This book describes a novel and proven approach to cytologically classify urinary samples for the detection of bladder cancer and lesions of the upper urinary tract. The new method is based on the collective experience of knowledgeable cytopathologists who have tested the terminology within their own laboratories for reproducibility and predictability of neoplasms of the urinary tract. Accompanying the written criteria for each diagnostic category are meticulously photographed exemplars of the cellular features, with cogently annotated descriptions of the photographs. The book thereby performs as an atlas for microscopists involved in diagnostic cytopathology at all levels of their education. Included in the targeted readership are experienced pathologists, cytotechnologists, and students of both professional groups. The new terminology also considers the clinical aspects of patient management. Written by experts in the field who convened at the 18th International Congress of Cytology in Paris, The Paris System for Reporting Urinary Cytology presents a global standard for reporting and a new philosophic approach that maximizes the strengths of detecting the potentially lethal high grade lesions by urinary cytology, and recognizes without apology the inability to reliably detect the low grade lesions in urinary cytology. The Concept has been endorsed by the American Society Of Cytopathology, and the International Academy of Cytology. While many Civil War reference books exist, there is no single compendium that contains important details about the combatant states (and territories) that Civil War researchers can readily access for their work. People looking for information about the organizations, activities, economies, demographics, and prominent personalities of Civil War states and state governments must assemble data from a variety of sources, with many key sources remaining unavailable online. This volume provides a crucial reference book for Civil War scholars and historians, professional or amateur, seeking information about Pennsylvania during the war. Its principal sources include the Official Records, state adjutant general reports, legislative journals, state and federal legislation, executive speeches and proclamations on the federal and state levels, and the general and special orders issued by the military authorities of both governments, North and South. Designed and organized for easy use, this book can be read in two ways: by individual state, with each chapter offering a stand-alone history of an individual state's war years; or across states, comparing reactions to the same event or solutions to the same problems.
