

Isis Papers

When Islamic State (ISIS) forces were driven out of the territories they had acquired in Syria and Iraq, there remained a concern that the threat posed by ISIS was far from over. It was clear that significant long-term strategies would be needed to establish and maintain security and stability if the potential for further radical Islamist threats in the Middle East and among NATO countries was to be eradicated. This book presents papers from the NATO Advanced Research Workshop (ARW) entitled The Post ISIS-Era: Regional and Global Implications, held in Washington DC, USA, from 6-8 September 2019. The ARW brought together participants from NATO member nations and Partner countries, and from diverse backgrounds, including academia, security, law enforcement, intelligence, military, foreign affairs, media, think tanks, international organizations and embassies. Topics covered included: the future of ISIS after the loss of its territories; maintaining security and stability; analysis of ISIS recruitment and propaganda activities; the returnee problem and the plight of refugees; the processes of radicalization; and violent extremism; policy recommendations to mitigate the consequences of new threats; and dealing with the exploitation of public fear of terrorism. The book also discusses how the lessons learned can be implemented, and offers specific policy recommendations for the future. It will be of interest to all those involved in combating the international terror threat.

The essential "on the ground" report on the fastest-growing new threat in the Middle East, from the winner of the 2014 Foreign Affairs Journalist of the Year Award Born of the Iraqi and Syrian civil wars, the Islamic State astonished the world in 2014 by creating a powerful new force in the Middle East. By combining religious fanaticism and military prowess, the new self-declared caliphate poses a threat to the political status quo of the whole region. In The Rise of Islamic State, Patrick Cockburn describes the conflicts behind a dramatic ravelling of US foreign policy. He shows how the conditions for ISIS's explosive success by stoking the war in Syria. The West—the US and NATO in particular—underestimated the militants' potential until it was too late and failed to act against jihadi sponsors in Saudi Arabia, Turkey and Pakistan.

During the course of the struggle of African people against European racism, brutality and domination, many innovative thinkers have risen from our ranks. The greatest and most courageous scholars have devoted their lives to the pursuit of an explanation for the virtually inherent animosity most white people appear to have toward people of color / Unlike her predecessors, Dr. Frances cress welsing, a brilliant, Washington, DC psychiatrist has rejected conventional notions about the origin and perpetuation of racism . First published in 1962, this volume collects together some of Newton's most important scientific papers. Chosen primarily to illustrate Newton's ideas on the nature of matter, the papers afford valuable insights into Newton's development as a scientist and his ideas of the world that science explores. The six sections are entitled: Mathematics, Mechanics, Theory of Matter, Manuscripts related to the Principia, Education and Notes. Each section has a critical introduction to set the manuscripts in perspective and to discuss their implications. English translations of the Latin documents are given.

The most recent update to one of the most essential references on medical genetics Cassidy and Allanson's Management of Genetic Syndromes, 4th Edition is the latest version of a classic text in medical genetics. With newly covered disorders and cutting-edge, up-to-date information, this resource remains the most crucial reference on the management of genetic syndromes for students, clinicians, and researchers in the field of medical genetics. The 4th edition includes current information on the identification of genetic syndromes (including newly developed diagnostic criteria), the genetic basis (including diagnostic testing), and the routine care and management for more than 60 genetic disorders. Each, "expert authored", chapter includes sections on: Incidence Diagnostic criteria Etiology, pathogenesis and genetics Diagnostic testing Differential diagnosis Manifestations and Management (by system) The book focuses on genetic syndromes, primarily those involving developmental disabilities and congenital defects. The chapter sections dealing with Manifestations and Management represents the centerpiece of each entry and is unmatched by other genetic syndrome references. Management of Genetic Syndromes is perfect for medical geneticists, genetic counselors, primary care physicians and all health care professionals seeking to stay current on the routine care and management of individuals with genetic disorders.

First published in 1934 and revised in 1962, this book gathers Journalist and historian Joel Augustus Rogers' columns from the syndicated newspaper feature titled Your History. Patterned after the look of Ripley's popular Believe It or Not the multiple vignettes in each episode recount short items from Rogers's research. The feature began in the Pittsburgh Courier in November 1934 and ran through the 1960s.

This speech was said to have been delivered by Willie Lynch on the bank of the James River in the colony of Virginia in 1712. Lynch was a British slave owner in the West Indies. He was invited to the colony of Virginia in 1712 to teach his methods to slave owners there.

These documents provide a shocking inside account of the activities of one tobacco company, Brown & Williamson, and its multinational parent, British American Tobacco, over more than thirty years.

Do you know who - and what - you are? Do you know who you're meant to be? Do you know how to find the answers to questions like these? Knowledge of Self is the result of a process of self-discovery, but few of us know where to begin when we're ready to start looking deeper. Although self-actualization is the highest of all human needs, it is said that only 5% of people ever attain this goal. In the culture of the Nation of Gods and Earths, commonly known as the Five Percent, students are instructed that they must first learn themselves, then their worlds, and then what they must do in order to transform their world for the better. This often intense process has produced thousands of revolutionary thinkers in otherwise desperate environments, where poverty and hopelessness dominate. Until now, few mainstream publications have captured the brilliant yet practical perspectives of these luminary men and women. Knowledge of Self: A Collection of Writings on the Science of Everything in Life presents the thoughts of Five Percenters, both young and old, male and female, from all over the globe, in their own words. Through essays, poems, and even how-to articles, this anthology presents readers with an accurate portrait of what the Five Percent study and teach, as well as sound direction on how to answer timeless questions like: Who am I, and why am I here? Why is there so much injustice in the world, and what can be done about it? Who is God and where on Earth is he? How do I improve myself without losing myself? Why are people of color in the situations they're in? What can we do about the global problems of racism and poverty?

The Isis Ysis PapersThe Keys to the ColorsAfrikan World Books

WHEN THE "PEACE PRIZE" in this "courageous" (The Washington Post) memoir of survival, a former captive of the Islamic State tells her harrowing and ultimately inspiring story. Nadia Murad was born and raised in Kocho, a small village of farmers and shepherds in northern Iraq. A member of the Yazidi community, she and her brothers and sisters lived a quiet life. Nadia had dreams of becoming a history teacher or opening her own beauty salon. On August 15th, 2014, when Nadia was just twenty-one years old, this life ended. Islamic State militants massacred the people of her village, executing men who refused to convert to Islam and women too old to become sex slaves. Six of Nadia's brothers were killed, and her mother soon after, their bodies swept into mass graves. Nadia was taken to Mosul and forced, along with thousands of other Yazidi girls, into the ISIS slave trade. Nadia would be held captive by several militants and repeatedly raped and beaten. Finally, she managed a narrow escape through the streets of Mosul, finding shelter in the home of a Sunni Muslim family whose oldest son risked his life to smuggle her to safety. Today, Nadia's story—as a witness to the Islamic State's brutality, a survivor of rape, a refugee, a Yazidī—has forced the world to pay attention to an ongoing genocide. It is a call to action, a testament to the human will to survive, and a love letter to a lost country, a fragile community, and a family torn apart by war.

Nanosatellites: Space and Ground Technologies, Operations and Economics Rogerio Atem de Carvalho, Instituto Federal Fluminense, Brazil Jaime Estela, Spectrum Aerospace Group, Germany and Peru Martin Langer, Technical University of Munich, Germany Covering the latest research on nanosatellites Nanosatellites: Space and Ground Technologies, Operations and Economics comprehensively presents the latest research on the fast-developing area of nanosatellites. Divided into three distinct sections, the book begins with a brief history of nanosatellites and introduces nanosatellites technologies and payloads, also explaining how these are deployed into space. The second section provides an overview of the ground segment and operations, and the third section focuses on the regulations, policies, economics, and future trends. Key features: Payloads for nanosatellites Nanosatellites components design Examines the cost of development of nanosatellites. Covers the latest policies and regulations. Considers future trends for nanosatellites.

Nanosatellites: Space and Ground Technologies, Operations and Economics is a comprehensive reference for researchers and practitioners working with nanosatellites in the aerospace industry.

The Key to the Colors

The so-called Islamic State, or ISIS, has inspired young men and women all over the world to commit horrible atrocities in its name. How has the Islamic State surpassed al-Qaeda to become the most popular jihadist group on the planet? Its goal is not only to revive the Islamic empire but also usher in the End of Times – a final battle that will restore the Muslim community to its medieval glory days. And they will not stop until they achieve their mission.

Argues that the extremist Sunni jihadist group ISIS presents a great danger to the United States and the world, looking at the origin of the group, its objectives, and its unlawful terrorist strategies.

Nefertari, the favorite queen of Ramses II, was buried about 3,200 years ago in the most exquisitely decorated tomb in Egypt's Valley of the Queens. Discovered in 1904 by Italian explorer Ernesto Schiaparelli, the tomb had deteriorated to a disastrous extent when emergency consolidation began in 1986. The six-year conservation project of the GCI and the Egyptian Antiquities Organization was completed in 1992. In this fascinating exploration of the tomb, John McDonald takes the reader through each chamber, describing the hieroglyphic messages depicted in the brilliant wall paintings and discussing the images within the context of Egyptian beliefs. He also offers insights into the life of Nefertari, the development and symbolism of royal tombs, and the construction and decoration of the tombs. House of Eternity is illustrated with historic black-and-white images and more recent color photographs that reveal the vibrant beauty of the wall paintings. In November 1995 the tomb was reopened to the public. Because of the potential for damage and deterioration to the fragile wall paintings caused by increased humidity, carbon dioxide, and microbiological activity introduced by visitors to the tomb, the number permitted to enter daily is strictly controlled by the Egyptian authorities. This book results from a desire of the GCI to enrich visitors' experience by providing a detailed descriptive walk-through of the tomb while conveying a strong message regarding the need for conservation and continuous monitoring to ensure the long-term survival of the tomb's paintings. Visitors to the tomb and the armchair traveler alike will find House of Eternity to be an excellent resource for understanding Nefertari's journey to the afterlife and for appreciating the extraordinary depictions of that journey on the walls of Nefertari's tomb.

Alkaline Herbal Medicine gives insight into many of the herbs used to reverse disease in Dr. Sebi's African Bio Mineral Balance. It covers scientifically supported properties, preparation, doses and dosages, and how to combine herbs. It addresses alkaline foods on the Dr. Sebi nutritional guide, and their chemical affinity with and support of the electric body. The natural order in life designed the body to be healthy and heal under the right conditions. These conditions are programmed DNA makeup is the African genome. Diets centered on the consumption of natural alkaline plant foods and ample exposure to the sun supported the healthy expression of the African genome. The environment of Africa, and environments similar to Africa, produced life that developed with a complete and balanced electrical structure. The plant life that grew in these environments grew under optimal conditions in nutrient rich soil under year long exposure to the sun. The resulting c protected them from environmental stresses. Africans originally ate diets centered on the consumption of these plants, like the great apes of Africa, and the programming of the African genome used the protective nature of these plants' nutrients to support its vibrancy. A scientific model supports the idea that Africans migrated out of Africa hundreds of thousands of years ago into the less hospitable environments of Europe and Asia. These environments didn't support the health in the mutation of the gene and the development of the Neanderthal of Europe and Denisovan of East Asia. Science has linked diseases like lupus, Crohn's disease, and type 2 diabetes to the Neanderthal gene. The Neanderthals, who inhabited the Neanderthal caves in Germany, ate a diet centered on the consumption of meat. The combination of their meat-centered diet and adverse relationship with the sun led to the development of dis-ease in the body. Now, the meat-centered di disease throughout the world. An alkaline plant-centered diet and the use of alkaline herbal medicine naturally support the healthy expression of the African genome in all people, and reverses chronic disease. Pharmaceutical medicine is built on the power of medicinal herbs because around fifty percent of its drugs are derived from herbs. The issue is industry has strategically conditioned people to forget about the healing power of natural alkaline herbs. I dedicate this book in the Dr. Sebi. He helped us to remember that natural alkaline herbs and plant foods support the healthy expression of the African genome that is in all people. He did this by sharing his African Bio Mineral Balance methodology. Categories: herbal remedies, naturopathy, healing, herbs, herbal medicine

The Compensatory Code is a term that means the sum total of everything that is thought, said, or done by one individual Non-White person, who is a Victim of Racism [Victim of White Supremacy] that is effective in helping to eliminate Racism (White Supremacy), and/or in helping to "make up" for the lack of justice and correctness.

Woodson's classic work of criticism explores how the education received by blacks has failed to give them an appreciation of themselves as a race and their contributions to history. Woodson puts forward a program that calls for the educated to learn about their past and serve the black community. (Education/Teaching)

The Oairis Papers: Reflections on the Life and Writings of Dr. Frances Cress Welsing is intended to be the first of many treatises written to examine the life, theories, and contributions of Dr. Frances Cress Welsing. Some of these writings will be hagiographic. Some will be critical, but all will expand our understanding of one of the greatest African thinkers of the past 100 years.

This is a widely read classic exposition of the history of Africans on the continent, the people of African descent in the United States and in the diaspora. This is well researched scholarly work detailing the development of civilisation in Africa and its destruction

Essays discuss the status of the contemporary African American family, examining current concerns and problems, and offering possible solutions to the troubles they face

**A rare and riveting first-hand account of the terror and torture inflicted by ISIS on young Iraqi Yazidi women, and an inspiring personal story of bravery and resilience in the face of unspeakable horrors. In the early summer of 2014, Farida Khalaf was a typical Yazidi teenager living with her parents and three brothers in her village in the mountains of Northern Iraq. In one horrific day, she lost everything: ISIS invaded her village, destroyed her family, and sold her into sexual slavery. The Girl Who Escaped ISIS is her incredible account of captivity and describes how she defied the odds and escaped a life of torture, in order to share her story with the world. Devastating and inspiring, this is an astonishing, intimate account of courage and hope in the face of appalling violence"--*

"Ingenious... Builds to one of the most memorable final scenes I've read in a novel this century." --The New York Times WINNER OF THE 2018 WOMEN'S PRIZE FOR FICTION FINALIST FOR THE 2019 INTERNATIONAL DUBLIN LITERARY AWARD LONGLISTED FOR THE MAN BOOKER PRIZE The suspenseful and heartbreaking story of an immigrant family driven to pit love against loyalty, with devastating consequences Isma is free. After years of watching out for her younger siblings in the wake of their mother's death, she's accepted an invitation from a mentor in America that allows her to resume a dream long deferred. But she can't stop worrying about Aneeka, her beautiful, headstrong sister back in London, or their brother, Parvaiz, who's disappeared in pursuit of his own dream, to prove himself to the dark legacy of the jihadist father he never knew.

When he resurfaces half a globe away, Isma's worst fears are confirmed. Then Eamonn enters the sisters' lives. Son of a powerful political figure, he has his own birthright to live up to—or defy. Is he to be a chance at love? The means of Parvaiz's salvation? Suddenly, two families' fates are inextricably, devastatingly entwined, in this searing novel that asks: What sacrifices will we make in the name of love?

"There are more than 200 negative words associated with the word black and more than 100 positive meanings or synonyms attributed to the word white. This analysis of semantics and semiotics illustrates how words are not racially neutral and can convey negative values within the African American community or any community of color. Also examined are the impact of images, from paintings of Jesus to images of Santa Claus, and how they have shaped the way blacks are viewed and how they view themselves. This is not a book on political correctness, but rather a guide to becoming more aware of and sensitive to the impact that words and images can have on the psyche."

In the essay The Psychopathic Racial Personality, Dr. Bobby Wright contends that viewing white behavior towards nonwhites as psychopathic provides a new lens through which to analyze and combat the actions and aims of Europeans

In the wake of its "Caliphate" declaration in 2014, the self-described Islamic State has been the focus of countless academic papers, government studies, media commentaries and documentaries. Despite all this attention, persistent myths continue to shape--and misdirect--public understanding and strategic policy decisions. A significant factor in this trend has been a strong disinclination to engage critically with Islamic State's speeches and writings--as if doing so reflects empathy with the movement's goals or, even more absurdly, may itself lead to radicalisation. Going beyond the descriptive and the sensationalist, this volume presents and analyses a series of milestone Islamic State primary source materials. Scholar-practitioners with field experience in confronting the movement explore and contextualise its approach to warfare, propaganda and governance, examining the factors behind its dramatic evolution from failed proto-state in 2010 to standard-bearer of global jihadism in 2014, to besieged insurgency in 2018. The ISIS Reader will help anyone--students and journalists, military personnel, civil servants and inquisitive observers--to better understand not only the evolution of Islamic State and the dynamics of asymmetric warfare, but the importance of primary sources in doing so.

The Oairis Papers

This book, based on four years of on-the-ground reporting, research in ten countries in the Middle East, a thousand hours of interviews with key players and access to generals, spies, policymakers, soldiers and refugees, is the first comprehensive look at the defeat of ISIS and the future reshaping of the Middle East. It provides a unique window into the battle for the heart and soul of the Muslim world and lays out why we need to be informed about changes on the ground after the defeat of ISIS. More than seventy countries are members of the international coalition formed in 2014 to defeat Islamic State (ISIS). After ISIS provides a sobering blueprint for how the US and regional powers will re-shape the region in years to come. Understanding these events and the choices ahead will determine if ISIS and similar ideologies reemerge, whether a new war between the US, its allies and Iran comes in the wake of ISIS, or if a younger generation of leaders can carve out a new Middle East. As ISIS recedes, the world is at a unique historic crossroads in the Middle East. Decisions made now in the region and in Washington matter more than ever. Tehran and the US are increasingly on a collision course to struggle over the vacuum left behind by ISIS in Iraq and Syria.

Did you come from Mexico? An Mexican-American defends Joaquin, a boyy frp, Mexico who came across the border. The Border Patrol is looking for him and his mother who are hiding. His newly found friend Priletia took him to the Herb Lady to help him with red welts.

Exploring several of the evolutionary branches of the mathematical notion of genus, this book traces the idea from its prehistory in problems of integration, through algebraic curves and their associated Riemann surfaces, into algebraic surfaces, and finally into higher dimensions. Its importance in analysis, algebraic geometry, number theory and topology is emphasized through many theorems. Almost every chapter is organized around excerpts from a research paper in which a new perspective was brought on the genus or on one of the objects to which this notion applies. The author was motivated by the belief that a subject may best be understood and communicated by studying its broad lines of development, feeling the way one arrives at the definitions of its fundamental notions, and appreciating the amount of effort spent in order to explore its phenomena.
