In 1997, former U.S. Marine sniper Craig Robers, a seasoned veteran of the Vietnam war, stood for the first time at the 6th floor “sniper’s nest” window of the Texas School Book Depository. As he looked down into what the U.S. Government maintains was the kill zone used by Lee Harvey

Why? Because Roberts, a combat experienced marksman, knew that he could not have duplicated Oswald's supposed feat--even if armed with the much more modern sniper rifle he used with devastating accuracy in Vietnam. At that moment, Roberts, a 20 year veteran police officer, investigator, and recognized authority on sniping, began an investigation that would last six years, take him into the shadow world of clandestine intelligence operations--and beyond--to discover the existence of a sinister organization that resides far above the CIA, KGB, the Mafia, and even government itself. *Danger in the Comfort Zone examines the phenomenon of the "entitlement" mentality in the American workforce -- people's preoccupation with their rewards rather than their responsibilities. Bardwick describes three basic mindsets and shows the effect of each on individuals and their organizations: * Entitlement -- people feel entitled to rewards and lethargic about having to earn them; motivation and job satisfaction are low * Fear -- people are paralyzed; the threat of layoffs makes them focus on protecting their jobs rather than doing them well * Earning -- people are energized by challenge; they know their accomplishments will be noticed --*

Vietnamese were everywhere, on the roads and in the camp. They were in places I thought would be taboo on a military base. #3 I was assigned to the supply sergeant for my equipment. He gave me two sets of jungle fatigues,

One of his most popular lectures, is titled "Surviving Inside the Kill Zone." He has often been asked the question, "When are you going to put this in a book?" That question is now answered. In the brutal arena of life and death combat, there are things that you can do and things you can't. There are also things you should always do and there are things you should never do. And the right things that you are able to do in combat are the ones that will enable you to survive a deadly attack. Emerson always starts this lecture with the

question; "How many first responders are in this room?" There are always several police, firemen, or paramedics in the audience who raise their hands. And then the lecture starts. In this book you will learn the principles, concepts, strategies, and tactics behind the training methods Ernest Emerson has been teaching to members of Special Operations Units, Government Agencies, and Counter-terrorist Units for over two decades. The book breaks down the subject into seven related but distinct chapters that starts with Education, stressing the importance of learning strategies, tactics, weapons, and methodologies of the bad guys. Emerson then follows with

a further exploration and recommendation for choosing the right weapons, how to judge a training system, and how to identify what you really need to know and how to learn it. Emerson explains why half of what you know, won't work in combat and only about half of what really works in combat is what you'll actually be able to do. That only leaves about 25% combat effectiveness, when you're up against someone is who trying to take your life. This book gives you the tools that make that 25% and make it more effective and powerful than the other 75% left behind. The book introduces you to the rules of combat, the important role of goals and the right strategic

objectives and how to apply them to both training and combat. Emerson provides valuable insight into the predator/prey relationship and how you can use it to work against a predator and effectively take you off their radar as a potential prey. Learn how to identify and break the sequence of events that leads to a surprise attack. Mr. Emerson also teaches the CIA maxim of Detect, Deny, Destroy, and explains how a system that works so well for their officers can be used to work just as well for you. Knowing that the physical battle is only part of any aggressive or violent confrontation, Emerson devotes an entire chapter to the Warrior Mindset and also the

importance of the Will in developing the absolute conviction that you will never quit and never, ever give up, using the same techniques as taught to U.S. Navy SEALs. There is also very valuable information on developing the Mental Trigger, material that until now has never been covered in any other civilian source. And you will learn how functional conditioning and strength play a vital role in your ability to fight and prevail against the attacker. Combat strength conditioning is explained in terms that allow you to reevaluate your training regimen and fine tune it for optimum combat performance.
