The Complete Guide to Human Resources and the Law will help you navigate complex and potentially costly Human Resources issues. You'll know what to do (and what not to do) to avoid costly mistakes or oversights, confront HR problems - legally and effectively - and understand the rules. The Complete Guide to Human Resources and the Law offers fast, dependable, plain English legal guidance for HR-related situations from ADA accommodation, diversity training, and privacy issues to hiring and termination, employee benefit plans, compensation, and recordkeeping. It brings you the most up-to-date information as well as practical tips and checklists in a well-organized, easy-to-use resource. The 2010 Edition provides new and expanded coverage of issues such as: Discussion of the economic recovery measures under the Emergency Economic Stabilization Act of 2008, the Worker, Retiree and Employer Recovery Act of 2008, and the American Recovery and Reinvestment Act of 2009 The PBGC flat-rate premium for single employer plans for 2009 is \$34/participant The requirement of distributing Summary Annual Reports to participants and

beneficiaries has been replaced by the requirement of issuing annual funding notices for most benefit plans; DOL issued a model notice and FAQs for implementing the requirement Courts continued to develop standards under Metropolitan Life Insurance v. Glenn, 128 S. Ct. 2343 (2008), for reviewing claims decisions made by decision-makers (such as plan sponsors and insurers) that have a conflict of interest because they are responsible for paying whatever claims are allowed The Children's Health Insurance Program Reauthorization Act of 2009, Pub. HITECH Act (Health Information Technology for Economic and Clinical Health; part of ARRA) was enacted to strengthen the privacy and security rules under HIPAA, and to promote broader usage of electronic medical records. State Attorneys General now have the power to enforce HIPAA through suits in federal court. The Lilly Ledbetter Fair Pay Act (Pub. L. 111-2) was enacted. It increases the number of employment discrimination suits that can be brought by reversing the Supreme Court's decision that the timing rules for lawsuits begin when an allegedly discriminatory practice is adopted. The Supreme Court extended its string of pro-arbitration cases by ruling in 14 Penn Plaza LLC v. Pyett, 129 S. Ct. 1456 (4/1/09), that a collective bargaining agreement clause that clearly obligates union members to arbitrate ADEA claims is enforceable. The Supreme Court held that federal labor law preempts a California law that forbade employers that receive state contracts or other funding to discuss union matters with employees. As long as employers avoid coercion, federal law seeks to promote wide-open debate on labor issues: Chamber of Commerce v. Brown, 128 S. Ct. 2408 (2008). Another Supreme Court ruling discussed allows unions to charge non-

members who pay agency fees in lieu of joining the union amounts representing certain expenses of national litigation: Locke 'Building Control Systems' provides the building services engineer with a comprehensive understanding of modern control systems and relevant information technology. This will ensure that the best form of control systems for the building is specified and that proper provision is made for its installation, commissioning, operation and maintenance. Beginning with an overview of the benefits of the modern building control system, the authors describe the different controls and their applications, and include advice on their set-up and tuning for stable operation. There are chapters on the practical design of control systems, how to work from the hardware components and their inclusion in networks, through to control strategies in Heating, Ventilation and Air Conditioning (HVAC) systems and whole buildings. The relationship between Building, Management Systems (BMS) and information technology systems is discussed, and the building procurement process and the importance of considering control requirements at an early stage in the design process

“Meticulously researched and rewarding to read...Thomas is a gifted storyteller.” —The New York Times Book Review Best known as a monumental achievement of the civil rights movement, the 1964 Civil Rights Act also revolutionized the lives of America’s working women. Title VII of the law made it illegal to discriminate “because of sex.” But that simple phrase didn’t mean much until ordinary women began using the law to get justice on the job—and some took their fights all the way to the Supreme Court. Among them were Ida Phillips, denied an assembly line job because she had a preschool-age child; Kim Rawlinson, who fought to become a prison guard—a “man’s job”; Mechelle Vinson, who brought a lawsuit for sexual abuse before “sexual harassment” even had a name;

Ann Hopkins, denied partnership at a Big Eight accounting firm because the men in charge thought she needed "a course at charm school"; and most recently, Peggy Young, UPS truck driver, forced to take an unpaid leave while pregnant because she asked for a temporary reprieve from heavy lifting. These unsung heroines' victories, and those of the other women profiled in Gillian Thomas' *Because of Sex*, dismantled a "Mad Men" world where women could only hope to play supporting roles; where sexual harassment was "just the way things are"; and where pregnancy meant getting a pink slip. Through first-person accounts and vivid narrative, *Because of Sex* tells the story of how one law, our highest court, and a few tenacious women changed the American workplace forever.

The transformation of schooling from a twelve-year jail sentence to freedom to learn. John Taylor Gatto's *Weapons of Mass Instruction*, now available in paperback, focuses on mechanisms of traditional education which cripple imagination, discourage critical thinking, and create a false view of learning as a byproduct of rote-memorization drills. Gatto's earlier book, *Dumbing Us Down*, introduced the now-famous expression of the title into the common vernacular. *Weapons of Mass Instruction* adds another chilling metaphor to the brief against conventional schooling. Gatto demonstrates that the harm school inflicts is rational and deliberate. The

real function of pedagogy, he argues, is to render the common population manageable. To that end, young people must be conditioned to rely upon experts, to remain divided from natural alliances and to accept disconnections from their own lived experiences.

They must at all costs be discouraged from developing self-reliance and independence.

Escaping this trap requires a strategy Gatto calls "open source learning" which imposes no artificial divisions between learning and life. Through this alternative approach our children can avoid being indoctrinated-only then can they achieve self-knowledge, good judgment, and courage.

Anderson's Ohio School Law Manual is specifically geared towards School Board Members, Superintendents, Treasurers, Business Officials, Administrators, Teachers and Students. It comprises the first volume of the comprehensive Ohio School Law Guide, giving all necessary information to the consumers at a bargain price. Author Kimball H. Carey covers:

- school districts
- administration
- school finance and management
- buildings and property
- teachers, pupils, and pupil services
- liability of school districts and officers
- federal issues.

This book is a one-stop resource on all the critical aspects of planning and designing hospitals, one of the most complex healthcare projects to undertake. A well-planned and designed hospital should control infection rate, provide safety to patients, caregivers and visitors, help improve patients' recovery and have scope for future expansion and change. Reinforcing these basic principles, guidance on such effective planning and designing is the key focus. Readers are offered insights into eliminating shortcomings at every stage of setting up a hospital which may not be feasible to rectify later on through alterations. Chapters from 1 to 12 of the book provide exhaustive notes

on initial planning, such as detailed project reports, feasibility studies, and area calculation. Chapters 13 to 27 include designing and layout of all the essential departments/units such as OPD, emergency, intermediate care, diagnostics, operating rooms, and intensive care units. Chapters 28 to 37 cover designing support services like sterilization department, pharmacy, medical gas pipeline, kitchen, laundry, medical record, and mortuary. Chapters 38 to 48 take the readers through planning other services like air-conditioning and ventilation, fire safety, extra low voltage, mechanical, electrical, and plumbing services. Chapter 49 is for the planning of medical equipment. A particular chapter on "Green" hospital designing is included. This book is a single essential tabletop reference for hospital consultants, medical and hospital administrators, hospital designers, architecture students, and hospital promoters.

The capability and use of IT and web based energy information and control systems has expanded from single facilities to multiple facilities and organizations with buildings located throughout the world. This book answers the question of how to take the mass of available data and extract from it simple and useful information which can determine what actions to take to improve efficiency and productivity of commercial, institutional and industrial facilities. The book also provides insight into the areas of advanced applications for web based EIS and ECS systems, and the integration of IT/web based information and control systems with existing BAS systems.

The Third Edition of ANSI/ACCA Manual D is the Air Conditioning Contractors of America procedure for sizing residential duct systems. This procedure uses Manual J (ANSI/ACCA, Eighth Edition) heating and cooling loads to determine space air delivery requirements. This procedure matches duct system resistance (pressure drop) to blower performance (as defined by manufacturer's blower performance tables). This assures that appropriate airflow is delivered to all rooms and spaces; and that system airflow is compatible with the operating range of primary equipment. The capabilities and sensitivities of this procedure are compatible with single-zone systems, and multi-zone (air zoned) systems. The primary equipment can have a multi-speed blower (PSC motor), or a variable-speed blower (ECM or constant torque motor, or a true variable speed motor). Edition Three, Version 2.50 of Manual D (D3) specifically identifies normative requirements, and specifically identifies related informative material. A comprehensive analysis and practical guide for handling the many legal issues facing all health care providers in today's dynamic health care environment. Each chapter contains a concise, comprehensive discussion of the law; an analysis of problems likely to be faced by health care providers; and practical guidelines for dealing with those problems. • Medical malpractice, risk management and quality assurance • Consent to medical treatment • Medical information and confidentiality • Reimbursement • Antitrust and health care • Medical staff matters • Patient care issues--admission and discharge, abortion and sterilization, death, autopsies, organ donations, and AIDS issues • Tax issues • Contractual relations • Facility licensing and accreditation • Licensure of professionals • Joint Ventures and practice acquisitions • Fraud and abuse and self-referral issues First published 1985. Building owners and managers expect fully automated and energy efficient operations, on line diagnostic of systems parameters to prevent failures, and on line diagnostic of problems prior to exposing occupants to deteriorating environmental conditions. A simple HVAC control is no longer acceptable by current standards. Controls and Automation for Facilities Managers examines principles and applications of HVAC engineering, outlining information for design, development of operations, logic, systems diagnostics, and building of environmental conditions with reliability

and minimum operating cost. The book moves from the principles of mechanical engineering (related to HVAC systems) through DDC applications engineering, thereby summarizing complex topics of electrical engineering for mechanical engineers. Individual chapters: Provide essential information on related mechanical (HVAC) engineering, controls strategies, and examples of basic algorithms for on line diagnostics Guide (DDC) application engineers to a more thorough understanding of mechanical engineering disciplines (i.e., the psychrometric chart) as well as guide mechanical engineers to a more thorough understanding of DDC applications engineering (i.e., direct digital controllers and systems) Outline information on current topics Discussions also include: Indoor air quality - presenting material for facilities engineers as well as controls and consulting engineers Utilities metering - describing the distribution of real time data over a network, including consumption, alarms, diagnostics, trends, and reports On line problem diagnostics - outlining HVAC and environmental problems Controls and Automation for Facilities Managers serves as an exceptional guide for facilities managers and engineers, architects and consulting engineers, vendors and contractors, and other professionals in the design, application, and implementation of controls and automation systems for industrial, educational, institutional, and governmental facilities. This new book, by the original developer of the BACnet standards, explains how BACnet's protocols manage all basic building functions in a seamless, integrated way. BACnet is a data communication protocol for building automation and control systems, developed within ASHRAE in cooperation with ANSI and the ISO. This book explains how BACnet works with all major control systems--including those made by Honeywell, Siemens, and Johnson Controls--to manage everything from heating to ventilation to lighting to fire control and alarm systems. BACnet is used today throughout the world for commercial and institutional buildings with complex mechanical and electrical systems. Contractors, architects, building systems engineers, and facilities managers must all be cognizant of BACnet and its applications. With a real 'seat at the table,' you'll find it easier to

understand the intent and use of each of the data sharing techniques, controller requirements, and opportunities for interoperability between different manufacturers' controllers and systems. Highlights include: * A review of the history of BACnet and its essential features, including the object model, data links, network technologies, and BACnet system configurations; * Comprehensive coverage of services including object access, file access, remote device management, and BACnet-2012's new alarm and event capabilities; * Insight into future directions for BACnet, including wireless networking, network security, the use of IPv6, extensions for lifts and escalators, and a new set of BACnet Web Services; * Extensive reference appendices for all objects and services; and * Acronyms and abbreviations
