*The study of what is collectively labeled “New Media”—the cultural and artistic practices made possible by digital technology—has become one of the most vibrant areas of scholarly activity and is rapidly turning into an established academic field, with many universities now offering it as a major. The Johns Hopkins Guide to Digital Media is the first comprehensive reference work to which teachers, students, and the curious can quickly turn for reliable information on the key terms and concepts of the field. The contributors present entries on nearly 150 ideas, genres, and theoretical concepts that have allowed digital media to produce some of the most innovative intellectual, artistic, and social practices of our time. The result is an easy-to-consult reference for digital media scholars or anyone wishing to become familiar with this fast-developing field.*

*This collection of new essays explores the many ways in which composers have been depicted in film and what audiences have taken away from such depictions. Beginning with some of the earliest silent film examples—including some of the first feature-length “bio-pics” ever produced—these essays range from the 12th century abbess Hildegard of Bingen to the great classical and romantic eras of Verdi, Wagner, Berlioz and Strauss, up to the 20th century’s Elgar, Delius, Gershwin and Blitzstein.*

*A compelling historical analysis of the pivotal events of the year 1492 focuses on the role of the Spanish Inquisition in strengthening the power of King Ferdinand and Queen Isabella, the campaign against Moorish occupation, the expulsion of the Spanish Jews, and the beginning of the Spanish conquest of the New World. Reprint. 25,000 first printing.*

*In this remarkably accessible, concise, and engaging introduction to the philosophy of religion, Steven M. Cahn brings together a rich and balanced collection of sixty-six classic and contemporary readings. This unique anthology features a clear, well-organized structure and careful editing of many articles in order to sharpen their focus and make them understandable to students with little or no background in philosophy. The book also reflects the importance of women's contributions to the field; 40% of the contemporary readings are by women. In addition, topics often minimized in other collections are covered in more depth here, including forgiveness and love; ritual, prayer, and worship; gender; speaking of God; and the afterlife.*

**Magic enjoyed a vigorous revival in sixteenth-century Europe, attaining a prestige lost for over a millennium and becoming, for some, a kind of universal philosophy. Renaissance music also suggested a form of universal knowledge through renewed interest in two ancient themes: the Pythagorean and Platonic "harmony of the celestial spheres" and the legendary effects of the music of bards like Orpheus, Arion, and David. In this climate, Renaissance philosophers drew many new and provocative connections between music and the occult sciences. In Music**

**in Renaissance Magic, Gary Tomlinson describes some of these connections and offers a fresh view of the development of early modern thought in Italy. Raising issues essential to postmodern historiography—issues of cultural distance and our relationship to the others who inhabit our constructions of the past —Tomlinson provides a rich store of ideas for students of early modern culture, for musicologists, and for historians of philosophy, science, and religion. "A scholarly step toward a goal that many composers have aimed for: to rescue the idea of New Age Music—that music can promote spiritual well-being—from the New Ageists who have reduced it to a level of sonic wallpaper."—Kyle Gann, Village Voice "An exemplary piece of musical and intellectual history, of interest to all students of the Renaissance as well as musicologists. . . . The author deserves congratulations for introducing this new approach to the study of Renaissance music."—Peter Burke, NOTES "Gary Tomlinson's Music in Renaissance Magic: Toward a Historiography of Others examines the 'otherness' of magical cosmology. . . . [A] passionate, eloquently melancholy, and important book."—Anne Lake Prescott, Studies in English Literature**

**and the meaning of life. The result is a novel analysis of the greatest science fiction film of all time and a unique contribution to the philosophy of film.**

**Ethnomusicological fieldwork has significantly changed since the end of the the 20th century. Ethnomusicology is in a critical moment that requires new perspectives on fieldwork - perspectives that are not addressed in the standard guides to ethnomusicological or anthropological method. The focus in ethnomusicological writing and teaching has traditionally centered around analyses and ethnographic representations of musical cultures, rather than on the personal world of understanding, experience, knowing, and doing fieldwork. *Shadows in the Field* deliberately shifts the focus of ethnomusicology and of ethnography in general from representation (text) to experience (fieldwork). The "new fieldwork" moves beyond mere data collection and has become a defining characteristic of ethnomusicology that engages the scholar in meaningful human contexts. In this new edition of *Shadows in the Field*, renowned ethnomusicologists explore the roles they themselves act out while performing fieldwork and pose significant questions for the field: What are the new directions in ethnomusicological fieldwork? Where does fieldwork of "the past" fit into these theories? And above all, what do we**

**see when we acknowledge the shadows we cast in the field? The second edition of *Shadows in the Field* includes updates of all existing chapters, a new preface by Bruno Nettl, and seven new chapters addressing critical issues and concerns that have become increasingly relevant since the first edition.**

**Offering outstanding listening pedagogy, *THE ESSENTIAL LISTENING TO MUSIC 2e* delivers a streamlined and succinct presentation of classical music that inspires a lifelong appreciation of music. Scholar and master-teacher Craig Wright focuses on the key concepts and works presented within a typical Music Appreciation course. Organized chronologically, the text discusses musical examples from each historical period within its social context--giving students a sense of a piece's construction as well as its historical and cultural meaning. *Reading Song Lyrics offers the first systematic introduction to lyrics as a vibrant genre of (performed) literature. It takes lyrics seriously as a complex form of verbal art that has been unjustly neglected in literary, music, and, to a lesser degree, cultural studies, partly as it cuts squarely across institutional boundaries. The first part of this book accordingly introduces a thoroughly transdisciplinary interpretive framework. It outlines theoretical approaches to issues such as performance and performativity, generic convention and cultural capital, sound and songfulness, mediality and musical multimedia, and step by step applies them to the example of a single song. The second part then offers three extended case studies which showcase the larger cultural and historical viability of this model. Probing into the relationship between lyrics and the ambivalent performance of national culture in Britain, it offers exemplary readings of a highly subversive 1597 ayre by John Dowland, of an 1811 broadside ballad about Sara Baartman, 'The Hottentot Venus', and of a 2000 song by 'jungle punk' collective Asian Dub Foundation. Reading Song Lyrics demonstrates how and why song lyrics matter as a paradigmatic art form in the culture of*

A Theory of Adaptation explores the continuous development of creative adaptation, and argues that the

practice of adapting is central to the story-telling imagination. Linda Hutcheon develops a theory of adaptation through a range of media, from film and opera, to video games, pop music and theme parks, analysing the breadth, scope and creative possibilities within each. This new edition is supplemented by a new preface from the author, discussing both new adaptive forms/platforms and recent critical developments in the study of adaptation. It also features an illuminating new epilogue from Siobhan O'Flynn, focusing on adaptation in the context of digital media. She considers the impact of transmedia practices and properties on the form and practice of adaptation, as well as studying the extension of game narrative across media platforms, fan-based adaptation (from Twitter and Facebook to home movies), and the adaptation of books to digital formats. *A Theory of Adaptation* is the ideal guide to this ever evolving field of study and is essential reading for anyone interested in adaptation in the context of literary and media studies.

A breakaway bestseller since its first printing, *All Souls* takes us deep into Michael Patrick

MacDonald's Southie, the proudly insular neighborhood with the highest concentration of white poverty in America. Rocked by Whitey Bulger's crime schemes and busing riots, MacDonald's Southie is populated by sharply hewn characters like his Ma, a miniskirted, accordion-playing single mother who endures the deaths of four of her eleven children. Nearly suffocated by his grief and his community's code of silence, MacDonald tells his family story here with gritty but moving honesty.

The Original Portrayal of Mozart's Don Giovanni offers an original reading of Mozart's and Da Ponte's opera Don Giovanni, using as a lens the portrayal of the title role by its creator, the baritone Luigi Bassi (1766–1825). Although Bassi was coached in the role by the composer himself, his portrayal has never been studied in depth before, and this book presents a large number of new sources (first- and second-hand accounts), which allows us to reconstruct his performance scene by scene. The book confronts Bassi's portrayal with a study of the opera's early German reception and performance history, demonstrating how Don Giovanni as we know it today was not only created by Mozart, Da Ponte and Luigi Bassi but also by the early German adapters, translators, critics and performers who turned the title character into the arrogant and violent villain we still encounter in most of today's stage productions. Incorporating

discussion of dramaturgical thinking of the late Enlightenment and the difficult moral problems that the opera raises, this is an important study for scholars and researchers from opera studies, theatre and performance studies, music history as well as conductors, directors and singers.

Fredric Jameson sweeps from the Renaissance to The Wire High modernism is now as far from us as antiquity was for the Renaissance. Such is the premise of Fredric Jameson's major new work in which modernist works, this time in painting (Rubens) and music (Wagner and Mahler), are pitted against late-modernist ones (in film) as well as a variety of postmodern experiments (from SF to The Wire, from "Eurotrash" in opera to Altman and East German literature): all of which attempt, in their different ways, to invent new forms to grasp a specific social totality. Throughout the historical periods, argues Jameson, the question of narrative persists through its multiple formal changes and metamorphoses. A study into indigenous music-making in New World societies, including the Aztecs and the

Passionate, witty, and brilliant, *Opera as Drama* has been lauded as one of the most controversial, thought-provoking, and entertaining works of operatic criticism ever written. First published in 1956 and revised in 1988, *Opera as Drama* continues to be indispensable reading for all students and lovers of opera.

For courses in Music Theory (a two-year sequence including sight singing and ear training) as well as separate Sight Singing courses. Using an abundance of meticulously organized melodies drawn from the literature of composed music and a wide range of the world's folk music, Ottman provides the most engaging and comprehensive Sight Singing text on the market. Over fifty years ago, Robert W. Ottman set out to write a book that draws examples from the literature as opposed to being composed by the author. He proposed that students should work with "real" music as they study musical forms. The result was *Music for Sight Singing*. Not only is real music more enjoyable and interesting to sing than dry examples, but genuine repertoire naturally introduces a host of important musical considerations beyond pitch and rhythm (including dynamics, accents, articulations, slurs, repeat signs, and tempo markings). Several generations of teachers have also agreed that Ottman's ability to order his examples from the simple to the complex is another key to the book's long

term success. Nancy Rogers, the book's new author, has added new vitality to the book, introducing exercises to develop creativity as well as to build basic skills.
