*Developed in response to the theoretically driven mainstream sociology, institutional ethnography starts from people’s everyday experiences, and works from there to discover how the social is organized. Starting from experience is a central step in challenging taken-for-granted assumptions and relations of power, whilst responding critically to the neoliberal cost-benefit ideology that has come to permeate welfare institutions and the research sector. This book explicates the Nordic response to institutional ethnography, showing how it has been adapted and interpreted within the theoretical and methodological landscape of social scientific research in the region, as well as the institutional particularities of the Nordic welfare state. Addressing the main topics of concern in the Nordic context, together with the way in which research is undertaken, the authors show how institutional ethnography is combined with different theories and methodologies in order to address particular problematics, as well as examining its standing in relation to contemporary research policy and university reforms. With both theoretical and empirical chapters, this book will appeal to scholars and students of sociology, professional studies and anthropology with interests in research methods and the Nordic region. These beautiful pages invite you to pick up your brush and grow. *Elisabeth Roudinesco’s bold reinterpretation of Sigmund Freud is a biography for the twenty-first century—a sympathetic yet impartial appraisal of a genius admired but misunderstood in his time and ours. Alert to tensions in his character and thought, she views Freud less as a scientific thinker than as an interpreter of civilization and culture.*

A heartbreaking and hilarious memoir by iCarly and Sam & Cat star Jennette McCurdy about her struggles as a former child actor—including eating disorders, addiction, and a complicated relationship with her overbearing mother—and how she retook control of her life. Jennette McCurdy was six years old when she had her first acting audition. Her mother’s dream was for her only daughter to become a star, and Jennette would do anything to make her mother happy. So she went along with what Mom called “calorie restriction,” eating little and weighing herself five times a day. She endured extensive at-home makeovers while Mom chided, “Your eyelashes are invisible, okay? You think Dakota Fanning doesn’t tint hers?!” She was even showered by Mom until age sixteen while sharing her diaries, email, and all her income. In “I’m Glad My Mom Died,” Jennette recounts all this in unflinching detail—just as she chronicles what happens when the dream finally comes true. Cast in a new Nickelodeon series called iCarly, she is thrust into fame. Though Mom is ecstatic, emailing fan club moderators and getting on a first-name basis with the paparazzi (‘Hi Gale!’), Jennette is riddled with anxiety, shame, and self-loathing, which manifest into eating disorders, addiction, and a series of unhealthy relationships. These issues only get worse when, soon after taking the lead in the iCarly spinoff Sam & Cat alongside Ariana Grande, her mother dies of cancer. Finally, after discovering therapy and quitting acting, Jennette embarks on recovery and decides for the first time in her life what she really wants. Told with refreshing candor and dark humor, ‘I’m Glad My Mom Died’ is an inspiring story of resilience, independence, and the joy of shampooing your own hair.

"I have been an inveterate keeper of journals since I was 14 especially at times of adventure and crisis and travel. Here, for the first time, such a journal made its way to publication, not that much changed from the raw, handwritten journal that I kept during my fascinated 9 days in Oaxaca." Dr. Oliver Sacks Oliver Sacks is best known as an explorer of the human mind, a neurologist with a gift for the complex, insightful portrayals of people and their conditions that fuel the phenomenal success of his books. But he is also a card-carrying member of the American Fern Society, and since childhood has been fascinated by these primitive plants and their ability to survive and adapt. Now the bestselling author of Awakenings and The Man Who Mistook His Wife for a Hat brings his ceaseless curiosity and eye for the wondrous to the province of Oaxaca, Mexico. Oaxaca Journal is Sacks’s spellbinding account of his trip with a group of fellow fern enthusiasts to the beautiful, history-steeped province of Oaxaca. Bringing together Sacks’s passion for natural history and the richness of human culture with his penetrating curiosity and trammeling eye for detail, Oaxaca Journal is a captivating evocation of a places, its plants, its people and its myriad wonders.

"Intersectionality, a term coined in 1989, is rapidly increasing in importance within the academy, as well as in broader civic conversations. It describes the study of overlapping or intersecting social identities such as race, gender, ethnicity, nationality, and sexual orientation alongside related systems of oppression, domination, and discrimination. Together, these frameworks are used to understand how systematic injustice or social inequality occurs. In this book, Roland Betancourt examines the presence of marginalized identities and intersectionality in the medieval era. He reveals the fascinating, little-examined conversations in medieval thought and visual culture around matters of sexual and reproductive consent, bullying, non-monogamous marriages, homosocial and homoerotic relationships, trans and non-binary gender identifications, representations of disability, and the oppression of minorities. In contrast to contemporary expectations of the medieval world, this book looks at these problems from the Byzantine Empire and its neighbors in the eastern mediterranean through sources ranging from late antiquity and early Christianity up to the early modern period. In each of five chapters, Betancourt provides short, carefully scaled narratives used to illuminate nuanced and surprising takes on now-familiar subjects by medieval thinkers and artists. For example, Betancourt examines depictions of sexual consent in images of the Virgin; the origins of sexual shaming and bullying in the story of Empress Theodora; early beginnings of trans history as told in the lives of saints who lived portions of their lives within different genders; and the ways in which medieval authors understood and depicted disabilities. Deeply researched, this is a groundbreaking new look at medieval culture for a new generation of scholars"--Cici’s Journal

The revolutionary life of an 18th-century dwarf activist who was among the first to fight against slavery and animal cruelty. Prophet Against Slavery is an action-packed chronicle of the remarkable and radical Benjamin Lay, based on the award-winning biography by Marcus Rediker that sparked the Quaker community to re-embrace Lay after 280 years of disownment. Graphic novelist David Lester brings the full scope of Lay ’s activism and ideas to life. Born in 1682 to a humble Quaker family in Essex, England, Lay was a forceful and prescient visionary. Understanding the fundamental evil that slavery represented, he would unflinchingly use guerrilla theatre tactics and direct action to shame slave owners and traders in his community. The prejudice that Lay suffered as a dwarf and a hunchback, as well as his devout faith, informed his passion for human and animal liberation. Exhibiting stamina, fortitude, and integrity in the face of the cruelties practiced against what he called his “ fellow creatures, ” he was often a lonely voice that spoke truth to power. Lester ’ s beautiful imagery and storytelling, accompanied by afterwords from Rediker and Paul Buhle, capture the radicalism, the humor, and the humanity of this truly modern figure. A testament to the impact each of us can make, Prophet Against Slavery brings Lay ’ s prophetic vision to a new generation of young activists who today echo his call of 300 years ago: “ No justice, no peace!”

This book is the first collection of original research to explore links between demographics and media coverage of emerging human rights issues. It covers cross-national reporting on human trafficking, HIV/AIDS, water contamination, and child labour; and same-sex marriage, Guantanamo detainee rights, immigration reform, and post-traumatic stress disorder in the United States. The research asks questions such as: What are the principal catalysts that propel rights issues into media agendas? Why do some surface more quickly than others? And how do the demographics of cross-national reporting differ from those driving multi-city US nationwide coverage of rights claims? Using community structure theory and innovative Media Vector content analysis, the eight chapters of this book reveal three striking patterns that show how differences in female empowerment, social or economic vulnerability, and Midwestern newspaper geographic location, link powerfully with variations in coverage of rights issues. The patterns connecting demographics and rights claims confirm that coverage of human rights can mirror the concerns of stakeholders and vulnerable groups, contrary to conventional assumptions that media typically serve as "guard dogs" reinforcing the interests of political and economic elites. This book was originally published as a special issue of The Atlantic Journal of Communication.

The Speaking Stone: Stories Cemeteries Tell is a literary love letter to the joys of wandering graveyards and the discoveries such wanderings can yield. Here, Michael Griffith roams Spring Grove (founded 1844), the nation’s third-largest cemetery, following curiosity and accident wherever they lead. The result is this fascinating collection, which narrates the lives of those he encountered on the way. Griffith lingers amidst the traces left behind—these are stories of race, feminism, art, and death, uncovered through obituaries, archival documents, and family legacies. Some essays focus on well-known figures like the feminist icon and freethinker Fanny Wright, but most chronicle the lives of lesser-known figures (a spiritual medium, a temperance advocate, the designers of caskets and hearses, the inventor of the glass-door oven) or of nearly unknown ones (a young heiress who died under mysterious circumstances, the daring sign-painters known as walldogs). The Speaking Stone examines what endures and what doesn’t, reflecting on the vanity and poignancy of our attempts to leave monuments that last. Archival photos grace the pages of these thirteen essays that explore a larger, deeply tangled complex of ideas about place, history, self, and art.

To demonstrate the powerfully enduring effect of place, this text reviews a decade of research in Chicago, to demonstrate how neighborhoods influence social phenomena, including crime, health, civic engagement & altruism.

Provides an introduction to the social, cultural, economic, historical, and religious practices and beliefs of Central and South America.

**An argument that social, political, and economic systems maintain power by discarding certain people, places, and things. Discard studies is an emerging field that looks at waste and wasting broadly construed. Rather than focusing on waste and trash as the primary objects of study, discard studies looks at wider systems of waste and wasting to explore how some materials, practices, regions, and people are valued or devalued, becoming dominant or disposable. In this book, Max Liboiron and Josh Lepawsky argue that social, political, and economic systems maintain power by discarding certain people, places, and things. They show how the theories and methods of discard studies can be applied in a variety of cases, many of which do not involve waste, trash, or pollution. Liboiron and Lepawsky consider the partiality of knowledge and offer a theory of scale, exploring the myth that most waste is municipal solid waste produced by consumers; discuss peripheries, centers, and power, using content moderation as an example of how dominant systems find ways to discard; and use theories of difference to show that universalism, stereotypes, and inclusion all have politics of discard and even purification—as exemplified in “inclusive” efforts to broaden the Black Lives Matter movement. Finally, they develop a theory of change by considering “wasting well,” outlining techniques, methods, and propositions for a justice-oriented discard studies that keeps power in view.**

**An authority on the human mind reflects on his intellectual development, his groundbreaking work, and different types of intelligences—including his own. Howard Gardner's Frames of Mind was that rare publishing phenomenon--a mind-changer. Widely read by the general public as well as by educators, this influential book laid out Gardner's theory of multiple intelligences. It debunked the primacy of the IQ test and inspired new approaches to education; entire curricula, schools, museums, and parents' guides were dedicated to the nurturing of the several intelligences. In his new book, A Synthesizing Mind, Gardner reflects on his intellectual development and his groundbreaking work, tracing his evolution from bookish child to eager college student to disengaged graduate student to Harvard professor.**

**In this book, economist Jean-Philippe Platteau addresses the question: does Islam, the religion of Muslims, bear some responsibility for a lack of economic development in the countries in which it dominates? In his nuanced approach, Platteau challenges the widespread view that the doctrine of Islam is reactionary in the sense that it defends tradition against modernity and individual freedom. He also questions the view that fusion between religion and politics is characteristic of Islam and predisposes it to theocracy. He disagrees with the substantivist view that Islam is a major obstacle to modern development because of a merging of religion and the state, or a fusion between the spiritual and political domains. But he also identifies how Islam's decentralized organization, in the context of autocratic regimes, may cause political instability and make reforms costly.**

This is an exciting time to be an academic advisor—a time in which global recognition of the importance of advising is growing, research affirms the critical role advising plays in student success, and institutions of higher education increasingly view advising as integral to their missions and essential for improving the quality of students' educational experiences. It is essential that advisors provide knowledgeable, realistic counsel to the students in their charge. The New Advisor Guidebook helps advisors meet this challenge. The first and final chapters of the book identify the knowledge and skills advisors must master. These chapters present frameworks for setting and benchmarking self-development goals and for creating self-development plans. Each of the chapters in between focuses on foundational content: the basic terms, concepts, information, and skills advisors must learn in their first year and upon which they will build over the lengths of their careers. These chapters include strategies, questions, guidelines, examples, and case studies that give advisors the tools to apply this content in their work with students, from demonstrations of how student development theories might play out in advising sessions to questions advisors can ask to become aware of their biases and avoid making assumptions about students to a checklist for improving listening, interviewing, and referral skills. The book covers various ways in which advising is delivered: one-to-one, in groups, and online. The New Advisor Guidebook serves as an introduction to what advisors must know to do their jobs effectively. It pairs with Academic Advising Approaches: Strategies That Teach Students to Make the Most of College, also from NACADA, which presents the delivery strategies successful advisors can use to help students make the most of their college experience.

Embodying urbanity, intellect and prismatic emotion, this exceptional selection of works from a poet at the forefront of American poetry gives readers a full tour of his celebrated career.

The Cursed Carolers in Context explores the interplay between the forms and contexts in which the tale of the cursed carolers circulated and the meanings it had for medieval and early modern authors and audiences. The story of the cursed carolers has circulated in Europe since the eleventh century. In this story, a group of people in a village in Saxony skip Christmas mass to perform a circle dance in the cemetery, only to be cursed and forced to keep dancing for a whole year. By approaching the story in specific historical contexts, this book shows how the story of the cursed carolers became a space in which medieval readers, writers, and listeners could debate the meaning and significance of a surprising variety of questions, including ecclesiastical authority, gender roles, pastoral responsibility, and even the conduct of crusades. This consideration of the interplay between text and context sheds new light on how and why the story of the dancers achieved such popularity in the Middle Ages, and how its meanings developed and changed throughout the period. This book will appeal to scholars and students of medieval European history, literature, and dance, as well as those interested in cultural history.

Subtexts are all around us. In conversation, business transactions, politics, literature, philosophy, and even love, the art of expressing more than what is explicitly said allows us to live and move in the world. But rarely do we reflect on this subterranean dimension of communication. In this book, renowned classicist and scholar of rhetoric Laurent Pernot explores the fascinating world of subtext. Of the two meanings present in any instance of double meaning, Pernot focuses on the meaning that is unstated—the meaning that counts. He analyzes subtext in all its multifarious forms, including allusion, allegory, insinuation, figured speech, irony, innuendo, esoteric teaching, reading between the lines, ambiguity, and beyond. Drawing on examples from figures as varied as Homer, Shakespeare, Moli è re, Proust, Foucault, and others, as well as from popular culture, Pernot shows how subtext can be identified and deciphered as well as how prevalent and essential it is in human life. With erudition and wit, Pernot explains and clarifies a device of language that we use and understand every day without even realizing it. The Subtle Subtext is a book for anyone who is interested in language, literature, hidden meanings, and the finer points of social relations.

A captivating literary and historical record, Jean Giono's Occupation Journal offers a glimpse into life in collaborationist France during the Second World War, as seen through the eyes and thoughts of one of France's greatest and most independent writers. Written during the years of France's occupation by the Nazis, Jean Giono's Occupation Journal reveals the inner workings of one of France's great literary minds during one of the country's darkest hours. A renowned writer and committed pacifist throughout the 1930s—a conviction that resulted in his imprisonment before and after the Occupation--Giono spent the war in the village of Contadour in Provence, where he wrote, corresponded with other writers, and cared for his consumptive daughter. This journal records his musings on art and literature, his observations of life, his interactions with the machinery of the collaborationist Vichy regime, as well as his forceful political convictions. Giono recounts the details of his life with fierce independence of thought and novelistic attention to character and dialogue. Occupation Journal is a fascinating historical document as well as a unique window into one of French literature's most voracious and critical minds.
