Intimate Relationships covers both classic and current material in a concise yet thorough and rigorous manner. Chapters range from attraction to love, attachment to jealousy, conflict to relationship dissolution — all written in a warm, personal, and engaging voice. Each chapter is organized around the major issues and relevant theories, in addition to a critical evaluation about the research. When appropriate, the authors discuss and evaluate popular ideas about relationship processes in the context of scientific research. This includes critical evaluations of evolutionary approaches to attraction, victim-based accounts of abuse, and the separate-cultures view of the sexes. Experienced commanders discuss anecdotes and case studies from their past operations.

There is a large body of shared knowledge between the study of Organizational Behaviour and Human Resource Management but despite the crossover, they are often treated as very distinct disciplines. Written by a team of experts across both fields, Organizational Behaviour bridges the gap between OB and HRM, with an emphasis on inter-cultural and cross-cultural perspectives of organizational development, talent management, and leadership. Through a critical analysis of existing literature and case studies, the contributors cover topics such as corporate governance, ethical business practices, employee morale and motivation, performance management, corporate politics and conflict resolution, creativity, and change management - all within the framework of current global employment standards and best practices. Decades of research have demonstrated that the parent-child dyad and the environment of the familyâ€”which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their care and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Practices for Personal and Professional Performance

Discover the secrets to success with straightforward exercises and advice from two of the world's foremost leadership experts From the bestselling authors of *The Leadership Challenge* and over a dozen award-winning leadership books comes a new book that examines a question of fundamental importance: *How do people learn to become leaders?* *Learning Leadership: The Five Fundamentals of Becoming an Exemplary Leader* is a comprehensive guide to unleashing the inner leader in us all and to building a solid foundation for a lifetime of leadership growth and mastery. The book offers a concrete framework to help individuals of all levels, functions, and backgrounds take charge of their own leadership development and become the best leaders they can be. Arguing that all individuals are born with the capacity to lead, bestselling authors Kouzes and Posner provide readers with a practical series of actions and specific coaching tips for harnessing that capacity and creating a context in which they can excel. Supported by over 30 years of research, from over seventy countries, and with examples from real-world leaders, *Learning Leadership* is a clarion call to unleash the leadership potential that is already present in society today. *Learning Leadership* provides readers with evidence-based strategies to ignite the habit of continuous improvement and the mindset of becoming the best leaders they can be. *Emerging leaders*, as well as leadership developers, internal and external coaches and trainers, and other human resource professionals will learn from first-hand stories and practical examples so that they can deeply understand and apply the fundamentals for becoming the best leaders they can be. *Learning Leadership: The Five Fundamentals of Becoming an Exemplary Leader* is divided into digestible bite-sized chapters that encourage daily actions to becoming a better leader. Key takeaways from the book include: *Believe in Yourself. Believing in oneself is the essential first step in developing leadership competencies. The best leaders are learners, and they can't achieve mastery until and unless they truly decide that inside them there is a person who can make and difference and learn to be a better leader than they are right now. Aspire to Excel. To become an exemplary leader, people must determine what they care most about and why they want to lead. Leaders with values-based motivations are the most likely to excel. They also must have a clear image of the kind of leader they want to be in the future—and the legacy they want to leave for others. Challenge Yourself. Challenging oneself is critical to learning leadership. Leaders must seek new experiences and test themselves. Practice Deliberately. No one gets better at anything without continuous practice. Exemplary leaders spend more time practicing than ordinary leaders. Simply being in the role of a leader is insufficient. To achieve mastery, leaders must set improvement goals, participate in designed learning experiences, ask for feedback, and get coaching. They also put in the time every day and make learning leadership a daily habit. Kouzes and Posner offer unrivaled insights into what it means to become an exemplary leader in today's world with their original research and over 30 years of experience studying the practices of extraordinary leadership. They show that anyone can become a better leader if they believe in themselves, aspire to excel, challenge themselves to grow, engage the support of others, and practice deliberately. Learning Leadership challenges readers to do the meaningful and disciplined work necessary to becoming the best they can, using a new mindset and toolkit that can make extraordinary things happen. It's not the once-in-a-while transformational acts that demonstrate leadership. It's the little things that one does day in and day out that pave the path to greatness.*

This edited volume provides an overview of the current state and indigenous practices of leadership development (LD) in a select group of emerging market economies, including BRICS, Southeast and East Asia, Middle East, Eastern Europe, and Africa. While some authors focus exclusively on LD in the business sector, others discuss such topics as LD in higher education, the role of higher education institutions in leadership development for managers and executives, the role of religious institutions, and LD in the government and public sectors. Further, chapters on Brazil, Malaysia, Russia, Thailand, South Africa and South Korea include case studies of LD in individual companies. These cases and examples can be used in discussions of indigenous LD practices in courses on international and cross-cultural HRD, HRM, and leadership and organization development. Readers will benefit from this unique view of indigenous practices and perspectives from a variety of disciplinary backgrounds: HRD, HRM, and management and leadership studies. It is an essential read for academic audiences who recognize leadership development as a dominant trend both in developed and emerging economies.

The second edition of Leadership offers a unique, highly-applied academic treatise on leadership, uniquely blending a chronological analysis of the last 100 years of leadership theory with exclusive CEO interviews. The case studies, expert insights and other teaching aids are timely and hard hitting, making this textbook relevant, insightful and informative, while a research chapter empowers the reader to competently question the leaders that shape our world. The world has turned on its political and corporate axis since the first edition of Leadership was published, and it became necessary to produce a second edition that fully encapsulated, respected and observed these changes. Numerous new case studies, discussion starters and examples subsequently reflect today's volatile technological, political, financial and social shifts, while exclusive interviews with successful CEOs powerfully blend theory with practice. Readers will learn the importance of navigating leadership in the most testing of times. A new chapter, "Researching leadership", offers the reader the opportunity to develop significantly as a leadership researcher and to ably question reality in a post-truth world. A self-leadership chapter equips the reader to develop their own leadership capabilities, while retaining the ability to avoid destructive leadership. Ultimately, readers will become empowered to appreciate the complex, intersectional nature of leadership and to learn what it takes to lead in today's politically, technologically and socially tumultuous world. This book will be particularly engaging for students and educators at secondary school, college, undergraduate and postgraduate level, and for leadership/management consultants. While the book's primary role remains as a core text for leadership management and business modules, it will also be of interest to students on many other courses (e.g. psychology, politics, sociology). Packed with teaching resources which educators will find particularly useful, Leadership is the only textbook of its kind to offer such an applied view of this subject via the inclusion of 12 (mostly CEO) expert insights. The first edition was an "Amazon Hot New Release", so this second edition might also hold interest for a general readership.
