Symposium on the reclamation of lands disturbed by surface mining

Surface mining for coal in Appalachia has generated opposition because rock and dirt from mountaintops is removed and placed in valleys and streams. The Office of Surface Mining Reclamation and Enforcement (OSM) and states regulate these mines. Mine operators must provide financial assurances to allow mines to be reclaimed. This report examined: (1) the approaches OSM and the states have taken to obtain financial assurances for surface coal mines with valley fills; (2)

fed. and state agencies' monitoring of these mines after reclamation and mitigation are complete; and (3) the fed. laws agencies may use, and have used, to address latent environ. problems. The report gathered info. from agencies in KY, TN, VA, and WV. Illus. This is a print on demand report.

The book provides a critical review of fatal injuries and safety data occurring in the coal mining industry since 1900. Excellent charts and graphs are used to magnify and place special emphasis on safety data from 1982 through 2001. A list of disasters that occurred from 1900 - 2001 are included which reflect the tragic past of the coal mining industry. The book provides an individual summary describing each of the fatal
