reports in the DRI series aimed at providing specific guidance on the appropriate uses of the DRIs. The first report provided guidance on appropriate methods for using DRIs in dietary assessment. This volume builds on the statistical foundations of the assessment report to provide specific guidance on how to use the appropriate DRIs in planning diets for individuals and for groups. Dietary planning, whether for an individual or a group, involves developing a diet that is nutritionally adequate without being excessive. The planning goal for individuals is to achieve recommended and adequate

nutrient intakes using food-based guides. For group planning, the report presents a new approach based on considering the entire distribution of usual nutrient intakes rather than focusing on the mean intake of the group. The report stresses that dietary planning using the DRIs is a cyclical activity that involves assessment, planning, implementation, and reassessment. composition and quality of 730 different foods are examined in table format. Nutritional quality is a function of a food's nutrient components, such as protein, vitamins, and fats, in relation to an individual's daily nutrient needs, as derived from the RDAs. The foods surveyed include milk and milk products, cereals and cereal products, eggs, fish, meats, legumes, nuts, vegetables, fruits, fats, oils and candies. Each food is analyzed per serving or size for energy content (in calories), vitamins, minerals,

This paper analyzes the macroeconomics of HIV/AIDS. The paper highlights that the mortality and morbidity associated with AIDS make it unlike most other types of sickness and disease. The paper describes the most common approaches used in accounting for growth in the context of an HIV/AIDS epidemic. The impact of HIV/AIDS on education and the accumulation of human capital is discussed. The paper also discusses the impact of HIV/AIDS on the public sector, and elaborates certain demographic events specific to the HIV/AIDS pandemic.

It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardized up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. This knowledge product explains the rationale and procedures for incorporating allowances for climate change in detailed engineering design, with a focus on credible adjustments to extreme rainfall and to mean and high-end sea-level rise. Highlighting worked examples drawn from Viet Nam's road transport sector and peer-reviewed research literature, it offers a point of departure for more sophisticated assessments of high-risk projects. It presents principles and approaches extendable to other design variables (extreme air temperature, evaporation, and wind speed) and transferable to other sectors, regions, and stages of the asset life cycle (from project concept to decommissioning). Authorities agree that nutritional care for pregnant, about-to-be pregnant, and nursing women can prevent health problems that are costly in terms of both dollars and quality of life. Yet many women still receive little guidance regarding maternal nutrition. Now, health care professionals can turn to a handy, practical guide for help in smoothly integrating maternal nutritional care into their practices. Nutrition During Pregnancy and Lactation provides physicians, nurses, primary care providers, and midwives with a ready-made, step-by-step program for helping new mothers. In keeping with recommendations by the U.S. Surgeon General, the guide promotes breastfeeding and includes practical information for mothers on how to breastfeed. Providing background details, resource lists, and a "toolbox" of materials, this implementation guide makes nutritional care simple and straightforward. Part I walks the health care professional through the process of providing nutritional advice for new mothers--from the prepregnancy questionnaire to the final postpartum visit. It includes helpful tools such as weight charts and checklists to follow during each patient visit. It also offers
