***"This new curriculum standard for the Level 2 - General Machinist for the Machining and Tooling trades is based upon the on-the-job performance objectives, located in the industry approved training standard. The curriculum is organized into 8 reportable subjects. The Program Summary of Reportable Subjects chart summarizes the training hours for each reportable subject. The curriculum identifies only the learning that takes place off-the-job. The in-school program focuses primarily on the theoretical knowledge and the essential skills required to support the performance objectives of the Apprenticeship Training Standards. Employers/Sponsors are expected to extend the apprentice's knowledge and skills through practical training on the work site."--Document.***

**An edited collection exploring various aspects of critical pedagogy and how it can be applied to information literacy teaching. The chapters are focused on the work and practice of librarians in various countries and fields, both within a classroom context and wider explorations of collection management and critical library liaison, as well as deep dives into the theory of a more critical librarianship praxis. The book is inspired by the success of the Critical Library Pedagogy Handbook (2016) and aims to be a useful guide to exploring critical practice further.**

**A guide to electrical isolation and switching. It is part of a series of manuals designed to amplify the particular requirements of a part of the 16th Edition Wiring Regulations. Each of the guides is extensively cross-referenced to the Regulations thus providing easy access. Some Guidance Notes contain information not included in the 16th Edition but which was included in earlier editions of the IEE Wiring Regulations. All the guides have been updated to align with BS 7671:2001.**

This handbook brings together and promotes research on the area of vocational education and training (VET). It analyzes current and future economic and labor market trends and relates these to likely implications for vocational education and training. It questions how VET engages with the growing power of human development approaches and with the sustainable development agenda. Equity and inclusion are discussed in a range of ways by the authors and the consideration of the construction of these terms is an important element of the handbook. It further addresses both the overall notion of system reform, at different scales, and what is known about particular technologies of systems reform across a variety of settings. Vocational learning and VET teacher/trainer education are discussed from a comparative perspective. National and comparative experiences are also shared on questions of equity and efficiency in funding in terms of those that fund and are funded, and for a range of funding methodologies. As well as reviewing existing gaps, this handbook is looking forward in identifying promising new directions in research and environment. Areas covered: The Changing World of Work | Editors: Margarita Pavlova and Salim Akoojee Skills for Sustainable Human Development | Editor: Lesley Powell Planning and Reforming Skills Systems | Editor: Robert Palmer Private Training Markets | Editors: Michael Gessler, Larissa Freund and Susanne Peters Vocational Learning | Editors: Karen Evans and Natasha Kersh Competence and Excellence | Editor: Kirby Barrick Measuring Learning and Instructional Performance | Editor: Esther Winther Supporting Learners |

Editor: Joy Papier VET Teacher/Trainer Education | Editor: Volker Wedekind

The National Occupational Analysis (NOA) has the following objectives: to describe and group the tasks performed by skilled workers; to identify which tasks are performed in every province and territory; to develop instruments for use in the preparation of interprovincial Red Seal examinations and curricula for training leading to the certification of skilled workers; to facilitate the mobility of apprentices and skilled workers in Canada; and, to supply employers, employees, associations, industries, training institutions and governments with analyses of occupations. This analysis covers tasks performed by recreation vehicle service technicians, defined as workers who work on systems and components of recreation vehicles, including electrical components, plumbing, propane gas components, appliances, exterior and interior components, structural frames and towing systems.--Includes text from document.
