

Key Issue 1 Where Are Ethnicities Distributed

'Post-truth' was Oxford Dictionaries 2016 word of the year. While the term was coined by its disparagers in the light of the Brexit and US presidential campaigns, the roots of post-truth lie deep in the history of Western social and political theory. Post-Truth reaches back to Plato, ranging across theology and philosophy, to focus on the Machiavellian tradition in classical sociology, as exemplified by Vilfredo Pareto, who offered the original modern account of post-truth in terms of the 'circulation of elites'. The defining feature of 'post-truth' is a strong distinction between appearance and reality which is never quite resolved and so the strongest appearance ends up passing for reality. The only question is whether more is gained by rapid changes in appearance or by stabilizing one such appearance. Post-Truth plays out what this means for both politics and science.

The Cultural Landscape An Introduction to Human Geography Low Carbon Development Key Issues Routledge

This open access book analyzes the main drivers that are influencing the dramatic evolution of work in Asia and the Pacific and identifies the implications for education and training in the region. It also assesses how education and training philosophies, curricula, and pedagogy can be reshaped to produce workers with the skills required to meet the emerging demands of the Fourth Industrial Revolution. The book's 40 articles cover a wide range of topics and reflect the diverse perspectives of the eminent policy makers, practitioners, and researchers who authored them. To maximize its potential impact, this Springer-Asian Development Bank co-publication has been made available as open access.

Themelios is an international, evangelical, peer-reviewed theological journal that expounds and defends the historic Christian faith. Themelios is published three times a year online at The Gospel Coalition (<http://thegospelcoalition.org/themelios/>) and in print by Wipf and Stock. Its primary audience is theological students and pastors, though scholars read it as well. Themelios began in 1975 and was operated by RTSF/UCCF in the UK, and it became a digital journal operated by The Gospel Coalition in 2008. The editorial team draws participants from across the globe as editors, essayists, and reviewers. General Editor: D. A. Carson, Trinity Evangelical Divinity School Managing Editor: Brian Tabb, Bethlehem College and Seminary Consulting Editor: Michael J. Ovey, Oak Hill Theological College Administrator: Andrew David Naselli, Bethlehem College and Seminary Book Review Editors: Jerry Hwang, Singapore Bible College; Alan Thompson, Sydney Missionary & Bible College; Nathan A. This book offers something quite new - an advanced textbook that considers professional writing as a negotiated process between writer and reader. Arguing that ethics, imagination and rhetoric are integral to professional writing praxis, the book encourages students to look critically at various writing practices in a range of contexts. A textbook for advanced undergraduates and postgraduates in Linguistics, Communication, Journalism and Media Studies.

• New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world “ At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope. ” —Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming*

“ There ’ s been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom. ” —David Roberts, *Vox*

“ This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook. ” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA

In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth ’ s warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

This book provides a state-of-the-art collection of papers presented at the 67th Conference on Glass Problems at The Ohio State University, October 31-November 1, 2006. Provides a state-of-the-art collection of recent papers on glass problems as presented at the 67th Conference on Glass Problems. Sections on furnaces, refractories, raw materials, and environmental issues are included.

The sexual lives of people with disabilities are rarely discussed. It is as if, because someone has a biological or psychological impairment, they do not exist as a sexual being. As such, many people with disabilities feel marginalised and powerless not only in their day-to-day lives, but also in their ability to form sexual relationships. A range of health issues are raised as a result. Illustrated by research drawn from a range of international contexts, *Disability and Sexual Health: A Critical Exploration of Key Issues* is the first to examine this important but seldom

Read Book Key Issue 1 Where Are Ethnicities Distributed

acknowledged issue. Beginning with an understanding of how both disability and sexuality are socially defined phenomena, the book discusses the implications for the sexual health of people with disabilities, from sexual health education and access to information to STDs and possible sexual exploitation. The book concludes with a chapter recommending inclusive practice in line with the aims of the UN Convention on the Rights of People with Disabilities. Disability and Sexual Health will be important reading for researchers and students in health psychology, critical psychology and the psychology of sexuality, gender, disability and nursing. It will also be of interest to professionals working with people with disabilities in health care and social work.

This volume is part of the Ceramic Engineering and Science Proceeding (CESP) series. This series contains a collection of papers dealing with issues in both traditional ceramics (i.e., glass, whitewares, refractories, and porcelain enamel) and advanced ceramics. Topics covered in the area of advanced ceramic include bioceramics, nanomaterials, composites, solid oxide fuel cells, mechanical properties and structural design, advanced ceramic coatings, ceramic armor, porous ceramics, and more.

The COVID-19 pandemic struck the global economy after a decade that featured a broad-based slowdown in productivity growth. Global Productivity: Trends, Drivers, and Policies presents the first comprehensive analysis of the evolution and drivers of productivity growth, examines the effects of COVID-19 on productivity, and discusses a wide range of policies needed to rekindle productivity growth. The book also provides a far-reaching data set of multiple measures of productivity for up to 164 advanced economies and emerging market and developing economies, and it introduces a new sectoral database of productivity. The World Bank has created an extraordinary book on productivity, covering a large group of countries and using a wide variety of data sources. There is an emphasis on emerging and developing economies, whereas the prior literature has concentrated on developed economies. The book seeks to understand growth patterns and quantify the role of (among other things) the reallocation of factors, technological change, and the impact of natural disasters, including the COVID-19 pandemic. This book is must-reading for specialists in emerging economies but also provides deep insights for anyone interested in economic growth and productivity. Martin Neil Baily Senior Fellow, The Brookings Institution Former Chair, U.S. President ' s Council of Economic Advisers This is an important book at a critical time. As the book notes, global productivity growth had already been slowing prior to the COVID-19 pandemic and collapses with the pandemic. If we want an effective recovery, we have to understand what was driving these long-run trends. The book presents a novel global approach to examining the levels, growth rates, and drivers of productivity growth. For anyone wanting to understand or influence productivity growth, this is an essential read. Nicholas Bloom William D. Eberle Professor of Economics, Stanford University The COVID-19 pandemic hit a global economy that was already struggling with an adverse pre-existing condition—slow productivity growth. This extraordinarily valuable and timely book brings considerable new evidence that shows the broad-

based, long-standing nature of the slowdown. It is comprehensive, with an exceptional focus on emerging market and developing economies. Importantly, it shows how severe disasters (of which COVID-19 is just the latest) typically harm productivity. There are no silver bullets, but the book suggests sensible strategies to improve growth prospects. John Fernald Schrodgers Chaired Professor of European Competitiveness and Reform and Professor of Economics, INSEAD

Sweden has large and diverse securities markets where services can be easily provided on a cross-border basis. The main exchange, Nasdaq Stockholm, is part of the global Nasdaq group and operates as the hub of Nasdaq 's Nordic operations. Trading in Swedish issuers ' shares is fragmented across European trading venues and over-the-counter (OTC), with Nasdaq Stockholm holding a less than 50 percent market share. Remote members account for more than two-thirds of the value of equity trading on Nasdaq Stockholm. While limited data on the investment fund assets managed and marketed on a cross-border basis is available, the number of foreign investment funds sold in Sweden exceeds the number of domestic funds. Both domestic and foreign firms actively seek to benefit from the passports provided under the European Union (EU) legislation. This emphasizes the importance of robust home country regulation and supervision and requires authorities to be vigilant about potential cross-border spillovers. This complex operating environment poses challenges for Finansinspektionen (FI), particularly for the two areas, Consumer Protection and Markets, that have the primary responsibility for the regulation and supervision of securities markets.

In this major theoretical statement, the author offers a new and provocative interpretation of the institutional transformations associated with modernity. We do not as yet, he argues, live in a post-modern world. Rather the distinctive characteristics of our major social institutions in the closing period of the twentieth century express the emergence of a period of 'high modernity,' in which prior trends are radicalised rather than undermined. A post-modern social universe may eventually come into being, but this as yet lies 'on the other side' of the forms of social and cultural organization which currently dominate world history. In developing an account of the nature of modernity, Giddens concentrates upon analyzing the intersections between trust and risk, and security and danger, in the modern world. Both the trust mechanisms associated with modernity and the distinctive 'risk profile' it produces, he argues, are distinctively different from those characteristic of pre-modern social orders. This book build upon the author's previous theoretical writings, and will be of fundamental interest to anyone concerned with Giddens' overall project. However, the work covers issues which the author has not previously analyzed and extends the scope of his work into areas of pressing practical concern. This book will be essential reading for second year undergraduates and above in sociology, politics, philosophy, and cultural studies.

Low Carbon Development

School improvement in recent years has largely focused on rapid improvement and quick fixes. Yet, genuine and sustainable school improvement is complex, gradual and

incremental. It requires developing a culture and focusing relentlessly on teaching and learning. The Gradual Art of School Improvement is a comprehensive practical guide to school improvement, covering aspects such as improvement planning, staff development, the learning environment, dealing with outside pressures including inspection, curriculum design and the role of leaders at all levels. It includes: Detailed accounts of the steps that can be taken to create a positive learning culture over time Case studies and worked examples, concentrating on the practical aspects of school improvement from the perspective of an experienced and successful head teacher Ready-to-use practitioner resources that readers can adapt and use in their own settings Accessibly written and entertaining, this book is an invaluable resource for leaders at all levels and stages of their career.

Low Carbon Development: Key Issues is the first comprehensive textbook to address the interface between international development and climate change in a carbon constrained world. It discusses the key conceptual, empirical and policy-related issues of low carbon development and takes an international and interdisciplinary approach to the subject by drawing on insights from across the natural sciences and social sciences whilst embedding the discussion in a global context. The first part explores the concept of low carbon development and explains the need for low carbon development in a carbon constrained world. The book then discusses the key issues of socio-economic, political and technological nature for low carbon development, exploring topics such as the political economy, social justice, financing and carbon markets, and technologies and innovation for low carbon development. This is followed by key issues for low carbon development in policy and practice, which is presented based on cross-cutting issues such as low carbon energy, forestry, agriculture and transportation. Afterwards, practical case studies are discussed from low carbon development in low income countries in Africa, middle income countries in Asia and Latin America and high income countries in Europe and North America. Written by an international team of leading academics and practitioners in the field of low carbon development, this book is essential reading for students, academics, professionals and policy-makers interested in the fields of low carbon development,

climate change mitigation, climate policy, climate change and development, global environmental change, and environment and development.

Vacation ownership is becoming a mainstream travel product. Continued growth based on number of units sold and an increasing number of international brands has placed this segment in a very strong position. As the market continues to grow there is an increasing demand for clear and engaging sources of information on the key issues and components of vacation ownership, from both hospitality management students and the public. This book updates hospitality students in this vacation sector, provides the key background information, explanation of the growth, the components to vacation ownership management and an overview of opportunities in vacation ownership management. Timeshare Management provides the understanding of the financing, marketing, sales, management, and human resource issues surrounding the subject - vital to any hospitality and tourism student. * Provides an overview of vacation ownership management by sharing the segment's history, terms, and rules * Offers skills that are necessary for success in this segment *

Establishes best practice examples through a case study format

Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key

Read Book Key Issue 1 Where Are Ethnicities Distributed

forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

This key resource is often referred to as the "Green Book". Federal policymakers and program managers are continually seeking ways to better achieve agencies' missions and program results, in other words, they are seeking ways to improve accountability. A key factor in helping achieve such outcomes and minimize operational problems is to implement appropriate internal control. Effective internal control also helps in managing change to cope with shifting environments and evolving demands and priorities. As programs change and as agencies strive to improve operational processes and implement new technological developments, management must continually assess and evaluate its internal control to assure that the control activities being used are effective and updated when necessary. The Federal Managers' Financial Integrity Act of 1982 (FMFIA) requires the General Accounting Office (GAO) to issue standards for internal control in government. The standards provide the overall framework for establishing and maintaining internal control and for identifying and addressing major performance and management challenges, and areas at greatest risk of fraud, waste, abuse and mismanagement. This report explores the Five Standards for Internal Control as identified by GAO for policymakers and program managers: - Control Environment - Risk Assessment - Control Activities - Information and Communications - Monitoring These standards apply to all aspects of an agency's operations: programmatic, financial, and compliance. However, they are not intended to limit or interfere with duly granted authority related to developing legislation, rule-making, or other discretionary policy-making in an agency. These standards provide a general framework. In implementing these standards, management is responsible for developing the detailed policies, procedures, and practices to fit their agency's operations and to ensure that they are built into and an integral part of operations. Women's employment is one of the most widely-discussed and often-misunderstood issues of modern society. Are women today oppressed, or do they have the best of both worlds? Do women have to go out to work to gain equality with men, or do they already do more than their share of domestic work, caring work and voluntary work as well as work in the informal economy? Do women seek careers on the same terms as men, or are they content

Read Book Key Issue 1 Where Are Ethnicities Distributed

to be dependent wives or secondary earners taking jobs on a short-term basis? How important is job segregation in explaining the 20% pay gap between men and women? Have equal opportunities laws had any real impact? Are women in Europe lagging behind, or are they at the forefront of developments in modern societies? This new updated edition of Catherine Hakim's classic text addresses all the key issues currently debated in relation to women's work - in the domestic sphere, as well as paid employment. Dr Hakim tests the power of patriarchy theory and preference theory against economic theories. Sex discrimination, work-life balance, part-time work, flexible hours, homeworking, career patterns across the life cycle, labour mobility, labour turnover, the returns to education, occupational segregation, the pay gap, the glass ceiling, and the impact of European Union policies are all considered. Analysis of historical developments over the twentieth century, based on censuses, is complemented by case studies of people working in occupations undergoing dramatic change. Throughout the book, comparisons are drawn between the USA, Britain, other European countries, Canada, Australia, and also China, Japan and other Far Eastern societies. The analysis draws on sociology, economics, psychology, labour law, history and social anthropology to conclude that the diversity of women's life goals and lifestyle preferences is increasing. This explains the growing polarisation of women's employment and many contradictory recent research results.

The success of nearly all public- and private-sector policies hinges on the behavior of individuals, groups, and organizations. Today, such behaviors are better understood than ever, thanks to a growing body of practical behavioral science research. However, policymakers often are unaware of behavioral science findings that may help them craft and execute more effective and efficient policies. The pages of this new journal will become a meeting ground: a place where scientists and non-scientists can encounter clearly described behavioral research that can be put into action. By design, the scope of Behavioral Science & Policy is broad, with topics spanning health care, financial decisionmaking, energy and the environment, education and culture, justice and ethics, and work place practices. Contributions will be made by researchers with expertise in psychology, sociology, law, behavioral economics, organization science, decision science, and marketing. The journal is a key offering of the Behavioral Science & Policy Association in partnership with the Brookings Institution. The mission of BSPA is to foster dialog between social scientists, policymakers, and other practitioners in order to promote the application of rigorous empirical behavioral science in ways that serve the public interest. BSPA does not advance a particular agenda or political perspective.

For a growing number of countries in Africa the discovery and exploitation of natural resources is a great opportunity, but one accompanied by considerable risks. This book presents research on how to better manage the revenues and opportunities associated with natural resources.

The oceans provide a great challenge for the development and management of planet earth by humankind. This book covers new approaches to the development of the law of the sea, the division of the oceans among states, and new thinking on institutions in depth.

The United States is among the wealthiest nations in the world, but it is far from the healthiest. Although life expectancy and survival rates in the United States have improved dramatically over the past century, Americans live shorter lives and experience more injuries and illnesses than people in other high-income countries. The U.S. health disadvantage cannot be attributed solely to the adverse health status of racial or ethnic minorities or poor people: even highly advantaged Americans are in worse health than their counterparts in other, "peer" countries. In light of the new and growing evidence about the U.S. health disadvantage, the National Institutes of Health asked the National Research Council (NRC) and the Institute of Medicine (IOM) to convene a panel of experts to study the issue. The Panel on Understanding Cross-National Health Differences Among High-Income Countries examined whether the U.S. health disadvantage exists across the life span, considered potential explanations, and assessed the larger implications of the findings. U.S. Health in International Perspective presents detailed evidence on the issue, explores the possible explanations for the shorter and less healthy lives of Americans than those of people in comparable countries, and recommends actions by both government and nongovernment agencies and organizations to address the U.S. health disadvantage.

Interface Theology is a biannual refereed journal of theology published in print, epub and open access by ATF Press in Australia. The journal is a scholarly ecumenical and interdisciplinary publication, aiming to serve the church and its mission, promoting a broad based interpretation of Christian theology within a trinitarian context, encouraging dialogue between Christianity and other faiths, and exploring the interface between faith and culture. It is published in English for an international audience.

The Key Issues for Hospitality Managers

World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel

Read Book Key Issue 1 Where Are Ethnicities Distributed

and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

Since the 1980s, the language used around market-based government has muddied its meaning and polarized its proponents and critics, making the topic politicized and controversial. *Competition, Choice, and Incentives in Government Programs* hopes to reframe competing views of market-based government so it is seen not as an ideology but rather as a fact-based set of approaches for managing government services and programs more efficiently and effectively.

Clinics in Developmental Medicine No. 179 The complex nature of the postural control system makes it vulnerable to adverse conditions during early life, such as prenatally or perinatally acquired lesions of the brain or preterm birth. Children with disorders of the developing brain nearly always have dysfunctions in postural control. The postural control system of children with other neurodevelopmental disabilities such as myelomeningocele or muscle disease is also challenged: it has to find age-specific solutions for the postural problems posed by the disorder. These postural problems have serious consequences for the activities of daily life, as adequate postural control is a prerequisite for adequate motility. Until now, knowledge about the nature of postural problems in children has been scattered, and this has hampered the development of appropriate therapeutic management strategies. This book is a breakthrough in that it introduces the reader to the complexity of typical and atypical postural development and provides suggestions for the day-to-day management of postural problems in children with developmental disorders such as cerebral palsy, developmental coordination disorder, muscle disorder and myelomeningocele. “This should be a ‘must read’ for anyone whose occupation or interests are in the areas of motor development or rehabilitation” Diane Damiano.

Managing Heritage in Africa provides a wide-ranging, up-to-date synthesis of heritage management practice in Africa,

covering a broad spectrum of heritage issues such as archaeology, living traditions, sacred sites, heritage of pain (slavery), international conventions cultural landscapes, heritage in conflict areas and heritage versus development. Dealing with both intangible and tangible heritage, *Managing Heritage in Africa* gives an informative insight into some of the major issues and approaches to contemporary heritage management in Africa and situates the challenges facing heritage practitioners.

One of our deepest needs is for a sense of identity and belonging. A common feature in this is human attachment to landscape and how we find identity in landscape and place. The late 1980s and early 1990s saw a remarkable flowering of interest in, and understanding of, cultural landscapes. With these came a challenge to the 1960s and 1970s concept of heritage concentrating on great monuments and archaeological locations, famous architectural ensembles, or historic sites with connections to the rich and famous. *Managing Cultural Landscapes* explores the latest thought in landscape and place by: airing critical discussion of key issues in cultural landscapes through accessible accounts of how the concept of cultural landscape applies in diverse contexts across the globe and is inextricably tied to notions of living history where landscape itself is a rich social history record widening the notion that landscape only involves rural settings to embrace historic urban landscapes/townscapes examining critical issues of identity, maintenance of traditional skills and knowledge bases in the face of globalization, and new technologies fostering international debate with interdisciplinary appeal to provide a critical text for academics, students, practitioners, and informed community organizations discussing how the cultural landscape concept can be a useful management tool relative to current issues and challenges. With contributions from an international group of authors, *Managing Cultural Landscapes* provides an examination of the management of heritage values of cultural landscapes from Australia, Japan, China, USA, Canada, Thailand, Indonesia, Pacific Islands, India and the Philippines; it reviews critically the factors behind the removal of Dresden and its cultural landscape from World Heritage listing and gives an overview of Historic Urban Landscape thinking.

Aspasia is an international peer-reviewed yearbook that brings out the best scholarship in the field of interdisciplinary women's and gender history focused on - and produced in - Central, Eastern, and Southeastern Europe. In this region the field of women's and gender history has developed unevenly and has remained only marginally represented in the "international" canon.
