Elvis Cole finds himself deep in the bayou of Louisiana searching for the estranged parents of a television star -- but something deadly is looking for him. L.A. private eye Elvis Cole is hired by popular television star Jodie Taylor to delve into her past and identify the biological parents who gave her up for adoption thirty-six years before. Cole's assignment is to find out their biological history and report back. It seems all too clear cut. But when he gets to Louisiana and begins his search, he finds that there's something much darker going on. Other people are also looking for Taylor's parents, and some are ending up dead. And when Cole realizes that his employer knew more than she was telling, Voodoo River becomes a twisting tale of identity, secrets, and murder.

"Love is an emotion that will destroy you if you let it. It can ruin your life or create a new one. Jealousy isn't much different." Jennifer Downs treads in dangerous waters. Finnley Felton is unaware. With the help of Lady Luck, they will make it through. Or will they? Texas is nothing compared to Vegas but among the bright lights and busy streets, Jennifer discovers who she is. Her life has changed, and for better or worse, she continues to live like tomorrow will never come. Sabotage. Hatred. Betrayal. Although love is beautiful and kind, it comes with consequences. Jennifer finds herself fighting. Fighting for her rights, for love, for Finnley, and for her life. Hearts may be broken. Lives will change. But the ultimate question remains: can love win all?

This project-oriented facilities design and material handling reference explores the techniques and procedures for developing an efficient facility layout, and introduces some of the state-of-the-art tools involved, such as computer simulation. A "how-to," systematic, and methodical approach leads readers through the collection, analysis and development of information to produce a quality functional plant layout. Lean manufacturing; work cells and group technology; time standards; the concepts behind calculating machine and personnel requirements, balancing assembly lines, and leveling workloads in manufacturing cells; automatic identification and data collection; and ergonomics. For facilities planners, plant layout, and industrial engineer professionals who are involved in facilities planning and design.

Compact Utility Tractors, or CUTs, are cute little cutters! As farming became more refined so did the needs of tractors. The answer was a smaller, more maneuverable and fuel-efficient tractor with a variety of implements and attachments. With this focus on special needs, attachments became available such as plows, disc harrows, mower decks, cultivators, spreaders, snowblowers, and more. They have become a necessary utility for farmers, orchards, small construction jobs, and landscaping/maintenance for estates, parks and golf courses. At the forefront of this evolution was the Farmall Cub and John Deere Model L. Then came the Japanese invasion; a new kind of tractor by companies such as Yanmar and Kubota. These four-wheel drive machines were rugged and tough and used a variety of hydraulically powered attachments. American companies like John Deere, International Harvester, and Massey Ferguson built their own their own four-wheel versions. Today's compact tractors, such as the Kubota BX series, Massey Ferguson's GC series, and the John Deere 3000, offer an even larger selection of implements for special purposes.

The problem of mass blindness today stems largely from cataract which accounts for a total of 40 million cataract victims in the world – and it will worsen with the ageing population. Fortunately, this problem can be resolved with cost effective extracapsular cataract extraction (ECCE) and posterior chamber implantation (PCI). This book highlights how the use of ECCE and PCI can restore normal vision to cataract victims around the world. A successful approach is to establish training centres. The success of the International Intraocular Implant Training Centre (IIITC) in the Peoples' Republic of China is cited to show that implant surgery for cataracts can be successfully performed in communities in developing nations in Asia with appropriate training and supervision. The centre has since yielded excellent results with cost effective ECCE and PCI. The book challenges eye surgeons around the world to unite to address a global need to contain world cataract blindness. In this book, we discuss about the petroleum and gas field processing. Oil and gas wells consist of mixtures of oil, gas, and water that are difficult to transport, requiring a certain amount of field processing. This reference analyzes principles and procedures related to the processing of reservoir fluids for the separation, handling, treatment, and production of quality petroleum oil and gas products. It details strategies in equipment selection and system design, field development and operation, and process simulation and control to increase plant productivity and safety and avoid losses during purification, treatment, storage, and export. Providing guidelines for developing efficient and economical treatment systems, the book features solved design examples that demonstrate the application of developed design equations as well as review problems and exercises of key engineering concepts in petroleum field development and operation.

Fourteen-year-old Roonie loves hip-hop almost as much as she loves her grandmother. She cannot wait to compete in her school's dance competition. But as her grandmother's health deteriorates, Roonie becomes more and more reluctant to visit her in the care home. These feelings of guilt and frustration cause Roonie to mess things up with her hip-hop dance partner and best friend, Kira. But while doing some volunteer hours in the hospital geriatric ward, Roonie meets an active senior recovering from a bad fall. Their shared love of dance and the woman's zest for life help Roonie face her fears, make amends with Kira and reconnect with Gram before it 's too late.

The Rochester Quadrajets carburetor was found perched atop the engine of many a classic GM performance vehicle. The Q-Jet is a very capable but often misunderstood carb. This book, How to Rebuild and Modify Rochester Quadrajets Carburetors, seeks to lift the veil of mystery surrounding the Q-Jet and show owners how to tune and modify their carbs for maximum performance. The book will be a complete guide to selecting, rebuilding, and modifying the Q-Jet, aimed at both muscle car restorers and racers. The book includes a history of the Q-Jet, an explanation of how the carb works, a guide to selecting and finding the right carb, instructions on how to rebuild the carb, and extensive descriptions of high-performance modifications that will help anyone with a Q-Jet carb crush the competition.

How One Company Changed the World by Reinventing Business

When a bad day at work culminates in losing out on a promotion, Jim Sanders shifts into his animal form to let off steam. Then his bad day turns into a bad night-while prowling his Atlantic City neighborhood as a large gray house cat, he's caught in a torrential downpour. What little luck he has washes down the gutter when his new boss, Andrew Wright, catches him taking shelter on his porch, brings him inside, and starts calling him Mr. Frosty. As a feline, Jim becomes the inadvertent confessor for his boss's lonely son, Tony, a victim of schoolyard bullying. As a human, he feels drawn to Andrew, a man he wanted to resent. Finding love was never part of Jim's plan for the future-not with his bizarre secret-yet suddenly he finds himself navigating that minefield anyway. But not everything is easy, especially for an interracial gay couple dealing with prejudice in the workplace, at Tony's school, and even within their own families.

Interactive Computer Graphics with WebGL, Seventh Edition, is suitable for undergraduate students in computer science and engineering, for students in other disciplines who have good programming skills, and for professionals interested in computer animation and graphics using the latest version of WebGL. ı Computer animation and graphics are now prevalent in everyday life from the computer screen, to the movie screen, to the smart phone screen. The growing excitement about WebGL applications and their ability to integrate HTML5, inspired the authors to exclusively use WebGL in the Seventh Edition of Interactive Computer Graphics with WebGL.This is the only introduction to computer graphics text for undergraduates that fully integrates WebGL and emphasizes application-based programming. The top-down, programming-oriented approach allows for coverage of engaging 3D material early in the course so students immediately begin to create their own 3D graphics. ıı Teaching and Learning Experience This program will provide a better teaching and learning experience–for you and your students. Looptail is Bruce Poon Tip's extraordinary first-person account of his entrepreneurial instincts to start and develop G Adventures, the highly successful international travel adventure company - and along the way he reveals his unusual management secrets that not only keep his employees fully engaged and energized but also keep his customers extremely happy. His unique approach has worked in marvellous ways. Poon Tip has created an entirely new and refreshing approach to management. For example, there is no CEO at G Adventures - instead, every employee is a CEO, empowered to make instantaneous decisions to help clients on the spot. But while there's no CEO, there is a company Mayor, who take the pulse of corporate morale. There's no HR department - but there is a Talent Agency and company Culture Club. It hasn't always been easy to try to balance his desire for a socially responsible company along with the desire to generate profits. But thanks to Poon Tip's vision, G Adventures has flourished and has done its best to maintain its looptail approach. In short, it's been an extraordinary ride, and in many ways G Adventures is at the vanguard of what modern-day companies are beginning to look like.

Sometimes you know things you ' re not supposed to know. Things that you can never un-know. Things that will change the course of your life...and the fate of the ones you love. I found her in our living room, bleeding and close to death, but alive. Barely. Until morning stole her last breath. The media called her killer the " Triangle Terror " ... and then forgot about her. But I never forgot—my murdered sister, and an investigation that led to my own resurrection from the dead. T twenty-two years ago, on a cold February night, Landon Worthington lost his father for the last time. After an armed robbery gone wrong, evidence and witness testimony pointed a shaky finger at Dan Worthington—deadbeat dad and alcoholic husband. But before the dust could settle over the conviction, Landon ' s preteen sister, Alexis, is murdered in their home, plunging Landon ' s life into further despair. Two decades and a cold case later, Landon is dogged by guilt over their estranged relationship and decides to confront his incarcerated father about what really happened the night of the robbery. But the years of lies are hard to unravel. And the biggest question of all haunts him: How does everything tie into his sister ' s murder? And so begins Landon ' s journey to piece together the puzzle of secrets, lies, and truths that can free his father, avenge his sister, and perhaps save himself. A short story mystery perfect for fans of Robert Dugoni's Third Watch and Dean Koontz's The Neighbor. Read as a standalone or as the companion book to A Secondhand Lie.
