Engineering News-record

Senator Ted Kennedy said, "My father worked here. The Fore River Shipyard will once again be a symbol of our leadership. And I will do all I can to insure that this leadership continues to thrive. The shipbuilding industry has been struggling in this country as a whole. Employment has dropped to a 40 year low. American-built ships carry less than one percent of world trade. That is unacceptable." Senator John McCain said, "We have an obligation to protect the taxpayers' dollars by ensuring that this is a viable project. It is my desire that the Quincy shipyard, into which the state of Massachusetts and the city of Quincy have invested significant resources, will be a successful venture." President Clinton said about shipbuilding and the Quincy yard in particular, "Shipbuilding is one of the keys to America's national defense and helping our shipbuilders succeed commercially is an important goal of defense conversion. This administration is committed to preserving highly skilled American jobs and we believe that American shipbuilding can compete and win in world markets." What happened ? SHIPBUILDING USED TO BE ONE OF THE TOP FIVE INDUSTRIES IN THE U.S.A.

With Means Site Work & Landscape Cost Data 2000, you get much more than just the most reliable costs in the industry. You'll also have instant access to over 600 pages of up-to-date estimating guidelines, tips and more -- All Repriced for 2000 - including: -- Year 2000 Crew Listing for over 400 standard construction crews, including many specifically related to site work and landscape projects. Simplifies pricing out labor. Budgeting, Scheduling, Customizing costs. -- The latest On-Site Localization Factors for 930 cost zones in the U.S. and Canada. One simple calculation is all it takes to convert Means national average prices to the prices at your project site. -- Historical Cost Tables make it easy to update old estimates for comparative purposes. Save time on order to magnitude estimates... bid/no bid decision-making. -- Year 2000

Reference Section, completely cross-referenced to cost pages, is packed with must-have pointers, tips, guidelines and more Information designed to help you avoid costly oversights and errors -- Step-by-Step Instructions make it easy to estimate with Means Site Work & Landscape Cost Data 2000, Even if You've Never Done it Before

Accident Prevention and OSHA Compliance contains all the information you need to reduce or avoid injuries, illnesses, fires, and equipment damage resulting from an accident. The book provides valuable insight into how OSHA conducts its inspections and how to avoid losses and increase profits by complying with OSHA regulations. By following the easy-to-understand techniques and guidelines, you can effectively train personnel on safety and health issues. The book explains accident causes and describes unsafe acts and conditions. It offers suggestions about how to look for hazards and how to safety-check each step of a job. Guidelines are given for constructing a safety inspection list, conducting a job hazard analysis and how to revise it, organizing a safety committee, and reporting accidents to OSHA. It also includes steps that can be used to protect trade secrets. Human factors and limitations, protective equipment and its proper usage, first aid and medical care, and much more are detailed. Record-keeping requirements are given and examples of direct and indirect costs of accidents are illustrated. The effects of drugs and alcohol and tips to recognize users are discussed. Helpful appendices contain numerous charts and tables, useful contacts, and valuable additional information. The book also includes various office and home hazards and injuries, and steps to follow to make both places safe. Written by a professional with vast experience as an engineer, certified hazard control manager, professor of safety and health, and safety consultant, Accident Prevention and OSHA Compliance provides a single source covering the immense amount of information on this subject. The proven principles and practices found in this book cover every aspect of accident prevention and provide perfect solutions to profit-losing problems.

Engineering-contracting

These chapters should have provided a rare glimpse of the inner workings of the Bethlehem plant. The events I witnessed were seldom heard or mentioned outside the plant. I do not judge anyone I've mentioned. Most of them have gone to that country from which no traveler ever returns. I doubt if one in any five hundred will have the slightest memory of me. Im okay with that. We are all spirits and survivors of a different era that is long gone and can be proud of what we accomplished. I am grateful and indebted to the USWA union, without whose help I never would have made it to retirement. As always, the companys response would be, Man was paid. I close with the words of Bob Seger. Sometimes at night I see their faces, the traces they left on my soul. These are the memories that make me a wealthy soul (Travelin man). So mote it be!

New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets the results of human endeavour set in the context of society and culture.
