Hergé created only twenty-four Tintin books which have been translated into more than seventy languages and sold 230 million copies worldwide. The Real Hergé: The Inspiration Behind Tintin takes an in-depth look at the man behind the cultural phenomenon and the history that helped shape these books. As well as focussing on the controversies that engulfed Hergé, this biography will also look at his personal life, as well as the relationships and experiences that influenced him. This is the first time that an Air Chief is sharing his

thoughts and memories with the reading public. His span of service covers a period of thirty-three years: from the end of 1939 to the beginning of 1973. It includes the Burma campaign of World War II, the restricted fighting in Kashmir in 1947 and 1948, the Chinese debacle in 1962 and the two full scale wars with Pakistan in 1965 and 1971. He had 4,274 hrs of flying with the Air Force to his credit and the experience of flying 58 types of aircraft from Wapitis to supersonic jets. In 1965 he was the Vice Chief of Air Staff and in 1971 the Chief. His honesty and forthrightness many readers will find engaging& but perhaps a few who were on the scene then may find

them unpalatable. In a way this is the story of aviation in India, in particular of the Indian Air Force. It is a story of a real life adventure the genesis, growth and achievements of the youngest of the three defence services. Sir Winstom Churchill said of the RAF: Never before in the history of human conflict was so much owed by so many to so few. That is true also of the Indian Air Force. Though this does not purport to be a history of the Indian Air Force without it no history would be complete.

The Geek Gap is thoroughly original, virtually unique, of paramount importance and, on top of ALL that, a 'great read.' Bill Pflieger and Minda Zetlin deserve a giant 'Hats off' for this wonderful piece of work. --Tom PetersBusiness managers (suits) and technology professionals (geeks) have become warring camps in too many companies. While both

groups have no trouble following the lingo of their own specialties, when they have to communicate with each other, neither side fully understands-or wants to understand-the other. And that's a big problem in an increasingly technology-dependent business environment where success depends on the smooth integration of both business savvy and technological expertise. Bill Pflieger-a respected computer and Web consultant-and Minda Zetlin-a veteran business writer-explore, in this insightful, witty, and very instructive book, the culture clash that pervades nearly every business-technology interaction. The Geek Gap provides members of both camps a practical guide to working together effectively. Using many real-world

examples, the authors vividly illustrate the consequences in time, money, careers, and even lives when these separate cultures fail to communicate. By far the most serious example was the Challenger space shuttle disaster, which was likely the direct result of an internal clash and lack of communication between NASA's managers and engineers. The authors provide practical solutions for building trust between business and computer professionals. The book is filled with tips aimed at geeks and suits to help each group understand the other, communicate in what amounts to a foreign language, and get what they need to do their jobs effectively. The author profile companies and individual executives who have

successfully bridged the gap by conducting events that bring the two groups together, switching jobs from one area to the other, creating whole new careers as go-betweens, and much, much more. This is the first book to directly address issues of communication and understanding between business and technology people. The Geek Gap-in identifying this problem and providing numerous practical and workable solutions-is an indispensable guide for all. Ambition will fuel him. Competition will drive him. But power has its price. It is the morning of the reaping that will kick off the tenth annual Hunger Games. In the Capitol, eighteen-year-old Coriolanus Snow is preparing for his one shot at glory as a mentor in the Games. The once-mighty house of Snow has fallen on hard times, its fate hanging on the slender chance that Coriolanus will be able to outcharm, outwit, and outmaneuver his

fellow students to mentor the winning tribute. The odds are against him. He's been given the humiliating assignment of mentoring the female tribute from District 12, the lowest of the low. Their fates are now completely intertwined - every choice Coriolanus makes could lead to favor or failure, triumph or ruin. Inside the arena, it will be a fight to the death. Outside the arena, Coriolanus starts to feel for his doomed tribute . . . and must weigh his need to follow the rules against his desire to survive no matter what it takes.

"Nineteen Eighty-Four: A Novel", often published as "1984", is a dystopian social science fiction novel by English novelist George Orwell. It was published on 8 June 1949 by Secker & Warburg as Orwell's ninth and final book completed in his lifetime.

Thematically, "Nineteen Eighty-Four" centres on the consequences of totalitarianism, mass surveillance, and repressive regimentation of persons and behaviours within society. Orwell, himself a democratic socialist, modelled the authoritarian government in the novel after Stalinist Russia. More broadly, the novel examines the role of truth and facts within politics and the ways in which they are

manipulated. The story takes place in an imagined future, the year 1984, when much of the world has fallen victim to perpetual war, omnipresent government surveillance, historical negationism, and propaganda. Great Britain, known as Airstrip One, has become a province of a totalitarian superstate named Oceania that is ruled by the Party who employ the Thought Police to persecute individuality and independent thinking. Big Brother, the leader of the Party, enjoys an intense cult of personality despite the fact that he may not even exist. The protagonist, Winston Smith, is a diligent and skillful rank-and-file worker and Outer Party member who

Cruising the Queensland Coast is a cruising guide for yachts cruising the Queensland coast. Each of the 13 coasts, from the Gold Coast to the Cooktown Coast, is covered in detail, including marinas, anchorages, passages, wind and wave averages, public pontoons and quick reference information and links for vital weather, search and rescue, notices to mariners and other vital information. It features hundreds of chartlets and high-resolution aerial photos of anchorages to take the guesswork out of anchoring. Each anchorage has information on depth, bottom, mobile reception, marine park zone and recommended wind directions and strengths. The book is also integrated with Navionics and C-Map. Anchorages and passages can be imported into Navionics
