, cosmopolitan city sitting at a strategic center of commerce for both Greece and the wider Roman Empire, was known for its decadence and wealth. In his commentary on 1 and 2 Corinthians, Chuck Swindoll explores how Paul took the Corinthian church to task for taking on the character of the city instead of the character of Christ. As Chuck shows, the message of Paul to the Corinthians is greatly needed by the Church today. The 15-volume Swindoll's Living Insights New Testament Commentary series draws on Gold Medallion Award-winner Chuck Swindoll's 50 years of experience studying and preaching God's Word. His deep insight, signature easygoing style, and humor bring a warmth and practical accessibility not often found in commentaries. Contemporary Systems Thinking is a series of texts, each of which deals comparatively and/or critically with different aspects of holistic thinking at the frontiers of the discipline. Traditionally, writings by systems thinkers have been concerned with single theme propositions such as General Systems Theory, Cybernetics, Operations Research, System Dynamics, Soft Systems Methodology and many others. Recently there have been attempts to fulfil a different yet equally important role by comparative analyses of viewpoints and approaches, each addressing disparate areas of study such as: modeling and simulation, measurement, management, 'problem solving' methods, international relations, social theory and last, but not exhaustively or least, philosophy. In a recent book these were drawn together within a multiform framework as part of an eclectic discussion -a nearly impossible task as I discovered (see *Dealing With Complexity -An Introduction to the Theory and Application of Systems Science*, R. L. Flood and E. R. Carson, Plenum, New York, 1988). Nevertheless, bringing many sources together led to several achievements, among which was showing a great diversity of approaches, ideas and application areas that systems thinking contributes to (although often with difficulties remaining unresolved). More important, however, while working on that manuscript I became aware of the need for and potential value in a series of books, each focusing in detail on the study areas mentioned above.

Each notebook contains sixty-four high-quality ruled, acid-free pages that take both pen and pencil nicely to invite a flow of inspiration. *The Flash: Journal Collection* is a must-have for fans of both the show and comics.

Drawing from original source material, contemporary scholarship, and Wilfred Bion's psychoanalytic writings, *Zen Insight, Psychoanalytic Action: Two Arrows Meeting* introduces the Zen notion of "gō jin," or total exertion, and elaborates a realizational perspective that integrates Zen Buddhism and psychoanalysis. Developed by the thirteenth century Zen teacher and founder of the Japanese Soto Zen school, Eihei Dogen, gō jin finds expression and is referenced in various contemporary scholarly and religious commentaries. This book explains this pivotal Zen concept and addresses themes by drawing from translated source material, academic scholarship, traditional Zen kōans and teaching stories, extensive commentarial literature, interpretive writings by contemporary Soto Zen teachers, psychoanalytic theory, clinical material, and poetry, as well as the author's thirty years of personal experience as a psychoanalyst, supervisor, psychoanalytic educator, ordained Soto Zen priest, and transmitted Soto Zen teacher. From a realizational perspective that integrates Zen and psychoanalytic concepts, the book addresses anxiety-driven interferences to deepened Zen practice, extends the scope and increases the effectiveness of clinical work for the psychotherapist, and facilitates deepened experiences for both the Buddhist and the secular meditation practitioner. *Two Arrows Meeting* will be of great interest to researchers in the fields of Zen Buddhism and psychoanalysis. It will also appeal to meditation practitioners and psychoanalysts in practice and training.

"Transformative...[Taylor's] experience...will shatter [your] own perception of the world."—ABC News The astonishing New York Times bestseller that chronicles how a brain scientist's own stroke led to enlightenment On December 10, 1996, Jill Bolte Taylor, a thirty-seven-year-old Harvard-trained brain scientist experienced a massive stroke in the left hemisphere of her brain. As she observed her mind deteriorate to the point that she could not walk, talk, read, write, or recall any of her life—all within four hours—Taylor alternated between the euphoria of the intuitive and kinesthetic right brain, in which she felt a sense of complete well-being and peace, and the logical, sequential left brain, which recognized she was having a stroke and enabled her to seek help before she was completely lost. It would take her eight years to fully recover. For Taylor, her stroke was a blessing and a revelation. It taught her that by "stepping to the right" of our left brains, we can uncover feelings of well-being that are often sidelined by "brain chatter." Reaching wide audiences through her talk at the Technology, Entertainment, Design (TED) conference and her appearance on Oprah's online Soul Series, Taylor provides a valuable recovery guide for those touched by brain injury and an inspiring testimony that inner peace is accessible to anyone.

***"The first definitive book on the science of self-awareness, Insight is a fascinating journey into everyone's favorite topic: themselves. Do you understand who you really are? Or how others really see you? We all know people with a stunning lack of self-awareness--but how often do we consider whether we might have the same problem? Research shows that self-awareness is the meta-skill of the 21st century--the foundation for high performance, smart choices, and lasting relationships. Unfortunately, we are remarkably poor judges of ourselves and how we come across, and it's rare to get candid, objective feedback from colleagues, employees, and even friends and family. Integrating hundreds of studies with her own research and work in the Fortune 500 world, organizational psychologist Tasha Eurich shatters conventional assumptions about what it takes to truly know ourselves--like why introspection isn't a bullet train to insight, how experience is the enemy of self-knowledge, and just how far others will go to avoid telling us the truth about ourselves. Through stories of people who've made dramatic gains in self-awareness, she offers surprising secrets, techniques and strategies to help readers do the same - and therefore improve their work performance, career satisfaction, leadership potential,***

*The four short letters of 1-3 John and Jude deliver powerful messages of correct living in a wrong world and are as relevant today as they were in the first century. Written near the end of the John's life, 1 John was meant to revive the faith, love, and hope of his readers and encourage them to renew an authentic, contagious walk with Christ. Like two siblings, 2 and 3 John are letters with unique personalities but also some striking similarities, each taking a unique approach to a single, urgent message: balance unconditional love with discerning truth. Jude, the brother of Jesus, writes with a twofold purpose: expose the false teachers that had infiltrated the Christian community, and encourage the believers to stand firm in the faith and fight for it.
