A Handbook for Managers and Executives

International Business Strategy

Managers and executives who work in international trade and foreign direct investment are acutely aware of the importance of the governmental, intergovernmental, and systemic factors that regulate, facilitate, and/or complicate the conduct of international business (IB). But most managers and executives have limited or no expertise in these factors, which are referred to collectively as the IB environment. Also, because the IB environment is a socio-

political-economic construct that is governed by non-business disciplines (which include international relations, international law, sociology, and cultural anthropology), it can be difficult for managers and executives to access usable information on the elements of the IB environment. The International Business Environment: A Handbook for Managers and Executives addresses both of these conditions by providing managers and executives with concise and incisive information on each of the elements of the IB environment. The elements covered in the book include tariff and non-tariff barriers, anti-dumping duties, subsidies and countervailing duties, entry and post-entry barriers to foreign direct investment, political risk, the General Agreement on Tariffs and Trade and other global instruments, the World Trade Organization and other global mechanisms, regional trade blocs (which include free trade areas and customs unions), bilateral trade and investment agreements, the conflict of laws, dispute settlement mechanisms, and systemic and cultural differences. The book also explains

related terms, concepts, principles, and practices. The book relies primarily on original source materials; makes extensive use of examples; and can be used as a text in corporate seminars, executive development programs, and MBA programs.

Useful for undergraduate and graduate students of international business, this work features coverage of the Asian financial crisis and the European Union. Its treatment of such topics as foreign exchange, international trade policy, and economic development introduces students to techniques for analyzing national economies.

Updated to reflect the most recent trends, trade agreements, cartels, and innovations in international business, this handbook defines approximately 5,000 terms related to the international marketplace. Definitions and explanations focus on international finance and marketing, foreign exchange, import/export, trade organizations, and much more. It's a handy quick-reference source for business professionals and students, and useful for training programs

in international business management.

The limited number of global or international strategy textbooks almost exclusively focuses on how to manage larger, multinational enterprises (MNEs), which primarily come from and compete in developed economies. While MNEs are important, such a focus ignores the fact (1) that many smaller, entrepreneurial firms have also aggressively internationalized recently and (2) that MNEs often have to compete in emerging economies, which increasingly nurture strong local competitors. Most mainstream strategic management textbooks, while seeming to address the hot theme of globalization, contain only one chapter on international strategy. Finally, most international business textbooks do have a section (containing several chapters) on international strategy. However, they always carry a wider coverage of major business functions such as marketing, operations, finance, and accounting, making them unwieldy. GLOBAL STRATEGY is written to offer a number of new perspectives. These include (1) a broadened definition of

global strategy, (2) a comprehensive and innovative coverage, (3) an in-depth and consistent explanation of cutting-edge research, and (4) an interesting and accessible way to engage students. In this book, global strategy is defined not as MNE strategy only, but as strategy around the globe. Most global strategy and international business textbooks take the perspective of the foreign entrant, typically the MNE, often dealing with issues such as how to enter foreign markets. Important as these issues are, they only cover one side of international business, namely, the foreign side. The other side, naturally, is how domestic firms compete against each other and against foreign entrants. Failing to understand the other side, at best, captures only one side of the coin.
