Philippine Government and Constitution

A powerful and humane exploration of the history of the "insanity defense," through the story of one poignant case. When a three-year-old child was found with a head wound and other injuries, it looked like an open-and-shut case of second-degree murder. Psychologist and attorney Susan Vinocour agreed to evaluate the defendant, the child's mentally ill and impoverished grandmother, to determine whether she was competent to stand trial. Even if she had caused the child's death, had she realized at the time that her actions were wrong or was she legally "insane"? What followed was anything but an open-and-shut case. Nobody's Child traces the legal definition of "insanity" back to its inception in Victorian Britain nearly two hundred years ago, from when our understanding of the human mind was in its infancy, to today, when questions of race, class, and ability so often determine who is legally "insane" and who is criminally guilty. Vinocour explains how "competency" and "insanity" are creatures of a legal system, not of psychiatric reality, and how, in criminal law, the insanity defense has to often been a luxury of the rich and white. Nobody's Child is a profoundly dignified portrait of injustice in America and a complex examination of the troubling intersection of mental health and the law. When prisons are now the largest institutions for the mentally ill, Vinocour demands that we reckon with our conceptions of "insanity" with clarity, empathy, and responsibility.

Globalization and Neoliberalism

A Reference for Learners of Tagalog

How do recent trends toward globalization affect the Caribbean, a region whose suppliers, production, markets, and politics have been globalized for centuries? What is

the status of neoliberal development policy in the Caribbean, where the rewards for belt tightening and economic opening have been slow in coming? How have Caribbean policymakers and citizens responded to and resisted the pressures to conform to the new rules of the global economy? By examining these questions through the lens of political economy, this volume explores the interaction among development, trade, foreign policy, the environment, tourism, gender relations, and migration. With its global implications, this book will be invaluable for students and scholars from all disciplines who are concerned with the impact of development and globalization.
