Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Life is full of challenges- no matter age, gender, religion, ethnicity, or occupation. Some days can be wonderful and rich with blue skies with rays of yellow, and in a single moment, dark clouds and stormy winds push you to the brink of despair! In those moments, we often find ourselves discouraged and in need of words that speak to the heart of the matter; and it is there that we get a glimpse of the smallest rays of hope, waiting to be put together like pieces of a fragmented puzzle. The question for us then becomes, wherein does this source of enlightenment stem? In this big little book, these simply penned words, steeped in hidden pathways, can have the ability to meet you where you are and change life's trajectory. No matter how deep the pit appears or how hot the fire burns, take comfort in knowing that this collection: Poetry Thoughts & Meditations for the Soul, are writings inspired just for you. One of the most powerful gifts we have is that of self-expression. So understanding how to build a practical and healthy sense of self does not end when we face adversity; it merely begins when we overcome it. Here a little, there a little, step by step! The creativity He inspires can become an integral part of our lives when we learn how to saturate ourselves in the Son-light. Your journey in the wilderness has been a tedious one. Won't you allow a force higher than yourself to sustain and refresh your soul? Come, eat, and drink from the fountain. I hope that within these pages, you find a breadth of depth in the infinite source you have never known before. On that foundation, that source will unleash within your inner self unconditional Love, Joy, Peace, and the Hope of a Lasting Legacy!

ACRP Report 78: "The original problem statement and objectives for ACRP 02-16 as developed by the project panel are restated as follows: 'Increased levels of demand at airports in the United States may result in a growth in airport GSE

activity and an associated increase in airport surface emissions. Local air quality and global climate change concerns, regulatory pressures, and the desire to be environmentally responsible have resulted in a growing number of airport programs around the United States looking to assess and reduce airport emissions. Although much is known about aircraft fleets, operations, and emissions, comparatively little is known about GSE. The available GSE data are outdated, unreliable, and limited. Accurate GSE data are needed by the FAA and airport sponsors to plan adequately and to balance the growing demands of air travel with air quality concerns. Proactive strategies that reduce surface emissions may help airports address air quality concerns. As such, research is needed to obtain additional information on GSE equipment and to identify programs and best practices that could reduce GSE emissions for GSE owners, operators, and airports.' In response to this problem statement, the primary objectives of this research were to (1) develop a tutorial that describes GSE operations and identifies potential strategies to reduce emissions from powered GSE for use by GSE owners and operators and (2) conduct a representative inventory of powered GSE at airports to help the industry assess the contribution of GSE to air quality impacts at airports. ." --from p. 1.

Fuels, Lubricants, Coolants, and Filters easily helps a reader to understand these wonderful liquids and filters better. By starting with the basics, it builds your knowledge step-by-step in a very structured manner.

A field-tested guide to surviving a nuclear attack, written by a revered civil defense expert. This edition of Cresson H.

Kearny's iconic Nuclear War Survival Skills (originally published in 1979), updated by Kearny himself in 1987 and again in 2001, offers expert advice for ensuring your family's safety should the worst come to pass. Chock-full of practical instructions and preventative measures, Nuclear War Survival Skills is based on years of meticulous scientific research conducted by Oak Ridge National Laboratory. Featuring a new introduction by ex-Navy SEAL Don Mann, this book also includes: instructions for six different fallout shelters, myths and facts about the dangers of nuclear weapons, tips for maintaining an adequate food and water supply, a foreword by "the father of the hydrogen bomb," physicist Dr. Edward Teller, and an "About the Author" note by Eugene P. Wigner, physicist and Nobel Laureate. Written at a time when global tensions were at their peak, Nuclear War Survival Skills remains relevant in the dangerous age in which we now live.
