*Students will be prepared on test day with MOSBY'S QUESTIONS AND ANSWERS FOR NCLEX-PN®. This comprehensive review manual covers the core clinical areas: medical-surgical, maternal/child, and psychiatric/mental health nursing. Each question is updated to reflect current practice and includes rationales for correct and incorrect options. A free disk with over 100 additional questions simulates the NCLEX-PN, giving students the confidence needed to pass the Boards. \* Approximately 2,000 questions provide extensive practice and review. \* Review questions are grouped by subtopic for the specific clinical area, while the two comprehensive exams are integrated. \* Rationales of all options for each question reinforce learning and clarify misconceptions. \* All questions are presented in the stand-alone format that will be used on the NCLEX-PN to familiarize students with the kind of questions they will encounter on the Boards. \* All questions are coded for nursing process, client need, cognitive level, and level of difficulty, so students can evaluate specific strengths and weaknesses. \* Contains a free disk with over 100 additional questions. **supports the death penalty, that half of all marriages end in divorce, and that four out of five prefer a particular brand of toothpaste. But remarkably, such data--now woven into our social fabric--became common currency only in the last century. With a bold and sophisticated analysis, Sarah Igo demonstrates the power of scientific surveys to shape Americans' sense of themselves as individuals, members of communities, and citizens of a nation.**

**The implementation of technological tools in classroom settings provides significant enhancements to the learning process. When utilized properly, students can achieve better knowledge and understanding. Multiculturalism and Technology-Enhanced Language Learning is a critical source of research for the latest perspectives on the intersection of cross-cultural studies and technology in foreign language learning classrooms. Highlighting pertinent topics across a range of relevant coverage, such as mobile learning, game-based learning, and distance education, this book is ideally designed for educators, researchers, academics, linguists, and upper-level students interested in the latest innovations for language education.**

This upper-level textbook offers an original and up-to-date introduction to issues in corporate social responsibility (CSR) from a global perspective. Written by an international team of experts, it guides students through key themes in CSR including strategy, communication, regulation and governance. Balancing critiques of CSR with a discussion of the opportunities it creates, it includes chapters devoted to critical issues such as human rights, anti-corruption, labour rights and the environment. Pedagogical features include customised case studies, study questions, key term highlighting, practitioner pieces and suggestions for further resources. The book is also complemented by a companion website featuring adaptable lecture slides, teaching notes for cases and links to related resources. Tailored for upper-level undergraduate and postgraduate courses on corporate social responsibility, sustainability and business ethics, it is also relevant to non-business courses in political science, international relations and communications.

The three-volume set LNCS 9186, 9187, and 9188 constitutes the proceedings of the 4th International Conference on Design, User Experience, and Usability, DUXU 2015, held as part of the 17th International Conference on Human-Computer Interaction, HCI 2015, in Los Angeles, CA, USA, in August 2015, jointly with 13 other thematically similar conferences. The total of 1462 papers and 246 posters presented at the HCI 2015 conferences were carefully reviewed and selected from 4843 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of Human-Computer Interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 132 contributions included in the DUXU proceedings were carefully reviewed and selected for inclusion in this three-volume set. The 61 papers included in this volume are organized in topical sections on design thinking, user experience design and usability methods and tools, DUXU management and practice, emotional and persuasion design, and storytelling, narrative and fiction in DUXU.

**Brazil's leadership role in the fight against HIV has brought its public health system widespread praise. But the nation still faces serious health challenges and inequities. Though home to the world's second largest African-descendant population, Brazil failed to address many of its public health issues that disproportionately impact Afro-Brazilian women and men. Kia Lilly Caldwell draws on twenty years of engagement with activists, issues, and policy initiatives to document how the country's feminist health movement and black women's movement have fought for much-needed changes in women's health. Merging ethnography with a historical analysis of policies and programs, Caldwell offers a close examination of institutional and structural factors that have impacted the quest for gender and racial health equity in Brazil. As she shows, activists have played an essential role in policy development in areas ranging from maternal mortality to female sterilization. Caldwell's insightful portrait of the public health system also details how its weaknesses contribute to ongoing failures and challenges while also imperiling the advances that have been made.**

**Ethics in Psychological Research is a brief, practical guide for student researchers and their mentors to answer ethical questions and navigate issues of institutional policies and academic freedom. Authors Daniel P. Corts and Holly E. Tatum guide readers in identifying, preventing, mitigating, and resolving ethical issues in research using a unique ethical framework. Each of the standalone chapters provide real-life examples of ethical questions, a description of scholarly work on the matter, and suggestions for how to address similar problems should they arise in the researcher's own work. The book makes for a succinct and easy-to-use reference for any student conducting research in the behavioral sciences.**

Collaborative Statistics is intended for introductory statistics courses being taken by students at two- and four-year colleges who are majoring in fields other than math or engineering. Intermediate algebra is the only prerequisite. The book focuses on applications of statistical knowledge rather than the theory behind it. Barbara Illowsky and Susan Dean are professors of mathematics and statistics at De Anza College in Cupertino, CA. They present nationally on integrating technology, distance learning, collaborative learning, and multiculturalism into the elementary statistics classroom.
