This fascinating book will be of as much interest to engineers as to art historians, examining as it does the evolution of machine design methodology from the Renaissance to the Age of Machines in the 19th century. It provides detailed analysis, comparing design concepts of engineers of the 15th century Renaissance and the 19th century age of machines from a workshop tradition to the rational scientific discipline used today.

The Culture of Reading and the Teaching of English aims to do for contemporary literary and cultural theory what I.A. Richard's Practical Criticism did for literary formalism.

The modernization of public administration is a recurring theme on the political and public agenda in many countries. This book demonstrates how public administration organizations try to adapt to changing circumstances in their environment in order to secure their legitimacy, presenting a number of case studies.

This compact and completely up-to-date, two-way dictionary provides a comprehensive and modern vocabulary, containing 85,000 headwords and phrases. It is the ideal reference for learners of Swedish. The maximum of information is provided in the minimum space, making the dictionary an invaluable reference source. Features include: * guide to Swedish pronunciation and inflexions * important grammatical information provided: gender; plurals; past tense * meaning and usage clearly signposted * expressions and idioms of current written and spoken language * extensive coverage of colloquial and slang registers * full coverage with exceptional simplicity and clarity * user-friendly format

Did you know...The claim that "science and faith are enemies" is a myth? The discovery of DNA and its genetic code points squarely to a designer of the universe? The fossil record is a gigantic embarrassment and "headache" for evolution? Darwin's theories are based ultimately on philosophy, not on science?Brace yourself for a scientific earthquake! Strange "tremors" are now coming from science labs. As researchers uncover new levels of astonishing complexity within the cell, they suddenly face a shocking conclusion: Darwin was wrong. This sophisticated complexity could not arise by chance; it must have been designed.Darwinism Under the Microscope probes the exciting "Darwinism vs. Design" debate that is making headlines. It lays a scientific foundation for "divine design" and equips the reader to discuss the topic intelligently...even with professors!One of the book's contributing authors, biologist Michael Behe, has done revolutionary work on the cell's tiny molecular machines. His "evidence of design" in Darwin's Black Box triggered an ever-expanding global controversy. Using Darwin's own pass-fail test, Behe concludes: "Darwin's theory has absolutely broken down."Darwinism Under the Microscope explains the "breakdown" and provides the knowledge and skill to share this breaking news with the next generation.

The role of museums in enhancing well-being and improving health through social intervention is one of the foremost topics of importance in the museums sector today. With an aging population and emerging policies on the social responsibilities of museums, the sector is facing an unprecedented challenge in how to develop services to meet the needs of its communities in a more holistic and inclusive way. This book sets the scene for the future of museums where the health and well-being of communities is top of the agenda. The authors draw together existing research and best practice in the area of museum interventions in health and social care and offer a detailed overview of the multifarious outcomes of such interactions, including benefits and challenges. This timely book will be essential reading for museum professionals, particularly those involved in access and education, students of museums and heritage studies, as well as practitioners of arts in health, art therapists, care and community workers.

There is growing interest internationally in the contributions which the creative arts can make to wellbeing and health in both healthcare and community settings. A timely addition to the field, the Oxford Textbook of Creative Arts, Health, and Wellbeing is the first work of its kind to discuss the role the creative arts have in addressing some of the most pressing public health challenges faced today. Providing an evidence-base and recommendations for a wide audience, this is an essential resource for anyone involved with this increasingly important component of public health practice. The textbook offers key insights for developing new creative arts-based approaches to health and wellbeing, and shows how these can augment established practices within a variety of social settings. Theoretically grounded and with a strong evidence base, this book brings together contributions from both practitioners and researchers to provide a comprehensive account of the field. Using international examples, the textbook elucidates the various approaches that have successfully led to improvements in public health, whilst case studies in healthcare practices evaluate the impact of arts-based initiatives in a multitude of international settings, life-course stages, and social milieus. The Oxford Textbook of Creative Arts, Health, and Wellbeing is a comprehensive resource that will be essential to anyone with an interest in this increasingly important component of public health practice.

Micah Green, Charlene Thomas, Eric Baites and Jasmine "Jazzy" Sinclair are all on the hunt for SATISFACTION. Micah is the owner of the hottest restaurant in town. She is a drop dead gorgeous force of nature who seeks her fulfillment with whomever she likes. Eric is in a state of recovery after his fiancé walks out on him leaving nothing behind except her stiletto imprints on his heart. Battered emotionally and physically by a man that she hates, Jazzy is suddenly forced to stand up for herself and do the unthinkable to secure her safety. After discovering her husband's infidelity, Charlene reluctantly begins to accept that no problem is ever solved through denial. SATISFACTION is a fiercely sexy and dramatic story about a complex ensemble of young professionals and their respective journeys to claim the desires of their hearts. Four this foursome, SATISFACTION is elusive and taunting but always worth chasing.

The MicroStrategy Report Services: Documents and Dashboards course provides an overview of Dynamic Enterprise Dashboards™ built in MicroStrategy Report Services™ in MicroStrategy Web™. The course introduces the many features that enable you to create sophisticated, boardroom-quality documents and the various types of documents. In this course, you will learn about panel stacks, selectors, dashboard templates, and analyses. Additionally, you will learn about graph formatting features, best uses for certain graph types, and best practices in dashboard design. The course also covers Flash-specific features, as well as document performance topics. You will be introduced to Visual Insight™ features and capabilities.

Research in science education is now an international activity. This book asks for the first time, Does this research activity have an identity? –It uses the significant studies of more than 75 researchers in 15 countries to see to what extent they provide evidence for an identity as a distinctive field of research. –It considers trends in the research over time, and looks particularly at what progression in the research entails. –It provides insight into how researchers influence each other and how involvement in research affects the being of the researcher as a person. –It addresses the relation between research and practice in a manner that sees teaching and learning in the science classroom as interdependent with national policies and curriculum traditions about science. It gives graduate students and other early researchers an unusual overview of their research area as a whole. Established researchers will be interested in, and challenged by, the identity the author ascribes to the research and by the plea he makes for the science content itself to be seen as problematic.

Supersymmetry and the Unification of Fundamental Interactions

This annual SUSY conference has become the world's largest international meeting devoted to new ideas in high energy physics. The main subject of the conference is theoretical and phenomenological aspects of supersymmetric theories, and dark matter and dark energy, and other comological connections. New, interesting results from various experimental groups are increasingly presented at the conference as well. With roughly 200 plenary and parallel presentations, SUSY08 will likely deliver energy and enthusiasm of both theorists and experimentalists who are searching the frontier of high energy physics.

Rebecca Rusch is one of the great endurance athletes of our time. Known today as the Queen of Pain for her perseverance as a relentlessly fast runner, paddler, and mountain bike racer, Rusch was a normal kid from Chicago who abandoned a predictable life for one of adventure. In her new book Rusch to Glory: Adventure, Risk & Triumph on the Path Less Traveled, Rusch weaves her fascinating life's story among the exotic locales and extreme conditions that forged an extraordinary athlete from ordinary roots. Rusch has run the gauntlet of endurance sports over her career as a professional athlete-- climbing, adventure racing, whitewater rafting, cross-country skiing, and mountain biking--racking up world championships along the way. But while she might seem like just another superhuman playing out a fistful of aces, her empowering story proves that anyone can rise above self-doubt and find their true potential. First turning heads with her rock climbing and paddling skills, Rusch soon found herself spearheading adventure racing teams like Mark Burnett's Eco-Challenge series. As she fought her way through the jungles of Borneo, raced camels across Morocco, threaded the rugged Tian Shan mountains, and river-boarded the Grand Canyon in the dead of winter, she was forced to stare down her own demons. Through it all, Rusch continually redefined her limits, pushing deep into the pain cave and emerging ready for the next great challenge. At age 38, Rusch faced a tough decision: retire or reinvent herself yet again. Determined to go for broke, she shifted her focus to endurance mountain bike racing and rode straight into the record books at a moment when most athletes walk away. Rusch to Glory is more than an epic story of adventure; it is a testament to the rewards of hard work, determination, and resilience on the long road to personal and professional triumph.

Félix Ventura trades in an unusual commodity; he is a dealer in memories, clandestinely selling new pasts to people whose futures are secure and who lack only a good lineage to complete their lives. In this completely original murder mystery, where people are not who they seem and the briefest of connections leads to the forging of entirely new histories, a bookish albino, a beautiful woman, a mysterious foreigner, and a witty talking lizard come together to discover the truth of their lives. Set in Angola, Agualusa's tale darts from tormented past to dream-filled present with a lightness that belies the savage history of a country in which many have something to forget -- and to hide. A brilliant American debut by one of the most lauded writers in the Portuguese-speaking world, this is a beautifully written and always surprising tale of race, truth, and the transformative power of creativity.

The second book in the steamy, romantic Body Finder thriller series by Kimberly Derting. Violet and Jay are finally dating, but adjusting to the new relationship is not as easy as Violet anticipated. Especially when she has to split Jay's time and attention with his new best friend, Mike, and Mike's pesky younger sister—who happens to be obsessed with Jay. Meanwhile, when Violet's special abilities lead her to the body of a young boy, her tip to the police puts her on the radar of the FBI. Violet tries to fend off the FBI's questions while maintaining the semblance of a normal life, but somebody's leaving her threatening notes and an echo around Mike's house reinforces that all is not right. Violet is forced to admit that perhaps the only people who can help her figure it out are the very people she's desperate to avoid—the FBI. Desires of the Dead is the compulsive second book in the four-book Body Finder series by Kimberly Derting.

This is the first book to explore and evaluate the potential of museum and gallery spaces and partnerships for art therapy. Showcasing approaches by well-known art therapists, the edited collection contains descriptions of, and reflections on, art therapy in museums and galleries around the globe. Case studies encompass a broad range of client groups, including people with dementia, refugees and clients recovering from substance abuse, exploring the therapeutic skills required to work in these settings. The collection also establishes the context for art therapy in museums and galleries through reviewing key literature and engaging with the latest research, to consider wider perspectives on how these spaces inform therapeutic practice. Offering a comprehensive look at ways in which these locations enable novel and creative therapeutic work, this is an essential book for art therapists, arts and health practitioners and museum professionals.

Do the rapidly expanding genres of digital literature mean that the narrative mode--novels, films, television drama--is losing its dominant position in our culture? Author Espen Aarseth eases our fears of literary loss (at least temporarily) by pointing out that electronic text requires an interactive response to generate a literary sequence. Where's the fun if you have to write your own ending? 21 illustrations.

Andre Rival, at home in both Paris and Berlin, has created a fascinating project out of a relatively simple idea: 100 women taking photographs of themselves. The outcome is both startling and impressive. It is an expression of contemporary female identity - self-aware, distinctive and thoroughly positive, in a series of nude photographs that inexorably capture and hold our attention, revealing at the same time the artist's highly creative approach to the medium of photography and to the individual selves of the women portrayed. The author describes his project in this way: "We are inundated with pictures of women in the media. Ordinarily, the pictures we see seek to achieve a kind of 'sameness' based on unwritten ideals of beauty; physical perfection, total fitness become the determining factors. These images of women, provoked as they are by the media industry, awakened in me the urge to confront both that industry and myself with something else. I chose to set aside my own ways of thinking and do a series of 100 women in which it was not I who would put together the photographs, but the women themselves. For this purpose, I gave them each a shutter-switch and left the room. That represented the beginning of the attempt to enable the women to become photographic subjects rather than objects; they were left to decide on their own which personal image of themselves they wanted to convey. The conditions were the same for all of the women: the same lighting, the same white background and the same unchanged camera position. It was essential to fix the location of the camera, so that the women did not perceive themselves as being pursued by an 'observer'; instead, they were able to establish distance and camera angle themselves with the aid of a video screen that showed them each camera exposure as a still photo."

Defining an Identity

Mathematics and Computer Science

Evolving

This is the first book where mathematics and computer science are directly confronted and joined to tackle intricate problems in computer science with deep mathematical approaches. It contains a collection of refereed papers presented at the Colloquium on Mathematics and Computer Science held at the University of Versailles-St-Quentin on September 18-20, 2000. The colloquium was a meeting place for researchers in mathematics and computer science and thus an important opportunity to exchange ideas and points of view, and to present new approaches and new results in the common areas such as algorithms analysis, trees, combinatorics, optimization, performance evaluation and probabilities. The book is intended for a large public in applied mathematics, discrete mathematics and computer science, including researchers, teachers, graduate students and engineers. It provides an overview of the current questions in computer science and related modern mathematical methods. The range of applications is very wide and reaches beyond computer science.

Everyone's heard of it. Many believe it. Is there a 'gap in time' between the first two verses in Genesis? Does this alleged gap really represent a vast amount of time? Weston Fields' classic treatment of this subject is now being published by Master Books, and promoted by such important organisations as Answers in Genesis. In this book, Fields makes a detailed study of the gap theory, paying particular attention to the Hebrew of Genesis. His conclusion -- that this theory is not a reasonable compromise with modern evolutionary theory, but a dangerous diversion from biblical truth -- helps readers who struggle with the question of the time taken during the creation week. Was it really six days? Can Christians find a workable solution to the debate about creation and time? An important book. Features: A presentation of a variety of views espoused by Christians of all denominations; A professional, scholarly look that can be easily understood by laymen; A fascinating study of the original Hebrew text.
