James Taylor remembers very well the disappointment among his petrol-head friends when the XJ-S was announced in 1975. It was not a replacement for the legendary E-type; its colours were uninspired; and its interior was drab. All credit, then, to those people at Jaguar who truly believed in the car and, over a period of nearly 20 years, turned the ugly duckling into a swan. From the moment the XJ-S HE arrived in 1981, there seemed to be renewed hope, and from then on, the car went from strength to strength to become the much-admired grand tourer it

always should have been. The book contains a timeline of the key events in the history of the XJ-S and an overview of the evolution of the XJ-S from the XJ27 prototype. Packed with details it gives UK showroom prices through the year and sales in the US by year. Of great interest to all motoring and Jaguar enthusiasts, it is superbly illustrated with 192 colour and black & white photos. James Taylor has been writing professionally about road transport since the late 1970s, his primary interest is in those models that made the British motor industry great.

Farm model collecting has become increasingly popular with people of all ages. Britains, a leading manufacturer, have a long and distinctive history of producing these models. This book is the first comprehensive fully illustrated guide for those interested in collecting them. The book describes all the baler and combine models produced by Britains since they were first added to its farm model range 40 years ago, and also provides details of their development. As well as standard models, this includes details and photographs of prototype and rare models. The history is complemented by a catalog describing the main features,

account of young designer's journey after joining that most prestigious of marques, Rolls-Royce. Sometimes eccentric, often humorous, the workings of this uniquely British institution during a period of immense change are described in detail. Generously supported by previously unseen illustrations, the author's story, from his position as designer to Chief Stylist, pulls back the curtain concealing an idiosyncratic institution, motivated as much by pride as the bottom-line.

This book covers British car electrical systems from 1950 to 1980. Particular emphasis is placed on the Lucas, Smith and SU components that were ubiquitous in British cars of the period. Each major system is given its own chapter, providing theory, component parts and full system operating explanations. Modifications are suggested for those wishing to bring performance and reliability up to more modern standards. Fault-finding charts, cross referenced to the appropriate pages in the
