*Science of Logic is the work in which Georg Wilhelm Friedrich Hegel outlined his vision of logic. For Hegel, in which Hegel, the most important achievement of German idealism, starting with Immanuel Kant and culminating in his own philosophy, was the argument that reality is shaped through and through by thought and is, in a strong sense, identical to thought. Thus ultimately the structures of thought and being, subject and object, are identical. Since for Hegel the underlying structure of all of reality is ultimately rational, logic is not merely about reasoning or argument but rather is also the rational, structural core of all of reality and every dimension of it. Thus Hegel's Science of Logic includes among other things analyses of being, nothingness, becoming, existence, reality, essence, reflection, concept, and method. As developed, it included the fullest description of his dialectic.*

*Lawrence Venuti, winner of a Guggenheim fellowship and the Global Humanities Translation Prize, among many other awards, has translated into English these Italian Gothic tales of obsessive love, mysterious phobias, and the hellish curse of everlasting life. In this collection of nine eerie stories, Iginio Ugo Tarchetti switches effortlessly between the macabre and the breezily comical. Set in nineteenth-century Italy, his characters court spirits and blend in with the undead: passionate romances filled with jealousy and devotion are fueled by magic elixirs. Time becomes fluid as characters travel between centuries, chasing affairs that never quite prosper. First published by Mercury House in 1992.*

Talent Level 2 Student's Book

Take a journey through the world's most romantic city, traveling from color to magnificent color with this beguiling book. An orange caft® chair, bright blue bicycles against a fence, a weathered white door-Nichole Robertson's sumptuous photographs of the distinctive details of Paris, all arranged by color, evoke a sense of serendipitous discovery and celebrate the city as never before. At once a work of art and a window into the heart of the city, Paris in Color will surprise and delight those who love art, design, color, and, of course, Paris!

Every learner has the potential to achieve great things. Talent helps unlock that potential. Talent offers a combination of language, life and academic skills and fresh, contemporary topics, preparing students for further study, travel or work; wherever their talent may take them! With videos filmed on the streets of London, and contemporary topics like antibiotic resistance and space archaeology, Talent is sure to spark students' interest and promote academic debate. Exam-style exercises and topics help students prepare for a range of international exams, including IGCSE and Cambridge exams.
