Over the past two decades theorists and researchers have given increasing attention to the effects, both beneficial and harmful, of various control related motivations and beliefs. People's notions of how much personal control they have or desire to have over important events in their lives have been used to explain a host of performance and adaptational outcomes, including motivational and performance deficits associated with learned helplessness (Abramson, Seligman, & Teasdale, 1978) and depression (Abramson, Metalsky, & Alloy, 1989), adaptation to aging (Baltes & Baltes, 1986; Rodin, 1986), cardiovascular disease (Matthews, 1982), cancer (Sklar & Anisman, 1979), increased reports of physical symptoms (Pennebaker, 1982), enhanced learning (Savage, Perlmutter, & Monty, 1979), achievement-related behaviors (Dweck & Licht, 1980; Ryckman, 1979), and post abortion adjustment (Mueller & Major, 1989). The notion that control motivation plays a fundamental role in a variety of basic, social psychological processes also has a long historical tradition. A number of theorists (Heider, 1958; Jones & Davis, 1965; Kelley, 1967), for example, have suggested that causal inferences arise from a desire to render the social world predictable and controllable. Similarly, control has been implicated as an important mediator of cognitive dissonance (Wicklund & Brehm, 1976) and attitude phenomena (Brehm & Brehm, 1981; Kiesler, Collins, & Miller, 1969). Despite the apparent centrality of control motivation to a variety of social psychological phenomena, until recently there has been relatively little research explicitly concerned with the effects of control motivation on the cognitive processes underlying such phenomena (cf.

The cinema of Nigeria is often referred to as Nollywood, a term coined in the mid-1990s to describe Nigeria's vibrant, film industry consisting of movies produced in the country but watched all over Africa and largely by Africans in the diaspora. This book presents a selection of photographic portraits by Iké Udé depicting some of the major Nigerian actors and actresses, television presenters, directors, and producers. With his ongoing photographic self-portraits, Nigerian-born Iké Udé explores a world of dualities: photographer/performance artist, artist/spectator, mainstream/marginal, African/postnationalist, individual/everyman, and fashion/art. As a Nigerian-born, New York-based artist conversant with the world of fashion and celebrity, Udé gives conceptual aspects of performance and representation a new vitality, melding his own theatrical selves and multiple personae with his art.

"A lyrical and understanding chronicler of people who somehow become displaced within their own lives.Mr. Lindsay-Abaire has shown a special affinity for female characters suddenly forced to re-evaluate the roles by which they define themselves."—New York Times Set in the Bristol Place Assisted Living Facility, this glorious and biting new comedy from David Lindsay-Abaire centers around Abby, who takes pride in her residence in one of the most coveted rooms in the rest home. Things turn sour quickly when she must take in Marilyn, a new roommate to share her precious space. In a satirical conflict of territory and control, Lindsay-Abaire spins a benign, typically mundane setting into an absurdist, colorful battleground. This high-stakes comedy examines our expectations of what it means to grow old in twenty-first century America, and what happens when a sense of possession collides with a mania of obsession. David Lindsay-Abaire's plays include Good People, Fuddy Meers, Kimberly Akimbo, Wonder of the World, High Fidelity, A Devil Inside, and Rabbit Hole, winner of the 2007 Pulitzer Prize for Drama. Lindsay-Abaire wrote the book for Shrek the Musical, and the screen adaptation of Rabbit Hole starring Nicole Kidman. Lindsay-Abaire is a proud New Dramatists alum, a graduate of Sarah Lawrence College and the Juilliard School, as well as a member of the WGA and the Dramatists Guild Council.

Status is ubiquitous in modern life, yet our understanding of its role as a driver of inequality is limited. In Status, sociologist and social psychologist Cecilia Ridgeway examines how this ancient and universal form of inequality influences today's ostensibly meritocratic institutions and why it matters. Ridgeway illuminates the complex ways in which status affects human interactions as we work together towards common goals, such as in classroom discussions, family decisions, or workplace deliberations. Ridgeway's research on status has important implications for our understanding of social inequality. Distinct from power or wealth, status is prized because it provides affirmation from others and affords access to valuable resources. Ridgeway demonstrates how the conferral of status inevitably contributes to differing life outcomes for individuals, with impacts on pay, wealth creation, and health and wellbeing. Status beliefs are widely held views about who is better in society than others in terms of esteem, wealth, or competence. These beliefs confer advantages which can exacerbate social inequality. Ridgeway notes that status advantages based on race, gender, and class—such as the belief that white men are more competent than others—are the most likely to increase inequality by facilitating greater social and economic opportunities. Ridgeway argues that status beliefs greatly enhance higher status groups' ability to maintain their advantages in resources and access to positions of power and make lower status groups less likely to challenge the status quo. Many lower status people will accept their lower status when given a baseline level of dignity and respect—being seen, for example, as poor but hardworking. She also shows that people remain willfully blind to status beliefs and their effects because recognizing them can lead to emotional discomfort. Acknowledging the insidious role of status in our lives would require many higher-status individuals to accept that they may not have succeeded based on their own merit; many lower-status individuals would have to acknowledge that they may have been discriminated against. Ridgeway suggests that inequality need not be an inevitable consequence of our status beliefs. She shows how status beliefs can be subverted—as when we reject the idea that all racial and gender traits are fixed at birth, thus refuting the idea that women and people of color are less competent than their male and white counterparts. This important new book demonstrates the pervasive influence of status on social inequality and suggests ways to ensure that it has a less detrimental impact on our lives.

I Will Survive is the story of Gloria Gaynor, America's "Queen of Disco." It is the story of riches and fame, despair, and finally salvation. Her meteoric rise to stardom in the mid-1970s was nothing short of phenomenal, and hits poured forth that pushed her to the top of the charts, including "Honey Bee," "I Got You Under My Skin," "Never Can Say Goodbye," and the song that has immortalized her, "I Will Survive," which became a #1 international gold seller. With that song, Gloria heralded the international rise of disco that became synonymous with a way of life in the fast lane - the sweaty bodies at Studio 54, the lines of cocaine, the indescribable feeling that you could always be at the top of your game and never come down. But down she came after her early stardom, and problems followed in the wake, including the death of her mother, whose love had anchored the young singer, as well as constant battles with weight, drugs, and alcohol. While her fans always imagined her to be rich, her personal finances collapsed due to poor management; and while many envied her, she felt completely empty inside. In the early 1980s, sustained by her marriage to music publisher Linwood Simon, Gloria took three years off and reflected upon her life. She visited churches and revisited her mother's old

Bible. Discovering the world of gospel, she made a commitment to Christ that sustains her to this day.

Occupational Science: The Evolving Discipline presents the most current and comprehensive information on the development of occupational science. This exciting resource offers stimulating ideas about occupation and its implications for health and occupational therapy practice. The papers in this book, most of which are from presentations at the Occupational Science Symposia, reflect an extensive range of perspectives. Presentations by Stephen Hawking, Jane Goodall, and Mary Catherine Bateson are included, as well as other invited and peer-reviewed presentations. In these papers, experienced scholars share their ideas, hypotheses, and preliminary research, tying together the theory behind the study of occupational science. Each section of the book begins with a detailed introduction in which Zemke and Clark describe the relationship of each paper to the study of occupational science. This unique text provides an understanding of occupation that will give therapists a heightened concern for those activities in which their patients invest their energies and time, a better understanding of how participation in occupation shapes self-identity, a way to identify the motivating factors for participation in occupation, and knowledge of how patients can enhance their life opportunities.

This book presents both the challenges and opportunities that exist for addressing the critical needs of black children, who have been historically underserved in the U.S. education system.

*A healthy relationship based on mutual trust is every parent's wish. The bond between infant and parent is a natural phenomenon, but as children reach their preteens and form their own personalities, fireworks between the child and parent can ensue. Drawing on 20 years of clinical experience and new theories on attachment, family therapist and consultant to Parents magazine Dr. Fran Walfish argues that parents need to distinguish their own personality types in order to make more informed decisions about how they interact and raise their own children. This step-by-step guide shows parents:
\* how to recognize the strength and weaknesses of your parenting style and how it affects your child;
\* the ways your style might clash with your child's nature, and how to negotiate a common ground;
\* the vital importance of establishing trust with a preteen to better prepare for turbulent teen years. Written with warmth, authority, and wit, Dr. Walfish holds a gentle mirror up to parents and helps them understand themselves in order to create a closer relationship with their child.*

*A son learns more about his father than he ever could have imagined when a mysterious piece of art is unexpectedly restored to him After receiving an unexpected call from the Australian consulate, Matt Santos becomes aware of a painting that he believes was looted from his family in Hungary during the Second World War. To recover the painting, he must repair his strained relationship with his harshly judgmental father, uncover his family history, and restore his connection to his own Judaism. Along the way to illuminating the mysteries of his past, Matt is torn between his doting girlfriend, Tracy, and his alluring attorney, Rachel, with whom he travels to Budapest to unearth the truth about the painting and, in turn, his family. As his journey progresses, Matt's revelations are accompanied by equally consuming and imaginative meditations on the painting and the painter at the center of his personal drama, Budapest Street Scene by Ervin Kálmán. By the time Memento Park reaches its conclusion, Matt's narrative is as much about family history and father-son dynamics as it is about the nature of art itself, and the infinite ways we come to understand ourselves through it. Of all the questions asked by Mark Sarvas's Memento Park—about family and identity, about art and history—a central, unanswerable predicament lingers: How do we move forward when the past looms unreasonably large?*

**Despite the global endorsement of the Sustainable Development Goals, environmental justice struggles are growing all over the world. These struggles are not isolated injustices, but symptoms of interlocking forms of oppression that privilege the few while inflicting misery on the many and threatening ecological collapse. This handbook offers critical perspectives on the multi-dimensional, intersectional nature of environmental injustice and the cross-cutting forms of oppression that unite and divide these struggles, including gender, race, poverty, and indigeneity. The work sheds new light on the often-neglected social dimension of sustainability and its relationship to human rights and environmental justice. Using a variety of legal frameworks and case studies from around the world, this volume illustrates the importance of overcoming the fragmentation of these legal frameworks and social movements in order to develop holistic solutions that promote justice and protect the planet's ecosystems at a time of intensifying economic and ecological crisis.**

**What does it mean to "act black" or "act white"? Is race merely a matter of phenotype, or does it come from the inflection of a person's speech, the clothes in her closet, how she chooses to spend her time and with whom she chooses to spend it? What does it mean to be "really" black, and who gets to make that judgment? In *Acting White?*, leading scholars of race and the law Devon Carbado and Mitu Gulati argue that, in spite of decades of racial progress and the pervasiveness of multicultural rhetoric, racial judgments are often based not just on skin color, but on how a person conforms to behavior stereotypically associated with a certain race. Specifically, racial minorities are judged on how they "perform" their race. This performance pervades every aspect of their daily life, whether it's the clothes they wear, the way they style their hair, the institutions with which they affiliate, their racial politics, the people they befriend, date or marry, where they live, how they speak, and their outward mannerisms and demeanor. Employing these cues, decision-makers decide not simply whether a person is black but the degree to which she or he is so. Relying on numerous examples from the workplace, higher education, and police interactions, the authors demonstrate that, for African Americans, the costs of "acting black" are high, and so are the pressures to "act white." But, as the authors point out, "acting white" has costs as well. Provocative yet never doctrinaire, *Acting White?* will boldly challenge your assumptions and make you think about racial prejudice from a fresh vantage point.**

**The author has written a detailed and interesting account of the evolution and types of paper available to artists in England from the Renaissance to the early nineteenth century. The first chapter provides the basic information needed to understand hand papermaking and discusses each of the paper types. The second chapter introduces the three major types of paper produced: white, brown, and blue. The third focuses on new products, especially papers for printing and drawing. The last chapter explores the influx of new artists' paper that occurred around the year 1800. This second expanded and revised edition has 100 additional pages of text and 100 new illustrations.**
