The accountant is responsible for many activities, which may require years of training and experience to fully comprehend. The breadth of knowledge required can seem overwhelming. The Accountants' Guidebook is designed to simplify matters by providing the accountant with a practical knowledge of how to complete many accounting tasks, while also imparting an understanding of the more critical accounting standards. Topics covered include accounting procedures, GAAP for common transactions, closing the books, producing financial statements and other reports, collection tactics, payroll management, budgeting, and much more. In short, this is the essential desk reference for the accountant.

Quantitative Methods for Decision Makers covers everything you need to know for an introductory quantitative methods course. Relating techniques directly to real-life business decisions in private and public sector organisations, it is particularly well-suited to MBA students who will be applying quantitative methods in day-to-day managerial decision-making.

Timed to coincide with the ICC Cricket World Cup 2003 in South Africa this book begins with an account of the 2003 final in Johannesburg. Edward Griffiths then goes back to the beginning - the genesis of the one-day game with the launch of the Gillette Cup in 1963 and traces the development of the game over four decades. There are some accounts of the first and subsequent Cricket World Cup tournaments which highlight the changes in the game over the years, heroic performances, triumphs and defeats.

The fifth edition of this text has been fully revised to include: new questions from professional examinations bodies including, the Institute of Chartered Accountants, the Institute of Chartered Secretaries and the Institute of Company Accountants; extended treatment of balancing scorecards; international aspects of transfer pricing, life-cycle costing and post-completion analysis; and updated professional terminology

Conveys a foundation knowledge of management accounting practice within the context of relevant theory. This book situates management accounting in its social and organisational context, before examining costing, decision-making, planning and control and performance measurement. It is illustrated with examples, exercises and questions. This book deals comprehensively with the elements of cost accounting, their application to costing methods, and their significance for management through budgetary control, short term decision-making, and capital budgeting. It is an extensive revision of the author's well-known costing text, and provides the student with a complete introduction to cost accounting. Relevant exercises are included at the end of each chapter,

with solutions at the end of the book. These include many from recent examinations of the major professional accountancy bodies. Teachers are thus able to use their own favourite examples in lecture or class, and to refer students to other exercises for further practice. Students who are unable to attend a regular course will be able to check their work against the solutions. A series of multiple choice questions throughout the book provides a further opportunity for the student to check personal progress. Other features of the book include: a complete introduction to cost accounting; new material on capital budgeting and cost accounting for service activities; an explanation of budgetary control including behavioural aspects; and graded questions and MCQs throughout (definitions follow CIMA terminology).
