This booklet has been compiled because of my interest in promoting road safety. It started back in 1985 with Advanced Driving, and then in 1991 I took the opportunity to train as a Driving Instructor. I have since retired after teaching for some 12 years. There have been many changes in driver tuition since I started. One of them has been the introduction of the Theory Test. Now it is necessary to pass the Theory Test before applying for the Practical Test. This Theory Test is in two parts. Firstly a Multiple Choice Question Paper, then a Hazard Perception Video Exam. Both together make up one Theory Test. This booklet is to assist with the first part, or multiple. Many of my friends in the industry tell their

clients to buy books containing the questions. Only then if theres a problem are they invited to come back and ask any questions on what ever queries they came across. Most times this works, but not always. So starting only as a hobby, I analysed each and every theory question, and wrote hundreds of notes. These became very extensive, so I then put them in some sort of order that non-drivers could understand. This hobby then turned into a project which Ive put into print. It covers all the multiple choice questions in your exam. Every piece of information in this booklet is what the Driving Standard Agency requires you to know, not just what a Driving Instructor wants you too. You now have it, and its all facts. Im sure you will enjoy it.

What is it like to be born dirt-poor in South Africa?

Clinton Chauke knows, having been raised alongside his two sisters in a remote village bordering the Kruger National Park and a squatter camp outside Pretoria.

Clinton is a young village boy when awareness dawns of how poor his family really is: there's no theft in the village because there's absolutely nothing to steal. But fire destroys the family hut, and they decide to move back to the city. There he is forced to confront the rough-and-tumble of urban life as a 'bumpkin'. He is Venda, whereas most of his classmates speak Zulu or Tswana and he has to face their ridicule while trying to pick up two or more languages as fast as possible. With great self-awareness, Clinton negotiates the pitfalls and lifelines of a young life: crime and drugs, football, religion, friendship, school, circumcision and, ultimately, becoming a man. Throughout it all, he displays determination as well as a self-deprecating humour that will keep you turning the pages till the end. Clinton's story is one that will give you hope that even in a sea of poverty there are those that

refuse to give up and, ultimately, succeed.

Student Empowerment in Higher Education brings together the accumulated knowledge and experience of many accomplished teachers and students from higher education institutions around the world, and has much to offer those who are engaged in higher education, as students, teachers or support staff. The authors offer personal reflections in teaching, learning, mentoring, assessment, hands-on activities, course design and student identities in higher education across the globe, supported by academic research and scholarship. Readers are provided with a window into tried and tested empowering practices in varying contexts, enabling them to see what works and what does not, alongside the challenges and possibilities. A distinctive feature of this book, and its paramount strength, is that it explores best practices in student empowerment, whilst reflecting on matters of

teaching and learning that are familiar to students and teachers alike, and also explores practices in a variety of disciplines. The intention of these volumes, therefore, is not only to inform readers about the diverse learning and teaching approaches of the authors, but, most importantly, to facilitate processes of student empowerment and promote reflection on teaching and learning practices. "In recent decades, higher education policy discourse has persistently implied that a university education is 'delivered' to students under the impersonal banner of 'the student experience'. Not only does this commodify the diverse, individual experiences of students into one marketable product, it also creates false barriers and power dynamics between students and their teachers. In *Student Empowerment in Higher Education*, the students and lecturers who collaborated to write this important volume have literally blown such misleading notions out of the window! I highly recommend each varied and autonomous chapter to learn what really inspires confidence and success in university students." Professor Sarah Hayes, Professor of Higher Education Policy, University of Wolverhampton "The two volumes of *Student Empowerment in Higher Education* offer the reader rich and varied examples and understandings of student empowerment from around the world. The authors provide reflective accounts of learning and teaching from diverse perspectives and disciplines, which focus on many different areas of practice in higher education. It is this variety that will appeal to many readers, as the source of

ideas and inspiration for numerous possible routes to empowerment. With many chapters co-authored by students and staff, the book models the collective responsibility students and staff have for enhancing student empowerment."
