***Goods made or designed in Italy enjoy a profile which far outstrips the country's modest manufacturing output. Italy's glorious design heritage and reputation for style and innovation has 'added value' to products made in Italy. Since 1945, Italian design has commanded an increasing amount of attention from design journalists, critics and consumers. But is Italian design a victim of its own celebrity? Made in Italy brings together leading design historians to explore this question, discussing both the history and significance of design from Italy and its international influence. Addressing a wide range of Italian design fields, including car design, graphic design, industrial and interior design and ceramics, well-known designers such as Alberto Rosselli and Ettore Sottsass, Jr. and iconic brands such as Olivetti, Vespa and Alessi, the book explores the historical, cultural and social influences that shaped Italian design, and how these iconic designs have contributed to the modern canon of Italian-inspired goods.***

Spaghetti with meatballs, fettuccine alfredo, margherita pizzas, ricotta and parmesan cheeses—we have Italy to thank for some of our favorite comfort foods. Home to a dazzling array of wines, cheese, breads, vegetables, and salamis, Italy has become a mecca for foodies who flock to its pizzerias, gelateries, and family-style and Michelin-starred restaurants. Taking readers across the country's Nations series, Al Dente explores our obsession with Italian food and how the country's cuisine became what it is today. Fabio Parasecoli discovers that for centuries, southern Mediterranean countries such as Italy fought against food scarcity, wars, invasions, and an unfavorable agricultural environment. Lacking in meat and dairy, Italy developed foodways that depended on grains, legumes, and the majority of Italians to afford a more diverse diet. Parasecoli elucidates how the last half century has seen new packaging, conservation techniques, industrial mass production, and more sophisticated systems of transportation and distribution, bringing about profound changes in how the country's population thought about food. He also reveals that much of Italy's culinary reputation hinged has led to the prevalence of high-end Italian restaurants in major cities around the globe. Including historical recipes for delicious Italian dishes to enjoy alongside a glass of crisp Chianti, Al Dente is a fascinating survey of this country's cuisine that sheds new light on why we should always leave the gun and take the cannoli.

In the sumptuous style of classic Italian cuisine, this collection of delectably authentic recipes reinvents vegan. Mouth-watering dishes burst with fresh fruits,vegetables, whole grains, nuts, and healthy fats like olive oil - all within an animal-free diet, ideal for lactose-intolerant eaters and vegetarians, too. Delicious Italian food was made for bountiful and flavor-filled variations, not weak substitutes or other ingredients that mimic meat, dairy, and eggs. Now readers can treat themselves to something scrumptious - even if they can't make it to Italy this year.

For decades, Translation Studies has been perceived not merely as a discipline but rather as an interdiscipline, a trans-disciplinary field operating across a number of boundaries. This has implied and still implies a considerable amount of interaction with other disciplines. There is often much more awareness of and attention to translation and Translation Studies than many translation scholars are aware of. This volume crosses the boundaries to other disciplines and explicitly sets up dialogic formats: every chapter is co-authored both by a specialist from Translation Studies and a scholar from another discipline with a special interest in translation. Sixteen disciplinary dialogues about and around translation are the result, sometimes with expected partners, such as scholars from Computational Linguistics, History and Comparative Literature, but sometimes also with less expected interlocutors, such as scholars from Biosemiotics, Game Localization Research and Gender Studies. The volume not only challenges the boundaries of Translation Studies but also raises issues such as the institutional division of disciplines, the cross-fertilization of a given field, the trends and turns within an interdiscipline.

The acceptance and preference of the sensory properties of foods are among the most important criteria determining food choice. Sensory perception and our response to food products, and finally food choice itself, are affected by a myriad of intrinsic and extrinsic factors. The pressing question is, how do these factors specifically affect our acceptance and preference for foods, both in and of themselves, and in combination in various contexts, both fundamental and applied? In addition, which factors overall play the largest role in how we perceive and behave towards food in daily life? Finally, how can these factors be utilized to affect our preferences and final acceptance of real food and food products from industrial production and beyond for healthier eating? A closer look at trends in research showcasing the influence that these factors and our senses have on our perception and affective response to food products and our food choices is timely. Thus, in this Special Issue collection " Consumer Preferences and Acceptance of Food Products " , we bring together articles which encompass the wide scope of multidisciplinary research in the space related to the

determination of key factors involved linked to fundamental interactions, cross-modal effects in different contexts and eating scenarios, as well as studies that utilize unique study design approaches and methodologies.

***Following recent events in Eastern Europe, questions surrounding European identity seem more pressing than ever. This volume explores, through a series of ethnographic case studies, the construction and experience of identities in Western Europe. All of the case studies are based on fieldwork, and in geographical scope range from Wales to the Basque country; from Corsica to the Lake District. The peoples they look at are similarly diverse: nationalists and members of the Communist party; rural and urban populations. The essays illustrate the ways in which detailed ethnographic case studies can illuminate how identities are lived by ordinary people.***

***The first comprehensive history of Italian Socialism in English, this book ranges from the defeat of Socialism by Mussolini in 1926 to its resurgence as a powerful force in Italian politics today. Di Scala has not only combed the archives of Italy and America, but also interviewed an array of prominent Italian and American sources, providing testimonies that are themselves likely to become important historical documents. His sweeping, intensive survey sheds new light on important Socialists such as Rodolfo Morandi and Pietro Nenni, and highlights the tremendous accomplishments of Italy's first Socialist prime minister, Bettino Craxi. Di Scala demonstrates that through a remarkable intellectual and political revival, the Socialists overcame their subjection by the Communists and Christian Democrats and went on to radically transform the politics, economy, and international affairs of modern Italy.***

Coffee: A Comprehensive Guide to the Bean, the Beverage, and the Industry offers a definitive guide to the many rich dimensions of the bean and the beverage around the world. Leading experts from business and academia consider coffee’s history, global spread, cultivation, preparation, marketing, and the environmental and social issues surrounding it today. They discuss, for example, the impact of globalization; the many definitions of organic, direct trade, and fair trade; the health of female farmers; the relationships among shade, birds, and coffee; roasting as an art and a science; and where profits are made in the commodity chain. Drawing on interviews and the lives of people working in the business—from pickers and roasters to coffee bar owners and consumers—this book brings a compelling human side to the story. The authors avoid romanticizing or demonizing any group in the business. They consider basic but widely misunderstood issues such as who adds value to the bean, the constraints of peasant life, and the impact of climate change. Moving beyond simple answers, they represent various participants in the supply chain and a range of opinions about problems and suggested solutions in the industry. Coffee offers a multidimensional examination of a deceptively everyday but extremely complex commodity that remains at the center of many millions of lives. Tracing coffee’s journey from field to cup, this handbook to one of the world’s favorite beverages is an essential guide for professionals, coffee lovers, and students alike. This edited collection studies the production and dissemination of popular music, tourism, cinema, fashion, broadcasting programmes, advertising and coffee in Western Europe in the twentieth century. Focussing on the supply side of popular culture, it addresses a field of study that is neglected in European historiography. Moreover, it provides a theoretical and methodological discussion that takes into account the inherent dynamics of content production and the role of cultural intermediaries in the change of cultural repertoires. Taking key developments in the culture industries in the USA as a point of reference, the book highlights particularities of cultural production in Europe. It identifies a greater autonomy of creatives, stronger influence of critics and a lesser concern with audience research as three characteristics of the production regime in Western Europe. It takes into view the transfer of popular culture across the Atlantic and between European countries and offers new insights into research on the cultural Americanisation of Europe. This book was originally published as a special issue of the European Review of History.

The Science of Quality

During the 20th century, medico-technical advances such as the invention of the latex condom (1930), the arrival of the contraceptive pill on the free market (1960/61) and the birth of the first child conceived by in vitro fertilization (1978) contributed to the fact that in Europe and the USA, the planning, conceiving and making of children was increasingly perceived as a matter of individual and collective decision-making. Especially since mid-century, these societies underwent profound political, economic and cultural evolutions. In the realm of human reproduction the relationship between the possible, the desirable, and the permitted had to be continually renegotiated. This volume examines in nine chapters how thinking, speaking and acting changed with regards to reproduction and family planning throughout the modern and post-modern period. Applying an international comparative perspective, the study specifically focuses on the role of value changes underlying these transformation processes.

Elizabeth Jolley's Mr Scobie's Riddle

Renewing Italian Socialism

Rethinking a Century of Italian Design

Themes, places, characters and voices of Elizabeth Jolley's Mr Scobie's Riddle are explored in detail in this monograph, which provides different narratological and translational analyses of the novel, as well as an academic translation into Italian. Considering the challenges and issues posed by a literary work's translation helps to shed light on the original work itself. In this manner, the translation is to be seen as a further analytical instrument to gain insight into the original novel. The purpose of this work is to obtain a deeper understanding of the complicated microcosm created by Jolley in the nursing home of "St Christopher and St Jude": the typically Australian themes of migration, isolation, place and displacement; the Australian culture-specific elements; the ensemble of curious characters and their entertaining voices. This book strives to preserve the above elements in translation as the expression of something Other, a different culture, and to take Italian readers on a journey to the Australia depicted in Mr Scobie's Riddle so that Jolley's characters' voices can echo in the Italian language.
