

Labour Relations 3rd Edition Suffield

"Extends the concept of the Middle Passage to encompass the expropriation of people across other maritime and inland routes. No previous book has highlighted the diversity and centrality of middle passages, voluntary and involuntary, to modern global history."—Kenneth Morgan, author of *Slavery and the British Empire* "This volume extends the now well-established project of 'Atlantic World Studies' beyond its geographic and chronological frames to a genuinely global analysis of labour migration. It is a work of major importance that sparkles with new discoveries and insights."—Rick Halpern, co-editor of *Empire and Others: British Encounters with Indigenous Peoples, 1600-1850*

Scholars and laypersons alike regard Jonathan Edwards (1703-58) as North America's greatest theologian. The *Theology of Jonathan Edwards* is the most comprehensive survey of his theology yet produced and the first study to make full use of the recently-completed seventy-three-volume online edition of the Works of Jonathan Edwards. The book's forty-five chapters examine all major aspects of Edwards's thought and include in-depth discussions of the extensive secondary literature on Edwards as well as Edwards's own writings. Its opening chapters set out Edwards's historical and personal theological contexts. The next thirty chapters connect Edwards's theological

loci in the temporally-ordered way in which he conceptualized the theological enterprise—beginning with the triune God in eternity with his angels to the history of redemption as an expression of God's inner reality ad extra, and then back to God in eschatological glory. The authors analyze such themes as aesthetics, metaphysics, typology, history of redemption, revival, and true virtue. They also take up such rarely-explored topics as Edwards's missiology, treatment of heaven and angels, sacramental thought, public theology, and views of non-Christian religions. Running throughout the volume are what the authors identify as five basic theological constituents: trinitarian communication, creaturely participation, necessitarian dispositionalism, divine priority, and harmonious constitutionalism. Later chapters trace his influence on and connections with later theologies and philosophies in America and Europe. The result is a multi-layered analysis that treats Edwards as a theologian for the twenty-first-century global Christian community, and a bridge between the Christian West and East, Protestantism and Catholicism, conservatism and liberalism, and charismatic and non-charismatic churches. Labour relations in the public elementary and secondary school system is a vital area of Canadian public policy with important direct and indirect effects on society. However, at many times and in many jurisdictions teacher bargaining has been regarded as profoundly unsuccessful. Taking an inter-provincial comparative approach, *Dynamic Negotiations* identifies potential

avenues of reform. Academic and legal experts describe and analyse the history, current structure, and functioning of bargaining in public elementary and secondary schools in five key jurisdictions - Alberta, British Columbia, Manitoba, Ontario, and Quebec - representing a spectrum of approaches. This is a vital area of public policy that is much discussed but not well enough understood. The volume is a valuable resource for policy-makers, academics, and practitioners in education and labour relations.

Searching for answers in the midst of the sexual abuse crisis in the church, many blamed the clerical culture. But what exactly is this clerical culture? We may know it when we see it, but how can we 'whether clergy or laypeople 'go about dismantling it and putting in place a new, healthy culture? George Wilson has spent decades working with organizations to help them discover, and often recover, their foundational calling. He is also a Jesuit priest engaged in the lives of congregations. In *Clericalism: The Death of Priesthood* he brings together both capacities and gives his sense of the challenges facing the church. As members of the church, Wilson maintains, we are all responsible for creating a clerical culture. And we are also responsible for that culture's transformation. Clericalism aids this transformation by helping us examine some underlying attitudes that create and preserve destructive relationships between ordained and laity. After looking at the crisis and establishing where we are now, this book challenges us with concrete suggestions for changing behaviors. We are lay and

ordained, but all baptized into the royal priesthood of 1 Peter 2:9, all called to spread the Gospel and do the work of God's love in the world. Ultimately, this is a hopeful book, looking for the restoration of a genuine priesthood, free of clericalism, in which we become truly united in Christ..

Kris Manjapra weaves together the study of colonialism over the past 500 years, across the globe's continents and seas. This captivating work vividly evokes living human histories, introducing the reader to interlocking pasts and ongoing legacies of colonialism through the study of: war, conquest, militarization, extractive economies, migration and diaspora, racialization, biopolitical management, and unruly and creative responses and resistances. He describes some of the most salient political, social, and cultural constellations of our present across the Americas, Africa, Asia, and Europe. By exploring the dissimilar, yet entwined, histories of settler colonialism, racial slavery, and empire across Asia, Manjapra exposes the enduring role of colonial force and freedom struggle in the making of our modern world.

Working People in Alberta traces the history of labour in Alberta from the period of First Nations occupation to the present. Drawing on over two hundred interviews with labour leaders, activists, and ordinary working people, as well as on archival records, the volume gives voice to the people who have toiled in Alberta over the centuries. In so doing, it seeks to counter the view of Alberta as a one-class, one-party, one-

ideology province, in which distinctions between those who work and those who own are irrelevant. Workers from across the generations tell another tale, of an ongoing collective struggle to improve their economic and social circumstances in the face of a dominant, exploitative elite. Their stories are set within a sequential analysis of provincial politics and economics, supplemented by chapters on women and the labour movement and on minority workers of colour and their quest for social justice. Published on the occasion of the 100th anniversary of the Alberta Federation of Labour, Working People in Alberta contrasts the stories of workers who were union members and those who were not. In its depictions of union organizing drives, strikes, and working-class life in cities and towns, this lavishly illustrated volume creates a composite portrait of the men and women who have worked to build and sustain the province of Alberta. Labor Economics, 5e is a well-received text that blends coverage of traditional topics with modern theory and developments into a superb Labor Economics book. The Fifth Edition builds on the features and concepts that made the first four editions successful, updating and adding new content to keep the text on the cusp of recent events in the Labor Economics field. The new edition continues to be the most concise book in the market, enabling the instructor to teach all relevant material in a semester-long class.

Despite the book's brevity, the instructor will find that all of the key topics in labor economics are efficiently covered in the Fifth Edition. Thanks to updated pedagogy, new end-of-chapter material, and even stronger instructor support, the Fifth Edition of Labor Economics remains one of the most relevant textbooks in the market.
