This book results from a Special Issue related to the latest progress in the

thermodynamics of machines systems and processes since the premonitory work of Carnot. Carnot invented his famous cycle and generalized the efficiency concept for thermo-mechanical engines. Since that time, research progressed from the equilibrium approach to the irreversible situation that represents the general case. This book illustrates the present state-of-the-art advances after one or two centuries of consideration regarding applications and fundamental aspects. The research is moving fast in the direction of economic and environmental aspects. This will probably continue during the coming years. This book mainly highlights the recent focus on the maximum power of engines, as well as the corresponding first law efficiency upper bounds.

The Swatch Book

The bestselling title, developed by International experts - now updated to offer comprehensive coverage of the core and extended topics in the latest syllabus. - Covers the core and supplement sections of the updated syllabus - Supported by the most comprehensive range of additional material,

including Teacher Resources, Laboratory Books, Practice Books and Revision Guides - Written by renowned, expert authors with vast experience of teaching and examining international qualifications We are working with Cambridge International Examinations to gain endorsement.

Over 400 years ago, Swiss alchemist and physician Paracelsus (1493-1541) cited: "All substances are poisons; there is none that is not a poison. The right dose differentiates a poison from a remedy." This is often condensed to: "The dose makes the poison."

So, why are we overtly anxious about intoxications? In fact, poisons became a global problem with the industrial revolution. Pesticides, asbestos, occupational chemicals, air pollution, and heavy metal toxicity maintain high priority worldwide, especially in developing countries.

Children between 0 and 5 years old are the most vulnerable to both acute and chronic poisonings, while older adults suffer from the chronic effects of chemicals. This book aims to raise awareness about the challenges of poisons, to help clinicians understand current issues in toxicology.

Complete Chemistry is a revised and enlarged edition of the popular GCSE Chemistry improved to bring it totally up-to-date. This book covers all syllabuses with core material, for Double Award, and extension material, for Science: Chemistry. The breadth and depth is sufficient to stretch your students aiming for the top grades and makes it an excellent foundation for those intending to progress

to advanced level chemistry. **Key Points:** · Now includes all the necessary topics for IGCSE · Concepts and principles of chemistry presented in a clear, straightforward style · Lively and colourful coverage of the relevance of chemistry in the real world · End of chapter testing with more challenging and structured questions · Examination style questions · Pagination remains the same as GCSE Chemistry so that the two can be used alongside each other

Fabric for Fashion

This comprehensive guide offers advice on the types of surgery on offer and highlights the many diets that are required prior to surgery. Its main focus is on

advice and recipes for after surgery to help the post-op patient maximise their best chance of long-term success with weight-loss and better health.

• questions from very challenging examinations since 2003 • complete solutions • arranged in topical order to facilitate drilling • complete and true encyclopedia of question-types • comprehensive “trick” questions revealed • tendency towards carelessness is greatly reduced • most efficient method of learning, hence saves time • very advanced tradebook • complete edition eBook available

This easily navigable resource provides over 125 swatches of the most recognized and widely used varieties of fabric, including natural fabrics such as cottons, silks, wools, and linens as well as artificial and synthetic fabrics like acetates, lyocells, nylons, and metallics to encourage consideration of not just the aesthetic appeal of various fabrics but also their structure, feel, and weight. Bound into a hardcover book, with descriptions and contextual illustrations alongside them, the fabrics are in their raw state, before bleaching, dying, or finishing, so that their properties can be observed without the distraction of color or pattern. With information on fibers, basic construction of fabrics, weights, construction, and weave comparison, the book will help student fashion designers to make informed textile choices based upon an understanding of raw materials together with the processes that make up a fabric. A useful glossary defines key terminology. The book will be useful for anyone who works with fabrics and is the ideal companion to the Fabric for Fashion book. This revised set of resources for Cambridge IGCSE Business Studies syllabus 0450 (and Cambridge O

Level Business Studies syllabus 7115) is thoroughly updated for the latest syllabus for first examinations from 2015. Written by experienced teachers, the Coursebook provides comprehensive coverage of the syllabus. Accessible language combined with the clear, visually-stimulating layout makes this an ideal resource for the course. Questions and explanation of key terms reinforce knowledge; different kinds of activities build application, analytical and evaluation skills; case studies contextualise the content making it relevant to the international learner. It provides thorough examination support for both papers with questions at the end of each chapter and an extensive case study at the end of each unit. The CD-ROM contains revision aids, further questions and activities. A Teachers CD-ROM is also available.
