Intended for the one semester general statistics course, this text emphasizes statistical thinking. It introduces topics of data collection including observations, experiments, and surveys.

Providing students with the skills to prepare and analyze company-only and consolidated financial statements, this book also looks at the theory behind asset valuation and income determination, and encourages students to develop an awareness of the limitations of conventional financial statements. teaching and learning aids, such as discussion questions, reference to source material, further reading suggestions and worked examples. It is designed for undergraduate 2nd year financial accounting courses, 2nd/3rd year undergraduate business courses, and 1st year MBA/DMS courses.

Don't you love those moments in your course when students are fully engaged? When the "Aha!" revelations are bursting like fireworks? David Spiceland, Wayne Thomas, and Don Herrmann have developed a unique set of materials based directly on their collective years in the classroom. They've brought together best practices like highlighting Common Mistakes, offering frequent Let's Review exercises, integrating the course with a running Continuing Problem, demonstrating the relevance of the course with real-world companies and decision analysis, and conveying it all in a student-friendly conversational writing style. The authors have developed a concise and well-organized learning framework to show students that accounting consists of three major processes: measuring, analyzing, and communicating. By consistently tying each lesson into this framework, instructors can continue to improve student outcomes. After the proven success of the first four editions of Financial Accounting, the fifth edition will continue to motivate, engage, and challenge students. Paired with the market-leading power of the Connect platform, the Spiceland/Thomas/Herrmann author team will truly illuminate the financial accounting course for each student.
