There is nothing like the pain of feeling invisible to those around you. It especially hurts when you are serving, giving, and loving, and no one seems to notice or even care. In creating The Invisible Woman, Nicole Johnson shows how much she understands the difficulty of living without recognition. Nicole puts us inside the mind and heart of Charlotte Fisher. And as we walk through Charlotte’s story of feeling invisible, we experience the comedy and loneliness of her life. The invisibility that at first feels inflicted ultimately brings her real significance and meaning. As the

builders of the great cathedrals, Charlotte realizes she is not invisible to God, and this simple truth changes everything for her. Faith is rekindled in her heart as she seeks to love her family in ways that only invisibility makes possible.

Tourism, for the uninitiated reader is a bright, sunny and interesting sector that satisfies the needs of resting, quest, knowledge, fun, curiosity and finally recreation. This kind of tourism seeks and visualizes everyone, in this tourism everyone seeks for the fulfilment of some of his desires; this

tourism is being dreamed before the journey and this one reminisce after completion. In addition, tourism offers a lot and important benefits to an individual, to the destination, to the country, even to the globe, from financial, employment, social, cultural and psychological point of view.

However, this tourism has some other negative, dark, delinquent aspects, such as sex tourism, death tourism, illegal medical tourism etc, all which are highlighted systematically and in an analytical manner in this book, as the invisible and defamatory side. The contributors - people that deacon

scientifically and professionally tourism for years – wish these iniquities and corruptions, to be known to the state as well as to the wide public, in order to find ways to confront them. This book is addressed to all those that they love, study or work in the tourism sector and through this are

hoping of the reinforcement of its constructive aspect.

Every Life Matters. When you truly see a person God has placed in your path, not just with your eyes, but also with your heart, you just might catch a glimpse of God. When you cultivate the ability to see the "invisible," you open yourself up to the opportunity for spiritual transformation. Some

individuals may seem obscure, even invisible to the world, but if you choose to engage in a meaningful way, to hear and understand their story, the encounter could transform you--and them. Listen In On A Conversation between Dr. Arthur Ammann and Barbara McLennan, inspired by the brief

letter of the Apostle Paul to Philemon. Dr. Ammann presents rich stories of transformation occurring in the lives of friends, brothers and sisters, husbands and wives, and even strangers bringing new found value to each individual Together, they explore what it means to engage in authentic

relationships, and confront the devastating influences of our culture and technology, which threaten to undermine the value of individuals. The authors will challenge you to expect that transformation may occur in every encounter, and to resist the relentless intrusion of technology that seeks to

diminish our value.

Data is fundamental to the modern world. From economic development, to healthcare, to education and public policy, we rely on numbers to allocate resources and make crucial decisions. But because so much data fails to take into account gender, because it treats men as the default and

women as atypical, bias and discrimination are baked into our systems. And women pay tremendous costs for this bias, in time, money, and often with their lives. Celebrated feminist advocate Caroline Criado Perez investigates shocking root cause of gender inequality and research in Invisible

Women † , diving into women ’ s lives at home, the workplace, the public square, the doctor ’ s office, and more. Built on hundreds of studies in the US, the UK, and around the world, and written with energy, wit, and sparkling intelligence, this is a groundbreaking, unforgettable exposé that

will change the way you look at the world.

overwhelmed by your doubts and questions about God's goodness: Where is He? Why would He allow this suffering?Fear or shame keeps you quiet. You live alone with your invisible wounds.It doesn't have to be that way. In

"Demographic and technological trends have yielded new forms of work that are increasingly more precarious, globalized, and brand centered. Some of these shifts have led to a marked decrease in the visibility of work or

workers. This edited collection examines situations in which technology and employment practices hide labor within the formal paid labor market, with implications for workplace activism, social policy, and law. In some

cases, technological platforms, space, and temporality hide workers and sometimes obscure their tasks as well. In other situations, workers may be highly visible--indeed, the employer may rely upon the workers' aesthetics

to market the branded product--but their aesthetic labor is not seen as work. In still other cases, the work occurs within a social interaction and appears as leisure--a voluntary or chosen activity--rather than as work.

Alternatively, the workers themselves may be conceptualized as consumers rather than as workers. Crossing the occupational hierarchy and spectrum from high- to low-waged work, from professional to manual labor, and from

production to service labor, the authors argue for a broader understanding of labor in the contemporary era. This book adopts an interdisciplinary approach that integrates perspectives from law, sociology, and

industrial/labor relations"--Provided by publisher.

This book offers a detailed analysis of the construction, reception and eventual decline of the cult of the Hungarian Communist Party Secretary, M ty s R kosi, one of the most striking examples of orchestrated adulation in the Soviet bloc. While his cult never

approached the magnitude of that of Stalin, R kosi's ambition to outshine the other 'best disciples' and become the best of the best was manifest in his diligence in promoting a Soviet-type following in Hungary. The main argument of Bal zs Apor is that the

cult of personality is not just a curious aspect of communist dictatorship, it is an essential element of it. The monograph is primarily concerned with techniques and methods of cult construction, as well as the role various institutions played in the creation of

mythical representations of political fi gures. Separate chapters present visual and non-visual methods of cult construction. The author engages with a wider international literature on Stalinist cults in an impressive manner. Apor uses the case of R kosi to

explore how personality cults are created, how such cults are perceived, and how they are eventually unmade. The book addresses the success?generally questionable?of such projects, as well as their uncomfortable legacies.
