Employing a non-intimidating writing style that emphasizes concepts rather than formulas, this uniquely welcoming text shows consumers of research how to read, understand, and critically evaluate the statistical information and research results contained in technical research reports. Some key topics covered in this thoroughly revised text include: descriptive statistics, correlation, reliability and validity, estimation, hypothesis testing, t-tests, ANOVA, ANCOVA, regression, multivariate analysis, factor analysis, and structural

equation modeling (SEM). A number of mini-topics related to research and statistics are also discussed, such as the geometric mean, Tau-b correlation, Guttman split-half reliability, sensitivity, specificity, and the Sobel test. Additionally, the sixth edition also includes over 488 new excerpts (tables, figures, passages of text) taken from current research reports. Written specifically for students in non-thesis Master's Programs but also perfectly suitable for students in upper-level undergraduate statistics courses, doctoral students who must conduct dissertation research, and independent researchers who want a better handle on how to decipher and critique statistically-based

A New York Times Bestseller "A sacred reminder of what so many millions suffered, and only a few survived." —Adam Kirsch, New Republic In 1939, Helga Weiss was a young Jewish schoolgirl in Prague. As she endured the first waves of the Nazi invasion, she began to document her experiences in a diary. During her internment at the concentration camp of Terezín, Helga's uncle hid her diary in a brick wall. Of the 15,000 children brought to Terezín and deported to Auschwitz, there were only one hundred survivors. Helga was one of them. Miraculously, she was able to
