1. Master Guide Agriculture Science deals with the Agricultural Entrance exams 2. Covers various sections and makes a complete study package 3. Book is divided into 8 Units and total of 22 Chapters 4. Ample number of MCQs in each chapter 5. Latest question papers of various exams for practice 6. Equally useful for UPSC, State PSCs, ARS, JRF, NET & BHU covers Agriculture Science subject. Agriculture, being the main contributor to the Indian Economy, it serves as a backbone to the country. Even today, the source of livelihood of more than 65% country's population depends on it. With the increasing innovation in this sector, the opportunities are also increasing, attracting many students to opt for Agriculture Science as a full time career. Prepare yourself with the revised edition of "Master Guide Agriculture Science" that has been framed keeping in view the entrance exams conducted by the UPSC exams. Giving the complete coverage to the syllabus, this book is divided in 22 Chapters categorized under 8 Units. Theories given in every chapter helps students to know the concepts clearly. To mark your preparation on point, this guide provides Solved Papers of FSO, AAO and BHU M.Sc. for practice. The book will be equally useful for UPSC, State PSCs, ARS, JRF, NET & BHU which covers the subject of Agriculture Science. As the book contains ample number study as well as practice material, it for sure will help the aspirants score high in the upcoming examinations. TABLE OF CONTENT UNIT - 1: Agriculture Science, UNIT - 2: Gardening, UNIT - 3: Genetics and Plant Breeding, UNIT - 4: Soil Science and Fertility and Fertilizers, UNIT - 5: Plant and Pathology and Entomology, UNIT - 6: Agriculture Extension and Agriculture Economics, UNIT - 7: Agriculture Statistics, UNIT - 8: Animal Science and Dairy Science, Glossary, Question Papers: FSO, AAO, BHU M.Sc.

'Fundamentals of Agriculture' for competitive exams in agriculture discipline contains 6 chapters in volume I and 7 chapters in volume II covering all disciplines of agriculture. The chapters included General Agriculture, Agricultural Climatology, Genetics, Plant Breeding & Biotechnology, Plant Physiology & Biochemistry, Seed Technology and Agronomy in volume I and Soil Science & Agricultural Microbiology, Horticulture, Entomology, Plant Pathology, Agriculture Extension, Agriculture Economics and Agriculture Statistics in Volume II have given due importance and whole syllabus is covered as per ICAR/SAUs syllabus and guidelines. Each chapters contains very short types of descriptive questions. Recent precise information and development in the field of agriculture have been incorporated in the book. For the overall benefit of the student in the discipline of agriculture we have made this book exclusively in such a way that it hands out not only solutions but also detailed explanations. Though these detailed and thorough explanation, student can learn the concepts which will enhance their thinking and learning ability. Thus this book may be useful not only to students but also teachers, researchers, extension workers and development officers for reference and easy answering of many complicated questions of all related disciplines of agriculture. Fundamentals of Agriculture covers the course contents of competitive examinations like IAS, IFS, PCS, ARS, Banking services, B.Sc./M.Sc./Ph.D. (Ag) admission, states and national levels of different competitions in agriculture. The entire book is prepared in most simple, clear, talking language, comprehensive and short descriptive types of questions so that the concepts could be easily understand by the readers in short times. Hence, this book can solve as a single platform for preparation of different competitive examinations in agriculture.

Agronomy deals with the science and technology of producing and using plants for food, fuel, fiber, and land reclamation. The importance of agronomy provides farmers with agricultural information about how to grow and care for plants and soils in certain environments. Factors such as climate, roots, moisture, weeds, pests, fungi, and erosion can pose significant challenges when farmers attempt to produce a plentiful harvest. In order to discover ways of integrating crops into the environment in ways that will allow them to prosper, agronomists study these agricultural hurdles. Throughout history, scientific and technological advances have greatly impacted the agriculture industry. Early farmers improved their crop production by inventing the first hoes. Today, farmers improve crop production through the use of global positioning systems (GPS). How did these changes happen? How did people learn about new ideas? How have these ideas changed farming methods? In recent times, research and development in this area have made innovations in farming products and practices. Fundamentals Of Agronomy presents the comprehensive coverage in the pursuit of improving the yield of crops, protecting crops against diseases and pest, making livestock healthy all the time, designing the best method of crops storage and even helping in predicting the climate conducive for agricultural practice cannot be over emphasized. Crop protection is very vital in agriculture. Disease affects plants and leads to delay in metabolic activities, stunted growth, shedding of flowers and fruits and sometimes the actual death of the plant. Cultural and chemical controls are most of the time used. Culturally, crop rotation is adopted, burning remains after harvesting, regular weeding of the soil, proper spacing of crops using of high yielding and resistant varieties and practicing of irrigation during

dry season are adopted. This book will be of interest to students, professional practitioners, educators, and advisers who work directly with farmers, companies, and others in the agriculture community to implement the latest methods and tools for growing crops profitably and sustainably.

Before the concept of history began, humans undoubtedly acquired life benefits by discovering medicinal and aromatic plants (MAPs) that were food and medicine. Today, a variety of available herbs and spices are used and enjoyed throughout the world and continue to promote good health. The international market is also quite welcoming for MAPs and essential oils. The increasing environment and nature conscious buyers encourage producers to produce high quality essential oils. These consumer choices lead to growing preference for organic and herbal based products in the world market. As the benefits of medicinal and aromatic plants are recognized, these plants will have a special role for humans in the future. Until last century, the production of botanicals relies to a large degree on wild-collection. However, the increasing commercial collection, largely unmonitored trade, and habitat loss lead to an incomparably growing pressure on plant populations in the wild. Therefore, medicinal and aromatic plants are of high priority for conservation. Given the above, we bring forth a comprehensive volume, "Medicinal and Aromatic Plants: Healthcare and Industrial Applications", highlighting the various healthcare, industrial and pharmaceutical applications that are being used on these immensely important MAPs and its future prospects. This collection of chapters from the different areas dealing with MAPs caters to the need of all those who are working or have interest in the above topic.

This Book Covers A Wide Range Of Topics In Statistics With Conceptual Analysis, Mathematical Formulas And Adequate Details In Question-Answer Form. It Furnishes A Comprehensive Overview Of Statistics In A Lucid Manner. The Book Provides Ready-Made Material For All Inquisitive Minds To Help Them Prepare For Any Traditional Or Internal Grading System Examination, Competitions, Interviews, Viva-Voce And Applied Statistics Courses. One Will Not Have To Run From Pillar To Post For Guidance In Statistics. The Answers Are Self-Explanatory. For Objective Type Questions, At Many Places, The Answers Are Given With Proper Hints. Fill-In-The-Blanks Given In Each Chapter Will Enable The Readers To Revise Their Knowledge In A Short Span Of Time. An Adequate Number Of Multiple-Choice Questions Inculcate A Deep Understanding Of The Concepts. The Book Also Provides A Good Number Of Numerical Problems, Each Of Which Requires Fresh Thinking For Its Solution. It Will Also Facilitate The Teachers To A Great Extent In Teaching A Large Number Of Courses, As One Will Get A Plethora Of Matter At One Place About Any Topic In A Systematic And Logical Manner. The Book Can Also Serve As An Exhaustive Text.

This volume is the second of the new two-volume Plant Biotechnology set. This volume covers many recent advances in the development of transgenic plants that have revolutionized our concepts of sustainable food production, cost-effective alternative energy strategies, microbial biofertilizers and biopesticides, and disease diagnostics through plant biotechnology. With the advancements in plant biotechnology, many of the customary approaches are out of date, and an understanding of new updated approaches is needed. This volume presents information related to recent methods of genetic transformation, gene silencing, development of transgenic crops, biosafety issues, microbial biotechnology, oxidative stress, and plant disease diagnostics and management. Key features: Provides an in-depth knowledge of various techniques of genetic transformation of plants, chloroplast, and fungus Describes advances in gene silencing in plants Discusses transgenic plants for various traits and their application in crop improvement Looks at genetically modified foods and biodiesel production Describes biotechnological approaches in horticultural and ornamental plants Explores the biosafety aspect associated with transgenic crops Considers the role of microbes in sustainable agriculture

The knowledge on Agriculture is continuously improved, updated, and disseminated. It is also important that the review and inventory of the 'State of the Art' in agriculture objectives questions and best practices should be shared widely among agriculture practitioners, educators and scholars. Through Competitive Examinations, there is direct recruitment for admission and high position in our education system; the pattern followed is M.C.Q's or Objective type questions in such examinations. The book is a repository of more than 6,000 objective questions; which calls for quick answering for success within a specified period in the examinations. A sincere effort has been made by different authors to present them

in most easy, short and understandable language for the benefit of students, teachers and those who are interested in Agriculture and Agricultural Extension. Majorly, all different aspects of Agriculture Discipline are provided in the book, which are a part of various Agricultural Universities syllabi. This book will be of great service, to the students aiming for higher level competitive examination such as NET, ARS, JRF, SRF, UG and PG entrance examinations.

Written in easy to follow language, the book presents cutting-edge agriculturally relevant plant biotechnologies and applications in a manner that is accessible to all. This book introduces the scope and method of plant biotechnologies and molecular breeding within the context of environmental analysis and assessment, a diminishing supply of productive arable land, scarce water resources and climate change. Authors who have studied how agro ecosystems have changed during the first decade and a half of commercial deployment review effects and stress needs that must be considered to make these tools sustainable.

In this book, attempts have been made to deliver the core of the subject in a concise, easily assimilated form designed to compete the JRF, SRF, NET and ARS. It may be useful to seek admission in Ph. D. in Plant Pathology through entrance examinations of various institutions and get through screening tests conducted by Public Service Commission of various states for jobs in Plant pathology/Plant Protection. This book covers all the chapters of plant pathology including historical background, molecular plant pathology, breeding for resistance to disease, physiology of diseased plants, root diseases, seed-borne diseases, postharvest diseases of fruits and vegetables, diseases caused by fungi, bacteria, viruses, viroid, virusoid, phytoplasmas, spiroplasmas, protozoa and abiotic stresses etc. It contains objective questions with answers to be asked in various competitive exams. This book is designed to satisfy the needs of students preparing for competitive exams and to understand the fundamental aspects clearly and easily.

In the context of South Asian Association for Regional Cooperation countries.

In the era of Competition the literature plays a vital role whether to get entry in teaching institutes or service. The State Agricultural Scientists Recruitment Board is also through competition. For Becoming authority in the subject one will have to go through scores of books not in one or two months but in years together, which is not only a costly proposition but also time consuming. In this regards, the question in a concern area/subject is a great relief. The questions book entitles "Objective Questions on Vegetable World" would be a great help to the students of vegetable science in seeking admission for higher education and entry into the service. This book embodied the question the questions on vegetables like solanaceous, cucuritaceous, leguminous, cole crops, root crops, spices etc., besides statistics and list of institutes/Centers in the country conducting research on vegetables. It is hoped that this compilation of questions along with answers would be an asset to the students and scientists of vegetable science.

With a special reference to India.
