

Learning Resource Pack Bbc

Drawing on case studies, this book explores how teachers, artists and arts organisations can collaborate to create a culture of artistic aspiration and success for students. It analyses and explains what is needed to make such partnerships a success and explores the challenges and issues faced. Services for young children have gone through a period of rapid transformation in recent years, which have been paralleled by great advances in our knowledge of early child development. However, care and education in the first three years of life continues to be a neglected area. Thoroughly updated to take account of key policy and practice changes in childcare provision, this landmark text translates child development theory and research into everyday practice. All the practical ideas in the book have been developed and tested in nurseries, family and children's centres and include the importance of providing opportunities for adventurous and exploratory play for babies and toddlers, understanding and responding to children's emotional needs and offering personalized and sensitive care. The book also explores different ways of working with parents and the role of early years settings and practitioners in helping to keep children safe. It includes chapters on: Childcare policy and services Planning spaces for living, learning and playing Babies in day care Heuristic play with objects Mealtimes Learning out of doors Leading and managing a childcare centre Involving and working with parents Safeguarding children People Under Three is an established practical text for all those training to work with young children or managing day care facilities. Focusing on the care and learning of very young children, it is designed specifically for those who look after them day by day, as well as being a useful resource for social work students and policy makers.

Buzz is a comprehensive four-level primary course for young learners in the classroom. It offers an active approach to learning English, combining proven, familiar techniques with innovative ideas. The introduction of new vocabulary is controlled and key linguistic skills are developed steadily throughout the course. New language is revised regularly through the repetition of rhymes, songs and stories, and in contexts such as games, craft activities, projects and quizzes.

Growing up resource pack Using ICT in History A Teacher's Resource Guide Nelson Thornes

Published in association with Special Children magazine, this practical and highly flexible resource pack is designed to offer help for all those mainstream teachers who may have children with various sorts of special educational needs in their classes. The pack is based on Special Children's 'Back to Basics' series, but each section has been revised and extended to include photocopiable worksheets, checklists and practical advice for teachers in mainstream settings. Each section looks in detail at one of the key topics related to learning and behaviour problems. Each is based on a straightforward, four-stage 'problem to solution' approach through which teachers can build a plan of action for looking at possible solutions to children's needs: 1. Clarifying the problem: who has the problem, and what sort of problem is it? 2. Collecting evidence: how serious is it, and what are the causes and effects? 3. Planning: what can be done, who will do it, when and how? 4. Action: converting the plan to action, monitoring and review In each chapter the discussion of planning strategies is supported by a case study example of its use in practice, together with materials for teachers to use and adapt in their own classroom contexts. Sections include: * literacy skills * maths skills * science * thinking and learning skills * dyslexia * handwriting * speech and language difficulties Published in a loose-leaf format, this pack provides invaluable source material for all classroom teachers, and will also be of help to special needs co-ordinators planning INSET work and whole-school approaches under the Code of Practice.

Victorians resource pack

Teaching is a demanding profession as there is constant fluctuation and evolution. A portion of teaching is the ability to be able to adapt to various environments, especially shifting from instruction to online practices. Over the last few years, early childhood and elementary school classrooms have been thrust into hybrid and remote learning environments, and it is vital for educators and institutions adapt to new practices and create various outlets for teachers to be able to more adequately reach their young audience. The Handbook of Research on Adult Learning Practices for Early Childhood and Elementary School Classrooms is a critical resource to assist teachers as they develop online teaching practices and work to cater to young students that they can receive the strongest benefits from their education. Through coverage of topics such as hybrid learning and parental involvement, paired with sample lesson plans, course concepts, ideas, and additional components to further the body of research pertaining to remote learning, this book is tremendously beneficial to administrators, researchers, academic practitioners, instructors, and students.

This book supports primary trainees in their learning and teaching approach to the core humanities subjects: geography, history and religion. It promotes an integrated approach to these areas and encourages trainees to reflect on the links between subjects, across the curriculum from the Early Years Foundation Stage through to Key Stage 2. This edition has been updated to incorporate the revised Professional Standards for the Award of QTS and addresses key initiatives such as Excellence and Enjoyment, Every Child Matters and the Primary National Strategy for Literacy and Mathematics.

This book offers friendly guidance on how to work with adult learners to develop their numeracy and mathematics skills. It brings together current research and practice on teaching adults into one handy volume and covers the major issues faced by teachers of adult numeracy such as current policy perspectives and implications for teaching practice. There are reflective tasks throughout, which encourage you to develop and apply your theoretical knowledge to your own experiences. Key features include: Reviews of existing policy and research and implications for practice Reflective tasks with commentary, encouraging you to develop and apply your knowledge Case studies of real student experiences Practical activities and ideas to support the teaching and assessment of adult numeracy Drawing on the substantial experience of the contributors, who have a wealth of experience as practitioners and researchers in the field, this is an essential resource for trainee and practising teachers of adult numeracy and mathematics. It is also an ideal textbook to support teacher training courses leading to a subject specific qualification in teaching numeracy to adults. Contributors: Jackie Ashton, John Barton, Carolyn Brooks, Martyn Edwards, Janette Gibney, David Holloway, David Kaye, Beth Kelly, Barbara Newmarch, Helen Oughton, David Prinn, Diana Spurr, Rebecca Woolley "This is a quite unique book about teaching adult numeracy, which will be invaluable to the many practitioners in this field. The chapters contributed by a group of experienced and successful lecturers and practitioners, include all aspects of this field, from methods of teaching specific mathematical topics to more general issues of dyscalculia and emotional factors in adult learners. Each chapter includes research findings and thoughtful presentation of ideas with practical ideas for teaching, and tasks for the classroom. This is a market which has not been served well in the past, so it is good to see the gap filled at last." Margaret Brown, Emeritus Professor of Mathematics Education, King's College London, and co-editors of this book set out to produce a text that would support teacher-education programmes for adult numeracy, and their book does that and more. The content covers different settings, different understandings of what numeracy actually is; and ranges from commentary on research through case studies to "how to" hints and tips for teaching. Chapters on (provoking mathematical thinking) and 8 (attitudes, beliefs and teaching) should be a required read for any adult numeracy teacher. The book would be at home on any numeracy teacher training course and would make an excellent set text for numeracy teacher training courses." Carol Randall, course co-ordinator for numeracy in the department of Lifelong Learning Teacher Education, University of Greenwich, UK "This book is a welcome addition to the growing literature on adult numeracy. It should be essential reading for trainee and practising adult numeracy educators. It brings together relevant research and professional wisdom on a wide variety of aspects of adult numeracy teaching and learning in an accessible way, with well-focussed tasks for readers to extend their knowledge and understanding. While the book is born out of UK concerns and issues, it is also relevant to international readers. Highly recommended." Professor Diana Coben PhD, Director, National Centre for Literacy & Numeracy for Adults, University of Waikato, New Zealand, and Hon. Trustee, Adults Learning Mathematics - A Research Forum (ALM -- www.alm-online.net/)

How to Develop Children's Early Literacy

People Under Three

Friend Or Foe

The Minimum Core for Numeracy: Knowledge, Understanding and Personal Skills

Practical Ideas for Teaching Primary Science is a fun and interactive guide which supports teachers to design and deliver enjoyable science lessons. Peter Loxley explores different scientific topics – from growing plants and nutrition to forces and magnetism – with an emphasis on story-telling and art to help children share their ideas and work collaboratively in the classroom. This practical guide uses a three-stage framework design to encourage and guide sociocultural practice across three levels: KS1 (5 – 7), lower KS2 (7 – 9) and upper KS2 (9 – 11). The ideas for practice are placed in engaging and significant contexts to encourage curiosity and enquiry and, most importantly, promote feelings of pleasure and satisfaction from science learning. Teachers are guided through hands-on puzzles and activities such as role-play and design and technology tasks both inside and outside of the classroom, with health and safety aspects highlighted throughout, to inspire children's interest in how the world works from an early age and provide them with the skills to apply their new-found scientific thinking in other contexts. Extended subject knowledge to all topics covered in this book can be found in Teaching Primary

Science. A companion website is available for both books. Features include: web links to external sites with useful teaching information and resources an interactive flashcard glossary to test students' understanding Image bank with downloadable pictures for use in the classroom. Practical Ideas for Teaching Primary Science is an invaluable teaching resource for both trainee and qualified teachers.

This handbook provides the Personal, Social and Health Education (PSHE) co-ordinator in a school with everything that they need to deliver good practice in this subject. The book contains thorough guidance through policy and required practice and has a strongly practical bias. It shows through examples of good practice what can be achieved and how this can generally help to raise standards in schools. This is a topical, lively and up-to-date book which tackles the real issues facing schools, heads, co-ordinators and classroom teachers in an engaging and practical manner. It quotes from examples and case studies where strategies worked, and failed - but also keeps the learning of the pupil as the focus of all activities. The PSHE Co-ordinators Handbook is what every Head and PSHE co-ordinator needs to help them make practical sense of the new curriculum, the new PSHE, the new healthy school standard, social inclusion, citizenship, school councils, and the new Ofsted requirements - and how these can be woven together in a coherent way to support the raising of academic standards.

This is a new, third edition of the essential text for all those working towards the Level 5 Diploma in Education and Training. Tailored to meet the demands of the qualification and the latest Standards, it incorporates key information on reflective practice, study and research skills, and provides full coverage of all the mandatory units. Accessible language is combined with a critical approach that clearly relates practical examples to the required underpinning theory. This third edition: has been fully updated throughout, including reference to the new Ofsted Inspection Handbook and legislation around GDPR, mental health, social media and apprenticeships includes new case studies and questions in every chapter features a completely new chapter on mental and emotional well-being is suitable for use with all awarding organisations and HEIs provides the depth and criticality to meet level 5 requirements

Meeting Standards and Applying Research

This series of textbooks is aimed at teacher training students and comprises two concerns: the practice of teaching and how to use theory and research findings to improve that practice, and how to meet the TTA standards whilst placing them in a wider context. This comprehensive textbook is an accessible guide to all those who are new to the profession of teaching history.

Covering all aspects of the job, from planning through to teaching and assessment, Rob Phillips provides constructive, practical advice to help subject teachers become more effective in their work>

Learning to Teach Science in the Secondary School, now in its third edition, is an indispensable guide to the process and practice of teaching and learning science. This new edition has been fully updated in the light of changes to professional knowledge and practice – including the introduction of master level credits on PGCE courses – and revisions to the national curriculum.

Written by experienced practitioners, this popular textbook comprehensively covers the opportunities and challenges of teaching science in the secondary school. It provides guidance on: the knowledge and skills you need, and understanding the science department at your school development of the science curriculum in two brand new chapters on the curriculum 11-14 and 14-19 the nature of science and how science works, biology, chemistry, physics and astronomy, earth science planning for progression, using schemes of work to support planning , and evaluating lessons language in science, practical work, using ICT , science for citizenship, Sex and Health Education and learning outside the classroom assessment for learning and external assessment and examinations. Every unit includes a clear chapter introduction, learning objectives, further reading, lists of useful resources and specially designed tasks – including those to support Masters Level work – as well as cross-referencing to essential advice in the core text Learning to Teach in the Secondary School, fifth edition. Learning to Teach Science in the Secondary School is designed to support student teachers through the transition from graduate scientist to practising science teacher, while achieving the highest level of personal and professional development.

Those who work in childcare and educational settings have an ethical and legal responsibility to take into account children's cultural, ethnic, religious and linguistic backgrounds. This fully updated second edition of Rosalind Millam's popular handbook provides wide-ranging guide to anti-discriminatory practice, incorporating practical applications, research findings and legal issues.

Covering the main areas of ICT that history teachers encounter, from Internet to DTP and creating and using spreadsheets, this book provides a matrix for teaching opportunities at Key Stage 3 and 4 / GCSE. It combines practical evaluation, advice and instruction, and includes a large selection of activity worksheets and exemplar sheets for specific applications that teachers can adapt and use in their own teaching.

Blended and online learning skills are rapidly becoming essential for effective teaching and learning in universities and colleges. Covering theory where useful but maintaining an emphasis on practice, this book provides teachers and lecturers with an accessible introduction to e-learning. Beginning by exploring the meaning of 'e-learning', it supports tutors in identifying how they plan to use technology to support courses that blend online and face-to-face interactions. Illustrated by a range of case of studies, the book covers: designing quality, appropriate effective and online learning efficient and sustainable e-learning activity providing appropriate feedback to learners devising student activities and sourcing learning resources managing online and offline interactions Packed with practical advice and ideas, this book provides the core skills and knowledge that teachers in HE and FE need when starting out and further developing their teaching course design for blended and online learning.

Teaching Religious Education Creatively offers a brand new approach for the primary classroom and is crammed full of innovative ideas for bringing the teaching of RE to life. It helps teachers understand what constitutes a healthy curriculum that will encourage children to appreciate and understand different belief systems. Perhaps most importantly, it also challenges teachers to understand RE as a transformatory subject that offers children the tools to be discerning, to work out their own beliefs and answer puzzling questions. Underpinned by the latest research and theory and with contemporary, cutting-edge practice at the forefront, expert authors emphasise creative thinking strategies and teaching creatively. Key topics explored include: What is creative teaching and learning? Why is it important to teach creatively and teach for creativity? What is Religious Education? Why is it important for children to learn 'about' and 'from' religion? How can you teach non-biased RE creatively as a discrete subject and integrate it with other curriculum areas? Teaching Religious Education Creatively is for all teachers who want to learn more about innovative teaching and learning in RE in order to improve understanding and enjoyment and transform their own as well as their pupil's lives.

Equitable Education

How to Develop Children's Early Literacy is a practical guide designed to support all early literacy educators and addresses current issues relating to early literacy.

This text provides primary teachers of all experience with the knowledge they need to plan and deliver age-appropriate dance lessons. It offers a scheme of 22 units of work suitable for use in the classroom along with practical and creative ideas for teaching dance. It includes a web resource to support teaching and learning.

Never has a book on social justice and equitable education been so relevant. Recent events have highlighted the huge attainment gaps that exist for many pupils within the education system due to factors outside of their control. As the diversity of the pupil population increases, it is more important than ever to develop the skills, knowledge and understanding within the teaching profession to address issues of equality and inclusion. This book provides trainees and teachers with an in-depth understanding of the complex issues related to the attainment of key groups of disadvantaged pupils and strategies that can be deployed to address these gaps. Chapters focus on social class, gender, English as an additional language, minority ethnic achievement, gypsy, Roma and traveller communities, asylum seekers, and those with special educational needs and disabilities. The book takes a stark look at the evidence and statistics, provides an overview of the key issues and considers the needs of a particular group, and suggests key resources and examples of good practice, along with case studies and points for reflection. Ultimately it encourages you to have high expectations of all pupils and to truly believe that you can help them realise their ambitions and aspirations.

Teaching Religious Education Creatively

Using ICT in History

An eye for an eye. It's very simple. You choose your homeland like a hyena picking and choosing where he steals his next meal from. Scavenger. Yes you grovel to the feet of Mengistu and when his people spit at you and kick you from the bowl you scuttle across the border. Scavenger. As a violent civil war rages back home in Ethiopia, teenager Alem and his father are in a bed and breakfast in Berkshire. It's his best holiday ever. The next morning his father is gone and has left a note explaining that he and his mother want to protect Alem from the war. This strange grey country of England is now his home. On his own, and in the hands of the social services and the Refugee Council, Alem lives from letter to letter, waiting to hear something from his father. Then he meets car-obsessed Mustapha, the lovely 'out-of-your-league' Ruth and dangerous Sweeney – three unexpected allies who spur him on in his fight to be seen as more than just the Refugee Boy. Lemn Sissay's remarkable stage adaptation of Benjamin Zephaniah's bestselling novel is published here in the Methuen Drama Student Edition series, featuring commentary & notes by Professor Lynette Goddard (Royal Holloway, University of London, UK) that help the student unpack the play's themes, language, structure and production history to date.

Replacing the bestselling *The Teaching of History in Primary Schools*, acclaimed author Hilary Cooper returns with this invaluable resource, showing how to sustain a dynamic history curriculum in the classroom.

The teacher training framework, introduced in September 2007, requires all teachers in the post-16 sector to possess knowledge, understanding and personal skills to at least level 2 in the minimum core for numeracy. Coverage and assessment of the core have to be embedded in all Certificate and Diploma courses leading to QTLS and ATLS status. This book is a practical guide to numeracy for trainee teachers in the Lifelong Learning sector. It enables trainee teachers to identify and develop their own numeracy skills and also to support their students' numeracy.

A Puffin Book - stories that last a lifetime. Carrie's War by Nina Bawden is an unforgettable Second World War story. 'I did a dreadful thing...or I feel that I did, and nothing can change it...' It is the Second World War and Carrie and Nick are evacuated from London to a small town in Wales, where they are placed with strict Mr Evans and his timid mouse of a sister. Their friend Albert is luckier, living in Druid's Bottom with Hepzibah Green who tells wonderful stories, and the strange Mister Johnny, who speaks a language all of his own. Carrie and Nick are happy to visit Albert there, until one day when Carrie does a terrible thing - the worst thing she ever did in her life... Based on her own childhood, Nina Bawden's enchanting story Carrie's War has delighted a whole generation of readers. Nina Bawden is without question one of the very best writers for children' Daily Telegraph Perfect for fans of Goodnight Mister Tom by Michelle Magorian. Now part of the A Puffin Book - stories that last a lifetime - series Nina Bawden is one of today's best writers for both adults and children. she has often used her own childhood experiences in her books - Carrie's War is set in the mining valley in Wales where she lived as an evacuee in wartime. She studied philosophy, politics and economics at Somerville College, Oxford and finished her first novel the year after she took her degree. She won the Guardian Award for Children's Fiction for The Peppermint Pig.
