

Introduction To Maternity And Pediatric Nursing Study Guide Answer Key

Written specifically for the LPN/LVN student, this Third Edition of *Introductory Maternity and Pediatric Nursing* provides clear, well-illustrated, and clinically relevant coverage of pregnancy, birth, and pediatrics to help student's master key clinical and critical thinking skills and prepare for the NCLEX® exam and successful practice. This Third Edition is enhanced by new care plans in the clinical chapters, new case studies, a new art program, a new pronunciation guide, and more. Online video clips of live births, Cesarean delivery, breastfeeding, pediatric milestones, the well child, and the hospitalized child bring concepts to life in dynamic full color. To ensure student mastery of key topics, an integrated workbook at the end of each chapter includes NCLEX-style questions (many NEW to this edition), study activities, and critical thinking: "What Would You Do?" exercises.

The evaluation of reproductive, maternal, newborn, and child health (RMNCH) by the Disease Control Priorities, Third Edition (DCP3) focuses on maternal conditions, childhood illness, and malnutrition. Specifically, the chapters address acute illness and undernutrition in children, principally under age 5. It also covers maternal mortality, morbidity, stillbirth, and influences to pregnancy and pre-pregnancy. Volume 3 focuses on developments since the publication of DCP2 and will also include the transition to older childhood, in particular, the overlap and commonality with the child development volume. The DCP3 evaluation of these conditions produced three key findings: 1. There is significant difficulty in measuring the burden of key conditions such as unintended pregnancy, unsafe abortion, nonsexually transmitted infections, infertility, and violence against women. 2. Investments in the continuum of care can have significant returns for improved and equitable access, health, poverty, and health systems. 3. There is a large difference in how RMNCH conditions affect different income groups; investments in RMNCH can lessen the disparity in terms of both health and financial risk.

Written by the foremost experts in maternity and pediatric nursing, *Maternal Child Nursing Care*, 5th Edition offers the accurate, practical information you need to succeed in the classroom, the clinical setting, and on the NCLEX® examination. This new edition offers numerous content updates throughout the text to keep you up-to-date on the latest topics and best practices. Plus hundreds of illustrations, alert boxes, and tables clarify key content and help you quickly find essential information. Atraumatic Care boxes in the pediatric unit teach you how to provide competent and effective care to pediatric patients with the least amount of physical or psychological stress. Community Focus boxes emphasize community issues, supply resources and guidance, and illustrate nursing care in a variety of settings. Critical thinking case studies offer opportunities to test and develop your analytical skills and apply knowledge in various settings. Emergency boxes in the maternity unit guide you through step-by-step emergency procedures. Expert authors of the market-leading maternity and pediatric nursing textbooks combine to ensure delivery of the most accurate, up-to-date content. Family-Centered Care boxes highlight the needs or concerns of families that you should consider to provide family-centered care. NEW! Content updates throughout the text give you the latest information on topics such as the late preterm infant, fetal heart rate pattern identification, obesity in the pregnant woman, shaken baby syndrome/traumatic brain injury, Healthy People 2020, car restraints, immunizations, and childhood obesity. NEW! Updated Evidence-Based Practice boxes including QSEN KSAs (knowledge, skills, attitudes) provide the most current practice guidelines to promote quality care. NEW! Medication Alerts stress medication safety concerns for better therapeutic management. NEW! Safety Alerts highlighted and integrated within the content draw attention to developing competencies related to safe nursing practice.

This full-color revision of LPN/LVN level pediatrics text condenses prenatal and newborn coverage and features expanded asthma coverage and care of the well child. The text is organized as follows: chapters on developmental stages (age groups) are followed by chapters covering related and common diseases within each stage/age group. The final unit of the text includes the child with chronic health problems and the dying child. New recurring features include Web activities, pediatric triage checklists, and case studies.

One of the most complete nursing education learning systems available, Virtual Clinical Excursions 4.0 (VCE) is an interactive print and online workbook that guides you through a virtual hospital where the patients are real and their conditions are constantly changing. Each lesson features a core reading assignment from *Introduction to Maternity and Pediatric Nursing, 8th Edition* along with activities based on "visiting" the patients in the hospital. By immersing you in a realistic, yet safe, nursing environment, VCE simulates the average clinical rotation by allowing you to conduct a complete assessment of a patient and set priorities for care, collect information, analyze and interpret data, prepare and administer medications, and reach conclusions about complex problems. This unique virtual setting is the best way to learn about the complexities of patient care by giving you the perfect environment to practice what you've learned. Duration for access to this product, which may be at the discretion of your institution, is up to 36 months. Elsevier reserves the right to restrict or remove access due to changes in product portfolio or other market conditions. Updated drug reference includes a comprehensive set of the latest drug monographs to help you make the best clinical judgments to complete each case. Online workbook lessons guide you throughout the patient scenarios to collect information, make decisions, and set priorities. Vital signs tool within each patient's room allows you to check the patient's status at critical moments, and promotes safe practice. Nurse-client interaction videos depict conversations and situations involving nurses, patients, family members, and hospital staff to help you discern between communications that are ideal and those that need improvement. Unique records that house data from the virtual patient's hospital stay allows you to record new findings to see how the data for different attributes has changed over time. Laboratory guide provides standard value ranges for all laboratory values offered within the virtual patient hospital, so you can confirm and compare standard lab values against your patients' test results. Physical examination experience with unique images and assessment findings advance your understanding of each patient's system assessments. Patient medication administration enhances your ability to think critically about safe medication practices and follow safe medication standards. Allows for easy and quick access to various patient charts, including Physician's Orders, Laboratory Reports, Patient Education, Nursing Admission, and many more. Kardex nursing information regarding patients' acute care provides quick access to vital information such as physician's orders, laboratory reports, patient education, nursing admission, and more, offering a richly detailed portrait of the patient. Maternity coverage includes: care of the pregnant woman from conception through delivery; care of the newborn and family; issues and trends; reproduction; and family planning. Paediatric coverage includes: growth and development; health problems organized by body system; medications and pain management; chronic and life threatening illness; and mental health problems. Each chapter has the following helpful tools to enhance learning and promote retention: student objectives; key terms; chapter outline; introduction; key concepts; NCLEX-style review questions; and a bibliography.

This full-color LPN/LVN-level textbook presents maternity nursing using a nursing process framework. Throughout the text are features that help students develop critical thinking skills and apply content to practice—such as nursing procedures, nursing care plans, clinical pearls, patients' and caregivers' stories, critical thinking questions, cultural snapshots, family teaching tips, and over 200 illustrations. Each chapter is followed by an integrated study guide/workbook with NCLEX®-style questions, Critical Thinking: What Would You Do? scenarios including dosage calculations, and Study Activities including Internet activities. *Introductory Maternity Nursing* is an ideal complement to Hatfield, Broadribb's *Introductory Pediatric Nursing, Sixth Edition*. Instructors who prefer a combined maternity/pediatric text can use Klossner/Hatfield, *Introductory Maternity and Pediatric Nursing*.
