Mastering the Art of International Mooting: The structure, technique and rules of international mooting is a book that can be used by all levels of law students regardless of their background with international mooting. As law schools around the world develop courses that deal with international mooting, a practical technique-

based mooting book will greatly add to the resources for this type of course. This book sets out the nature of the mooting exercise; the rationale for the exercise; how to analyse the fact-patterns; how to research and write skeleton arguments; and how to prepare for oral submissions. This book is unique, in that it provides strategies for moot students on how to deal with situations which may arise at international

competitions. Examples of possible addresses to the Court are provided in the book, giving students options of what to say and do in specific situations. While this book also speaks about how to prepare for competitions, it also speaks to coaches of mooting teams. Strategies and tips are provided to present and future coaches in respect of selection of moot teams and judging mooting competitions. It

is hoped that this book will increase the standard of mooting and eventual advocacy of law students and eventually lawyers.

This volume deals with the tension between unity and diversification which has gained a central place in the debate under the label of 'fragmentation'. It explores the meaning, articulation and risks of this phenomenon in a specific area:

Justice. It brings together established and fresh voices who analyse different sites and contestations of this concept, as well as its context and specific manifestations in the interpretation and application of International Criminal Law. The volume thereby connects discourse on 'fragmentation' with broader inquiry on the merits and discontents of legal pluralism in 'Public International Law'.

A must-read for students involved in mooting, this new edition of Jeffrey Hill's textbook has been fully updated and revised, and provides students with clear and compelling advice on every aspect of mooting. The book covers: - key aspects of the legal system; - the way in which moots are assessed; - what the judges are looking for; - how to structure a legal argument; and - how to prepare a skeleton argument and bundles. The text is accompanied by a companion website with videos of Supreme Court hearings so that students can learn from, and emulate, the advocacy skills of some of the most eminent advocates and lawyers: <https://www.bloomsburyonlineresources.com/the-practical-guide-to-mooting-2>

Legal education is currently undergoing a paradigm shift. Traditional law instruction, lecturing and memorizing have become a fading fashion, with legal

clinics increasingly cropping up. These allow law students to practice while studying and to contribute to social justice as part of the educational process. Students no longer accept one-way interaction from their professors, and demand interaction with their peers in various corners of the globe. The Middle East is no exception here. Legal clinics can be found in most countries of the region, though there is scant literature on legal education in the area, particularly with regards to clinical legal education. This book fills this gap, and offers comparative cases that will benefit legal educators and justice practitioners in the Middle East and beyond. The region needs reform in all dimensions, including the political, economic, social, religious, legal, and educational. Legal education lies at the heart of securing such long awaited reforms. The book examines

legal education within selected locations in the region, underscoring successful pedagogical models from various parts of the world. This peer-reviewed book focuses on practical legal education, where learning is student-centered, particularly clinical legal education, field work, street law, pro bono service, legal advice, simulations, placements/internships, moot courts and mock trials, problem-based learning, case analysis, group work, role-play, and brainstorming. The book brings together 28 chapters written by leading legal scholars from across the globe, all concerned with the advancement of legal education, with making it more interactive, and contributing to bridging the gap between powerful and powerless communities.

International criminal adjudication, together with the prosecution and

appropriate punishment of offenders at a national level, remains the most effective means of enforcing International Humanitarian Law. This book considers the various issues emanating from present-day breaches of norms of International Humanitarian Law (IHL) and the question of how impunity for such breaches can be tackled. Honouring the work of Timothy McCormack, Professor of International Law at the University of Melbourne and a world renowned expert on IHL and International Criminal Law, contributors of the book explore the interplay between the rules governing accountability for violations of IHL and other areas of law that impact the prosecution of war crimes, including international criminal law, human rights law, arms control law, constitutional law and national criminal law. In providing a contemporary

consideration of the various issues emerging from present-day breaches of norms of IHL, especially in light of growing interest in 'fragmentation' and 'normative pluralism', this book will be of great use and interest to students and researchers in public international law, international law, and conflict studies. Crimes of atrocity have profound and long-lasting effects on any society. The difference between triggering and preventing these tragic crimes often amounts to the choice between national potential preserved or destroyed. It is also important to recognise that they are not inevitable: the commission of these crimes requires a collective effort, an organisational context, and long planning and preparation. Thus, the idea of strengthening preventative action has taken on greater relevance, and is now encompassed in the emerging notion of

# File Type PDF International Criminal Court Moot Court Pace Law School

'responsibility to prevent'. International courts and tribunals contribute to this effort by ending impunity for past crimes. Focusing investigations and prosecution on the highest leadership maximises the impact of this contribution. The ICC has an additional preventative mandate which is fulfilled by its timely intervention in the form of preliminary examinations. Moreover, when situations of atrocity crimes are triggered, its complementarity regime incentivises states to stop violence and comply with their duties to investigate and prosecute, thus strengthening the rule of law at the national level. The new role granted to victims by the Rome Statute is key to the ICC's successful fulfilment of these functions. This new book of essays, which includes the author's unpublished inaugural lecture at Utrecht University, examines these issues and places

particular emphasis on the additional preventative mandate of the ICC, the ICC complementarity regime, the new role granted to victims, and the prosecution of the highest leadership through the notion of indirect perpetration. and human rights. Providing easy access to up-to-date and authoritative articles covering all key aspects of international criminal law, this book is an essential reference work for students, scholars and practitioners working in the field.

This insightful book explores the acute challenges presented by the internationalisation of law, a trend that has been accelerated by the growing requirement for academics and practitioners to work and research across countries and regions with

differing legal traditions. The authors have all confronted these challenges of internationalisation through their extensive knowledge and experience in civil law, common law and mixed jurisdictions around the globe. Their analysis of the implications for researchers and teachers, as well as practitioners, law-makers and reformers is original and their different proposals for dealing with the challenges are both practical and at times, radical.

This book takes the reader

on a sweeping tour of the

to reveal some of the patterns of difference, dominance, and disruption that belie international law's claim to universality. Pulling back the curtain on the "divisible college of international lawyers," Anthea Roberts shows how international lawyers in different states, regions, and geopolitical groupings are often subject to distinct incoming influences and outgoing spheres of influence in ways that reflect and reinforce differences in how they understand and

approach international law. These divisions manifest themselves in contemporary controversies, such as debates about Crimea and the South China Sea. Not all approaches to international law are created equal, however. Using case studies and visual representations, the author demonstrates how actors and materials from some states and groups have come to dominate certain transnational flows and forums in ways that make them disproportionately

influential in constructing the "international." This point holds true for Western actors, materials, and approaches in general, and for Anglo-American (and sometimes French) ones in particular. However, these patterns are set for disruption. As the world moves past an era of Western dominance and toward greater multipolarity, it is imperative for international lawyers to understand the perspectives and approaches of those coming

from diverse backgrounds. By taking readers on a comparative tour of different international law academies and textbooks, the author encourages them to see the world through the eyes of others -- an essential skill in this fast changing world of shifting power dynamics and rising nationalism.

Established as one of the main sources for the study of the Rome Statute of the International Criminal Court, this volume provides an article-by-article analysis of the

File Type PDF International  
Criminal Court Moot Court Pace  
Law School

Statute; the detailed analysis draws upon relevant case law from the Court itself, as well as from other international and national criminal tribunals, academic commentary, and related instruments such as the Elements of Crimes, the Rules of Procedure and Evidence, and the Relationship Agreement with the United Nations. Each of the 128 articles is accompanied by an overview of the drafting history as well as a bibliography of academic literature relevant to the

provision. Written by a single author, the Commentary avoids duplication and inconsistency, providing a comprehensive presentation to assist those who must understand, interpret, and apply the complex provisions of the Rome Statute. This volume has been well-received in the academic community and has become a trusted reference for those who work at the Court, even judges. The fully updated second edition of The International Criminal Court incorporates new

developments in the law, including discussions of recent judicial activity and the amendments to the Rome Statute adopted at the Kampala conference. This anthology offers case studies on the deterrent effect of international criminal tribunals in ten situations, six of which are International Criminal Court situations. The case studies cover four different international tribunals. This gives a new comparative perspective on the impact of international criminal law since the early 1990s.

The book seeks to contribute to an important discourse on deterrence: on how international criminal tribunals can assist in a global, co-operative effort to prevent core international crimes. Thirteen authors draw on both quantitative and qualitative factors to assess the rise and fall of criminality and perceptions of deterrence amongst a wide variety of respondents. The studies are based on first-hand information where feasible. They are multi-disciplinary and holistic.

Apart from the two editors, the book has contributions by Evelyne Owiye Asaala, Olivia Bueno, Dafi na Bucaj, Seydou Doumbia, Mackline Ingabire, Kasande Sarah Kihika, Sladjana Lazic, Sharanjeet Parmar, Kounkin Augustin Som and Eleanor D. Thompson. It presents concrete findings and recommendations to inform future work of international criminal tribunals including the International Criminal Court.

This book brings a new focus to the ongoing

debate on holding perpetrators of massive humanitarian and human rights violations accountable in countries in transition. It provides a clear-cut and comprehensive legal analysis of the content and nature of a state's obligations to investigate and prosecute as enshrined in the most important humanitarian and human rights treaties; it disentangles the common fallacy that these procedural obligations are naturally rooted and clearly spelled out in the

general human rights treaties; and it explains the flaws in an absolutist interpretation. This analysis serves to understand whether such procedural obligations, if narrowly construed, act as impediments to countries emerging from periods of conflict or systematic repression in the face of contingent circumstances and the formidable dilemmas raised by a univocal understanding of justice as retribution. Exploring the latest instances of interpretation and

File Type PDF International  
Criminal Court Moot Court Pace  
Law School

application via an analysis of state practice, the jurisprudence of treaty bodies, international courts and tribunals, soft law instruments, and doctrinal contributions, the book also addresses the complex issue of amnesty, and other transitional justice mechanisms designed to restore peace and facilitate transition traditionally included in national reconciliation programs, and criticizes the contention that amnesty is always

prohibited by international law. It also considers these problems from the viewpoint of the International Criminal Court, focusing on the cases of Uganda and Colombia after the 2016 peace agreement. Lastly, the volume offers a detailed analysis of techniques that may neutralize relevant obligations under international law, such as denunciation, derogation, limitation, and the public international law defenses of force majeure and necessity. Drawing

attention to the importance of a multidisciplinary and practical approach to these unsettling questions, and endorsing a pluralistic notion of accountability, the book will appeal to legal scholars and transitional justice experts as well as practitioners, human rights advocates, and government officials. Dr Jacopo Roberti di Sarsina is an International Law Expert at the Alma Mater Studiorum - University of Bologna School of Law, and a dual-qualified lawyer

(Italy and New York). He completed a PhD in public international law, label Doctor Europaeus, at the School of International Studies, University of Trento, holds an LLM from NYU School of Law, and read law at the University of Bologna.

Certain types of crime are increasingly being perpetrated across national borders and require a unified regional or global response to combat them. Transnational criminal law covers both the international treaty obligations which require States to introduce specific substantive measures into their domestic criminal law schemes, and an allied procedural dimension concerned with the articulation of inter-state cooperation in pursuit of the alleged transnational criminal.

The Routledge Handbook of  
Transnational Criminal Law provides

a comprehensive overview of the system which is designed to regulate cross border crime. The book looks at the history and development of the system, asking questions as to the principal purpose and effectiveness of transnational criminal law as it currently stands. The book brings together experts in the field, both scholars and practitioners, in order to offer original and forward-looking analyses of the key elements of the transnational criminal law. The book is split into several parts for ease of reference: Fundamental concepts surrounding the international regulation of transnational crime. American reluctance to join the International Criminal Court illuminates important trends in international security and a central dilemma facing U.S. Foreign policy in the 21st century. The ICC will prosecute individuals who commit egregious international human rights violations such as genocide. The Court is a logical culmination of the

global trends toward expanding human rights and creating international institutions. The U.S., which fostered these trends because they served American national interests, initially championed the creation of an ICC. The Court fundamentally represents the triumph of American values in the international arena. Yet the United States now opposes the ICC for fear of constraints upon America's ability to use force to protect its national interests. The principal national security and constitutional objections to the Court, which the volume explores in detail, inflate the potential risks inherent in joining the ICC. More fundamentally, they reflect a belief in American exceptionalism that is unsustainable in today's world. Court opponents

also underestimate the growing salience of international norms and institutions in addressing emerging threats to U.S. national interests.

The misguided assessments that buttress opposition to the ICC threaten to undermine American leadership and security in the 21st century more gravely than could any international institution.

Michael Vagias analyses the law and

procedure surrounding the territorial jurisdiction of the International Criminal Court. Moot Court competitions constitute an alternative model of human rights training, giving students the skills to contribute to the development of international human rights law and thus make them qualified advocates for human rights change in their home countries and abroad. By focusing on the perfection of oral as well as written skills, participants are more likely to be successful not only in cases brought before their home courts, but in front of international tribunals and other organs. Such competitions have opened the doorway for more

human rights classes in law schools, more clinical training programs, more NGOs dedicated to human rights law, and overall more lawyers dedicated to participating in an expanded notion of a human rights community. As demonstrated in this volume, moot court competitions have revolutionized human rights legal education in Africa, Europe and the Americas.

This book is concerned with the commercial exploitation of armed conflict; it is about money, war, atrocities and economic actors, about the connections between them, and about responsibility. It aims to clarify the legal framework that defines these connections and

gives rise to criminal or, in some instances, civil responsibility, referring both to mechanisms for international criminal justice, such as the International Criminal Court, and domestic systems. It considers which economic actors among individuals, businesses, governments and States should be held accountable and before which forum. Additionally, it addresses the question of how to recover illegally acquired profits and redirect them to benefit the victims of war. The chapters shine a critical light on the options provided by a network of laws to ensure that the 'great industrialists' of our time, who find economic opportunities in the war-

ravaged lives of others, are unable to pursue those opportunities with impunity.

This book analyzes the position of the ICC in relation to national court systems. The research illustrates that what seemed to be a straight forward relationship between the ICC and national courts under the complementarity mechanism, proves to be much more complex in practice. Using the referrals of Uganda and Darfur, the book demonstrates ways in which it might be possible to prosecute for crimes currently not prosecuted by the ICC and brings to light possible solutions to overcome the gaps in law and practice in the jurisdictional relation

between the ICC and national systems. It will be of value to academics, students and policy-makers working in the area of international law, international organizations, and human rights.
