What Readers Are Saying "This series is like Downton Abbey meets today's world. I love the old-century ideals mixed with the culture we have now. Refreshing!" "I love that this book is different from the first book. The idealism in the first book is sweet, but this book brings us down from the clouds and back to reality as Gavin discovers that his future depends on the choices he makes now." "The relationship between these two characters is incredible, their bond is so strong it feels like they're real people, and what is even more surreal is that I feel like I know them." "This book was so beautiful. I love Marilyn Grey's writing both in 'Where Love Finds You,' and now even more so in 'Down from the Clouds.'" THIS IS BOOK 2 OF THE UNSPOKEN SERIES Gavin Kessler is one of the most sensitive and emotional people you'd ever know, except you'd never know it. Trying to find out how he feels is like pulling a one-hundred pound bucket of water out of a seventy foot well. But when he finally falls in love and meets the woman of his dreams, who is set on getting to know every part of him, for better or worse, his walls crumble as he is forced to stand face-to-face with the past he's been avoiding. A mysterious letter from Gavin's grandfather sends him and his beloved on a reluctant journey through his childhood and beyond, all the while

planning their ideal wedding. Dreams are shattered and new paths are forged as two hearts mold into one. A beautifully romantic continuation of *Where Love Finds You*.

'Sebastopol appears to be a succession of

forts which the Russians are strengthening every day. A great number of the men are sick of the whole concern. No one looks forward to another winter out here with any degree of satisfaction'. Captain Thomas Basil Fanshawe served with the 33rd (Duke of Wellington's) Regiment at Sebastopol during the Crimean War. The letters he wrote to his parents and siblings living at Dagenham in Essex provide a unique and unprecedented insight into a conflict often referred to as the 'Forgotten War'. They contain personal observations, entertaining anecdotes about camp life and often frank comments about his fellow officers. We read about his experience of being under fire in the trenches as well as how he spent his leisure time. Captain Fanshawe even mentions a visit to the British Hotel set up by Mary Seacole and the hospital at Scutari administered by Florence Nightingale. The letters are fully transcribed, with an introduction, illustrations, footnotes, family trees and name index of military personnel providing much additional information. The original letters are held at the Barking and Dagenham Archives and Local Studies Centre at Valence House. They are now published as part of the Sebastopol to Dagenham

Project funded by the Heritage Lottery Fund. 'This is a superb book - really well researched and presented' - Scott Flaving, Honorary Secretary, Duke of Wellington's Regimental Museum Trustees.

Women suffer from headaches far more than men. According to the World Health Organization, migraine is one of the most disabling medical conditions. The understanding of the pathophysiology of migraine has changed dramatically over the past decade, leading to more rational and targeted treatments. Since most migraineurs are young women, use of contraception, management of headaches with menstruation, pregnancy, lactation, and menopause

are important issues addressed in this text. Headaches are often inherited, and, as such, the book also discusses genetic issues, particularly relevant in this era of customized medicine. The hormonal management of transgenders is important as many will experience severe headaches during their transitions. Comorbidities, including psychiatric syndromes and strokes, are also presented in detail. This text will be of interest to all practitioners who manage women with headaches. Each year, Americans consume hundreds of food products that contain truly dangerous compounds, including heavy metals, pesticides, and other harmful additives--with the blessing of the FDA. Why is this happening and why haven't you heard about it? In *Unsafe at Any Meal*, Dr. Renee Dufault, former food investigator for the Food and Drug Administration, provides the startling answers. While at the FDA, Dr. Dufault discovered that mercury--a highly toxic metal--was contaminating the plumbing systems of many food manufacturing plants. Upon further examination, she discovered that the same mercury was also evident in a number of processed foods commonly sold in supermarkets. When Dr. Dufault revealed these disturbing findings to her superiors, she was told to stop her investigation. Her continued efforts to raise the issue always met with a dead end, so she chose to take an early retirement from the FDA. Dr. Dufault then devoted her energy to making the public aware of the insidious dangers that contaminate our food. In 2010, she founded an organization of scientists to study the scope of this

problem and has published numerous research articles on the topic with little fanfare. To expose what still seems to be a well-kept secret by the FDA, she has written *Unsafe at Any Meal* to provide consumers with the information they need to know. The book begins with the author's story leading up to the creation of this work. It then describes the various toxic substances that are most commonly found in our food supply, and explains how they affect your genes, health, and the surrounding environment. After examining the Standard American Diet, which is sorely lacking in disease-preventing nutrients, it discusses the country's trend toward consuming a skyrocketing amount of ingredients that can contain heavy metals. It further shows how exposure to these heavy metals can contribute to conditions such as ADHD or autism. Also included is a helpful guide to reading food labels, recognizing misleading marketing tactics, and knowing what to look for--and what to look out for--in the aisles of your grocery store. Over fifty years ago, Rachel Carson's book *Silent Spring* exposed the dangers of DDT in our food supply. Unfortunately, it seems that the problem of food contamination has actually become worse. Backed by research and first-hand experience, Dr. Dufault reveals how the FDA has failed us, and outlines how you can protect yourself and your family by knowing what to avoid and by filling your kitchen with food that is clear of

toxins.

Never before has a book been written about Hip Hop through the spiritual scope of the culture, or has examined the culture from a mystical perspective. The Black Dot cleverly accomplishes both, while providing plenty of fuel for a conspiracy theorist. Hip Hop Decoded reveals that Hip Hop is far deeper than just beats and rhymes, and masterfully illustrates that each element of Hip Hop (Graffiti, DJ, Emcee, and B-Boy) has an ancient origin (hieroglyphics, drummer, oracle, and dancer), as well as spiritual significance (earth, air, fire, and water). Graffiti writing was born in the streets of Philadelphia in the late 1960s. But it was in New York in the early 1970s that it became a full-fledged urban art, gradually taking over the landscape of the city, from its walls to its subway cars. This is a writing manual, a detailed examination of how graffiti writers have developed the twenty-six letters of the alphabet. It includes the contribution of ten of the international scene's most talented creators answer Woshe's questions about matters that include their practice, their relationship with letters and their backgrounds. It includes a map of New York with the sites where the most important graffiti are located.***

The price we paid for becoming intelligent was to become painfully ignorant of the difference between good and evil. Adi, a 10-year-old boy, works together with two old philosophers as they try to unravel the prophecy of a promised King. With insatiable curiosity, Adi must work with the wise men as they rationalize with each other on why and how humans became intelligent. Together they attempt to answer some of the most profound questions related to existence. Does evolution end with human beings or is there an 'Overman' who can reach evolution's pinnacle? Will this Overman be able to define values for humankind? Centuries later a young boy promises his mother that he will

always uphold the love that she has taught him. It is a promise that drowns him in the nectar of the gods. Krish grows up to be an engineer and joins a team of scientists as they try to create artificial consciousness in a machine. Krish soon realizes that he has a bigger fight on his hands. A fight to preserve love in a desolate world. His quest for true love ultimately leads him down a path where he comes face to face with a fearsome snake delivering a kiss of death. Humans have come a long way by questioning the nature of objects around us and pushing the limits of our intelligence, but it's now time that we ask the greatest question yet: when does intelligence transcend to become consciousness?
