This is an essential text for primary trainees and teachers. While the focus in early reading is on systematic synthetic phonics, it is important to see the bigger picture and understand that teaching reading is a continuum that involves more much than the mechanics of reading. The book focuses on a range of issues to develop children who can read into children who do read, including extending reading with proficient readers, engaging disengaged readers, sustaining interest in the transition from primary to secondary, and the importance of oracy in reading. Additionally, there is an exploration of the wider context of reading including international perspectives, new literacies and the importance of reading to personal development. Case studies and activities demonstrate practical applications with clear links to the underpinning theory, while critical reflections challenge the reader and encourage deeper thought about the chapter content.

When learning to teach, practical experience in the classroom is essential as is learning from others and being able to reflect on your own learning and performance. Equally important is the ability to critically evaluate learning and teaching. In fact, in teacher training, the questions are just as important as the answers: What drives schools and what challenges them? What can we learn from other countries? Does curriculum really matter? How do teachers manage behaviour? How do I prove that my children are learning? What does mastery really look like? This new, extensive, core text from Learning Matters tackles these questions and more. It includes full coverage of the content of professional studies modules and goes beyond to support trainees on placements and in their learning on the course.
