

It Starts With The Egg How The Science Of Egg Quality Can Help You Get Pregnant And Prevent Miscarriage

A classic he-said-she-said romantic comedy, with bonus content including a Q&A with the author. All I've ever wanted is for Juli Baker to leave me alone. For her to back off — you know, just give me some space. Juli has been making Bryce's life hell from the moment they met. All he wants is to live a normal life, without some crazy person mooning after him. The first day I met Bryce Loski, I flipped. Honestly, one look at him and I became a lunatic. It's his eyes. But she doesn't see it that way. In her eyes, they're meant for each other, even though he might not realize it yet. That is, until the eighth grade, when everything flips. And just as Juli starts to realize that Bryce may not be all he seemed, Bryce begins to think that there's more to Juli than meets the eye . . . Wendelin Van Draanen's *Flipped* is a modern-day classic about first love and not judging a book by its cover. A romantic comedy-of-errors told in alternating chapters by two fresh, funny voices.

Making Babies offers a proven 3-month program designed to help any woman get pregnant. Fertility medicine today is all about aggressive surgical, chemical, and technological intervention, but Dr. David and Blakeway know a better way. Starting by identifying "fertility types," they cover everything from recognizing the causes of fertility problems to making lifestyle choices that enhance fertility to trying surprising strategies such as taking cough medicine, decreasing doses of fertility drugs, or getting acupuncture along with IVF. *Making Babies* is a must-have for every woman trying to conceive, whether naturally or through medical intervention. Dr. David and Blakeway are revolutionizing the fertility field, one baby at a time.

More and more couples are turning to IVF each year to help them conceive, and yet there are still many questions to be answered. "What makes IVF successful?" and "what else can we do to support our treatment?" are two of the most important queries couples can have, and here, Zita West offers solutions. Nutrition and lifestyle advice, psychological and emotional support and a positive mindset all play an important part in helping couples conceive, and can even make the difference between a successful and unsuccessful outcome. This book not only advises how to prepare for IVF, but why it's so important, and the step-by-step diet and lifestyle plan is a clear way to support your treatment.

Comforting and intimate, this "girlfriend" guide to getting pregnant gets to the heart of all the emotional issues around having children—biological pressure, in-law pressures, greater social pressures—to support women who are considering getting pregnant. Trying to get pregnant is enough to make any woman impatient. *The Impatient Woman's Guide to Getting Pregnant* is a complete guide to the medical, psychological, social, and sexual aspects of getting pregnant, told in a funny, compassionate way, like talking to a good friend who's been through it all. And in fact, Dr. Jean Twenge has been through it all—the mother of three young children, she started researching fertility when trying to conceive for the first time. A renowned sociologist and professor at San Diego State University,

Get Free It Starts With The Egg How The Science Of Egg Quality Can Help You Get Pregnant And Prevent Miscarriage

Dr. Twenge brought her research background to the huge amount of information—sometimes contradictory, frequently alarmist, and often discouraging—that she encountered online, from family and friends, and in books, and decided to go into the latest studies to find out the real story. The good news is: There is a lot less to worry about than you’ve been led to believe. Dr. Twenge gets to the heart of the emotional issues around getting pregnant, including how to prepare mentally and physically when thinking about conceiving; how to talk about it with family, friends, and your partner; and how to handle the great sadness of a miscarriage. Also covered is how to know when you’re ovulating, when to have sex, timing your pregnancy, maximizing your chances of getting pregnant, how to tilt the odds toward having a boy or a girl, and the best prenatal diet. Trying to conceive often involves an enormous amount of emotion, from anxiety and disappointment to hope and joy. With comfort, humor, and straightforward advice, *The Impatient Woman’s Guide to Getting Pregnant* is the bedside companion to help you through it.

Healing Arthritis and Psoriasis by Restoring the Microbiome

The Egg Quality Diet is the culmination of what Aimee Raupp has found, during her two decades of clinical practice, to be the most effective nutritional approach to optimizing fertility. This diet has been proven to work not in a randomized control trial (RCT) but in real life, on thousands of real women like you. Real women who have been told they have no good eggs left or they are too old or they are in menopause. This diet has been proven in women with high follicle stimulating hormone (FSH), low anti-mullerian hormones (AMH), recurrent pregnancy loss (RPL), multiple failed in-vitro fertilizations (IVF) and intrauterine inseminations (IUI). This diet has been proven in women with endometriosis, miscarriage, poly-cystic ovarian syndrome (PCOS), fibroids, cysts, adenomyosis, asherman's syndrome, premature ovarian failure (POF) and hypothalamic amenorrhea. This diet has helped hundreds of women, even those in their mid to late forties, make healthy babies using their own eggs. This diet has helped women bring their FSH from above 50 down to 10. This diet has helped women double, even triple their AMH. Even more, this diet has been recommended by multiple reproductive endocrinologists (R.E.) to their clients.

Created especially for the Australian customer! A guide to the medical, emotional, legal and financial aspects of IVF and life after treatment Are you trying for a baby but suspect you may have an infertility problem and need IVF to conceive? Nutrition and Lifestyle Guidance for Men Trying to Conceive

An increasing collection of research confirms that men's fertility health is just as important as the women's when couples are trying to conceive. Yet, there are only a small handful of resources supporting men trying to expand their family. Written by award-winning registered dietitian and nutrition expert Lauren Manaker, this guide you will find specific nutrition and lifestyle interventions that have been shown to improve male fertility parameters in scientific peer-reviewed papers. You will also find the author's personal recommendations for how to implement certain measures. Lastly, you will find a brief outline highlighting certain things you can do to modify your diet and lifestyle according to specific fertility challenges.

This is the complete guide to getting pregnant and improving fertility naturally -- even if you've been told your chances of conception are low. A nationally renowned women's health and fertility expert, Aimee Raupp has helped thousands of women optimize their fertility and get pregnant. Now, in this book, she provides her complete program for improving your chances of conceiving and overcoming infertility, including the most effective complementary and lifestyle approaches, the latest nutritional advice, and ways to prepare yourself emotionally and spiritually.

The cookbook companion to the groundbreaking fertility book It Starts with the Egg. A wealth of scientific research shows that adopting a Mediterranean diet can help you get pregnant faster and boost success rates in IVF. This book helps you put that research into practice, with over 100 recipes inspired by the Mediterranean diet, along with answers to all your questions about nutrition and fertility. Recipes include • Smoked Salmon and Leek Frittata • Baked Falafel with Lemon Tahini Dressing • Chicken Souvlaki with Avocado Tzatziki • Pan-Fried Snapper with Salsa Verde • Dairy-Free Chicken Alfredo • Low-Carb Rosemary Flatbread • Blueberry Almond Cake • Pecan Chocolate Chip Blondies

According to this reference from a leading authority who has worked with more than 7,000 couples, women who have experienced difficulty conceiving or multiple miscarriages may be suffering from treatable dysfunctions of their immune systems. Providing details that are both technical and accessible, this book explains how chemical therapy can temporarily regulate immune responses that might otherwise unleash natural killer cells. Sections cover the most common and adverse immune problems, including tissue compatibility, blood clotting defects, and antibodies that fight sperm, fetal cells, hormones, and neurotransmitters, and also outline clinical protocol for comprehensive immune testing. The discussion incorporates the author's own dramatic account of his clinical breakthroughs, the rejection of his ideas by mainstream medical practitioners, and his research showing that failed in vitro fertilization (IVF), infertility, and repeated miscarriages are often the result of abnormal immune reactions.

Budget Bytes

All the Fertility and Infertility Explanations You Will Ever Need, from A to Z

How tiny variations in our personal DNA can determine how we look, how we behave, how we get sick, and how we get well. News stories report almost daily on the remarkable progress scientists are making in unraveling the genetic basis of disease and behavior. Meanwhile, new technologies are rapidly reducing the cost of reading someone's personal DNA (all six billion letters of it). Within the next ten years, hospitals may present parents with their newborn's complete DNA code along with her footprints and APGAR score. In *Genetic Twists of Fate*, distinguished geneticists Stanley Fields and Mark Johnston help us make sense of the genetic revolution that is upon us. Fields and Johnston tell real life stories that hinge on the inheritance of one tiny change rather than another in an individual's DNA: a mother wrongly accused of poisoning her young son when the true killer was a genetic disorder; the screen siren who could no longer remember her lines because of Alzheimer's disease; and the president who was treated with rat poison to prevent another heart attack. In an engaging and accessible style, Fields and Johnston explain what our personal DNA code is, how a few differences in its long list of DNA letters makes each of us unique, and how that code influences our appearance, our behavior, and our risk for such common diseases as diabetes or cancer.

The debut cookbook from the *Saveur* blog award-winning Internet expert on making eating cheap dependably delicious. As a college grad during the recent great recession, Beth Moncel found herself, like so many others, broke. Unwilling to sacrifice eating healthy and well—and armed with a degree in nutritional science—Beth began tracking her costs with obsessive precision, and soon cut her grocery bill in half. Eager to share her tips and recipes, she launched her blog, *Budget Bytes*. Soon the blog received millions of readers clamoring for more. Beth's eagerly awaited cookbook proves cutting back on cost does not mean cutting back on taste. *Budget Bytes* has more than 100 simple, healthy, and delicious recipes, including Greek Steak Tacos, Coconut Chicken Curry, Chorizo Sweet Potato Enchilada, and Teriyaki

Salmon with Sriracha Mayonnaise, to name a few. It also contains expert principles for saving in the kitchen—including how to combine inexpensive ingredients with expensive to ensure that you can still have that steak you're craving, and information to help anyone get acquainted with his or her kitchen and get maximum use out of the freezer. Whether you're urban or rural, vegan or paleo, Budget Bytes is guaranteed to delight both the palate and the pocketbook.

'This book is an absolute game-changer' - Dr Xand Van Tulleken 'Everyone concerned about their fertility should read this book' - Dr Raj Mathur, Chair of the British Fertility Society The book you can trust to help you achieve a healthy pregnancy. Whether you are trying for a baby now or preparing for a family in future, The Fertility Book is the no-nonsense guide you need to help you to optimize your chances of a healthy pregnancy. World-renowned fertility consultant Adam Balen and reproductive biologist Grace Dugdale dispel the myths in this comprehensive guide to reproductive health, explaining in easy-to-understand terms the genetic and lifestyle factors at play. They take an honest look at the evidence for both conventional and alternative approaches, equipping you with powerful tools to improve your chances of a natural conception and an understanding of how to create the best environment for a healthy pregnancy. If you do decide to seek help through assisted conception, this book will be with you every step of the way, explaining what treatments are available and how to approach them, so that you can come to an informed decision about what is right for you. Professor Adam Balen and Grace Dugdale have decades of experience helping couples on their journey to conception and beyond. Now in this, their first book for a general readership, they explain everything you need to know to understand your own fertility.

Please note: This is a companion version & not the original book. Sample Book Insights: #1 The first few weeks after fertilization are a major hurdle for embryos, and many stop developing at some point during this time. Only about a third of fertilized embryos survive to become a baby. #2 The most common type of chromosomal abnormality is the addition of a copy of chromosome 21, which is what causes Down syndrome. However, sometimes a missing chromosome or more

Get Free It Starts With The Egg How The Science Of Egg Quality Can Help You Get Pregnant And Prevent Miscarriage

complex errors can also occur. An egg with the incorrect number of chromosomes is aneuploid. #3 The impact of chromosomal abnormalities on the chance of conceiving and carrying to term is especially apparent in the IVF context. If this factor is taken out of the equation, the pregnancy rates skyrocket. #4 Chromosomal screening is not a cure-all. It can reveal that none of the embryos created in an IVF cycle are chromosomally normal, which can result in no good embryo available to transfer.

It Starts with the Egg: How the Science of Egg Quality Can Help You Get Pregnant Naturally, Prevent Miscarriage, and Improve Your Odds in IVF

Business startup advice from the former president of the Ewing Marion Kaufmann Foundation and cofounder of Global Entrepreneurship Week and StartUp America, this “thoughtful study of ‘how businesses really start, grow, and prosper’...dispels quite a few business myths along the way” (Publishers Weekly). Carl Schramm, the man described by *The Economist* as “The Evangelist of Entrepreneurship,” has written a myth-busting guide packed with tools and techniques to help you get your big idea off the ground. Schramm believes that entrepreneurship has been misrepresented by the media, business books, university programs, and MBA courses. For example, despite the emphasis on the business plan in most business schools, some of the most successful companies in history—Apple, Microsoft, Google, Facebook, and hundreds of others—achieved success before they ever had a business plan. *Burn the Business Plan* punctures the myth of the cool, tech-savvy twenty-something entrepreneur with nothing to lose and venture capital to burn. In fact most people who start businesses are juggling careers and mortgages just like you. The average entrepreneur is actually thirty-nine years old, and the success rate of entrepreneurs over forty is five times higher than that of those under age thirty. Entrepreneurs who come out of the corporate world often have discovered a need for a product or service and have valuable contacts to help them get started. Filled with stories of successful entrepreneurs who drew on real-life experience rather than academic coursework, *Burn the Business Plan* is the guide to starting and running a business that will actually work for the rest of us.

From the author of "Fertility Diary" for the New York Times Motherlode blog comes a reassuring, no-nonsense guide to both the emotional and practical process of trying to get pregnant, written with the smarts, warmth, and honesty of a woman who has been in the trenches. "A compassionate, often funny, well-researched, and ultimately empowering guide."--Lori Gottlieb, New York Times bestselling author of *Maybe You Should Talk to Someone* There are so many ways

Get Free It Starts With The Egg How The Science Of Egg Quality Can Help You Get Pregnant And Prevent Miscarriage

to be Not Pregnant: You can be young, old, partnered, or unpartnered. Maybe you have endometriosis. Maybe you don't have enough eggs or your partner doesn't have enough sperm. Or maybe there's nothing wrong except you're Just. Not. Pregnant. Amy Klein has been there. Faced with fertility obstacles, she quickly became an expert. After nine rounds of IVF, four miscarriages, three acupuncturists, two rabbis, and one reproductive immunologist, she finally became a mother. And she wrote about it all for the New York Times Motherlode blog in her "Fertility Diary" column. Now, Amy has written the book she wishes she'd had when she was trying to get pregnant. With advice from medical experts as well as real women, she outlines your options every step of the way, from questions you should ask to advice on getting your mother-in-law to mind her own beeswax. In this comprehensive road map to infertility, you'll find topics such as: * whether to freeze your eggs * finding (and affording) a clinic * what to expect during your first IVF cycle * baby envy--aka it's okay to skip your friend's shower * whether the alternative route--acupuncture, herbs, supplements--is for you * helpful tips, charts, and more! Empowering, compassionate, and down-to-earth, *The Trying Game* will show you what to expect when you're not expecting with heart and humanity when you need it the most.

A practical and evidence-backed approach for improving egg quality and fertility— fully revised and updated in 2019. The latest scientific research reveals that egg quality has a powerful impact on how long it takes to get pregnant and the risk of miscarriage. Poor egg quality is in fact the single most important cause of age-related infertility, recurrent miscarriage, and failed IVF cycles. Based on a vast array of scientific research, *It Starts with the Egg* provides a comprehensive program for improving egg quality in three months, with specific advice tailored to a variety of fertility challenges— including endometriosis, unexplained infertility, diminished ovarian reserve, PCOS, and recurrent miscarriage. With concrete strategies such as minimizing exposure to common toxins, choosing the right vitamins and supplements to safeguard developing eggs, and harnessing nutritional advice shown to boost IVF success rates, this book offers practical solutions that will help you get pregnant faster and deliver a healthy baby.

NEW YORK TIMES BEST SELLER • Celebrated food blogger and best-selling cookbook author Deb Perelman knows just the thing for a Tuesday night, or your most special occasion—from salads and slaws that make perfect side dishes (or a full meal) to savory tarts and galettes; from Mushroom Bourguignon to Chocolate Hazelnut Crepe. "Innovative, creative, and effortlessly funny." —Cooking Light
Deb Perelman loves to cook. She isn't a chef or a restaurant owner—she's never even waitressed. Cooking in her tiny Manhattan kitchen was, at least at first, for special occasions—and, too often, an unnecessarily daunting venture. Deb found herself overwhelmed by the number of recipes available to her. Have you ever searched for the perfect birthday cake on Google? You'll get more than three million results. Where do you start? What if you pick a recipe that's downright bad? With the same warmth, candor, and can-do spirit her award-winning blog, *Smitten Kitchen*, is known for, here Deb presents more than 100 recipes—almost entirely new, plus a few favorites from the site—that guarantee delicious results every time. Gorgeously illustrated with hundreds of her beautiful color photographs, *The Smitten Kitchen Cookbook* is all about approachable, uncompromised home cooking. Here you'll find better uses for your favorite vegetables: asparagus blanketing a pizza; ratatouille dressing up a sandwich; cauliflower masquerading as pesto. These are recipes you'll bookmark and use so

Get Free It Starts With The Egg How The Science Of Egg Quality Can Help You Get Pregnant And Prevent Miscarriage

often they become your own, recipes you'll slip to a friend who wants to impress her new in-laws, and recipes with simple ingredients that yield amazing results in a minimum amount of time. Deb tells you her favorite summer cocktail; how to lose your fear of cooking for a crowd; and the essential items you need for your own kitchen. From salads and slaws that make perfect side dishes (or a full meal) to savory tarts and galettes; from Mushroom Bourguignon to Chocolate Hazelnut Crepe Cake, Deb knows just the thing for a Tuesday night, or your most special occasion.

Do any of these situations apply to you? *You're over 35 years of age and trying to get pregnant. *You've been told that you're too old to get pregnant with your own eggs. *You've had pregnancy losses. *You're

Get Free It Starts With The Egg How The Science Of Egg Quality Can Help You Get Pregnant And Prevent Miscarriage

preparing for IVF. Since 2000, natural fertility expert Julie Chang has helped women over 35 years halt the aging process to get pregnant and stay pregnant with a healthy baby. Julie combines her extensive clinical experience with scientifically supported strategies to provide a holistic approach to improving fertility naturally. In this guide, you will:

- Identify behaviors that hurt your fertility unknowingly.
- Make better food choices to support the growth of a thriving baby.
- Create a healthier lifestyle for improved fertility.

In doing so, you'll feel more optimistic and hopeful, knowing that it's not too late for a woman over 35 years and into her 40s to have her own child. You will be empowered to make better choices on your fertility journey, optimizing your chances of success every cycle. "Julie Chang's Cracking the Egg Myth is a unique guide to the way complementary medicine can improve pregnancy outcomes for women in their late 30/early 40's. She offers experienced insight into the combined Eastern/Western approach to infertility." - Arlene J Morales, MD, Medical Director, Fertility Specialists Medical Group (FSMG)

The "Jason Bourne of fertility" (The New York Times Book Review) presents a personal and deeply informative account of one woman's journey through the global fertility industry. On paper, conception may seem like a simple biological process, yet this is often hardly the case. While many would like to have children, the road toward conceiving and maintaining a pregnancy can be unexpectedly rocky and winding. Lawyer Elizabeth Katkin never imagined her quest for children would ultimately involve seven miscarriages, eight fresh IVF cycles, two frozen IVF attempts, five natural pregnancies, four IVF pregnancies, ten doctors, six countries, two potential surrogates, nine years, and roughly \$200,000. Despite her three Ivy League degrees and wealth of resources, Katkin found she was woefully undereducated when it came to understanding and confronting her own difficulties having children. After being told by four doctors she should give up, but without an explanation as to what exactly was going wrong with her body, Katkin decided to look for answers herself. The global investigation that followed revealed that approaches to the fertility process taken in many foreign countries are vastly different than those in the US and UK. In *Conceivability*, Elizabeth Katkin, now a mother of two, exposes eye-opening information about the medical, financial, legal, scientific, emotional, and ethical issues at stake. "A well-researched, informative, and positive account of a very long journey to motherhood" (Kirkus Reviews), *Conceivability* sheds light on the often murky and baffling world of conception science. Her book is an invaluable and inspiring text that will be a boon to others navigating the deep and "choppy waters" of fertility treatment (Publishers Weekly), and her chronicle of

What I Learned Exploring the Frontiers of Fertility

Are you unsure whether egg freezing is right for you? Or what the process actually involves? Did you know there are things you can do to boost your fertility before treatment? Imagine a dozen of the best fertility doctors and scientists from around the world all here to give you their advice about fertility, plus frank insights from women who've experienced egg freezing firsthand. Engaging and empowering, "Everything Egg Freezing" educates women about the big fertility questions of this generation. In clear steps that are relevant and practical, it helps women feel more confident in their decision making and more in control of their reproductive health. This book gives actionable advice to optimize fertility, including: How egg freezing works & how effective it is What is considered the "right age" to egg freeze Unbiased tools to determine if egg freezing is right for you How to find the best clinic Comprehensive evidence on what you can do to get "fertility fit" The real power of everything from fertility supplements and fertility tea to fertility testing strips What to expect physically and emotionally throughout treatment: the good, the bad and the side effects The exact tools to prepare your body for the best outcome and experience This book is for you if you... Are unsure if egg freezing is right for you Are thinking about freezing your eggs Are looking for a clinic and wondering how to pick one Want to learn more about pricing and financing options for egg freezing Want to fully understand the risks and benefits and side effects of egg freezing If you are preparing to egg freeze and want to set yourself up for success If you want to know what to expect If you've already frozen your eggs and you're considering doing it again If you're a doctor, nurse or dietician looking to learn more about fertility and egg freezing In conclusion: Your doctor will manage your clinical care. For everything else you need to know about egg freezing, read on...

'This book is totally brilliant - informative, sensitive, funny and wise. Reading it is like talking to a fairy godmother who also happens to be a gynaecologist and expert on all things fertility' Sophia Money-Coutts Big Fat Negative (BFN) - a term commonly used on internet forums to refer to a negative pregnancy test. Infertility can be a lonely journey. One in every six couples will struggle to conceive but, despite this, many don't feel comfortable talking openly about their experiences and sharing what they are going through. As a result, they feel isolated and alone. It doesn't have to be this way. By talking, laughing and shouting about our experiences we can start to lift the cloak of shame that so often engulfs those going through it. Big Fat Negative does just that. This no-nonsense, honest guide to infertility from the hosts of the Big Fat Negative podcast smashes the taboo around this isolating and heartbreaking illness, offering first-hand experience, an understanding voice when friends don't get it, expert advice, reassurance for when you feel alone and - most importantly - humour when it you need it the most. Using first-hand accounts of the various hurdles of infertility, from work to diagnoses and IVF, coupled with advice from leading experts, Big Fat Negative will hold your

Get Free It Starts With The Egg How The Science Of Egg Quality Can Help You Get Pregnant And Prevent Miscarriage

hand on the not-so simple journey to motherhood - helping you to face and defeat the trials of trying for a baby.

Raising a bright and happy child starts during pregnancy and early infancy, when small changes can have a big impact on brain development. By taking advantage of this golden window of opportunity--when millions of new brain cells are formed every single day--you can help support your child's IQ, language development, memory, attention span, and emotional regulation. Importantly, the same strategies that nurture these cognitive abilities can also help reduce the odds of autism and ADHD, conditions that now impact 1 in 10 children. Brain Health from Birth is your guide to this new scientific frontier, explaining which key nutrients may be missing from your prenatal supplement, how to reduce the odds of preterm birth, what to look for in a formula, how to support your baby's microbiome, and much more. With contributions from leading obstetricians and pediatricians, science writer Rebecca Fett (author of the bestselling fertility book It Starts with the Egg) brings you practical advice you can start applying today, to help your baby thrive.

Natural Ways to Improve Your Fertility Now and Into Your 40s

The Impatient Woman's Guide to Getting Pregnant

In this innovative cookbook, James Beard award-winning author Michael Ruhlman explains why the egg is the key to the craft of cooking. For culinary visionary Michael Ruhlman, the question is not whether the chicken or the egg came first, it's how anything could be accomplished in the kitchen without the magic of the common egg. He starts with perfect poached and scrambled eggs and builds up to brioche and Italian meringue. Along the way readers learn to make their own mayonnaise, pasta, custards, quiches, cakes, and other preparations that rely fundamentally on the hidden powers of the egg. A unique framework for the book is provided in Ruhlman's egg flowchart, which starts with the whole egg at the top and branches out to describe its many uses and preparations -- boiled, pressure-cooked, poached, fried, coddled, separated, worked into batters and doughs, and more. A removable illustrated

flowchart is included with this book. Nearly 100 recipes are grouped by technique and range from simple (Egg Salad with Tarragon and Chives) to sophisticated (nougat). Dozens of step-by-step photographs guide the home cook through this remarkable culinary journey.

MINI TREASURES: delightful mini picture books to treasure forever. MUMMY LAID AN EGG Mum and Dad decide it's time to tell the kids about the facts of life. But do they dare? And do they really know everything about the birds and the bees?

In *The Infertility Cure*, Dr. Lewis outlines her simple guidelines involving diet, herbs, and acupuncture so that you can make use of her experience and expertise to create a nurturing, welcoming environment for a healthy baby. Dr. Randine Lewis offers you a natural way to support your efforts to get pregnant. *The Infertility Cure* addresses: Advanced maternal age Recurrent miscarriage Immunological fertility problems Male-factor infertility Hormonal imbalances and associated conditions Anovulation, luteal phase defect, amenorrhea, unexplained infertility Endometriosis, polycystic ovaries, tubal obstruction, uterine fibroids Improving the outcome of assisted reproductive techniques *The Infertility Cure* opens the door to new ideas about treating infertility that will dramatically increase your odds of getting pregnant -- the natural way.

For people experiencing infertility, wanting a baby is a craving unlike any other. The intensity of their longing is matched only by the complexity of the emotional maze they must navigate. With insight and compassion, Drs. Janet Jaffe, Martha Diamond, and David Diamond--specialists in the field of Reproductive Psychology who have each experienced their own struggle with infertility--give couples the tools to: *Reduce their sense of helplessness and isolation *Identify their mates' coping styles to erase unfair expectations *Listen to their "unsung lullabies"--their conscious and unconscious dreams about having a family--to mourn the losses of infertility and move on. Ground-breaking, wise, and compassionate, *Unsung Lullabies* is a necessary companion for anyone coping with infertility.

"When it comes to the subject of fertility and infertility, and the weight that this delicate, complex, and sensitive journey bears, it's most important to have the right information quickly."--Synopsis.

Embarking on IVF - or any assisted fertility treatment - can be a very demanding and stressful experience, but the right physical, nutritional and emotional support can lessen these stresses and strains and increase your chances of success. In Zita West's Guide to Fertility and Assisted Conception leading fertility and pregnancy expert, Zita West, offers an in-depth explanation of all aspects of fertility and, uniquely, addresses the issues involved in using assisted conception. In her clear, yet sensitive, style Zita explains: - All aspects of fertility - from preconception and trying naturally through to assisted conception - What is involved in the IVF process - How to prepare your body to increase your chances of conceiving successfully - The importance of a proactive approach to diet and nutrition - How complementary therapies, such as acupuncture, can increase your chances of success Including interviews with leading experts in the field, case histories from patients and Zita's own holistic principles, this is an invaluable guide for the growing number of people who are considering, or have already embarked on, medical intervention to enable them to conceive.
