*Discusses all aspects of digital music, including navigating Internet radio, determining the best audio file format, creating playlists, and sharing music through social media outlets.*

*Internet radio services are usually accessible from anywhere in the world with a suitable internet connection available; one could, for example, listen to an Australian station from Europe and America. This has made internet radio particularly suited to and popular among expatriate listeners. Nevertheless, some major networks like TuneIn Radio, Entercom, Pandora Radio, iHeartRadio and Citadel Broadcasting (except for news/talk and sports stations) in the United States, and Chrysalis in the United Kingdom, restrict listening to in-country due to music licensing and advertising issues. Internet radio is also suited to listeners with special interests, allowing users to pick from a multitude of different stations and genres less commonly represented on traditional radio.Internet radio (also web radio, net radio, streaming radio, e-radio, IP radio, online radio) is a digital audio service transmitted via the Internet. Broadcasting on the Internet is usually referred to as webcasting since it is not transmitted broadly through wireless means. It can either be used as a stand-alone device running through the internet, or as software running through a single computer. Internet radio is generally used to communicate and easily spread messages through the form of talk. It is distributed through a wireless communication network connected to a switch packet network (the internet) via a disclosed source. Internet radio involves streaming media, presenting listeners with a continuous stream of audio that typically cannot be paused or replayed, much like traditional broadcast media; in this respect, it is distinct from on-demand file serving. Internet radio is also distinct from podcasting, which involves downloading rather than streaming.Internet radio services offer news, sports, talk, and various genres of music-every format that is available on traditional broadcast radio stations. Many Internet radio services are associated with a corresponding traditional (terrestrial) radio station or radio network, although low start-up and ongoing costs have allowed a substantial proliferation of independent Internet-only radio stations. The first Internet radio service was launched in 1993. As of 2017, the most popular internet radio platforms and applications in the world include (but are not limited to) TuneIn Radio, iHeartRadio, and Sirius XM.*

STRUGGLING TO STAY IN TOUCH WITH ELDERLY PARENTS DURING THE LOCKDOWN? WANTING TO HELP ISOLATED RELATIVES WITH ONLINE ORDERING? THIS IS THE PERFECT GUIDE FOR ANYONE GRAPPLING FOR THE FIRST TIME WITH FACETIME, GOOGLE HANGOUTS OR ANY OTHER ASPECT OF THE MODERN WORLD. A handy guide for anyone who says, 'The Facebook' or 'The Google' or who asks, 'Do they deliver emails on Sunday?' This is a book for the elderly and not-so-elderly who are bamboozled not just by the technology of the contemporary world, but also various modern concepts and conceits that the more youthful take for granted. It explains a host of modern concepts and technologies that have entered everyday use and parlance but which are alien (and possibly frightening) not just to the elderly - but probably also to anyone over 45. These concepts are universal and should therefore appeal to readers in the UK, Australia, US and Europe. The definitions are all real, but entertaining, making use of easy-to-understand 'real world' references or examples to explain them.

So, you think you have what it takes to be a DJ and broadcaster? Awesome news for you! And guess what? This is very lucky news for you because in today's technology, it allows anyone who wants to do what was once a limited to a very small percentage of people. But, now you can become an online / internet DJ and / or broadcaster! You can actually be the DJ, the station manager and even the program director who decides what to play on the station, because it's all on the internet! There are several ways and approaches you can take in creating a streaming Internet radio station. Which one you decide to choose depends on what your goals are and what type of ways you wish to go about doing them in. If you are really motivated and inspired to start an Internet-based radio station that operates for the sole purpose of profit and revenue generation, your direction and approach will be different than from the individual who just wants to set up an Internet radio station for the only purpose of simply sharing his or her favorite opinions, information or music with friends or people with the same interests as their own. There are many excellent options for the beginner that of which require very little technical knowledge. If you know how to create or put together MP3 format files, upload them onto a server and then choose some options, you can reach a world-wide audience! If this really interests you, keep on reading because you're about to enter the world of online radio.
