A millionairess returns to her home town to seek revenge on a man who wronged her in her youth. The white man, leaning with both arms over the roof of the little house in the stern of the boat, said to the steersman-"We will pass the night in Arsat's clearing. It is late."The Malay only grunted, and went on looking fixedly at the river. The white man rested his chin on his crossed arms and gazed at the wake of the boat. At the end of the straight avenue of forests cut by the intense glitter of the river, the sun

appeared unclouded and dazzling, poised low over the water that shone smoothly like a band of metal. The forests, sombre and dull, stood motionless and silent on each side of the broad stream. At the foot of big, towering trees, trunkless nipa palms rose from the mud of the bank, in bunches of leaves enormous and heavy, that hung unstirring over the brown swirl of eddies. In the stillness of the air every tree, every leaf, every bough, every tendril of creeper and every petal of minute blossoms seemed to have been bewitched into an immobility perfect and final. Nothing moved on the river but the eight paddles that rose flashing regularly, dipped together with a single splash; while the steersman swept right and

left with a periodic and sudden flourish of his blade describing a glinting semicircle above his head. The churned-up water frothed alongside with a confused murmur. And the white man's canoe, advancing upstream in the short-lived disturbance of its own making, seemed to enter the portals of a land from which the very memory of motion had forever departed.

Why does everything sound better if it's said in French? That fascination is at the heart of *The Story of French*, the first history of one of the most beautiful languages in the world that was, at one time, the pre-eminent language of literature, science and diplomacy. In a captivating narrative that spans the ages, from Charlemagne to Cirque du Soleil, Jean-Benoît Nadeau and Julie Barlow unravel the mysteries of a language that has maintained its global influence despite the rise of English. As in any good story, *The Story of French* has spectacular failures, unexpected successes and bears traces of

some of history's greatest figures: the tenacity of William the Conqueror, the staunchness of Cardinal Richelieu, and the endurance of the Lewis and Clark expedition. Through this colorful history, Nadeau and Barlow illustrate how French acquired its own peculiar culture, revealing how the culture of the language spread among francophones the world over and yet remains curiously centered in Paris. In fact, French is not only thriving—it still has a surprisingly strong influence on other languages. As lively as it is fascinating, *The Story of French* challenges long held assumptions about French and shows why it is still the world's other global language.

Black Sea. From these sparse facts, one of our most distinguished novelists has fashioned an audacious and supremely moving work of fiction. Marooned on the edge of the known world, exiled from his native tongue, Ovid depends on the kindness of barbarians who impate their dead and converse with the spirit world. But then he becomes the guardian of a still more savage creature, a feral child who has grown up among deer. What ensues is a luminous encounter between civilization and nature, as enacted by a poet who once catalogued the treacheries of love and a boy who slowly learns how to give it.

of plants and animals. But how many of us know that human cultures are going extinct at an even more shocking rate? While biologists estimate that 18 percent of mammals and 11 percent of birds are threatened, and botanists anticipate the loss of 8 percent of flora, anthropologists predict that fully 50 percent of the 7,000 languages spoken around the world today will disappear within our lifetimes. And languages are merely the canaries in the coal mine: what of the knowledge, stories, songs, and ways of seeing encoded in these voices? In *The Wayfinders*, Wade Davis offers a gripping and enlightening account of this urgent crisis. He leads us on a fascinating tour through a handful of indigenous cultures, describing the worldviews they represent and reminding us of the encroaching danger to humankind's survival should they vanish.

globalization is affecting education around the world. The contributors, drawing from innovative research in both the social sciences and the neurosciences, examine the challenges and opportunities now facing schools as a result of massive migration flows, new economic realities, new technologies, and the growing cultural diversity of the world's major cities. Writing for a wide audience, they address such questions as: How do we educate all youth to develop the skills and sensibilities necessary to thrive in globally linked, technologically interconnected economies? What can schools do to meet the
