

La Nueva Riqueza De Las Naciones

Este pequeño libro ambicioso intenta articular una visión integral de Centroamérica. La historia material y espiritual, que habla de las cifras de la economía y sus ciclos, pero asimismo de los anhelos y los conceptos básicos, de los poemas y las construcciones imaginarias de los centroamericanos y que pretende explicar un proceso social particular, pero ambiciona también seguir los cambios políticos profundos y adaptaciones de los centroamericanos a los cambios del poder externo, sus revoluciones y las más típicas evoluciones, desde la antigüedad hasta las vicisitudes del imperialismo estadounidense, de que ha sido teatro el istmo durante el último siglo, pasando por los conflictos imperiales entre España e Inglaterra en la era colonial, y entre Inglaterra y EUA en el siglo XIX. Esta obra tiene pues lagunas, olvidos necesarios. Pero quizás también un mérito: más que otras obras parecidas consigue demostrar cómo en la era colonial se integró una economía y sociedad que imantaron una discusión pública centroamericana.

Gary Hamel, world-renowned business thinker and coauthor of Competing for the Future, the book that set the management agenda for the 1990s, now delivers an agenda for the twenty-first century with the national bestseller, Leading the Revolution. Fully revised with a new introduction, this book provides an action plan for any company or individual intent on becoming and staying an industry revolutionary. Hamel argues that to thrive in the age of revolution, companies must adopt a radical new innovation agenda. The fundamental challenge companies face is reinventing themselves and their industries not just in times of crisis—but continually. Beautifully illustrated with more than 100 full-color photos and drawings, Hamel’s Leading the Revolution is an action plan (indeed, an incendiary device) for any company or individual intent on becoming and staying an industry revolutionary. Based on experiences of world-class companies, including Charles Schwab, Cisco, Virgin, and GE Capital, Leading the Revolution explains the underlying principles of radical innovation, explores where revolutionary new business concepts come from, and identifies the key design criteria for building companies that are activist friendly. It will show companies how to avoid becoming “one-vision wonders”; harness the imagination of every employee; develop new financial measures that focus on creating new wealth; and create vibrant internal markets for ideas, capital, and talent. Drawing on the examples of activists who profoundly changed their companies with their bare hearts, Hamel outlines the practical steps anyone can take to lead a successful revolution in their own firm.

Information value and quality can be considered an essential factor to evaluate both conceptual and practical contributions in organizational, technical, and scientific tasks and projects. It is important to effectively observe and implement these concepts in real organizational plans and efforts. Rethinking the Conceptual Base for New Practical Applications in Information Value and Quality discusses the re-evaluation of the conceptual base of information value and quality found in different forms of media; and how these concepts can be analyzed in real applications and business scenarios. This book is a vital reference source for scholars, practitioners, IT specialists, and students interested in information and knowledge management.

One of the most powerful tools available to an organization is its ability to create, maintain, and share knowledge and information vital to the success of the organization. From Manufacture to Mindfacture: A Relational Viable Systems Theory explores the concept of the organizational structure through the lens of the viable systems approach. Focusing particularly on human interaction and collaboration within a business setting, this research-based publication is ideally designed for use by business managers, social theorists, upper-level students, and researchers.

A Belgian banker and major force behind the creation of the Euro as a unified currency for Western Europe presents a clear-sighted, intellectually challenging, inspirational, and controversial analysis of how and why society depends on money--that "thing" that affects every aspect of life for the individual as well as society.

Hay algo que desconoces y limita tu riqueza Rica Mente es algo más que una forma de pensamiento positivo, es SER, SABER, CREER. Tu mente puede crear cualquier cosa: pobreza o riqueza. Elige el nivel de tus finanzas. Los ricos piensan diferentes, por eso consiguen resultados diferentes. Únete al club de las mentes libres, sabias y ricas. Con la lectura de este libro pretendo crear en ti una mentalidad de valores positivos que te permitan percibir tu vida desde la abundancia y no desde la carencia. Te enseñaré a darle la vuelta a la actitud mental, y pasarla de negativa a positiva para poder apreciar lo mucho que tienes en tu vida para estar agradecido y así abrirte a recibir más. Este libro es práctico porque te enseña a cambiar de percepción y no hay nada más poderoso que cambiar de mentalidad. Descubre cómo pasar de pobre mente a rica mente

La riqueza de las naciones

Un ensayo sobre la riqueza a través del estudio de las Fundaciones Norteamericanas, y sobre la responsabilidad global social de los ricos sobre los pobres.

El tema de los activos intangibles y la gestión del conocimiento estan de moda. Sin embargo, muchas empresas los despilfarran, por negligencia o porque no saben sacar el beneficio. Este libro demuestra que estas riquezas invisibles, que no estan en el balance, son la clave de la creacion de valor en la empresa. Por ello, se proponen metodologias que permiten identificar los activos intangibles, asi como para medirlos, desarrollararlos y convertirlos en generadores de valor. Como dice Leif Edvinsson, autor de El Capital Intelectual, y precursor de este tema, "Capital Intelectual- La nueva riqueza de las empresas es un libro estimulante que ayuda a desarrollar una estrategia basada en el conocimiento. Permite descubrir como aumentar la rentabilidad de su empresa a partir de los activos intangibles"

Based on the importance of human beings as creators and managers of knowledge towards the achievement of sustainability in the current digital age, this book is an effort to present many studies taking individuals as centers of knowledge and starting points for environmental, social, and economic development. From various theoretical and empirical studies developed by researchers from Mexico, Colombia, and Brazil, this book presents, in an ordered sequence, the individual as the creator of knowledge, the role of human beings as knowledge managers with and for sustainability, the opportunities for knowledge sharing in virtual research collaborations for sustainability, and the advantages and disadvantages with and for sustainability from a human-centered perspective in the digital era. Moreover, this text describes the antecedents of competitive advantage in a sustainable cooperative network, knowledge management in technology projects, an empirical study of knowledge management of tutorial intervention, a model of processes and knowledge management to increase competitiveness, the role of Information and Communication Technologies (ICT) for managing sustainable practices, finishing with knowledge management trends with and for sustainability, from a human-centered perspective in the digital era. Offering an innovative approach, this book seeks to expand the understanding of the theme of knowledge management and sustainability from the perspective of the human resource as a generator of knowledge. There is mounting focus on knowledge-intensive work and sustainable development in the corporate world. In light of these trends, this edited volume will be of value to researchers, academics, professionals, and advanced students in the fields of management, environment and sustainability, and development studies.

¿Cuáles son los secretos para convertirse en una máquina de hacer dinero? En realidad, el mayor secreto es tu mente. La Ley de Atracción puede ser utilizada por una poderosa mentalidad que envía energía positiva, reflejándola en el mundo. Esta energía positiva es la que atraerá todo lo que desees a tu vida. Si crees en tus sueños, y envías un mensaje positivo al universo, tus sueños se harán definitivamente realidad. Todo el dinero que necesitan ya es suyo, solo tienen que creer que llegará a ustedes y practicar el pensamiento positivo todo el tiempo. No te tortures por el dinero. ¡En vez de eso, atráelo! El poder para hacerlo reside en la Ley de Atracción, tu canal de comunicación seguro con las energías del universo. Tu sistema de creencias es la base para cualquier cosa en tu vida. La creencia construye la autodisciplina, la energía positiva y la atracción. Sobre todo, tienes que creer en tí mismo, en tus habilidades y sueños. Si sueñas con tener más dinero, el libro “La Ley de Atracción para la Riqueza” es la guía perfecta para transformar tu mentalidad en una que emane energía positiva y atraiga todas las riquezas. ¿El rasgo número uno que todos los millonarios comparten? Creer en sí mismos. Únase al 1% del mundo y tenga la vida abundante que siempre ha deseado. Haz tu propio “tablero de sueños”. Ponga allí todos sus sueños, fotos del coche o la casa de sus sueños, una nueva carrera o una mejor salud. Esto le ayudará a visualizar sus metas y nunca se aleje de ellas. El libro “La Ley de Atracción de la Riqueza” terminará con tus preocupaciones. Este asombroso libro tiene todas las enseñanzas esenciales para atraer la abundancia a su vida solo con el poder del pensamiento positivo. No subestime el poder de su voluntad. La solución a tu futuro está en la Ley de Atracción. Actúe ahora haciendo clic en el botón “Compre ahora con un clic” al desplazarse al principio de esta página.

The seventh International Conference on Knowledge Management in Organizations (KMO) brings together researchers and developers from industry and the academic world to report on the latest scientific and technical advances on knowledge management in organisations. KMO 2012 provides an international forum for authors to present and discuss research focused on the role of knowledge management for innovative services in industries, to shed light on recent advances in cloud computing for KM as well as to identify future directions for researching the role of knowledge management in service innovation and how cloud computing can be used to address many of the issues currently facing KM in academia and industrial sectors. The conference took place at Salamanca in Spain on the 11th-13th July in 2012.

Rethinking the Conceptual Base for New Practical Applications in Information Value and Quality

ICICKM 2013

La “Investigación de la naturaleza y causas de la riqueza de las naciones” de Adam Smith es una obra clave del pensamiento económico y, posiblemente, la que más ha influido en la doctrina posterior y en la toma de decisiones y preparación de políticas económicas. Es el estudio doctrinal que se puede considerar como la piedra angular de la economía clásica. Se publicó en Londres en 1776 y solamente dieciocho años después, en 1794, vio la luz la primera edición en español, cuya descarga aquí se ofrece. La traducción fue realizada por José Alonso Ortiz y la impresión se realizó en la ciudad de Valladolid. El ejemplar sobre el que se ha realizado la digitalización se encuentra depositado en la Biblioteca Central del Ministerio de Economía y Competitividad. La digitalización se ha realizado en 2014 y es la única realizada en este momento de uno de los libros editados en esa primera edición, la cual fue dedicada a Manuel Godoy.

Comparative Advantage in the Knowledge Economy: A National and Organizational Resource provides a comprehensive and insightful understanding of all the dimensions of a transition from a traditional to a knowledge economy.

Focusing on innovation management, the authors explore the role of knowledge stocks or intellectual capital blocks such as human, social, technological, organizational and regional capitals, on technological innovation process typologies and firm performance, absorptive capabilities and organizational learning.

Information and communication technologies are widely used to improve organizational efficiency and ensure effective workflows. Technology and software systems provide the opportunity to improve productivity and efficiency when used correctly; however, professionals continue to encounter challenges in a variety of settings. Improving Organizational Effectiveness with Enterprise Information Systems analyzes the challenges and solutions associated with integrating new technologies in organizations, including key topics in cloud computing, project management, and operational procedure development and implementation. This publication is an essential reference source for senior managers, CIOs, ICT professionals, project managers, researchers, academicians, and upper level students interested in the applications and advances in ICTs and IS.

Proceedings of the 5th European Conference on Intellectual Capital

Everyone knows the super rich are hiding tons of money and not paying near enough taxes. This common knowledge that the wealthy have found ways around taxation by moving their assets to countries that don't tax them raises the question of how much of the world's wealth is hidden and how. Gabriel Zucman, a prominent young French economist, has come up with novel yet effective ways of quantifying how big the problem is, how tax havens work and are organized, and how we can begin to tackle the problem. Digging deep into the global data and comparing it with that of individual and international institutions, "The Hidden Wealth of Nations" offers for the first time a full picture of how this sophisticated international system works and is organized in practice. It is an invaluable glimpse at one of the most powerful forces contributing to inequality across the globe."

In this groundbreaking critique of neoliberalism in schooling and education, an international cast of education policy analysts, educational activists and scholars deftly analyze the ideologies underlying the global, national and local neoliberalisation of schooling and education. The thrilling scholarship that makes up *Global Neoliberalism and Education and its Consequences* exposes the machinations, agenda and impacts of the privatising and 'merchandisation' of education by the World Bank, the General Agreement on Trade in Services (GATS), biased think tanks, global and national corporations and capital, and the full political spectrum of Neoliberal governments. Including such topics as the increasing polarization of racialized and gendered social classes as a consequence of neoliberal policies, the role and shape of markets and education in the era of globalised Capitalism, the effects of the profit motive in higher education, the impact of the Heritage Foundation in the USA, and even a critical evaluation of education in Cuba--readers are sure to find startling insight and provocative arguments throughout *Global Neoliberalism and Education and its Consequences*.

These proceedings represent the work of presenters at the 7th European Conference on Intellectual Capital (ECIC 2015). This year the conference is being hosted by The Technical University of Cartagena, Spain on the 9-10 April 2015. The Conference Co-Chairs are Dr. Eva Martínez Caro, Dr. María Eugenia Sánchez & Dr. David Cegarra Leiva from the Technical University of Cartagena and the Programme Chair is Dr. Juan Gabriel Cegarra Navarro also from the Technical University of Cartagena. The opening keynote address is by Constantin Bratianu, Bucharest University of Economic Studies, Romania on the topic of "A Dynamic Perspective on Intellectual Capital" Dr Scott Erickson from the School of Business, Ithaca College and Dr Helen Rothberg, Marist College, Poughkeepsie, USA will address the topic "Does intellectual capital have a role in making the big strategic decisions? On the second day of the conference Dr José María Viedma Martí from the Polytechnic University of Catalonia in Barcelona, Spain will talk about xxxx. The primary aim of this conference is to contribute to the further advancement of intellectual capital theory and practice. The conference provides a platform for presenting findings and ideas for the intellectual capital community and associated fields. The range of people, issues and the mix of approaches followed will ensure an interesting two days. 115 abstracts were received for this conference. After the double blind, peer review process there are 43 academic papers, 13 PhD papers and 2 Masters Research Papers and 1 Work In Progress Paper published in these Conference Proceedings. These papers represent truly global research from some xx different countries, including the Albania, Australia, Austria, Canada, Czech Republic, Espana, Finland, France, Germany, Hungary, Indonesia, Italy, Kazakhstan, Malaysia Netherlands, Nigeria, Pakistan, Portugal, Romania, Russia, Slovakia, Spain Thailand, United Arab Emirates, UK and the USA
